

GENERAL NOTES

THE Editors are anxious to improve the clinical aspect of the Journal and would welcome more reports of interesting cases. These clinical records need not be at all elaborate and it would be unnecessary to go minutely into the ætiology or the literature of the subject. Senior Registrars have unique opportunities for seeing a large variety of cases, many with unusual features. It is in many ways regrettable that these should go unrecorded. It is hoped that all those in charge of clinics will help us in this matter and see that such cases are not overlooked.

THE BÁRÁNY JUBILEE MEDAL

IN conjunction with the graduation ceremonies at the Uppsala University, Sweden, the Bárány Jubilee Medal was awarded to Dr. Charles Skinner Hallpike, M.D., F.R.C.P., F.R.C.S., F.R.S., Medical Research Council, Otological Research Unit, National Hospital, London.

At the ceremony Dr. C. O. Nylén, the successor of Bárány in the chair of Otolaryngology at Uppsala University gave an outline of Hallpike's works.

The Medical Faculty of Uppsala has awarded this outstanding distinction for 1958 to the eminent and internationally known scientist, Dr. C. S. Hallpike, London. By his clinical and experimental investigations he has increased to a high degree our knowledge of the functions of the vestibular system and of optomotorial nystagmus.

The Dean of the Medical Faculty then handed the gold medal to Dr. Hallpike.

POST-TONSILLECTOMY COMFORT

Immediate pain relief—Speedier Convalescence

The pain of traumatized tissues following tonsillectomy, demands its own relief—and points the need for analgesia that quickly reaches the irritated area.

ASPERGUM provides 'salivary analgesia' through the simple act of chewing—it brings pain-relieving acetylsalicylic acid into *intimate* and *prolonged* contact with the tonsillar

region, seldom reached even intermittently by gargling. The rhythmic stimulation of muscular action also aids in relieving local spasticity & stiffness: more rapid tissue repair is promoted. Each pleasantly flavoured chewing gum tablet provides $3\frac{1}{2}$ grains acetylsalicylic acid, permitting frequent use. Particularly suitable for children.
