OF THE
CAMBRIDGE PHILOSOPHICAL SOCIETY
VOLUME XXV

PROCEEDINGS
OF THE
CAMBRIDGE PHILOSOPHICAL
SOCIETY

VOLUME XXV

29 OCTOBER 1928—29 JULY 1929

CAMBRIDGE
AT THE UNIVERSITY PRESS
AND SOLD BY
DEIGHTON, BELL & CO., LTD., AND BOWES & BOWES, CAMBRIDGE
CAMBRIDGE UNIVERSITY PRESS, FETTER LANE, LONDON, E.C. 4

1929

First printed in Great Britain at the University Press, Cambridge
Reprinted by offset-litho by
Percy Lund Humphries and Co. Ltd., Bradford

CONTENTS

VOL. XXV

	PAGE
Bailey, W. N. A note on Bateman's expansion in Bessel functions	48
— On the convergence of a certain multiple series	410
Bromwich, T. J. I'A. Motion of a sphere in a viscous fluid	369
Bruyne, N. A. de. Layers of caesium and nitrogen on tungsten	347
Cave, H. M. Note on the number of high velocity β -rays	222
Chadwick, J. and Rutherford, E. Energy relations in artificial disintegration	186
Chalmers, J. A. An approximate method of determining the high-velocity limits of continuous β -ray spectra	331
Dirac, P. A. M. The basis of statistical quantum mechanics	62
Dixon, A. C. The second mean value theorem in the integral calculus	282
Du Val, P. On the Hesse-Cayley algorithm for a plane quartic whose bitangents are all real	433
Eddy, C. E. The passage of β -rays through matter	50
Feather, N. Note concerning the β particles of very small energy emitted during radioactive transformation	522
— and Nimmo, R. R. The distribution of range of the α particles from radium C' and thorium C'	198
Fowler, R. H. An analogy for beams of particles of a reciprocal optical theorem due to Helmholtz	193
Fox, C. A note on some integrals involving Bessel functions	130
Frazer, R. A. A proof of Miquel's theorem by involutions in the Argand diagram	285
Gabriel, R. M. Some further results concerning the integrals of moduli of regular functions along curves of certain types	139
Georgeson, W. Thermionic emission through double layers	175
Grace, J. H. Extension of a geometrical porism and other theorems	421
Hamshere, J. L. The mobility distribution and rate of formation of negative ions in air	205
Hargreaves, J. The dispersion electrons of lithium	75
— Some calculations relevant to the quantum defect in the extended Ritz formula	315
— The dispersion electrons in the one-electron problem	323

	PAGE
Harper, W. R. On the obliquity function to be used in the approximate theory of diffraction	289
Hartree, D. R. The propagation of electromagnetic waves in a stratified medium	97
— The distribution of charge and current in an atom consisting of many electrons obeying Dirac's equations	225
— The wave mechanics of an atom with a non-Coulomb central field. Part IV. Further results relating to terms of the optical spectrum	310
Henderson, G. H. Note on the condensation of radioactive substances on solid surfaces	344
Jeffreys, H. On the transverse circulation in streams	20
— On the transport of sediments by streams	272
Jones, H. The interaction of excited helium and hydrogen atoms	445
Landale, S. E. A. An analysis of triode valve rectification	355
— An analysis of triode valve rectification. Part II.	482
Lowry, T. M. Configuration of quadrivalent atoms	219
Moon, P. B. and Oliphant, M. L. Current distribution near edges of discharge-tube cathodes	461
Mordell, L. J. Poisson's summation formula in several variables and some applications to the theory of numbers	412
— On the convergence of a certain multiple series	407
Mott, N. F. The quantum theory of electronic scattering by helium	304
Moullin, E. B. The fields close to a radiating aerial	491
— A note on the stability of a valve amplifier	508
Nimmo, R. R. and Feather, N. The distribution of range of the α particles from radium C' and thorium C'	198
Oliphant, M. L. and Moon, P. B. Current distribution near edges of discharge-tube cathodes	461
Pars, L. A. The classification of orbits	1
Robinson, G. de B. A geometrical study of the alternating and symmetric groups	168
Rosenhead, L. Double row of vortices with arbitrary stagger.	132
— Systems of double rows of line vortices in a channel of finite breadth where the axis of the row is parallel to the axis of the channel	277
Roth, L. Jacobian surfaces of quadrics in four dimensions	268
— Some formulae for surfaces in higher space	390
Rutherford, E. and Chadwick, J. Energy relations in artificial disintegration	186
Sargent, B. W. The upper limits of energy in the β -ray spectra of actinium B and actinium C''	514
Sargent, W. L. C. On Young's criteria for the convergence of Fourier series and their conjugates	26

Contents

vii

	PAGE
Schonland, B. F. J. A new electroscope	340
Semple, J. G. On certain loci of three dimensions representable on ordinary space by means of cubic surfaces, and the Cremona transformations for ordinary space obtained by projection of such loci .	145
Sharman, C. F. Secondary electron emission from solid metal surfaces	237
Srivastava, P. L. On the Phragmén-Lindelöf principle	265
Stern, T. E. On the emission of electrons from metals covered by thin films, in intense electric fields	454
Todd, J. A. On the number of planes in hyperspace which satisfy a certain set of conditions	42
— A deduction of the formula for the product of two incidence symbols in the case of lines and planes	334
— Some particular line-systems of higher space	436
Ursell, H. D. Cayley's problem of seven lines on a quartic surface .	31
— Coincidence formulae in geometry	39
Walton, E. T. S. The production of high speed electrons by indirect means	469
Watson, E. E. Current measurement with a Compton quadrant electrometer	67
Wilton, J. R. A note on Ramanujan's arithmetical function $\tau(n)$.	121
— On Ramanujan's arithmetical function $\Sigma_{r,s}(n)$	255
Proceedings at the Meetings held during the Session 1928-1929 . .	530
Accounts, statement of, for 1928	542

PLATES

Plates I and II. To illustrate Mr N. Feather's paper	522

FELLOWS ELECTED DURING 1928—1929

Allsopp, C. B.	Hofton, J.	Siddiqi, M. R.
Andress, W. R.	Holmes, E. G.	Swain, L. M.
Barclay, A. E.	Kennedy, M. D.	Tims, H. W. Marett
Bennett, A. L.	Moran, T.	Tomkins, R. G.
Besicovitch, A.	Owen, E. A.	Vedy, L. G.
Braddick, H. J. J.	Pickles, A.	Walker, P. B.
Bruyne, N. A. de	Pumphrey, R. J.	Ward, F. A. B.
Eastham, L. E. S.	Roberts, J. K.	Wood, A. H.
Francis, W. L.	Robinson, M. E.	Woolley, R. v. d. R.
Gedge, G. R.	Roth, L.	Wootton, H. A.
Hall, P.	Semple, J. G.	Worthington, E. B.

ASSOCIATES ELECTED DURING 1928—1929

Allan, F. E.	Macky, W. A.	Revans, R. W.
Bannister, L. C.	McGee, J. D.	Richardson, H. O. W.
Brock, E. B.	McIntyre, J. T.	Rosenhead, L.
Brooks, J.	McVittie, G. C.	Sargent, B. W.
Byerly, P.	Miller, E. G.	Snow, C. P.
Cairns, J. E. I.	Morgan, J. W.	Stern, T. E.
Clarke, G. L.	Morley, A. W.	Terroux, F. R.
Griffiths, W. S.	Morton, T. H.	Tipper, C. F.
Haines, R. B.	Moss, E. B.	Traill, R. C.
Hanes, C. S.	Naish, A. M.	Trout, S. A.
Jones, H.	Palmer, R.	Watson, W. H.
Lea, C. H.	Paterson, K. M. N.	Webster, H. C.
Lloyd, E.	Pinhey, K.	Williams, S. R.
Mackenzie, G. I.	Rao, S. Jaya	

CONTENTS.

	PAGE
<i>Motion of a sphere in a viscous fluid.</i> By T. J. P.A. BROMWICH, Sc.D., St John's College. (With One Text-figure)	369
<i>A deduction of the formula for the product of two incidence symbols in the case of lines and planes.</i> By J. A. TODD, B.A., Trinity College. (Communicated by Professor H. F. BAKER)	384
<i>Some formulæ for surfaces in higher space.</i> By L. ROTH, B.A., Clare College	390
<i>On the convergence of a certain multiple series.</i> By Mr L. J. MORDELL, St John's College	407
<i>On the convergence of a certain multiple series.</i> By Mr W. N. BAILEY, Trinity College. (Communicated by Mr L. J. MORDELL)	410
<i>Poisson's summation formula in several variables and some applications to the theory of numbers.</i> By Mr L. J. MORDELL, formerly of St John's College	412
<i>Extension of a geometrical porism and other theorems.</i> By Mr J. H. GRACE, Peterhouse	421
<i>On the Hesse-Cayley algorithm for a plane quartic whose bitangents are all real.</i> By PATRICK DU VAL, Trinity College. (Communicated by Professor H. F. BAKER)	433
<i>Some particular line-systems of higher space.</i> By J. A. TODD, B.A., Trinity College. (Communicated by Professor H. F. BAKER)	436
<i>The interaction of excited helium and hydrogen atoms.</i> By H. JONES, Research Student, Trinity College. (Communicated by Mr R. H. FOWLER.) (With One Text-figure)	445
<i>On the emission of electrons from metals covered by thin films, in intense electric fields.</i> By T. E. STERN, Trinity College. (Communicated by Mr R. H. FOWLER.) (With Two Text-figures)	454
<i>Current distribution near edges of discharge-tube cathodes.</i> By P. B. MOON, B.A., Sidney Sussex College, and M. L. OLIPHANT, Trinity College. (Communicated by Professor Sir E. RUTHERFORD.) (With Seven Text-figures)	461
<i>The production of high speed electrons by indirect means.</i> By E. T. S. WALTON, Trinity College, 1851 Exhibition Research Scholar of the University of Dublin. (Communicated by Professor Sir E. RUTHERFORD.) (With Five Text-figures)	469
<i>An analysis of triode valve rectification. Part II.</i> By S. E. A. LANDALE, Corpus Christi College. (Communicated by Mr E. B. MOULLIN.) (With Five Text-figures)	482
<i>The fields close to a radiating aerial.</i> By Mr E. B. MOULLIN, Downing College. (With Eight Text-figures)	491
<i>A note on the stability of a valve amplifier.</i> By Mr E. B. MOULLIN, Downing College. (With Two Text-figures)	508
<i>The upper limits of energy in the β-ray spectra of Actinium B and Actinium C''.</i> By B. W. SARGENT, Emmanuel College, 1851 Exhibition Scholar of Queen's University, Kingston, Ontario. (Communicated by Dr J. CHADWICK.) (With Three Text-figures)	514
<i>Note concerning the β particles of very small energy emitted during radioactive transformation.</i> By N. FEATHER, B.A., Coutts-Trotter Student, Trinity College. (With Plates I, II and One Text-figure)	522
Proceedings at the Meetings held during the Session 1928-1929	530
Statement of Accounts of the Cambridge Philosophical Society, from January 1, 1928, to December 31, 1928	542
