### YEARBOOK ON INTERNATIONAL COMMUNIST AFFAIRS [1968 edition]

*Edited by Richard V. Allen.* This annual is the only comprehensive, continuous publication in English on the domestic and international political activities of the various individual communist parties, their policies and attitudes toward one another, and their concerted and separate responses to world developments. The current issue covers events for the calendar year 1967, and is the second volume. Referring to the first volume: ". . . the yearbook is extremely valuable as a single authoritative source of an enormous number of facts which are otherwise scattered in all sorts of publications of varying reliability and accessibility, and its annual appearance will make it increasingly valuable in the future." — *The Times Literary Supplement (London)* "This is an excellent, well-organized, voluminously documented reference work on world Communist affairs . . . The book is highly recommended and worth the price." — *Library Journal* (subscription rate, \$20.00 each copy) \$25.00

### THE COMMUNIST REGIMES IN EASTERN EUROPE: AN INTRODUCTION

*By Richard F. Staar.* Intended as a unique guide for the professional and as a text for the student, this work deals with the post-1945 history and current situation of each of the Eastern European Communist states that came into being after World War II. "The book should be helpful to all students of Eastern Europe, mainly by reason of the admirable documentation, and to libraries generally." — *Library Journal* \$7.50

### Guide to Russian Reference Books VOLUME V: SCIENCE, TECHNOLOGY, AND MEDICINE

*By Karol Maichel.* Lists and annotates nearly 3,000 items covering printed materials concerned with the sciences in Russia from the earliest recorded time, with special emphasis on the post-1950 period, and appearing in the Russian and the major Western languages. "It is becoming both more difficult and more essential for scientists in this country to be aware of the latest developments in the Soviet Union. This volume . . . provides the means of achieving this awareness. It also enables librarians to know what reference aids are available . . . this is an invaluable work, for which Mr. Maichel is to be congratulated." — *Library Journal* "If, as cannot be doubted, the high standard of the first two volumes of the six-volume reference work prepared by Maichel and Simmons is maintained, librarians and scholars will have, after its completion, a set at their disposal which will probably never be matched inside or outside Russia." — *Slavic Review* \$22.50
