

# Science Deified AND Science Defied

The Historical Significance of Science  
in Western Culture

Volume 2: From the Early Modern Age  
Through the Early Romantic Era ca.  
1640 to ca. 1820

**RICHARD OLSON**

What is the connection between "mechanical philosophy" and the development of Romanticism? Between Newtonian physics and biblical literalism? Between associationist psychology and socialism? Olson's magisterial two-volume work asks how, why, to what extent, and with what consequences scientific ideas have influenced Western culture. The author treats science itself as a cultural phenomenon and subjects it to the kinds of questions we might ask of any other cultural institution.

# SCIENCE PROGRESS

*a review journal of current scientific advance*

## EDITORS

**Professor J.M. Ziman FRS**

*Science Policy Support Group, London*

**Professor Patricia Clark FRS**

*Department of Chemical and Biochemical Engineering, University College London*

*Science Progress* was first published in 1894, and its primary object has always remained the same - to publish articles written by experts to explain the latest developments in their own speciality to their colleagues working in other fields. Some of the most spectacular advances in science arise from the fusion of two or more disciplines, such as that of physics and chemistry with genetics to produce molecular biology. In this situation the journal's current practice of presenting non-specialist reviews is

particularly valuable. It seeks as far as possible to emphasize current progress on the borderlines of the scientific disciplines in the hope that it may further the unification of science and stimulate scientists to think about problems outside their own immediate fields of interest.

## Subscription Information

*Science Progress* is published quarterly. Subscription rates for 1990 are £54.50 (UK), £63.00 (overseas) and US\$105.00 (USA & Canada) post free.

*Oryx* is recognised as the leading international journal in the field of wildlife conservation. Each issue contains illustrated feature articles, news and views on topical conservation issues, a world-wide news digest, book reviews, correspondence and details of projects funded by the Society. It is aimed both at professional conservationists and those who wish to be well-informed about the dangers that threaten wildlife and what is being done to avert them.

### Subscription Information

*Oryx* is published quarterly. Non-member

subscription rates for 1990 are £38.00 (UK), £44.00 (overseas) and US\$73.50 (USA & Canada) post free. Please complete the order form below.

### Membership Information

Members receive *Oryx* free. Annual Membership: Standard £20, Family £25, Concessionary (students, retired, unwaged) £12, Associate £10, Benefactor £35, Life £1,000. Those wishing to join the Fauna and Flora Preservation Society, and receive *Oryx* as part of their subscription, should contact the FFPS at the address above.

# SET YOUR IDEAS FREE

## ideaList

ideaList will set you and your data free from the prisons of regular PC database managers. Designed for lightning-fast, full-text searching of bibliographical references and abstracts, ideaList can help you with all your other loosely-formatted data - notes, results, jottings and the rest.

- Finds any word, date or number in any record - in milliseconds - no matter how large your database or primitive your PC
  - Variable-length fields and records - up to about 10 000 words each
  - Many types of record in one database
  - 194 ways to search
  - Omnivorous importing - DBF and Medline, wordprocessor etc text files
  - Flexible exporting (including re-formatting names/initials)
  - Cross-referencing
  - Familiar and complete editor (including clipboard)
  - Windows-style screen
  - Mouse support
  - 16-record demo version available on request.
- Price: only £120/US\$195 - less 20% to academic buyers.

via the addition  
 multiplied at the end of a  
 h have been made, (b) m  
 that particular reference to

$$\frac{d\omega}{\beta^2 c^2 \epsilon}$$

$$\beta - \sum_{i=1}^k \log$$

$$\frac{2m\beta^2 \gamma^2 c}{h\omega}$$

$$\sum_{R(t)} \exp \{z_i\}$$

The storage and  
 of some type of f  
 tries are added. I

## VuwriterII

VuwriterII is a proper wordprocessor for scientists: fast, full-featured and IBM-compatible, yet as simple as ABC. Drop-down menus, helpful dialog boxes and mouse support will have you running Vuwriter's slick editor, equation layouts and scientific fonts in next to no time.

- Full wordprocessor command set
- Maths/Greek fonts
- Windows-style, WYSIWYG display
- 15 levels of sub/super-script
- Vertically aligned proportional-space text
- Varying margins within pages
- Two files on screen
- Macros
- Mailmerge
- Spelling checker
- Epson/HP/PostScript support.
- Demonstration version available on request.

Price: £425 - less 20% to academic buyers.  
 (Apply for separate prices in USA/Canada.)

VuwriterII is a product of Vuman Computer Systems Ltd.  
 Fax: (+44 865) 721205 (24hrs). Tel: Peter Kibby on (+44 865) 240201.  
 Prices: add VAT in UK; airmail and support incl; subject to change without notice.

MACINTOSH/  
 MS-WINDOWS  
 COMPATIBLE

## FITS ANY FUNCTION TO EXPERIMENTAL DATA

## Regression

Regression now makes it easy for you to fit any function to your research data, on either a PC running MS-Windows or an Apple, Macintosh.

You enter the function (model) that you wish to fit as a simple, natural language equation. The function can be any that you define: common arithmetical/transcendental functions are available, including logarithmic, exponential and trigonometric. You can include up to 10 parameters and 100 data points, and weight residuals in different ways to suit the error structure of the data.

You can store models and data, and retrieve and edit them. Examples distributed free on disk include hyperbolic functions, mono- and bi-exponential functions and Rot/Cot curves. The documentation includes discussion of optimization strategies and the strengths of different algorithms.

- Demonstration version available on request for Macintosh or PC; requires MS-Windows to run on a PC.

Price: £150/US\$225 - less 20% discount to academic purchasers.  
 Use coupon on left.  
 Trademarks owners: Apple and Macintosh/Apple Computer Inc, MS-Windows/Microsoft Corporation

## VOLUME 23 PART 1 MARCH 1990

- 1 Editorial
- 3 **Michael Ben-Chaim:** Social mobility and scientific change: Stephen Gray's contribution to electrical research
- 25 **Graeme Gooday:** Precision measurement and the genesis of physics teaching laboratories in Victorian Britain
- 53 **Ruth Barton:** 'An Influential Set of Chaps': The X-Club and Royal Society Politics 1864–1885
- Essay Reviews
- 83 **Deborah Jean Warner:** What is a scientific instrument, when did it become one, and why?
- 95 **A.G. Molland:** A very astronomical poet
- 99 Book Reviews
- 125 Books Received

## VOLUME 23 PART 2 JUNE 1990

- 129 Editorial
- 131 **D.W. Jordan:** The Magnetic Circuit Model, 1850–1890: The Resisted Flow Image in Magnetostatics
- 175 **Colin A. Russel and Shirley P. Russell:** The archives of Sir Edward Frankland: Resources, Problems and Methods
- 187 **Alberto Elena and Javier Ordonez:** History of Science in Spain: A preliminary survey
- Essay Reviews
- 197 **Antonio Perez-Ramos:** Francis Bacon and astronomical inquiry
- 207 **John V. Pickstone:** A profession of discovery: Physiology in nineteenth-century history
- 217 Book Reviews
- 253 Books Received

VOLUME 23 PART 3 SEPTEMBER 1990

- 257 **Robert Maiocchi:** The case of Brownian motion  
285 **Eric Mendoza:** Delaroche and Bérard and experimental error  
293 **Wilbur R. Knorr:** John of Tynemouth *alias* John of London: emerging portrait  
of a singular medieval mathematician  
331 Book Reviews  
381 Books Received

VOLUME 23 PART 4 DECEMBER 1990

- 385 Editorial Announcements  
386 **Pierre Costabel** (1912–1989)  
387 **Michael Hunter:** Alchemy, magic and moralism in the thought of Robert  
Boyle  
411 **A.Q. Morton:** Lectures on natural philosophy in London: 1750–1765:  
S.C.T. Demainbray (1710–1782) and the ‘Inattention’ of his countrymen  
435 **Bernadette Bensaude-Vincent:** A view of the chemical revolution through  
contemporary textbooks: Lavoisier, Fourcroy and Chaptal  
461 Book Reviews  
497 Books Received  
500 Books Reviewed

505 Report of Council for 1989–90

## THE BRITISH SOCIETY FOR THE HISTORY OF SCIENCE

**Membership** of the Society, which normally includes a subscription to *The British Journal for the History of Science*, is open to all persons approved by the Council of the Society and elected at an ordinary meeting. The annual subscription for the membership year 1990 is £18.50 (\$40.00) or £9.25 (\$25.00) for associate membership, which includes students at centres of higher education. There is an Introductory Offer for ordinary members who pay £14.00 (\$30.00) for the first year. Applications for membership should be made on a form which is available from the Society's Executive Secretary at the address below.

**Meetings:** The Society mounts an ambitious programme of meetings. The pattern is flexible, the only fixture being the three day summer meeting, held at a different British University or Polytechnic each year. About four other meetings, lasting for between one and three days, are held during the year, sometimes devoted to a clearly-defined theme or an important anniversary, and often arranged in conjunction with other scholarly societies.

*The British Journal for the History of Science* is the official organ of the Society. All correspondence on the contents of the *Journal* should be addressed to the Editor, Dr J.H. Brooke, Department of History, University of Lancaster, Lancaster LA1 4YG, England.

**Books for review** should be sent to the Reviews Editor, Dr John Henry, Science Studies Unit, University of Edinburgh, 34 Buccleuch Place, Edinburgh EH8 9JT.

**Other publications:** BSHS Monograph Series is designed to allow the publication of monographic studies in the history of science quickly and cheaply. All correspondence on the subject of monographs, and any new suggestions for titles, should be sent to the Series Editor, Dr P. Weindling, Wellcome Unit for the History of Medicine, 45–47 Banbury Road, Oxford OX2 6PE, England. Monographs are available to members at a special price, post-free from the Society's Executive Secretary. Non-members may obtain them through bookshops, or post-free from the Executive Secretary. Titles are as follows:

2. *The Letters of Georges Cuvier: A Summary Calendar*. Ed. by Dorinda Outram. 1980. £4.50/\$10.00 (£3.50/\$8.00 to members).

3. *Rationality and Ritual: The Windscale Inquiry and Nuclear Decisions in Britain*. By Brian Wynne. 1982. £7.00/\$15.00 (£5.00/\$11.00 to members).

4. *The Royal Society and Its Fellows 1660–1700: The Morphology of an Early Scientific Institution*. By Michael Hunter. 1982, reprinted 1985. £9.00/\$19.00 (£6.50/\$14.00 to members).

5. *Francis Bacon's Natural Philosophy: A New Source. A Transcription of Manuscript Hardwick 72A with Translation and Commentary*. By Graham Rees, assisted by Christopher Upton. 1984. £7.90/\$17.00 (£5.60/\$12.00 to members).

6. *Archives of the British Chemical Industry, 1750–1914: A Handlist*. By Peter J. T. Morris and Colin A. Russell. Contributing editor John Graham Smith. 1988. £14.50/\$31.00 (£9.00/\$19.00 to members).

*Lists of theses:* Each year, the Society publishes a full list of current theses in history of science in British universities. This is available free to members, and at £3.00 (\$6.00) to non-members on request to the Executive Secretary. Standing orders are accepted from members or non-members who wish to receive the list regularly.

The Society's *Newsletter*, an informal publication edited by Dr Frank A. J. L. James, RICHST, The Royal Institution, 21 Albemarle Street, London W1X 4BS, appears in January, May and September each year. It is free to members, £6.00 (\$12.00) for institutions and non-members.

All the administrative business of the Society is handled by The Executive Secretary, Wing Commander G. Bennett, 31 High Street, Stanford in the Vale, Faringdon, Oxfordshire SN7 8LH.
