

Acknowledgments

The *Sustainable Development Report* (SDR) reviews progress made each year on the Sustainable Development Goals since their adoption by the 193 UN Member States in 2015. Fifty years after the release of *Limits to Growth* and the first UN Conference on the Environment, held in Stockholm in 1972, this 7th edition of the SDR is published amid multiple health, security and climate crises. The fundamental SDG principles of social inclusion, international cooperation, responsible production and consumption, and universal access to clean energy are needed more than ever to fight these major challenges of our times. Ahead of the SDG Summit in September 2023, which will convene at the level of heads of state under the auspices of the UN General Assembly, the SDR 2022 identifies major priorities to restore and accelerate SDG progress towards 2030 and beyond.

The report was coordinated by Guillaume Lafortune, in cooperation with Christian Kroll and under the overall supervision of Jeffrey D. Sachs. Lead writers are Jeffrey D. Sachs, Guillaume Lafortune, Christian Kroll, Grayson Fuller, and Finn Woelm. The statistical work was led by Grayson Fuller, Finn Woelm, and Guillaume Lafortune. The interactive website and data visualization that accompanies this report was developed by Max Gruber and Finn Woelm. Other major contributors to the data and analyses in this year's report include Leslie Belmont Diaz, Salma Dahir, Alaina Lynch, Isabella Massa, Samory Toure, and Rosalie Valentiny. We also thank Alyson Marks, Castelline Tilus, and Grant Cameron from the Thematic Research Network on Data and Statistics (SDSN TRenDS) for preparing Part 4. SDG Data Systems and Statistics.

The SDR 2022 combines data and analyses produced by international organizations, civil society organizations, and research centers. We thank all of these for their contributions and collaboration in producing the report, including during the annual public consultation process that took place in March and April 2022.

We also thank the regional and national SDSN networks, the SDSN secretariat, and experts and government officials for responding to the 2022 survey on "national implementation and coordination mechanisms for the SDGs at the central/federal level" and providing comments and feedback at various stages.

María Cortés Puch, Maëlle Voil, Cheyenne Maddox, and Ryan Swaney provided communication support for the launch of the report. We thank Philip Good and Roisin Munnelly from Cambridge University Press & Assessment and Roberto Rossi of Pica Publishing for preparing the manuscript for publication. We welcome feedback on the publication and data that may help to strengthen future iterations of this work.

Please notify us of any publications that use the SDG Index and Dashboards data or the *Sustainable Development Report* and share your publication with us at info@sdgindex.org.

An interactive online dashboard and all data used in this report can be accessed at: www.sdgindex.org
