NEUROLOGIST

The Sudbury General Hospital is a 302 bed acute care facility and the Regional level III Trauma Centre for Northeastern Ontario. The hospital includes an 8 bed, Intensivist staffed, Intensive Care Unit, an 8 bed Medical/ Surgical Progressive Care Unit and a 24 hour Emergency Department.

The hospital requires the services of a neurologist to complement its Neurosciences Service which includes four neurosurgeons and provides a regional service to a catchment population of 240,000. The neurologist will also provide medical direction to a fully staffed and equipped Neurology Lab capable of performing Electromyograms, Evoked Potentials and Electroencephalograms.

Sudbury is the major urban centre in Northeastern Ontario and offers an excellent environment for family life. The region, with its diverse multicultural population, possesses excellent summer and winter recreational facilities, a symphony orchestra, live theatre, a Science Centre and a bilingual University.
