

Clay Minerals

VOLUME 9 • NUMBER 3 • JULY 1972

CONTENTS

J. L. AHLRICHS, A. R. FRASER and J. D. RUSSELL. Interaction of ammonia with vermiculite	263
W. B. JEPSON and J. F. WILLIAMS. The adsorption of water by clays	275
H. ESWARAN. Morphology of allophane, imogolite and halloysite	281
C. E. DAVIS. Behaviour of potassium in some West Indian soil clays	287
R. W. TANK. Clay minerals of the Green River Formation (Eocene) of Wyoming	297
I. A. COWPERTHWAITTE, F. J. FITCH, J. A. MILLER, J. G. MITCHELL and R. H. S. ROBERTSON. Sedimentation, petrogenesis and radioisotopic age of the Cretaceous fuller's earth of Southern England	309
A. D. BURNETT, P. G. FOOKES and R. H. S. ROBERTSON. An engineering soil at Kermanshah, Zagros Mountains, Iran	329
 Notes	
A. P. THOMSON, D. M. L. DUTHIE and M. J. WILSON. Randomly orientated powders for quantitative X-ray determination of clay minerals	345
H. F. SHAW. The preparation of orientated clay mineral specimens for X-ray diffraction analysis by a suction-onto-ceramic tile method	349
A. PIETRACAPRINA, G. NOVELLI and A. RINALDI. Bentonite deposit at Uri, Sardinia, Italy	351
<i>Book Reviews</i>	357
