

THE JOURNAL
OF
MENTAL SCIENCE

Published by Authority of the
Association of Medical Officers of Asylums and Hospitals
for the Insane.

EDITED BY

C. L. ROBERTSON, M.D. CANTAB.

AND

HENRY MAUDSLEY, M.D. LOND.

"Nos vero intellectum longius à rebus non abstrahimus quam ut rerum imagines et
radii (ut in sensu fit) coire possint."

FRANCIS BACON, *Proleg. Instaurat. Mag.*

VOL. X.

LONDON:
JOHN CHURCHILL AND SONS,
NEW BURLINGTON STREET.

MDCCLXV.

"In adopting our title of the *Journal of Mental Science*, published by authority of the Association of Medical Officers of Asylums and Hospitals for the Insane, we profess that we cultivate in our pages mental science of a particular kind, namely, such mental science as appertains to medical men who are engaged in the treatment of the insane. But it has been objected that the term mental science is inapplicable, and that the terms, mental physiology, or mental pathology, or psychology, or psychiatry (a term much affected by our German brethren), would have been more correct and appropriate; and that, moreover, we do not deal in mental science, which is properly the sphere of the aspiring metaphysical intellect. If mental science is strictly synonymous with metaphysics, these objections are certainly valid, for although we do not eschew metaphysical discussion, the aim of this Journal is certainly bent upon more attainable objects than the pursuit of those recondite inquiries which have occupied the most ambitious intellects from the time of Plato to the present, with so much labour and so little result. But while we admit that metaphysics may be called one department of mental science, we maintain that mental physiology and mental pathology are also mental science under a different aspect. While metaphysics may be called speculative mental science, mental physiology and pathology, with their vast range of inquiry into insanity, education, crime, and all things which tend to preserve mental health, or to produce mental disease, are not less questions of mental science in its practical, that is, in its sociological, point of view. If it were not unjust to high mathematics to compare it in any way with abstruse metaphysics, it would illustrate our meaning to say, that our practical mental science would fairly bear the same relation to the mental science of the metaphysicians as applied mathematics bears to the pure science. In both instances the aim of the pure science is the attainment of abstract truth; its utility, however, frequently going no further than to serve as a gymnasium for the intellect. In both instances the mixed science aims at, and, to a certain extent, attains, immediate practical results of the greatest utility to the welfare of mankind; we therefore maintain that our Journal is not inaptly called the *Journal of Mental Science*, although the science may only attempt to deal with sociological and medical inquiries, relating either to the preservation of the health of the mind or to the amelioration or cure of its diseases; and although not soaring to the height of abstruse metaphysics, we only aim at such metaphysical knowledge as may be available to our purposes, as the mechanician uses the formularies of mathematics. This is our view of the kind of mental science which physicians engaged in the grave responsibility of caring for the mental health of their fellow-men may, in all modesty, pretend to cultivate; and while we cannot doubt that all additions to our certain knowledge in the speculative department of the science will be great gain, the necessities of duty and of danger must ever compel us to pursue that knowledge which is to be obtained in the practical departments of science, with the earnestness of real workmen. The captain of a ship would be none the worse for being well acquainted with the higher branches of astronomical science, but it is the practical part of that science as it is applicable to navigation which he is compelled to study."

J. C. BUCKNILL.

INDEX TO VOL. X.

I.—ORIGINAL ARTICLES.

- Asylums, cottage, Mr. E. Toller on, 342
foreign, English patients in, 514
stray notes on, by Dr. W. C. McIntosh, 1
- Atrophy of the brain, Dr. S. Wilks on, 381
- Bacon, Dr. G. McK., on a case of cancerous tumour of the brain, 74
- Blood-cysts in the arachnoid cavity, Dr. J. W. Ogle on, 525
- Boyd, Dr. R., on vital statistics, and observations, 491
- Brain, atrophy of, Dr. S. Wilks on, 381
- Browne, Mr. Commissioner, on the moral treatment of the insane, 309
- Cancerous tumours of the brain, Dr. G. McK. Bacon on, 74
Dr. J. Ogle on, 229
- Classification of the sciences, Dr. H. Maudsley on, 145
- Clinical cases, 74, 77, 207, 381, 520
- Clouston, Dr. T. S., on phthisical insanity, 220
- Combe, George, and his writings, Dr. J. G. Davey on, 168
- Davey, Dr. J. G., on George Combe, and his writings, 168
- Davies, Rev. W. G., on memory and the brain, 34
- English patients in foreign asylums, 514
- Food, refusal of, in the insane, Dr. S. W. D. Williams on, 366
- Haynes, Dr. S., on moral imbecility and insanity, 533
- Hereditary insanity, Dr. H. G. Stewart on, 50
- Hitchman, Dr. J., on an interview with George Victor Townley, 21
- Hydrocephalus, chronic, in the adult, Dr. S. Wilks on, 320
- Insane, the legal responsibility of the, Professor Laycock on, 350
the means of providing for the yearly increase of the pauper, Dr. C. L.
Robertson on, 471
the moral treatment of, Mr. Commissioner Browne on, 309
the refusal of food in, Dr. S. W. D. Williams on, 366
- Insanity and moral imbecility, Dr. S. Haynes on, 533
hereditary, Dr. H. G. Stewart on, 50
phthisical, Dr. T. S. Clouston on, 220
- Laycock, Professor, on the legal responsibility of the insane, 350

- McCormac, Dr. H.**, on the Ulster revival, 157
McIntosh's, Dr. W. C., stray notes on foreign asylums, 1
Maudsley, Dr. H., on the classification of the sciences, 145
Memory and the brain, Rev. W. G. Davies on, 34
Moral imbecility and insanity, Dr. S. Haynes on, 533
 treatment of the insane, Mr. Commissioner Browne on, 309
Morel, Dr., on the state and prospects of psychological medicine, 338
Mundy, Baron, on an oasis in the desert of German restraint, 66

Oasis, an, in the desert of German restraint, Baron Mundy on, 66
Ogle, Dr. J. W., on blood-cysts in the arachnoid cavity, 525
 on carcinoma of the brain, 229

Phthysical insanity, Dr. T. S. Clouston on, 220
Psychological medicine, its state and prospects, Dr. Morel on, 338

Refusal of food in the insane, Dr. S. W. D. Williams on, 366
Restraint, German, an oasis in the desert of, Baron Mundy on, 66
Revival, the Ulster, Dr. H. McCormac on, 157
Robertson, Dr. C. L., on case of James Snashall, 77
 on the means of providing for the yearly increase of
 pauper lunatics, 471

Sciences, classification of the, Dr. H. Maudsley on, 145
Snashall, James, case of, Dr. C. L. Robertson on, 77
Statistics, vital, and observations, Dr. R. Boyd on, 491
Stewart, Dr. H. G., on hereditary insanity, 50
Stray notes on foreign asylums, by Dr. W. C. McIntosh, 1

Tabes dorsalis, some cases of, Dr. C. Westphal on, 207
Toller, Mr. E., on cottage asylums, 342
Townley, George Victor, an interview with, Dr. J. Hitchman on, 21

Ulster revival, the, Dr. H. McCormac on, 157
Unlearning, on, 195

Vital statistics and observations, Dr. R. Boyd on, 491

Westphal, Dr. C., on some cases of tabes dorsalis, 207
Williams, Dr. S. W. D., on the refusal of food in the insane, 366
Wilks, Dr. S., on atrophy of the brain, 381
 on chronic hydrocephalus in the adult, 520

II.—REVIEWS.

DR. CHAPMAN'S SPINE-BAGS

(PATENT),

For the Application of Cold and Heat along the Back.

SOLD BY

C. MACINTOSH & CO., the Manufacturers, 3, Cannon Street West, London;
S. MAW & SON, 11, Aldersgate Street, London;
JOHN G. GOULD, 193, Oxford Street, London;
THOMAS CHAPMAN, 56, Buchanan Street, Glasgow;

AND MAY BE HAD BY ORDER OF ALL DRUGGISTS.

THESE bags are of two kinds, each kind being also varied in size according to the requirements of the patient.

One kind, used chiefly for the application of ice, is divided into two, three, or more cells, either by external clamps or by internal septa, in order to hold the ice or iced-water in apposition with the whole or any part of the back, the patient being enabled to remain upright or to walk about meanwhile. The mouth of each of these bags is closed by a clamp. The other kind, used chiefly for the application of heat, but also of moderate degrees of cold, consists of two parallel tubes, a little distance apart, and communicating at top and bottom, the mouth of the bag being closed by a screw.

Directions for preparing and applying the Ice-bag having Internal Septa.*

Put ice (broken into pieces about the size of a small walnut†) into the opening of the bag, on the

* This bag may be had of any of the following lengths:—10, 12, 14, 16, 18, 20, 22, 24, and 26 inches.

† This is most easily done by means of an "ice-breaker," supplied by ironmongers, and consisting of a tapered piece of steel, sharp-pointed, and fixed in a handle.

Pulvis Jacobi Ver., Newbery's.

REVIEWS:

NOTES AND CORRESPONDENCE.

JOHN CHURCHILL & SONS, New Burlington Street.

In One 8vo volume of 1,400 pages, with Engravings, Fourth Edition, greatly enlarged, 28s.,

COOLEY'S CYCLOPÆDIA OF PRACTICAL RECEIPTS

and PROCESSES, being a General Book of Reference for the Manufacturer, Tradesman, Amateur, and Heads of Families.

From the 'Times,' Nov. 16, 1864.

"A much improved edition. It has become a standard work, not only as a supplement to the pharmacopœias, but also as a book of reference in connection with the arts, manufactures, and trades."

JOHN CHURCHILL & SONS, New Burlington Street.

Third Edition (revised for the year 1865), crown 8vo, cloth, 1s. 6d.

A MANUAL of DIET and REGIMEN for PHYSICIAN

and PATIENT. By HORACE DOBELL, M.D., M.R.C.P., Physician to the Royal Infirmary for Diseases of the Chest.

"A very elaborate and carefully-compiled little book."—*The Lancet*.

"This very useful and concise work shows how health may be sustained as well as restored. It commends itself with great force to all classes; and we recommend it most cordially in the broadest acceptance of the word to all readers."—*Social Science Review*.

JOHN CHURCHILL & SONS, New Burlington Street.

BY P. H. CHAVASSE, F.R.C.S.

ADVICE to a WIFE on the MANAGEMENT of her own

HEALTH; and on the Treatment of some of the Complaints Incidental to Pregnancy, Labour, and Suckling. With an Introductory Chapter specially Addressed to a Young Wife. Sixth Edition, price 2s. 6d.

ADVICE to a MOTHER on the MANAGEMENT of her

OFFSPRING, and on the Treatment of some of their more Urgent Diseases. Seventh Edition, price 2s. 6d.

"The value of this edition is increased by the circumstance that it has received corrections and additions suggested by Sir Charles Locock, who has also added to it various practical annotations."—*British Medical Journal*.

JOHN CHURCHILL & SONS, New Burlington Street.

In One Volume, 8vo, cloth, £2 10s.,

AN EXPOSITORY LEXICON

OF

50,000 TERMS, ANCIENT AND MODERN, IN MEDICAL
AND GENERAL SCIENCE,

INCLUDING

A COMPLETE MEDICAL AND MEDICO-LEGAL VOCABULARY ;

And presenting the correct Pronunciation, Derivation, Definition, and
Explanation of the Names, Analogues, Synonymes, and Phrases
(in English, Latin, Greek, French, and German), employed
in Science, and connected with Medicine.

By R. G. MAYNE, M.D.

"A work to which there is no equal in the English language."—*Edinburgh Medical Journal*.

"The Dictionary contains a large amount of information, well arranged, and very accessible; and we have little doubt that it will soon come to be regarded as a necessary appendage to the library table of every man of science and scientific dilettante."—*Medico-Chirurgical Review*.

"We are able to bestow upon Dr. Mayne's labours the most unqualified approbation. So needful is the work here undertaken, and so admirably executed the task, that we doubt not its publication will eventually be as satisfactory in a commercial point of view as it now is in respect to the author's scholarship and professional reputation. This is expressing much in its favour, but not more than is just. So good is the book, that in spite of what many will deem its 'dry subject,' of the limited sale existing among the profession for works of high literary reputation, and the little attraction such an expenditure of talent, time, and money, ordinarily presents to the book-buying public, we believe this 'Expository Lexicon' will gradually force itself into a very wide circulation, and be eventually regarded as the 'Liddell and Scott' of the writers in the Medical Sciences."—*The Lancet*.

"This very remarkable production has occupied the *horæ subsecivæ* of the author during twenty-eight years. . . . We may half guess at the labour, when we reflect that 50,000 distinct terms, not similarly treated in any other work, have been illustrated in this volume. . . . This is just one of those works which are deserving of public acknowledgment. Its objects are undoubtedly of public utility; little is the service which it can ever prove to its Author in a remunerative sense; and in this sense it is to be especially distinguished from those productions which bring men renown and practice."—*Medical Times and Gazette*.

"This Lexicon is suited to the requirements of every educated gentleman. It embraces 'the correct pronunciation, derivation, definition, and application, of the names, analogues, synonymes, and phrases (in English, Latin, Greek, French, and German), connected with Medicine, and employed in Anatomy, Animal Pathology, Astronomy, Botany, Chemistry, Comparative Anatomy, Conchology, Crystallography, Entomology, Geography, Geology, Geometry, Ichthyology, Materia Medica, Medical Jurisprudence or Forensic Medicine, Microscopy, Mineralogy, Natural History, Natural Philosophy, Nosology, Obstetrics, Ornithology, Pathological Anatomy, Pathology, Pharmacy, Phrenology, Physiology, Surgery, Trigonometry, and Zoology.' We hope that the extraordinary industry and erudition displayed in this work may be rewarded by an extensive sale. While it is peculiarly adapted to the Medical profession, it must prove equally useful to all scientific men."—*British Medical Journal*.

JOHN CHURCHILL AND SONS, NEW BURLINGTON STREET.
