MARINE BIOLOGICAL ASSOCIATION OF THE UNITED KINGDOM

PATRON

H.R.H. THE PRINCE PHILIP, DUKE OF EDINBURGH, F.R.S.

OFFICERS AND COUNCIL

President: Prof. A. V. HILL, C.H., O.B.E., Sc.D., LL.D., F.R.S.

Vice-Presidents

The Earl of IVEAGH, K.G., C.B., C.M.G.

Sir NICHOLAS E. WATERHOUSE, K.B.E.

Col. Sir EDWARD T. PEEL, K.B.E., D.S.O., M.C.

Vice-Admiral Sir JOHN A. EDGELL, K.B.E., C.B.,
F.R.S.

Sir EDWARD J. SALISBURY, Kt., C.B.E., D.Sc., LL.D.,
F.R.S.

A. T. A. DOBSON, C.B., C.V.O., C.B.E.

Major E. G. CHRISTIE-MILLER

MORLEY H. NEALE, C.B.E.

The Earl of VERULAM

Prof. Sir JAMES GRAY, Kt., C.B.E., M.C., Sc.D.,
LL.D., F.R.S.

Honorary Members

Dr H. B. BIGELOW

Dr R. DOHRN

Prof. LOUIS FAGE

E. H. E. HAVELOCK, C.B., C.B.E.

Dr A. G. HUNTSMAN

Prof. HANS PETTERSSON, For. Mem. R.S.

Dr A. C. REDFIELD

Dr Å. VEDEL TÅNING

COUNCIL

Elected Members

Prof. E. BALDWIN, Ph.D.

G. E. R. DEACON, C.B.E., D.Sc., F.R.S.

Miss VERA FRETTER, D.Sc.

M. N. HILL, Ph.D.

O. D. HUNT

N. A. MACKINTOSH, C.B.E., D.Sc.

C. H. MORTIMER, Dr. phil., D.Sc.

G. E. NEWELL, Ph.D.

Prof. LILY NEWTON, D.Sc.

C. F. A. PANTIN, Sc.D., F.R.S.

Prof. R. J. PUMPHREY, Sc.D., F.R.S.

Prof. J. E. SMITH, Sc.D.

Prof. G. P. WELLS, Sc.D., F.R.S.

H. G. VEVERS, M.B.E., D.Phil.

R. S. WIMPENNY, O.B.E.

Governors

R. G. R. WALL (Ministry of Agriculture, Fisheries and
Food)

The Worshipful Company of Fishmongers:

The Prime Warden

Major E. G. CHRISTIE-MILLER

HARRISON S. EDWARDS

Prof. Sir ALISTER C. HARDY, Kt., D.Sc., F.R.S. (Oxford
University)

S. SMITH, Ph.D. (Cambridge University)

EDWARD HINDLE, Sc.D., F.R.S. (British Association)

N. B. MARSHALL (Zoological Society)

Prof. Sir JAMES GRAY, Kt., C.B.E., M.C., Sc.D.,
LL.D., F.R.S. (Royal Society)

Hon. Treasurer: HARRISON S. EDWARDS, Westhumble Lacey, Nr. Dorking, Surrey

Secretary: F. S. RUSSELL, C.B.E., D.S.C., D.F.C., LL.D., F.R.S., The Laboratory, Citadel Hill, Plymouth, Devon

SCIENTIFIC STAFF

Director: F. S. RUSSELL, C.B.E., D.S.C., D.F.C., LL.D., F.R.S.

H. W. HARVEY, M.A., Sc.D., F.R.S. (*Hydrologist*)

G. A. STEVEN, D.Sc., F.R.S.E. (*Zoologist*)

D. P. WILSON, D.Sc., F.R.P.S. (*Zoologist*)

L. H. N. COOPER, D.Sc., F.R.I.C. (*Chemist*)

G. M. SPOONER, M.B.E., M.A. (*Zoologist*)

MARY W. PARKE, D.Sc., Ph.D. (*Botanist*)

P. G. CORBIN, B.A. (*Zoologist*)

J. A. C. NICOL, B.Sc., M.A., D.Phil. (*Experimental
Zoologist*)

B. C. ABBOTT, B.Sc., Ph.D., F.Inst.P. (*Biophysicist*)

E. J. DENTON, B.A., B.Sc., Ph.D. (*Physiologist*)

N. A. HOLME, M.A. (*Zoologist*)

D. B. CARLISLE, M.A., D.Phil. (*Bursar and Endo-
crinologist*)

G. R. FORSTER, B.Sc. (*Zoologist*)

F. A. J. ARMSTRONG, A.R.I.C. (*Chemist*)

Miss D. BALLANTINE, B.Sc. (*Botanist*)

E. D. S. CORNER, M.Sc., Ph.D. (*Biochemist*)

A. J. SOUTHWARD, B.Sc., Ph.D. (*Zoologist*)

T. I. SHAW, M.A., Ph.D. (*Special Appointment:
Physiologist*)

B. R. JEWELL, B.Sc. (*Temporary Appointment:
Physiologist*)

November 1957

JOURNAL OF THE MARINE BIOLOGICAL ASSOCIATION

INSTRUCTIONS FOR THE PREPARATION OF MANUSCRIPTS

TITLE

The title of the paper should be kept as short as possible.

The name of the author at the beginning of the paper should be followed only by senior qualifications.

TEXT

Manuscripts must be typed (double-spaced) on one side of the paper, leaving ample margins, with the folios numbered. Words to be printed in italic should be underlined. The first mention of Latin names of species should be followed by the authority, except where reference is made to a work in which the authority appears (e.g. *Plymouth Marine Fauna*).

Manuscripts should be as concise as possible. Undue length will undoubtedly lead to delay in publication as the paper will be returned to the author for shortening.

All linear measurements and weights should be in the metric scale.

For symbols and abbreviations, the recommendations of the Royal Society (1951) are followed.

TABLES

Tables should be set out on separate sheets numbered in Roman numerals, and given a heading.

TEXT-FIGURES

Text-figures should be in black ink. It is important to make the lines sufficiently black when using 'Ethulon'. Areas to be mechanically stippled should be indicated by light blue pencil shading.

No drawing should be so large that it must be reduced to less than one-third of its original size. The degree of reduction need not be inserted by the author.

The size of the printed area of the *Journal* page is 18 × 12 cm. The maximum size for a full-page figure (with legend) is 19½ × 13½ cm.

Lettering, numerals, etc., should be inserted clearly in pencil in the appropriate place. This should be kept to a workable minimum, all details being included in the legend.

Axes and graduation marks on graphs

Authors are requested to see that their manuscripts are in finished form and completely ready for publication so that corrections may be reduced to a minimum, and these are confined as far as possible to the first proof. If the cost for corrections exceeds a reasonable figure, the author is liable to be charged to the full extent of the excess.

must be inked in. The lines on graph paper are not normally reproduced, and should be blue or faint grey.

Legends for figures must be typed all together on a separate sheet, and not inserted on the actual illustrations.

Text-figures are numbered in arabic numerals, and referred to in the text as 'Fig. 1', etc. Where there is a plate containing several figures, the text-figures are referred to as 'Text-fig. 1', etc.

All line-drawings are printed as text-figures, as well as photographs for which fine detail is not required.

PLATES

Photographs should be on smooth-surfaced paper, semi-matt or glossy. The edges of the photograph must be trimmed square. It is important that the background in the photograph be of a uniform tone and free from blemishes. Where several photographs make up a single plate, they are numbered 'Fig. 1', etc.

SUMMARY

Each paper must be accompanied by a Summary.

REFERENCES

References are listed alphabetically at the end of the paper. The full title of the paper must be given. Titles of papers, but not of books, are decapitalized. Titles of Journals are abbreviated as in the *World List of Scientific Publications* (3rd ed., 1952).¹ Volume (Vol.), Band (Bd.), or Tome (T.) numbers are in Arabic numerals. Where a volume appears in parts the part need only be specified where each has separate pagination. References to books should include the publisher. Citations in text to be given by author's name followed by date in brackets.

Examples:

MARSHALL, S. M., NICHOLLS, A. G. & ORR, A. P., 1939. On the growth and feeding of young herring in the Clyde. *J. mar. biol. Ass. U.K.*, Vol. 23, pp. 427-55.

RUSSELL, F. S. & YONGE, C. M., 1928. *The Seas*. 379 pp. London: Frederick Warne.

¹ In the abbreviation for this Journal, 'Mar.' is a misprint for 'mar.'

Editors: B. C. J. G. KNIGHT and A. F. B. STANDFAST

Contents of Volume 17, No. 2, October 1957

- Lwoff, A.** The concept of virus. The Third Marjory Stephenson Memorial Lecture.
- Gorrill, R. H.** Studies on lysogeny in staphylococci.
- Hošťálex, Z.** The maintenance of *Erethothecium ashbyi*.
- Williams, M. and Rittenberg, S. C.** Nuclear fusion in *Spirillum* spp.
- Rowatt, E.** Some factors affecting the growth of *Bordetella pertussis*.
- Rowatt, E.** The growth of *Bordetella pertussis*: a review.
- Cooper, P. D.** Some characteristics of vesicular stomatitis virus growth-curves in tissue culture.
- Cooper, P. D.** Paths of phosphate transfer in normal chick embryo cells and in cells infected with vesicular stomatitis virus.
- Cooper, P. D.** An osmotic barrier for inorganic phosphate in chick embryo cells and its stability during the latent and release periods of infection by vesicular stomatitis virus.
- Parle, J. N.** Yeasts isolated from the mammalian alimentary tract.
- Watson, S. W. and Raper, K. B.** *Labyrinthula minuta* n.sp.
- Littlewood, D. and Postgate, J. R.** Sodium chloride and the growth of *Desulphovibrio desulphuricans*.
- Thirst, M. L.** Hippurate hydrolysis in Klebsiella-Cloaca classification.
- Thirst, M. L.** Gelatin liquefaction: a microtest.
- Wensinck, F. and Boevé, J. J.** Quantitative analysis of the Gram reaction.
- Boyne, A. W., Eadie, J. M. and Raitt, K.** The development and testing of a method of counting rumen ciliate protozoa.
- Quadling, C. and Stocker, B. A. D.** The occurrence of rare motile bacteria in some non-motile Salmonella strains.
- Smith, E. E. B., Mills, G. T., Harper, E. M. and Galloway, B.** The cellular polysaccharide of a type II non-capsulated pneumococcus.
- Steel, R. and Walker, T. K.** A comparative study of cellulose-producing cultures and celluloseless mutants of certain *Acetobacter* spp.
- Whitfield, J. F. and Appleyard, R. K.** Formation of the vegetative pool by induced defective and healthy lysogenic strains of *Escherichia coli*.
- Goodwin, T. W.** The nature and distribution of carotenoids in some blue-green algae.
- Valentine, R. C.** The action of chemical disinfectants on bacteria in droplets compared with that in large volumes.
- Hancock, R.** Protein synthesis in a species of thermophilic bacillus.
- Kirkham, D. S.** The significance of polyphenolic metabolites of apple and pear in the host relations of *Venturia inaequalis* and *V. pirina*.
- Thorne, C. B. and Belton, F. C.** An agar diffusion method for titrating *Bacillus anthracis* immunizing antigen and its application to a study of antigen production.
- Pereira, H. G. and Kelly, B.** Dose-response curves of toxic and infective actions of adenovirus in HeLa cell cultures.
- Strange, R. E. and Dark, F. A.** Cell-wall lytic enzymes at sporulation and spore germination in *Bacillus* spp.

The subscription rate is 90s. net per volume of 3 parts, Single parts 35s. each, plus postage. Two volumes will be issued each year. Orders should be sent to

Histological Technique

H. M. CARLETON

*Sometime Research Fellow of New College,
Oxford*

with the collaboration of

R. A. B. DRURY

*Consultant Morbid Anatomist, Central
Middlesex Hospital*

Like its predecessors this new edition sets out to give in compact form the chief methods used in the microscopical examination of human and other mammalian organs.

The first six chapters cover the fundamental processes of fixation, embedding, section cutting and staining, with a separate chapter on 'type' staining methods of wide application.

These are followed by chapters on dark-ground illumination, fluorescence microscopy, injection and histochemical methods.

Accessory and special methods for the various organs and tissues are then described in detail as well as methods for the identification of morbid changes or parasites in tissues: the most suitable techniques for use in clinical conditions in which they may be found are also given.

Dr R. A. B. Drury who has assisted with the general revision of the book has also contributed new chapters on methods for histopathological processes, bacteriological methods and methods for spirochaetes.

As in the previous editions, practical notes have been appended to the methods described giving guidance on many details of technique necessary to obtain the best results, and also on the many small but hidden difficulties that may be encountered and how to avoid them.

A number of useful reference tables have been included and the summaries of the principal methods, given for quick reference in the endpapers of the book, have been considerably expanded.

THIRD EDITION

Demy 8vo 360 pages 19 illustrations

PUBLISHED 22 AUGUST 30s. net

OXFORD UNIVERSITY PRESS

The Quarterly Journal of Microscopical Science

JOINT EDITORS:

C. F. A. PANTIN, Sc.D., F.R.S.

and

JOHN R. BAKER, D.Sc.

This Journal was established in 1853, and many famous papers have been published in it. The present editorial policy is to concentrate on two particular fields: functional morphology and histochemistry.

Official Publications on Marine Biology

Her Majesty's Stationery Office publishes three important series of publications on fishery subjects:

Fishery Investigations for the Ministry of Agriculture, Fisheries and Food;
Marine Research series for the Scottish Home Department; and
Fishery Publications for the Colonial Office.

Each of these contains titles of interest to the marine biologist. A selection of recent issues is given below. A complete list of available official publications on all aspects of sea fisheries may be obtained, free of charge, from Room D.46, H.M. Stationery Office, Atlantic House, Holborn Viaduct, London, E.C. 1.

The biology of *Pandalus montagui* Leach. By M. N. Mistakidis (Fisheries Laboratory, Burnham-on-Crouch). (*Fishery Investigations*, Series II, Volume XXI, Number 4.) Illustrated. Price 14s. (post 5d.)

A seiche movement and its effect on the hydrology of Lake Victoria. By Geoffrey R. Fish (East African Fisheries Research Organisation). (*Fishery Publications*, No. 10, 1957.) Price 10s. 6d. (post 5d.)

Herring Rearing, III: Effect of Temperature and other Factors on Myotome counts. By J. H. S. Blaxter, M.A. (*Marine Research*, 1957, No. 1.) Price 4s. (post 4d.)

Benthic animals as indicators of hydrographic conditions and climatic change in Svalbard waters. By R. W. Blacker (Fisheries Laboratory, Lowestoft). (*Fishery Investigations*, Series II, Volume XX, No. 10.) Illustrated. Price 22s. 6d. (post 6d.)

Publications of the British Museum (Natural History) and the United Nations Food and Agriculture Organisation may also be obtained from

HER MAJESTY'S STATIONERY OFFICE

*at the Government Bookshops in London,
Edinburgh, Manchester, Birmingham, Cardiff, Bristol, and Belfast;
or through any bookseller*
