	PAGE
BROMWICH, T. J. F.A.	
The Ambiguous Cases in the Solution of Spherical Triangles, - - - - -	55
BROWN, Professor A.	
The Ratio of Incommensurables in Elementary Geometry [Title], - - - - -	99
BURGESS, A. G.	
On the orthoptic locus of the semi-cubical parabola [Title], - - - - -	79
COLLIGNON, EDOUARD.	
Recherches sur l'Enveloppe des Pédales des divers points d'une Circonférence par rapport à un triangle inscrit, - - - - -	2
Démonstrations de deux théorèmes de Géométrie, -	49
DAVIS, R. F.	
Note on the determination of the axes of a conic, -	94
HOLM, A.	
Determination of the radii of the circles which touch three given circles, - - - - -	75
LINDSAY, W. A.	
A Proof of the Theorem that the Arithmetic Mean of n positive quantities is not less than their Harmonic Mean [Title], - - - - -	54
M'INTYRE, J. H. A.	
On Mathematical Instruments and the accuracy to be obtained with them in some elementary practical problems [Title], - - - - -	93

MACKAY, J. S.	
Bibliography of the Envelope of the Wallace Line (the three-cusped Hypocycloid),	80
MILLER, JAMES N.	
A Method of Dividing the Circumference of a Circle into 360 equal parts,	58
MUIR, THOMAS.	
The Condensation of Continuants,	35
MUIRHEAD, R. F.	
Some Proofs of Newton's Theorem on Sums of Powers of Roots,	66
A Proof of Waring's Expression for Σa^r in terms of the Coefficients of an Equation,	71
OFFICE-BEARERS,	1
PICKEN, D. K.	
The Proof by Projection of the Addition Theorem in Trigonometry,	40
A direct method of obtaining the Foci and Directrices from the general equation $(a, b, c, f, g, h\lambda x, y, 1)^2 = 0,$	96
PINKERTON, P.	
The Turning-Values of Cubic and Quartic Functions and the Nature of the Roots of Cubic and Quartic Equations,	43
RAMASWAMI, V.	
Notes on Inequalities,	89
ROSS, EDWARD B.	
Contact between a Curve and its Envelope,	50
TAYLOR, D. G.	
Polar Loci,	61
VALENTINE, GEORGE D.	
Two Theorems on the factors of $2^p - 1$ [Title],	54
