Max Brödel

The Man Who Put Art into Medicine

This biography tells the story of an extraordinary man and great artist known up to now only to a very small group of medical specialists.

Max Brödel was born in Leipzig, Germany, in 1870 and died in Baltimore, USA, in 1941 after a brilliant career at the Johns Hopkins University School of Medicine. This book is based partly on unpublished writings of other well-known physicians at Johns Hopkins, such as Harvey Cushing, and partly on 19th century family letters originally written in German script. The biographical information clearly portrays Max Brödel's early development, his creation of a new way of seeing and depicting anatomical and medical information and his own description of his technical methods. This book brings examples of his magnificent medical illustrations to a wide audience for the first time.

1991. XI, 352 pp. 72 figs. Hardcover DM 98,- ISBN 3-540-97563-2

As founder and director of the first academic department of medical illustration at Johns Hopkins, Max Brödel was responsible for developing much of the philosophy and many of the techniques of medical illustration to be seen in today's scientific literature. His unique life story makes fascinating reading for both medical professionals and others interested in art and the history of science and medicine.
