

OPEN OFFER TO CONSERVATIONISTS

The Whitley Awards Foundation

The Whitley Awards Foundation offers a wide range of annual awards for conservation and sustainable development projects worldwide.

The total fund for 2001 will be over **£250,000**.

There are five awards for nature conservation in 2001: The Whitley Award (£50,000), The Iris Darnton Award (£20,000), The Rufford Award (£20,000), the Maurice Laing Award (£20,000) and the Daniel Kelly Award (£20,000).

For the first time this year, there is a further award for renewable energy, The Ashden Award, worth £30,000.

The deadline for applications is 16 October 2000.

Rufford Small Grant winner, Van Ngoc Thinh of Vietnam.

The critically endangered African Wild Ass.
© Patricia Moehlman (Daniel Kelly Award winner 2000).

Incorporated within the Foundation is the Rufford Grants Facility, which offers grants up to £5,000. Deadlines are quarterly throughout the year (end of April, July, October and January).

The application form is the same for all awards. This can be downloaded from the website at: www.whitleyaward.org

Fauna & Flora International membership application Please complete in block letters

Surname First name(s) Title

Address

Postcode

Membership categories (tick appropriate box)

Standard (includes *Oryx* and *Fauna & Flora News*) £37

Concessionary (senior citizen, unwaged, student*) £20 Sponsor £75 (includes additional subscription for *Oryx* in a developing country)

Supporter (includes *Fauna & Flora News*) £15 Benefactor £50 Life £1000

Airmail despatch (see inside cover for standard despatch details) £12.00

*If student please give date you expect to finish studies

Methods of Payment

Cheque/postal or money order/giro credit (currency: £ sterling only) I enclose £

Credit card (American Express, Visa, Delta, Switch*, Mastercard, Eurocard)

Name of card Name of card holder Expiry date

Card No.

*If paying by Switch, please state issue number

Direct Debit Please fill in the whole form and send it to FFI

Originator's identification number
916890

1. Name and full postal address of your Bank or Building Society Branch

To: The Manager, Bank or Building Society,

Postcode

2. Name(s) of account holder(s)

3. Branch Sort Code - -

4. Bank or Building Society Account No. 5. FFI ref. no. (office use only)

6. Instructions to your Bank or Building Society. Please pay Fauna & Flora International Direct Debits from the account detailed on this Instruction subject to safeguards assured by The Direct Debit Guarantee

Signature(s) Date

Gift Aid Declaration

I would like my subscription payment from 6 April 2000 onwards to Fauna & Flora International to be under the new Gift Aid 2000 scheme. I will be paying an amount of income tax and/or capital gains tax at least equal to the tax that Fauna & Flora International reclaims on my subscription in each tax year.

Name:

Address:

Signature: Date:

Please return your completed membership form to:
Membership Secretary, Fauna & Flora International,
Great Eastern House, Tenison Road, Cambridge CB1 2TT, UK.

Notes for contributors

Scope The journal aims to provide a comprehensive view of the conservation of wild species of fauna and flora. It welcomes original, succinct and up-to-date papers for rapid publication on all aspects of species conservation, particularly material that has potential to improve conservation efforts and that enhances understanding of conservation needs.

Readership The readership is broadly based and global. It includes conservation professionals, members of academic institutions specializing in wildlife conservation, government departments, non-governmental conservation organizations, students in conservation-related disciplines and interested members of the general public.

Submissions Manuscripts should be sent to Camilla Erskine, Editor, *Oryx* – The International Journal of Conservation, FFI, Great Eastern House, Tenison Road, Cambridge CB1 2TT, UK.

Papers (2000–7000 words) are invited on topics relevant to the journal's main focus, including:

- Field research on the status and distribution of threatened species
- Reviews of the status and distribution of individual species or taxonomic groups
- Reviews of conservation policy and legislation at international, national and local levels
- Planning for species and biodiversity conservation
- The working of international conservation conventions
- The nature and results of practical conservation initiatives by governmental and non-governmental organizations, especially analytical case studies
- Research on the sustainable use of wild species
- The history of conservation, including the role of key people, organizations and initiatives.

Short Communications (< 2000 words) are invited on: research results that have important implications for conservation; wild species or habitats under immediate threat; new legislation, protected areas or conservation initiatives; and conservation gains and losses.

Papers and Short Communications are considered on the understanding that their contents have not been published, or submitted for publication, elsewhere. A covering letter accompanying the manuscript should confirm this. If there is any overlap with other papers, e.g. in press or in preparation, this should be stated and the papers in question sent to the editor. The corresponding author must confirm that all authors are aware that the manuscript has been submitted.

Manuscripts are subject to peer review by at least two referees in liaison with one of the Senior Editors. It is helpful if authors suggest at least one appropriate referee.

After acceptance papers may be edited to enhance clarity. Where major changes have been made edited manuscripts are returned to authors before typesetting. Page proofs are sent to authors for approval. Contributors receive two free copies of the journal and may buy additional copies and offprints.

The editor would also be pleased to receive contributions to:

Opinion Contributions (< 700 words) to current conservation thinking, usually referring to material published in previous issues of the journal.

Briefly Concise reports (< 175 words) on news of general conservation interest, drawn from authoritative published sources, including reputable websites.

Announcements Grants, research opportunities, meetings.

Preparation of manuscripts Contributions should be in English and three copies should be submitted, double-spaced on A4 paper, with a left-hand margin of at least 40 mm. Pages and lines should be numbered. E-mail submissions are acceptable but should be followed by a printed copy. The journal welcomes manuscripts on disk after acceptance.

The cover page should contain the title of the paper (not exceeding 20 words, a running head of no more than 40 characters, a word count from the start of the text to the end of the references, the full mailing address, E-mail address and address at the time the research was carried out of the corresponding author, and the names and addresses of additional authors.

Abstract (100–250 words) This should describe the purpose of the paper, the major findings and main conclusions. It should be informative and intelligible without reference to the text. Five keywords relevant for literature searching should be supplied.

Biographical sketches are invited, describing the affiliations and main research interests of the corresponding author (up to 50 words) or of up to three authors (150 words in total).

Footnotes should be avoided if possible.

References should be cited in the text as, for example, Hardcastle & Wilson (1996) or (Leadbeater, 1996). Where there are three or more authors use the first author's surname followed by *et al.* Multiple references should be listed in chronological order. The reference list should be in alphabetical order and include the full article title. Titles of serial publications should be given in full. References at the end of the paper should follow the Harvard system. Examples of house style can be found in the journal and on the journal website.

Figures and maps should be in black ink on strong white or translucent paper and should be labelled in a size that will be legible when reduced to published size (either 165, 107.5 or 79 mm wide). Glossy, black-and-white whole-plate prints are preferred, but good quality colour slides may be used.

Electronic artwork We would like to receive your artwork in electronic form. Please save vector graphics (e.g. line artwork) in Encapsulated Postscript Format (EPS), and bitmap files (e.g. half-tones) in Tagged Image File Format (TIFF). Ideally, vector graphics that have been saved in metafile (.WMF) or pict (.PCT) format should be embedded within the body of the text file. Detailed information on our digital illustration standards is available on the BSL Homepage at: <http://www.blackwell-science.com/elecmed/authors.htm>

Tables should be self-explanatory and printed on a separate sheet with an appropriate caption.

Species' names should follow a named checklist, which should be mentioned in a covering letter. The first time a species is mentioned its scientific name should follow without intervening punctuation: thus, African elephant *Loxodonta africana*. English names should be in lower case throughout except where they incorporate a proper name.

Oryx is covered by *Biological Abstracts*, *BIOBASE/Current Awareness in Biological Sciences*, *Current Contents Agriculture, Biology and Environmental Science*, *Science Citation Index*, *SciSearch*, *Research Alert* and *Ecology Abstracts*.
