TABLE OF CONTENTS

Volume 19, 2011

Short-term treatment with 6-DMAP and demecolcine improves developmental competence of electrically or Thi/DTT-activated porcine parthenogenetic embryos <i>Sol Ji Park, Ok Jae Koo, Dae Kee Kwon, Ma Ninia Limas Gomez, Jung Taek Kang, Mohammad Atikuzzaman, Su Jin Kim, Goo Jang and Byeong Chun Lee</i>	1
Effect of maturation on the expression of aquaporin 3 in mouse oocyte <i>Jun Woo Jo, Byung Chul Jee, Chang Suk Suh, Seok Hyun Kim, Young Min Choi, Jung Gu Kim and Shin Yong Moon</i>	9
Nek2 and its substrate, centrobilin/Nip2, are required for proper meiotic spindle formation of the mouse oocytes <i>Seongkeun Sonn, Goo Taeg Oh and Kunsoo Rhee</i>	15
Capacitation status of activated bovine sperm cultured in media containing methyl- β -cyclodextrin affects the acrosome reaction and fertility <i>Yoku Kato, Sugita Shoei and Yoshikazu Nagao</i>	21
Multiple histone site epigenetic modifications in nuclear transfer and <i>in vitro</i> fertilized bovine embryos <i>Xia Wu, Yan Li, Lian Xue, Lingling Wang, Yongli Yue, Kehan Li, Shorgan Bou, Guang-Peng Li and Haiquan Yu</i>	31
Review: Role of tubal environment in preimplantation embryogenesis: application to co-culture assays <i>Pierre Guérin and Yves Ménézo</i>	47
Time course of meiotic spindle development in MII oocytes <i>Suha Kilani, Simon Cooke and Michael Chapman</i>	55
Optimization of artificial fertilization in the stinging catfish <i>Heteropneustes fossilis</i> (Bloch) <i>J. Godwin Christopher, A.G. Murugesan and N. Sukumaran</i>	63
Ultraviolet radiation and handling medium osmolarity affect chimaerism success in zebrafish <i>M. Francisco-Simão, J. Cardona-Costa, M. Pérez-Camps and F. García-Ximénez</i>	67
Stability of housekeeping genes and expression of locally produced growth factors and hormone receptors in goat preantral follicles <i>Isana M. A. Frota, Cintia C. F. Leitão, José J. N. Costa, Ivina R. Brito, Robert van den Hurk and José R. V. Silva</i>	71
Quality of transgenic rabbit embryos with different <i>EGFP</i> gene constructs <i>P. Chrenek, M. Bauer and A.V. Makarevich</i>	85
Association of distributions of three types of germinal vesicle stage oocytes with the canine follicle location in the ovary <i>L.X. Wang, S. Wang, J. Hou, R.L. Hu and X.R. An</i>	91
Activation of AMP-activated protein kinase may not be involved in AICAR- and metformin-mediated meiotic arrest in bovine denuded and cumulus-enclosed oocytes <i>in vitro</i> <i>Sylvie Bilodeau-Goeseels, Paul L. Panich and John P. Kastelic</i>	97
Meiotic inhibition of bovine oocytes in medium supplemented with a serum replacer and hormones: effects on meiosis progression and developmental capacity <i>Leticia Siqueira Sá Barretto, Viviane Sgobbi Dias Caiado Castro, Joaquim Mansano Garcia and Gisele Zoccal Mingoti</i>	107
Identification of a 2-cell stage specific inhibitor of the cleavage of preimplantation mouse embryos synthesized by rat hepatoma cells as 5'-deoxy-5'-methylthioadenosine <i>Masayuki Kobayashi, Koichi Saito, Shigeru Tamogami, Junko Takashima, Kano Kasuga and Ikuo Kojima</i>	117

Real-time qRT-PCR analysis of EGF receptor in cumulus-oocyte complexes recovered by laparoscopy in hormonally treated goats <i>K.C. Almeida, A.F. Pereira, A.S. Alcântara Neto, S.R.G. Avelar, L.R. Bertolini, M. Bertolini, V.J.F. Freitas and L.M. Melo</i>	127
Detrimental effects of antibiotics on mouse embryos in chromatin integrity, apoptosis and expression of zygotically activated genes <i>Jun Liu, Shuang Tang, Wei Xu, Yongsheng Wang, Baoying Yin and Yong Zhang</i>	137
Ooplasm transfer and interspecies somatic cell nuclear transfer: heteroplasmy, pattern of mitochondrial migration and effect on embryo development <i>Marina J. Sansinena, John Lynn, Kenneth R. Bondioli, Richard S. Denniston and Robert A. Godke</i>	147
In <i>X. laevis</i> embryos high levels of the anti-apoptotic factor p27BBP/eIF6 are stage-dependently found in BrdU and TUNEL-reactive territories <i>N. De Marco, C. Campanella and R. Carotenuto</i>	157
Methylation patterns in 5' terminal regions of pluripotency-related genes in mature bovine gametes <i>Jie Lan, Song Hua, Yuan Yuan, Liping Zhan, Xiaoning He and Yong Zhang</i>	165
Participation of inositol trisphosphate and ryanodine receptors in <i>Bufo arenarum</i> oocyte activation <i>M.T. Ajmat, F. Bonilla, L. Zelarayán and M.I. Bühler</i>	171
Participation of MAPK, PKA and PP2A in the regulation of MPF activity in <i>Bufo arenarum</i> oocytes <i>G. Sánchez Toranzo, F. Bonilla, M.C. Gramajo Bühler and M.I. Bühler</i>	181
Insulin–transferrin–selenium (ITS) improves maturation of porcine oocytes <i>in vitro</i> <i>Junhe Hu, Xiaoling Ma, Jian Chang Bao, Wei Li, De Cheng, Zhimin Gao, Anmin Lei, Chunrong Yang and Huayan Wang</i>	191
Blastocysts derived from adult fibroblasts of a rhesus monkey (<i>Macaca mulatta</i>) using interspecies somatic cell nuclear transfer <i>Dae Kee Kwon, Jung Taek Kang, Sol Ji Park, Ma Ninia Limas Gomez, Su Jin Kim, Mohammad Atikuzzaman, Ok Jae Koo, Goo Jang and Byeong Chun Lee</i>	199
Expression of follicle-stimulating hormone receptor (FSHR) in goat ovarian follicles and the impact of sequential culture medium on <i>in vitro</i> development of caprine preantral follicles <i>M.V.A. Saraiva, J.J.H. Celestino, V.R. Araújo, R.N. Chaves, A.P. Almeida, I.B. Lima-Verde, A.B.G. Duarte, G.M. Silva, F.S. Martins, J.B. Bruno, M.H.T. Matos, C.C. Campello, J.R.V. Silva and J.R. Figueiredo</i>	205
Follicular interactions affect the <i>in vitro</i> development of isolated goat preantral follicles <i>Ana Beatriz Graça Duarte, Roberta Nogueira Chaves, Valdevane Rocha Araújo, Juliana Jales Celestino, Gerlane Modesto Silva, Cláudio Afonso Pinho Lopes, Liliam Mara Trevisan Tavares, Cláudio Cabral Campelo and José Ricardo de Figueiredo</i>	215
Embryotoxicity and fetotoxicity following intraperitoneal administrations of hexavalent chromium to pregnant rats <i>Neila Marouani, Olfa Tebourbi, Moncef Mokni, Mohamed Tahar Yacoubi, Mohsen Sakly, Moncef Benkhalifa and Khémais Ben Rhouma</i>	229
Effect of trichostatin A on transfected donor cells and subsequent development of porcine cloned embryos <i>Fu Bo, Liu Di, Fang Qing-chang, Ren Liang, Ma Hong, Wang Liang, Guo Zhen-hua and Li Zhong-qiu</i>	237
Testicular structure and spermatogenesis of Amazonian freshwater cururu stingray <i>Potamotrygon cf. histrix</i> <i>Sérgio Fonseca Zaiden, Richard Phillip Brinn, Jaydione Luiz Marcon and Elisabeth Criscuolo Urbinati</i>	245
Effect of cryopreservation and <i>in vitro</i> culture of bovine fibroblasts on histone acetylation levels and <i>in vitro</i> development of hand-made cloned embryos <i>Liliana Chacón, Martha C. Gómez, Jill A. Jenkins, Staley P. Leibo, Gemechu Wirtu, Betsy L. Dresser and C. Earle Pope</i>	255
Sperm head binding to epithelium of the oviduct isthmus is not an essential preliminary to mammalian fertilization - review <i>R. H. F. Hunter</i>	265

Number of blastomeres and distribution of microvilli in cloned mouse embryos during compaction <i>Chao-Bo Li, Zhen-Dong Wang, Zhong Zheng, Li-Li Hu, Shu-Qi Zhong and Lei Lei</i>	271
Expression of enzymes involved in the synthesis of prostaglandin E ₂ in bovine <i>in vitro</i> -produced embryos <i>Marie Saint-Dizier, Bénédicte Grimard, Catherine Guyader-Joly, Patrice Humblot and Andrew A. Ponter</i>	277
Expression of enzymes involved in the synthesis of prostaglandin E ₂ in bovine <i>in vitro</i> -produced embryos – CORRIGENDUM <i>Marie Saint-Dizier, Bénédicte Grimard, Catherine Guyader-Joly, Patrice Humblot and Andrew A. Ponter</i>	285
Gene transfer to the mammalian reproductive tract <i>Pedro Esponda</i>	287
Effect of serum on the mitochondrial active area on developmental days 1 to 4 in <i>in vitro</i> -produced bovine embryos <i>M. Crocco, R.H. Alberio, L. Lauria and M.I. Mariano</i>	297
Survivin is a critical regulator of spindle organization and chromosome segregation during rat oocyte meiotic maturation <i>Ke Wang, Guang-Jian Jiang, Liang Wei, Xing-Wei Liang, De-Qiang Miao, Shao-Chen Sun, Lei Guo, Zhen-Bo Wang and Sheng-Sheng Lu</i>	307
Accelerated modification of the zona pellucida is the primary cause of decreased fertilizability of oocytes in the 129 inbred mouse strain <i>Toshiaki Hino, Kanako Oda, Kenji Nakamura, Hiroyuki Tateno, Yutaka Toyoda and Minesuke Yokoyama</i>	315
Birefringence parameter available for quantitative analysis of human zona hardness <i>Hiroshi Iwayama, Shinichi Hochi and Masanori Yamashita</i>	323
Effect of culture media on porcine embryos produced by <i>in vitro</i> fertilization or parthenogenetic activation after oocyte maturation with cycloheximide <i>Mariana Groke Marques, Anibal Ballarotti Nascimento, Renato Pereira da Costa Gerger, José Sergio de Arruda Gonçalves, Ana Rita de Sousa Coutinho, Renata Simões, Mayra Elena Ortiz D'Avila Assumpção and José Antônio Visintin</i>	331
Human zygote morphological indicators of higher rate of arrest at the first cleavage stage <i>Raquel Blanes Zamora, Rebeca Vaca Sánchez, Jonay González Pérez, Rubí Rodríguez Díaz, Delia Báez Quintana and José C. Alberto Bethencourt</i>	339
Freezing injuries in the embryos of <i>Piaractus mesopotamicus</i> <i>Darci Carlos Fornari, Ricardo Pereira Ribeiro, Danilo Pedro Streit Jr, Lauro Vargas, Nelson M. Lopera Barrero and Gentil Vanini de Moraes</i>	345
<i>Brycon gouldingi</i> (Teleostei, Characidae): aspects of the embryonic development in a new fish species with aquaculture potential <i>Francine Faustino, Laura Satiko Okada Nakaghi and Erika Neumann</i>	351
Role of cyclic AMP in the maturation of <i>Ciona intestinalis</i> oocytes <i>Francesco Silvestre, Alessandra Gallo, Annunziata Cuomo, Tiziana Covino and Elisabetta Tosti</i>	365

JOURNALS

Fetal and Maternal Medicine Review

Editor-in-chief

Stephen Robson, Fetal Medicine Unit, Royal Victoria Infirmary, Newcastle upon Tyne, UK

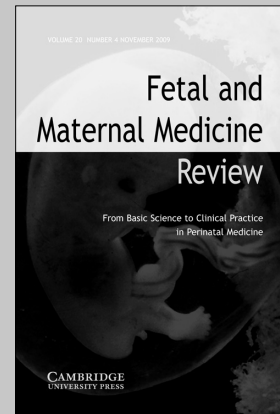

Fetal and Maternal Medicine Review publishes high-quality reviews drawn from all relevant disciplines in this rapidly expanding field. Each issue includes a selection of clinical and research reviews from experts in the field. Rapid publication and a deliberate preference for authors currently active in research ensures this journal has immediate relevance to contemporary clinical practice. Subject areas covered include fetal medicine, maternal medicine, neonatology, obstetric anaesthesia, epidemiology and basic science. It is essential reading for all engaged in the care of pregnant women and neonates, including obstetricians and neonatologists, postgraduates training for specialist careers, specialist nursing and midwifery staff.

CAMBRIDGE
UNIVERSITY PRESS

Instructions for Contributors

Zygote is an international journal dedicated to the rapid publication of original research in early embryology. It covers interdisciplinary studies on gametogenesis through fertilization to gastrulation in animals and humans. The scope has been expanded to include clinical papers, molecular and developmental genetics. While the editors will favour work describing fundamental processes in the cellular and molecular mechanisms of animal development, and, in particular, the identification of unifying principles in biology, new technologies, review articles, debates and letters will become a prominent feature.

Subjects covered include gametogenesis, sperm–oocyte interaction, gamete and embryo physiology, cell polarity, cell–cell interactions, nuclear transfer, haploidization, molecular and developmental genetics, in-vitro fertilization, stem cell and cryoconservation technologies.

To submit a manuscript, please email a complete copy, including figures and illustrations to:

- Brian Dale, Editor-in-Chief, *Zygote*, Centre for Reproductive Biology, Italy.
Email: brian.dale@virgilio.it or to
- Jacques Cohen, North American Editor, *Zygote*, Tyho-Galileo Research Laboratories, 3 Regent Street, Suite 301, Livingston, NJ 07039, USA
Email: jc@embryos.net or to
- Professor Norio Suzuki, Asian Pacific Editor, *Zygote*, Department of Biological Science, Hokkaido University, Japan.
Email: medaka-s@kdp.biglobe.ne.jp

Submission of a paper will be taken to imply that it is unpublished and it is not being considered for publication elsewhere. Authors of articles published in the journal assign copyright to Cambridge University Press (with certain rights reserved) and you will receive a copyright assignment form for signature on acceptance of your paper.

There is no formal restriction on length; however, original articles and reviews of less than 15000 words are likely to appear sooner than longer ones. Short communications should not exceed 1500 words and News and Views Commentaries 500 words.

Preparation of manuscripts

Manuscripts should be organised as follows: Title page (with full names and addresses of all authors, a running headline of up to 35 characters, and a contact address with telephone number and email address), an Abstract

of not more than 250 words followed by 5 Keywords, Introduction, Materials and Methods, Results, Discussion (combined Results and Discussion may be used for short papers), Acknowledgements, References, Endnotes, Tables and Figure Legends.

Manuscripts should be prepared using SI units

Figures

Figures should be numbered consecutively as they appear in the text. Any indication of features of special interest should also be included. Figures must be supplied electronically. They must be saved at final publication size and supplied in the following file formats: halftone figures (black & white, and colour) as TIF files at 300 dpi; black & white line figures as TIF or EPS files at 800 – 1200 dpi. When relevant, photographs should be submitted with proposed reduction or magnification indicated, when relevant, by a scale line on or beside, the illustration. The places for insertion into the text should be indicated in the text as 'Fig. 1' etc. Legends for all illustrations should be typed together, separately from the main text. A charge of £500 per figure will be made for colour photograph reproduction and printing.

Tables

Tables with concise headings should be placed at the end of the paper. Each table must have a text reference, in the form 'Table 1' etc.

References

References should be cited in the text as Conklin (1905) showed or as shown (Conklin, 1905). For papers with three or more authors use et al. A full list of references in alphabetical order should be given at the end of the text: surname of author and initials; year of publication (in parentheses); title of paper; journal or book name (the former being abbreviated in accordance with the World List of Scientific Periodicals); volume number; first and last page of the reference. For books and conference proceedings, place of publication and publisher (and editor(s) if appropriate) should be included.

Proofs

Proofs will be sent to the author for checking. Typographical or factual errors only may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

Offprints

A PDF offprint of each article will be supplied free to each first named author. Paper offprints may be purchased from the publisher if ordered at proof stage.
