

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to <http://mc.manuscriptcentral.com/phnutr>. Please contact the Editorial Office on phn.edoffice@cambridge.org regarding any other types of submission.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing interests.

The submission must include a statement within an Acknowledgements section reporting any competing interests (financial and non-financial), all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Monitoring and surveillance

Educational differences in healthy, environmentally sustainable and safe food consumption among adults in the Netherlands
Lenneke M van Busseel, Caroline TM van Rossum, Elisabeth HM Temme, Polly E Boon and Marga C Ocké 2057

The nutritional quality of supermarket own brand chilled convenience foods: an Australian cross-sectional study reveals limitations of the Health Star Rating
Claire Elizabeth Pulker, Heather Robertson Farquhar, Christina Mary Pollard and Jane Anne Scott 2068

Assessment and methodology

Misclassification of stunting, underweight and wasting in children 0-5 years of South Asian and Dutch descent: ethnic-specific v. WHO criteria
JA de Wilde, M Peters-Koning and BJC Middelkoop 2078

A Nutrition Report Card on food environments for children and youth: 5 years of experience from Canada
Alexa R Ferdinands, Dana Lee Olstad, Krista M Milford, Katerina Maximova, Candace U Nykiforuk and Kim D Raine 2088

Nutritional status and body composition

Evaluation of anthropometric measures for assessment of cardiometabolic risk in early childhood
Nicole Coles, Ravi Retnakaran, Anthony Hanley, Catherine Birken and Jill Hamilton 2100

Healthy nutrition in Germany: a survey analysis of social causes, obesity and socioeconomic status
Sebastian Mader, Malte Rubach, Wolfram Schaecke, Christine Röger, Ina Feldhoffer and Eva-Magdalena Thalmeier 2109

Nutrition communication

The influence of current food and nutrition trends on dietitians' perceptions of the healthiness of packaged food
Rachael L Thurecht, Fiona E Pelly and Sheri L Cooper 2124

Behavioural nutrition

The influence of the local food environment on diet following residential relocation: longitudinal results from RESIDential Environments (RESIDE)
Alexia Bivoltsis, Gina Trapp, Matthew Knuiman, Paula Hooper and Gina Leslie Ambrosini 2132

Correlates of sugar-sweetened beverages consumption among adolescents
Dominique Beaulieu, Lydi-Anne Vézina-Im, Stéphane Turcotte, Laurence Guillaumie, Danielle Boucher, Frédéric Douville and Dominic Simard 2145

Association between food availability and young people's fruits and vegetables consumption: understanding the mediation role of the theory of planned behaviour
May Oo Lwin, Shelly Malik and Jerrald Lau 2155

Nutritional epidemiology

Ready-to-eat cereal fortification: a modelling study on the impact of changing ready-to-eat cereal fortification levels on population intake of nutrients
Jessica D Smith, Neha Jain and Regan L Bailey 2165

Community nutrition

More to offer than books: stakeholder perceptions of a public library-based meal programme
Monica M De La Cruz, Kimmy Phan and Janine S Bruce 2179

Changes in dietary patterns when females engage in a weight management programme and their ability to meet Scientific Advisory Committee on Nutrition's fibre and sugar recommendations
Lauren Strathearn, HK Kaçar and A Avery 2189

Implementation of the Navajo fruit and vegetable prescription programme to improve access to healthy foods in a rural food desert
Michael A Sundberg, Abigail C Warren, Joan VanWassenhove-Paetzold, Carmen George, Danya S Carroll, Leandra Jewel Becenti, Akeemi Martinez, Burrell Jones, Karen Bachman-Carter, Mae-Gilene Begay, Taylor Wilmot, Henrietta Sandoval-Soland, Onagh MacKenzie, Lindsey Hamilton, Memarie Tsosie, Caitlyn K Bradburn, Emilie Ellis, Jamy Malone, Julia Pon, Ashley Fitch, Sara M Selig, Gail Gall and Sonya S Shin 2199

Interventions

A systematic review of interventions to improve the dietary intake, physical activity and weight status of children attending family day care services
Sze Lin Yoong, Melanie Lum, Jannah Jones, Erin Kerr, Maryann Falkiner, Tessa Delaney, Sam McCrabb, Li Kheng Chai, Kirsty Seward and Alice Grady 2211

Public policies

Changes in nutrition content and health claims post-implementation of regulation in Australia
Lyndal Wellard-Cole, Rebecca Li, Christine Tse, Wendy L Watson and Clare Hughes 2221

Reducing consumption of unhealthy foods and beverages through banning price promotions: what is the evidence and will it work?
Toby LS Watt, Walter Beckert, Richard D Smith and Laura Cornelsen 2228

Sugar-sweetened beverage consumption and association with weight status in Irish children: a cross-sectional study prior to the introduction of a government tax on sugar-sweetened beverages
Janas M Harrington, Catherine Perry, Eimear Keane and Ivan J Perry 2234

Nutrition composition of children's meals in twenty-six large US chain restaurants
Caroline G Dunn, Kelsey A Vercommen, Johannah M Frelief, Alyssa J Moran and Sara N Bleich 2245

Meal deals, combos and bundling: the impact on the nutrition composition of children's meals in restaurants
Sue Reeves 2253
