

# 12 times a year

Published monthly by The Company of Biologists, BioEssays covers advances in the fields of molecular, cellular and developmental biology. The journal is short, sharp and full of up to date reviews and discussions on new ideas and discoveries. To subscribe, complete and mail the coupon or fax to one of the numbers below.

## BioEssays

BioEssays is published for the ICSU Press by The Company of Biologists • Cambridge • England

<b>SUBSCRIPTION ORDER FORM:</b> I would like to subscribe to <i>BioEssays</i> for 1991 (please tick appropriate box).  <b>LIBRARY/INSTITUTIONAL SUBSCRIPTION</b> USA: <input type="checkbox"/> \$199    Rest of World: <input type="checkbox"/> £110  <b>INDIVIDUAL SUBSCRIPTION</b> (prepayment required) USA: <input type="checkbox"/> \$70    Rest of World: <input type="checkbox"/> £44 A discount on subscriptions is offered to members of certain societies. Please contact your society if it has made arrangements of this sort.  <i>All orders to:</i> The Company of Biologists Limited, Bidder Building, 140 Cowley Road, Cambridge CB4 4DL, UK. Tel: Cambridge (0223) 420482	<b>Methods of Payment</b> (please complete as appropriate) Name _____ PLEASE PRINT Delivery address _____  <input type="checkbox"/> Cheque/Money order payable to: The Company of Biologists Limited I undertake not to pass on any copy, purchased at the individual rate, to a library.    Signature _____ Credit card: <input type="checkbox"/> American Express <input type="checkbox"/> Access <input type="checkbox"/> MasterCard <input type="checkbox"/> Eurocard <input type="checkbox"/> VISA    Expiry date ____/____ _____ Credit card requirements: complete below if card name/address is different from above Cardholder's name _____ PLEASE PRINT Cardholder's address _____ _____	Library/Institution: Please invoice. ## NOTES TO CONTRIBUTORS

**GENETICAL RESEARCH** publishes original work on all aspects of genetics, or in any field of research which has an important bearing on genetics. Reviews of topical interest will also be considered. Papers will be submitted to referees, and will generally be printed in order of acceptance. Short papers (see below) will be given priority in publication.

**CONTRIBUTIONS** are welcomed from scientists of all nationalities, but must be written in English. Papers should be sent to one of the Executive Editors (see addresses inside front cover), or to a member of the Editorial Board with a particular interest in that area of genetics. Submission of a paper will be taken to imply that it is unpublished and is not being considered for publication elsewhere. Papers should be as concise as clarity permits, and illustrations should be restricted to the *minimum needed*.

**SHORT PAPERS** This category is designed for concisely written reports of work for which rapid publication is considered desirable. Such papers will normally be published within three months of receipt in acceptable form. They should not exceed 4 pages of print in length, and should include a summary.

**TYPESCRIPTS** A top copy and two other copies should be submitted. The top copy should be typed with double-spacing on one side of good quality paper, leaving margins of about 1½ inches at the left-hand side and at the top and bottom of each sheet. Each copy should include a complete set of illustrations. The title should ordinarily identify the organism. The address of the laboratory at which the work was carried out will be printed with the authors' names at the head of the paper, and changes of address may be added in footnotes. A footnote to the title page should also give the name and address to whom reprint requests may be made. Sources of financial support should be included with other acknowledgements at the end of the text. The title page of the typescript should include a short title for running headlines (limited to 50 letters and spaces), and the name and address of the author (or his proxy) to whom the proofs are to be sent, under the heading: *Proofs to be sent to...* Main headings should be typed in capitals and (except summary and references) numbered consecutively. Subheadings should be typed in lower case, and underlined except for those words and symbols which would be italicized in the text. Subheadings should be numbered (i), (ii), etc., within each main heading. **Numeral 1 and letter e: if your typewriter uses one symbol for both, please make clear to the Printer which is intended in formulae, gene symbols, etc.**

**SUMMARY** The summary will be printed at the beginning of the paper. It should give a concise abstract of the significant content and conclusions of the paper, in a form suitable for abstracting journals to use, and should not exceed 250 words.

**ILLUSTRATIONS** The separate category of Plates no longer applies in the new format. All illustrations, including photographs, diagrams, graphs etc. are to be labelled consecutively Figure 1, 2... according to their relative positions in the text. Each figure should have a legend to be printed underneath it. Photographs should be supplied as unmounted glossy prints, with a sketch or separate set to show the arrangement required when several photographs are to form one figure. The names of the authors and the

orientation of the figure should be indicated on the back of each photograph. *Diagrams* should be about twice the size of the printed figure, but not larger than 12 × 8 inches, unless exceptionally complicated, and the thickness of lines and size of points should be determined accordingly. They may be submitted as glossy photographic prints or be drawn in indian ink on white Bristol-board, tracing linen or graph paper ruled in pale blue (but not other colours). The lettering on drawings should be lightly inserted *in soft pencil only*, so that the printer can put in the finished lettering. Legends to illustrations must be given on a separate sheet of paper. Each illustration must have the name of the author and figure number pencilled on the back.

**TABLES** Each table should be typed on a separate sheet of paper and its approximate position in the text indicated on the typescript. Each should be numbered and carry an appropriate title. The table should be designed, whenever possible, to be printed in the normal orientation of the text. The data should be grouped so as to make the use of rules unnecessary. Vertical rules, in particular, are expensive to print, and will only be included at the Editor's discretion. Table footnotes should ordinarily employ the symbols \*, †, ‡, §, ||, ¶, \*\*, etc., in that order.

**SYMBOLS** Gene and mathematical symbols should generally be printed in italics. Please underline those to be italicized when they appear in the text and tables. Bold letters add to printing costs and should only be used where they are necessary to avoid confusion. The author must assume responsibility for the accurate printing of complex mathematical formulae submitted in typewritten form, by differentiating between letters and numbers which are open to misinterpretation, and identifying all Greek, Hebrew and script letters by means of marginal notes at their first appearance. Note that Greek symbols cannot be italicized and that '+' as the symbol for a wild-type allele should not be italicized.

**NOMENCLATURE** Wherever possible, standardized nomenclature should be employed. The author should refer to the following publications for guidance: Novick *et al.* (*Bacteriological Reviews* 40, 168–189) for plasmids; O'Brien (Ed.), *Genetic Maps* 4, Cold Spring Harbor 1987, for recent information on most species and recent gene lists.

**REFERENCES** should follow the normal usage in the journal. In the list of references at the end of the paper, *both titles of articles and names of periodicals* should be written out in full.

**PROOFS** Two sets of single-sided page proofs, together with the typescript of each paper will be sent to the author. The printers' marked proof should be returned after correction to the Executive Editor, together with the typescript. Excessive alterations, other than corrections of printers' errors, may be disallowed or charged to the author. Correction should be made using the symbols in British Standard 1219: 1958, or its shortened version B.S. 1219C: 1958.

**OFFPRINTS** Fifty offprints of each paper, or short paper, are provided free of charge. Additional offprints may be ordered in the form sent out with proofs, provided this is returned within fourteen days of receipt.

## Contents

- 1 ALVAREZ-FUSTER, ASUNCION; JUAN, CARLOS *and* PETITPIERRE, EDUARD. Genome size in *Tribolium* flour-beetles: inter- and intraspecific variation
- 7 CLARK, ANDREW G.; SZUMSKI, FRANCES M. *and* LYCKEGAARD, EVA M. S. Population genetics of the Y chromosome of *Drosophila melanogaster*: rDNA variation and phenotypic correlates
- 15 MARGULIES, LOLA *and* GRIFFITH, CAROLE S. The synergistic effect of X-rays and deficiencies in DNA repair in P-M hybrid dysgenesis in *Drosophila melanogaster*
- 27 BOUSSY, I. A. *and* DANIELS, S. B. Hobo transposable elements in *Drosophila melanogaster* and *D. simulans*
- 35 ROBERT, JACQUES; BARANDUN, BENJAMIN *and* KOBEL, HANS RUDOLF. A *Xenopus laevis* creatine kinase isozyme (CK-III/III) expressed preferentially in larval striated muscle: cDNA sequence, developmental expression and subcellular immunolocalization
- 41 HOLCOMBE, RANDALL F.; STEPHENSON, DENNIS A.; ZWEIDLER, ALFRED; STEWART, RUBY M.; CHAPMAN, VERNE M. *and* SEIDMAN, J. G. Linkage of loci associated with two pigment mutations on mouse chromosome 13
- 51 SWANK, RICHARD T.; SWEET, HOPE O.; DAVISSON, MURIEL T.; REDDINGTON, MADONNA *and* NOVAK EDWARD K. Sandy: a new mouse model for platelet storage pool deficiency
- 63 FOWLIS, DEBORAH J.; ANSELL, JOHN D. *and* MICKLEM, H. SPEDDING. Further evidence for the importance of parental source of the Xce allele in X chromosome inactivation
- 67 MEDRANO, J. F.; POMP, D.; SHARROW, L.; BRADFORD, G. E.; DOWNS, T. R. *and* FROHMAN, L. A. Growth hormone and insulin-like growth factor-I measurement in high growth (hg) mice
- 75 Abstracts of papers presented at the first Mammalian Genetics and Development Workshop held in the Linnean Society Rooms, Burlington House, Piccadilly, London on 6-9 November 1991
- 89 BOOK REVIEWS  
Genetically Engineered Organisms: Benefits and Risks by J. R. S. Fincham and J. R. Ravetz. ERIC REEVE  
From Gene to Animal by D. de Pomerai. JAMES SANG  
Genetics and Biology of Alcoholism by C. Robert Cloninger and Henri Begleiter. WALTER MUIR  
Theoretical Population Genetics by J. S. Gale. J. BRUCE WALSH  
A Dictionary of Genetics by Robert C. King and William D. Stansfield. ERIC REEVE  
Protein Engineering: In Focus by P. C. E. Moody and A. J. Wilkinson. ANDREW COULSON
