# MAYER & MELTZER

Wish to state that all the instruments listed in their Catalogues, with very few exceptions, are and always have been made in their own London Workshops, so that they can offer customers their usual service without any rise in price for such goods. In sundry lines, such as glass and enamelled ware, the manufacturers have advanced their prices, so that these must necessarily be raised in proportion. It is perhaps unnecessary to state that partners, capital and staff are entirely British.
