*Radiocarbon* reaches libraries, labs, individuals, and institutions in North America, South America, Europe, the Middle East, Asia, Africa, and Australasia. We can help you reach your target market, wherever it is.

We publish three issues per volume year. Advertise in two consecutive issues and get the third at a significant discount (must reserve all three ads at once for discount to apply).

We accept full-page and multipage advertisements in black and white or full-color. You may send camera-ready copy, film negatives, or digital files. Or, for a small fee, we will create an ad from your supplied text and graphics.

# UNLOCK THE ANSWERS

## Rafter Radiocarbon dating services and Stable Isotope science

Our isotope services help you unlock the answers to ecological and environmental history. Whether you seek knowledge of “a moment in time” from radiocarbon dating, or “inside knowledge” of isotope processes, Rafter Radiocarbon and GNS Science can provide the answers.

- 8–10 week reporting times and 3 week express services for  $^{14}\text{C}$
- radiometric  $^{14}\text{C}$  dating for large samples
- bone C and N analysis (%C, %N,  $\delta^{13}\text{C}$ ,  $\delta^{15}\text{N}$ , C:N)
- free consulting and calibration services
- 2–4 wk turnaround for stable isotope analysis
- analysis of  $\delta^{13}\text{C}$ ,  $\delta^{14}\text{N}$ ,  $\delta^{34}\text{S}$ ,  $\delta^{18}\text{O}$ , and  $\delta\text{D}$  values for all sample types; 10% discount when 5 isotopes ordered
