Proceedings of the Nutrition Society

CONTENTS OF VOL. 39, No. 3, SEPTEMBER 1980

choices that they make between these. By Y. Y. PITRIES, G. C. EMMANS and P. DUN

By N. C. KELLY, P. C. THOMAS and D. G. CHAMBERLAIN

S. B. CAMMELL, A. R. AUSTIN and M. C. SPOONER

The use of whole blood for the protection of organic materials from degradation in the rumen. By E. R. ØRSKOV,

The effect of pre-treatment on the stability of alpha tocopherol in moist barley. By C. H. McMurray, W. J.

The effect of dietary inclusions of protein on milk secretion and nitrogen retention in cows given silage-barley diets.

Some preliminary observations on the absorbability of copper in fresh and conserved grass to sheep. By N. F. Suttle ...

Changes in plasma levels of linoleic and linolenic acids in calves recently introduced to spring pasture. By C. H.

Measurement of nutrient supply at pasture. By M. J. ULYATT, D. E. BEEVER, D. J. THOMSON, R. T. EVANS and M. J.

The rate of digestion of the dry matter of forage material conserved in different ways. By E. JILL SMITH, J. L.

Dietary manipulation of the composition of milk. By J. L. CLAPPERTON, W. BANKS and J. A. F. ROOK ...

SYMPOSIUM PROCEEDINGS

Three Handred and Posts fort Scientific Meeting

Three Hundred and Porty-jirst Scientific Meeting								
Barnes Lecture Theatre, Royal Society of Medicine, London								
19 MARCH 1980								
ANIMAL MODELS FOR THE STUDY OF HUMAN NUTRITION								
Chairman: E. M. WIDDOWSON, University of Cambridge Clinic	cal Sch	ool, C	ambrid	ge				
								PAGE
Animal models for growth. By R. J. Goss	222	555			4.53			213
Animal models for the study of energy balance. By M. I. GURR			***	***	***	***		219
Animal models for the study of protein-energy malnutrition. By R. G. V	VHITEH	EAD		***		***	***	227
Chairman: P. P. Scott, Royal Free Hospital School of Medica	ne, Lo	ndon						
Animal models for the development of the nervous system. By M. A. CR.				***			***	233
Animal models for the study of trace metal requirements. By P. Aggett					***		•••	241
Three Hundred and Forty-third Scientific Meeting								
One Hundred and Twenty-fifth Scottish Meeting								
West of Scotland Agricultural College, Auchincruive, Ayr								
24 APRIL 1980								
GRASS AND GRASS PRODUCTS IN THE EIGHTIES								
Chairman: J. A. F. ROOK, Hannah Research Institute, Ayr								
Grass and fresh grass products. By F. J. GORDON								249
Silage. By P. C. Thomas, N. C. Kelly and D. G. Chamberlain	474	200	122			110-9		257
Possibilities for improving the conservation of grass by drying. By J. M.						5550		265
Breeding for nutritive quality. By J. P. Cooper and E. L. Breese								281
The future role of grass in the food chain. By C. R. W. SPEDDING		• • •						287
The little fole of grass in the food chains by C. R. W. SPEDDING	***					•	• • • •	207
Three Hundred and Forty-fourth Scientific Meeting								
Barnes Lecture Theatre, Royal Society of Medicine, London								
22 MAY 1980								
ADDRESS FROM RETIRING PRESIDENT								
Adventures in nutrition over half a century. By Elsie M. Widdowson								293
Auventures in nutrition over han a century. By ELSIE M. WIDDOWSON	***	***	555		***	***		-93
ABSTRACTS OF COMMUNICATIONS								
ABSTRACTS OF COMMUNICATIONS								
Three hundred and Forty-second Scientific Meeting								
One Hundred and Thirty-fourth Scottish Meeting								
West of Scotland Agricultural College, Auchincruive, Ayr								
24 APRIL 1980								
The responses of hens to feeds with different proportions of their en	nergy fr	om fat.	protei	n and c	arbohyo	irate an	d the	
choices that they make between these. By Y. Y. PITRIES, G. C. EM								59A
