

# Journal of BANKING & FINANCE

Editors: EDWARD I. ALTMAN, JEAN-JACQUES ROSA, MARSHALL SARNAT, GIORGIO P. SZEGÖ.

## Scope of the Journal of Banking & Finance:

The aim of this new international journal is to provide an outlet for the increasing flow of scholarly research concerning financial institutions and the money and capital markets within which they function.

It will also include studies which investigate the interaction of individuals and non-financial enterprises with financial intermediaries and markets.

The emphasis will primarily be on applied and policy oriented research. The journal is thus intended to improve communications between, and within, the academic and other research communities and those members of financial institutions, both private and public, national and international, who are responsible for operational and policy decisions.

The Journal will encourage: contributions in quantitative methods and the application of management science techniques to financial problems; analysis of monetary and fiscal theoretical applications to domestic and international situations; and the application of recent advances in financial theory to practical problems such as bank asset management.

## Contents of the first issue:

**Robert C. Merton**, An Analytic Derivation of the Cost of Deposit Insurance and Loan Guarantees: An Application of Modern Option Pricing Theory

**Michel Levasseur**, An Option Model Approach to Firm Liquidity Management

**Richard C. Stapleton and Christopher M. Burke**, European Tax Systems and the Neutrality of Corporate Financing Policy

**Edward I. Altman, Robert G. Haldeman and P. Narayanan**, ZETA Analysis: A New Model to Identify Bankruptcy Risk of Corporations

**James R. F. Guy**, The Behavior of Equity Securities on the German Stock Exchange

**Joseph Aharony and Martin Loeb**, Mean-Variance vs. Stochastic Dominance: Some Empirical Findings on Efficient Sets
