VOL. LXI

1941-1943

PUBLISHED BY
OLIVER & BOYD
EDINBURGH: TWEEDDALE COURT
LONDON: 98 GREAT RUSSELL STREET, W.C. 1

1943

CONTENTS

	PAGE
1. The Œsophagus of the Stenoglossan Prosobranchs. By Alastair Graham, M.A., B.Sc., Department of Zoology, Birkbeck College, University of London. <i>Communicated by</i> Professor Charles H. O'Donoghue. (With Five Text-figures.) Issued separately March 13, 1941,	I
*2. Non-Associative Algebra and the Symbolism of Genetics. By I. M. H. Etherington, B.A., Ph.D., Mathematical Institute, University of Edinburgh. Issued separately March 18, 1941,	24
*3. The Structure of Tulach Hill, Blair Atholl, Perthshire. By William J. McCallien, D.Sc., Carnegie Teaching Fellow, University of Glasgow. (With Four Text-figures and One Black and White Map.) Issued separately April 18, 1941,	43
4. The Hydroid of the Medusa <i>Cosmetira pilosella</i> Forbes. By W. J. Rees, Marine Biological Laboratory, Plymouth. <i>Communicated by</i> Dr A. C. Stephen. (With Two Text-figures.) Issued separately April 18, 1941,	55
*5. On <i>Cardiopteridium</i> , a Genus of Fossil Plants of Lower Carboniferous Age, with Special Reference to Scottish Specimens. By John Walton, M.A., D.Sc., Regius Professor of Botany in the University of Glasgow. (With One Plate and Three Text-figures.) Issued separately July 25, 1941,	59
6. Mutation and Lethal Effects of Ultra-Violet Irradiation on <i>Drosophila</i> . By K. Mackenzie, Ph.D., Institute of Animal Genetics, University of Edinburgh. <i>Communicated by</i> Dr P. C. Koller. (With Two Text-figures.) Issued separately July 25, 1941,	67
*7. The Genetical and Mechanical Properties of the Sex Chromosomes. VIII. The Cat (<i>Felis domestica</i>). By P. C. Koller, Ph.D., D.Sc., Institute of Animal Genetics, University of Edinburgh. (With Twenty-seven Text-figures.) Issued separately July 29, 1941,	78
8. The Structural Differentiation of Chromosome IV of <i>Drosophila simulans</i> and its Behaviour in <i>melanogaster</i> Genotype. By B. M. Slizynski, Ph.D., Institute of Animal Genetics, University of Edinburgh. <i>Communicated by</i> Dr P. C. Koller. (With Five Text-figures.) Issued separately July 29, 1941,	95
9. Cytological Analysis of Chromosome Behaviour in Three Breeds of Dogs. By I. A. Ahmed, B.Sc., Institute of Animal Genetics, University of Edinburgh. <i>Communicated by</i> Dr P. C. Koller. (With Nineteen Text-figures.) Issued separately August 8, 1941,	107

	PAGE
10. Geological Notes on the Stubendorff Mountains, West Spitsbergen. By W. B. Harland, Gonville and Caius College, Cambridge. <i>Communicated by</i> Dr G. W. Tyrrell. (With Three Plates and One Text-figure.) Issued separately September 22, 1941,	119
11. On the Sphincter Valve of the Antennal Gland of <i>Marinogammarus marinus</i> (Leach) sens. str. By Mary V. Schorstein, B.Sc. (Lond.). From the Department of Zoology, Victoria University, Manchester. <i>Communicated by</i> Professor H. Graham Cannon, F.R.S. (With Four Text-figures.) Issued separately October 23, 1941,	130
*12. The Avian Ulna: Its Quill-Knobs. By George H. Edington, M.D., D.Sc., and Agnes E. Miller, M.A., Glasgow. <i>Communicated by</i> Professor E. Hindle, M.A., Sc.D., Ph.D. (With Eight Plates.) Issued separately September 16, 1941,	138
13. The Evolution of Continents: A Possible Reconciliation of Conflicting Evidence. The Bruce-Preller Lecture for 1941. By Sir Thomas H. Holland, K.C.S.I., K.C.I.E., F.R.S. Issued separately October 23, 1941,	149
14. Quantitative Characters of the Growth and Development of a Paurometabolous Insect, <i>Dixippus (Carausius) morosus</i> Br. et Redt. I. The Loss of Water in relation to Ecdysis. By Beverley N. Smallman, M.A., Ph.D., Department of Zoology, McGill University. <i>Communicated by</i> Professor J. Ritchie, M.A., D.Sc. (With Four Text-figures.) Issued separately January 30, 1942,	167
15. A Simple Apparatus for the Direct Determination of the Volume of Small Irregular Objects. By Beverley N. Smallman, M.A., Ph.D., Department of Zoology, McGill University. <i>Communicated by</i> Professor James Ritchie, M.A., D.Sc. (With One Text-figure.) Issued separately January 30, 1942,	186
*16. Observations on Artificially Induced Heat in Immature Guinea-Pigs. By P. Bacsich, M.D., Carnegie Teaching Fellow, and G. M. Wyburn, M.B., Ch.B., D.Sc. From the Department of Anatomy, University of Glasgow. (With Two Plates.) Issued separately January 30, 1942,	188
*17. A Study of the Cytoplasmic Inclusions during the Spermatogenesis of the Mouse. By R. A. R. Gresson, D.Sc., Department of Zoology, University of Edinburgh. <i>Communicated by</i> Professor J. Ritchie, M.A., D.Sc. (With Two Plates.) Issued separately May 5, 1942,	197
*18. Variation in <i>Gryphæa incurva</i> (Sow.) from the Lower Lias of Loch Aline, Argyll. By Rhona M. MacIennan, B.Sc., and A. E. Trueman, D.Sc. (With Eleven Text-figures.) Issued separately May 5, 1942,	211
19. pH Phenomena in Relation to Stomatal Opening II-V. By Professor J. Small, D.Sc., Miss M. I. Clarke, and Mrs J. Crosbie-Baird, Queen's University, Belfast. (With Nine Text-figures and Two Tables.) Issued separately May 19, 1942,	233

	PAGE
*20. On the Feeding and Breeding of <i>Calanus finmarchicus</i> under Laboratory Conditions. By J. E. G. Rayment, B.Sc., A.M., and F. Gross, Dr.phil., Department of Zoology, University of Edinburgh. <i>Communicated by</i> Professor James Ritchie, M.A., D.Sc. (With Two Text-figures.) Issued separately June 23, 1942,	267
*21. The Specific Gravity of <i>Calanus finmarchicus</i> . By F. Gross, Dr.phil., and J. E. G. Rayment, B.Sc., A.M., Department of Zoology, University of Edinburgh. <i>Communicated by</i> Professor J. Ritchie, M.A., D.Sc. (With One Text-figure.) Issued separately June 23, 1942,.	288
22. Deficiency Effects of Ultra-violet Light in <i>Drosophila melanogaster</i> . By B. M. Slizynski, Ph.D., Institute of Animal Genetics, University of Edinburgh. <i>Communicated by</i> Dr A. W. Greenwood. (With Two Text-figures.) Issued separately July 29, 1942,	297
23. Types of Development of Polytene Chromosomes. By A. M. Melland, Ph.D., John Innes Horticultural Institution, Merton, London. <i>Communicated by</i> Dr P. C. Koller. (With Three Text-figures and One Plate.) Issued separately September 24, 1942,	316
*24. The Occurrence of Endodermis in Leguminous Root Nodules and Its Effect upon Nodule Function. By Helen L. Frazer, B.Sc., Botany Department, University of Manchester. <i>Communicated by</i> Professor J. Walton, D.Sc. (With Three Text-figures.) Issued separately October 2, 1942,	328
*25. Growth Stages in the Ammonite <i>Promicroceras marstonense</i> Spath. By Ethel D. Currie, B.Sc., Ph.D., F.G.S. <i>Communicated by</i> Professor A. E. Trueman, D.Sc., F.R.S. (With Thirteen Text-figures.) Issued separately October, 2, 1942,	344
26. The Induction of Pregnancy in the Golden Hamster during the Breeding Pause. By O. Peczenik, M.D., Department of Zoology, University of Glasgow. <i>Communicated by</i> Professor Edward Hindle, F.R.S. Issued separately October 2, 1942,	368
27. The Larval Maxillary Glands of <i>Euphausia superba</i> Dana. By M. V. Schorstein, M.Sc., Grisedale Scholar, Department of Zoology, Victoria University, Manchester. <i>Communicated by</i> Professor H. Graham Cannon, F.R.S. (With Three Text-figures.) Issued separately February 3, 1943,	375
28. Hybrid Sterility in Artificially Produced Recombinants between <i>Drosophila melanogaster</i> and <i>D. simulans</i> . By G. Pontecorvo, Institute of Animal Genetics, University of Edinburgh, and Department of Zoology, University of Glasgow. <i>Communicated by</i> Professor E. Hindle, F.R.S. (With One Table and Three Text-figures.) Issued separately February 3, 1943,	385
*29. The Effects of Radiation on Pollen Grain Development, Differentiation, and Germination. By P. C. Koller, Ph.D., D.Sc., Institute of Animal Genetics, University of Edinburgh. (With Nine Text-figures, One Plate, and Ten Tables.) Issued separately April 23, 1943,	398

	PAGE
30. Study of an Introduced North American Freshwater Mollusc, <i>Stagnicola catascopium</i> (Say). By D. Keith McE. Kevan, B.Sc., Zoology Department, University of Edinburgh. <i>Communicated by</i> Professor J. Ritchie, M.A., D.Sc. (With Ten Graphs and Twenty Text-figures.) Issued separately August 13, 1943,	430
31. Hair Pigmentation and the Genetics of Colour in Greyhounds. By Marca Burns, Zoology Department, University of Edinburgh. <i>Communicated by</i> Professor James Ritchie, M.A., D.Sc. (With One Plate.) Issued separately October 27, 1943,	462

* The thanks of the Society are due to the Carnegie Trust for the Universities of Scotland for grants towards the costs of the illustrations, tables, etc., in these papers, and towards similar costs in the papers in vol. lx, 1939-40, Nos. 25, 26, and 27.

INDEX SLIP

PROC. R.S.E., VOL. LXI, PART IV
Section B (Biology)

- SCHORSTEIN, M. V.—The Larval Maxillary Glands of *Euphausia superba* Dana.
Proc. Roy. Soc. Edin., vol. lxi, B, 1943, pp. 375–384.
- Duct, Intermediate Character of.
M. V. SCHORSTEIN.
Proc. Roy. Soc. Edin., vol. lxi, B, 1943, pp. 375–384.
- Euphausiid, Larval Segmental Excretory Organs in.
M. V. SCHORSTEIN.
Proc. Roy. Soc. Edin., vol. lxi, B, 1943, pp. 375–384.
- Sphincter Valve, Ectodermal Origin of.
M. V. SCHORSTEIN.
Proc. Roy. Soc. Edin., vol. lxi, B, 1943, pp. 375–384.
- PONTECORVO, G.—Hybrid Sterility in Artificially Produced Recombinants between *Drosophila melanogaster* and *D. simulans*.
Proc. Roy. Soc. Edin., vol. lxi, B, 1943, pp. 385–397.
- Drosophila, melanogaster* and *simulans*, Hybrid Sterility in.
G. PONTECORVO.
Proc. Roy. Soc. Edin., vol. lxi, B, 1943, pp. 385–397.
- Sterility, Hybrid, in *Drosophila melanogaster* and *simulans*.
G. PONTECORVO.
Proc. Roy. Soc. Edin., vol. lxi, B, 1943, pp. 385–397.
- KOLLER, P. C.—The Effects of Radiation on Pollen Grain Development, Differentiation, and Germination.
Proc. Roy. Soc. Edin., vol. lxi, B, 1943, pp. 398–429.
- Pollen Grain, Effects of Radiation on.
P. C. KOLLER.
Proc. Roy. Soc. Edin., vol. lxi, B, 1943, pp. 398–429.
- X-ray—Effects on Pollen Grain Development, Differentiation, and Germination.
P. C. KOLLER.
Proc. Roy. Soc. Edin., vol. lxi, B, 1943, pp. 398–429.
- KEVAN, D. KEITH MCE.—Study of an Introduced North American Freshwater Mollusc, *Stagnicola catascopium* (Say).
Proc. Roy. Soc. Edin., vol. lxi, B, 1943, pp. 430–461.
- Shell-form, Variation in, of Introduced North American Mollusc, *Stagnicola catascopium* (Say) under abnormal (thermal) conditions.
D. KEITH MCE. KEVAN.
Proc. Roy. Soc. Edin., vol. lxi, B, 1943, pp. 430–461.

- Stagnicola catascopium* (Say).—Study of Introduced North American Mollusc.
D. KEITH McE. KEVAN.
Proc. Roy. Soc. Edin., vol. lxi, B, 1943, pp. 430-461.
- Variation in Shell-form under Abnormal (Thermal) Conditions of Introduced North American Mollusc, *Stagnicola catascopium* (Say).
D. KEITH McE. KEVAN.
Proc. Roy. Soc. Edin., vol. lxi, B, 1943, pp. 430-461.
- BURNS, MARCA.—Hair Pigmentation and the Genetics of Colour in Greyhounds.
Proc. Roy. Soc. Edin., vol. lxi, B, 1943, pp. 462-490.
- Colour in Greyhounds, Hair Pigmentation and the Genetics of.
MARCA BURNS.
Proc. Roy. Soc. Edin., vol. lxi, B, 1943, pp. 462-490.
- Greyhounds, Hair Pigmentation and the Genetics of Colour in.
MARCA BURNS.
Proc. Roy. Soc. Edin., vol. lxi, B, 1943, pp. 462-490.
- Pigmentation, Hair, and the Genetics of Colour in Greyhounds.
MARCA BURNS.
Proc. Roy. Soc. Edin., vol. lxi, B, 1943, pp. 462-490.

INSTRUCTIONS TO AUTHORS (*continued*)

For fine pencil sketches, and line and wash sketches, the whitest base available should be used. The lightest tones or lines should be a little stronger than is desired in the reproduction, and the heavier tones strengthened in proportion, so that in reproduction the whole scale of tones may be adjusted to bring the base into its proper relationship. Otherwise a very light pencil line or a weak wash will not reproduce as a stronger tone than the base, but will merge with it and be lost. Fine pencil lines should be uniform throughout.

Drawings and photographic prints should be kept as clean as possible.

When the illustrations are to form plates, a scheme for the arrangement of the figures in Roy. 4to plates for the *Transactions*, and in Super Roy. 8vo for the *Proceedings*, must be given, and the figures numbered (and, when necessary, lettered).

Space available for figures and lettering in *Transactions*, $9\frac{3}{4}'' \times 7\frac{3}{4}''$.
" " " " *Proceedings*, $7\frac{3}{4}'' \times 5''$.

A proof of each paper will be sent to the author, whose address should be given on the MS. The cost of corrections made in the proof should not exceed 5 per cent. of the printers' charges for the setting of each paper. The author may be charged with any excess.

The proof must, if possible, be returned within one week, addressed to *The Secretary, Royal Society of Edinburgh, 22 George Street, Edinburgh, 2*, and *not to the printer*. To prevent delay, an author residing abroad should appoint someone residing in this country to correct the proof.

As soon as a *Transactions* paper, or the sheet in which the last part of a *Proceedings* paper appears, is ready for press, copies or reprints, in covers, bearing the title of the paper and the name of the author, are printed off and placed on sale. The date of such separate publication is printed on each paper.

Authors of papers will receive fifty reprints free, if they so desire; but in view of the strict necessity for economy in paper and printing, their attention is directed to the desirability of requesting only twenty-five gratis copies, where this number will meet their needs. Authors may have a reasonable number of additional reprints at a fixed scale of prices, which will (if paper is available) be furnished by the printer, who will charge them with the cost. To prevent disappointment, especially if the paper contains plates, the author should, as soon as possible, notify to the Secretary the number of additional reprints required.

To facilitate the compilation of indexes, and to secure that due attention to the important points in a paper shall be given in General Catalogues of Scientific Literature and in Abstracts published by periodicals, each author is requested to return to the Secretary, together with the proof of his paper, a brief index (on the model given below) of the points in it which he considers new or important. These indexes will be edited by the Secretary and incorporated in separate index slips issued with each part of the *Transactions* and *Proceedings*.

MODEL INDEX

Schäfer, E. A.—On the Existence within the Liver Cells of Channels which can be directly injected from the Blood-vessels. *Proc. Roy. Soc. Edin.*, xxiv, 1902, 65-69.

Cells, Liver,—Intra-cellular Canaliculi in.

E. A. Schäfer. *Proc. Roy. Soc. Edin.*, xxiv, 1902, 65-69.

Liver,—Injection within Cells of.

E. A. Schäfer. *Proc. Roy. Soc. Edin.*, xxiv, 1902, 65-69.

NO		PAGE
	XXX. Study of an Introduced North American Freshwater Mollusc, <i>Stagnicola catascopium</i> (Say). By D. KEITH MCE. KEVAN, B.Sc., Zoology Department, University of Edinburgh. <i>Communicated by Professor J. RITCHIE, M.A., D.Sc.</i> (With Ten Graphs and Twenty Text-figures)	430
	<i>(Issued separately August 13, 1943.)</i>	

	XXXI. Hair Pigmentation and the Genetics of Colour in Greyhounds. By MARCA BURNS, Zoology Department, University of Edinburgh. <i>Communicated by Professor JAMES RITCHIE, M.A., D.Sc.</i> (With One plate)	462
	<i>(Issued separately October 27, 1943.)</i>	

Title Page, Contents, and Index to Volume.

The Papers published in this part of the PROCEEDINGS may be had separately, on application to the Publishers, at the following Prices:—

No. XXVII.	Price 0s. 9d.	No. XXX	„ 2s. 9d.
No. XXVIII	„ 1s. 0d.	No. XXXI	„ 2s. 9d.
No. XXIX	„ 3s. 0d.
