Needlestick Prev

PUSH

PULL

SNAP

Prevention In A Snap.

SEAL

It's the lowest cost health protection you can get.

Now there's a simple, cost-effective way to put a lid on needlesticks.

Introducing the SafeSnap™ Security Syringe. Needlestick prevention that's as easy to use as *push, pull, snap and seal*. SafeSnap is the only security syringe with a retractable needle that locks and seals safely inside the syringe barrel. Where it can't stick you or anyone else. Ever again.

Plus, the small sealed unit won't add to the jumble of exposed needles in the sharps container. And since the sealed unit is only half the size of other safety syringes, it will cut your cost of disposal in half.

No other security syringe offers this double level of protection. And no other device makes needlestick prevention so easy and affordable.

Call 1-800-723-3762 (1-800 SAFESNAP) for a free trial. Or fax back the form below to (619) 674-1177 today.

Have you thought of subscribing?

Infection is a leading international journal tailored for the clinician that deals with the aetiology, diagnosis, pathogenesis and epidemiology of infection and infectious disease.

Infection encompasses modern diagnostics, patient-related mechanisms of infections, preventive measures including immunoprophylaxis and immunosubstitutes. Changing and emerging pathogens and the different clinical course of diseases make it essential to obtain the latest information.

Infection originates in Europe and has an international staff and editorial board, which ensures the high quality of its peer-reviewed, original contributions.

Infection is an official publication of the German Society for Infectious Diseases and the Paul-Ehrlich-Society for Chemotherapy. It is regularly listed in Current Contents/Life Sciences, Current Contents/Clinical Medicine, Science Citation Index, MEDLARS and MEDLINE.

Prof. Dr. med. Walter Marget (University of Munich), founder and Editor-in-Chief.

A complete overview can only be gained by reading Infection regularly!
