WEED TECHNOLOGY

Published six times a year by the Weed Science Society of America

Jason K. Norsworthy, *Editor*

The Weed Science Society of America publishes original research and scholarship in the form of peer-reviewed articles in three international journals. *Weed Science* is focused on understanding “why” phenomena occur in agricultural crops. As such, it focuses on fundamental research directly related to all aspects of weed science in agricultural systems. *Weed Technology* focuses on understanding “how” weeds are managed. As such, it is focused on more applied aspects concerning the management of weeds in agricultural systems. *Invasive Plant Science and Management* is a broad-based journal that focuses not only on fundamental and applied research on invasive plant biology, ecology, management, and restoration of invaded non-crop areas, but also on the many other aspects relevant to invasive species, including educational activities, policy issues, and case study reports. Topics for *Weed Technology* include all aspects of weed management in agricultural, horticultural, ornamental, forestry, aquatic, turf, recreational, rights-of-ways, and other settings; weed resistance to herbicides; herbicide resistant crops; biological weed control agents; new weed management techniques; impacts of weed competition with crops; vegetation management with plant growth regulators; weed surveys; weed-related grower surveys; education; and extension. Symposia papers and reviews are accepted. Consult the editor for additional information.

Associate Editors (Assignment Year)

Jason Bond, *Stoneville, MS* (2010)

Kevin Bradley, *Columbia, MO* (2012)

Barry Brecke, *Jay, FL* (2013)

Peter Dittmar, *Gainesville, FL* (2016)

Steve Fennimore, *Salinas, CA* (2004)

Aaron Hager, *Urbana, IL* (2012)

Prashant Jha, *Ames, IA* (2016)

Amit Jhala, *Lincoln, NE* (2018)

David Johnson, *Des Moines, IA* (2019)

William Johnson, *West Lafayette, IN* (2007)

Drew Lyon, *Pullman, WA* (2018)

Patrick McCullough, *Griffin, GA* (2016)

Scott McElroy, *Auburn, AL* (2012)

Robert Nurse, *Guelph, ON* (2016)

Darren Robinson, *Ridgetown, ON* (2008)

Larry Steckel, *Jackson, TN* (2007)

Daniel Stephenson, *Alexandria, LA* (2013)

Mark VanGessel, *Georgetown, DE* (2013)

Michael Walsh, *Crawley, Australia* (2016)

Eric Webster, *Baton Rouge, LA* (2018)

Tracy Candelaria, *Managing Editor*

Officers of the Weed Science Society of America

<http://wssa.net/society/bod/>

Weed Technology (ISSN 0890-037X) is published by the Weed Science Society of America, 12011 Tejon Street, Suite 700, Westminster, CO 80234. It is published bimonthly, one volume per year, six issues per year beginning in February.

Membership includes online access to *Weed Technology*, *Weed Science*, *Invasive Plant Science and Management*, and the online *WSSA Newsletter*. Dues should be sent to WSSA, 12011 Tejon Street, Suite 700, Westminster, CO 80234 no later than December 1 of each year. Membership in the society is on a calendar-year basis only.

New subscriptions and renewals begin with the first issue of the current volume. Please visit the *Weed Technology* subscription page at <https://www.cambridge.org/core/journals/weed-technology/subscribe>; Email: subscriptions_newyork@cambridge.org in USA, journals@cambridge.org outside USA.

Weed Technology publishes six times a year in February, April, June, August, October, and December. Annual institutional electronic subscription rates: US \$411.00; UK £286.00.

Please use Editorial Manager to access manuscript submissions (<http://www.editorialmanager.com/wt>). Authors are asked to pay \$85 for the first page and \$65 per page thereafter as a portion of the cost of publication, plus an additional processing charge of \$55 per manuscript if none of the authors are WSSA members. The Editor can make exceptions in advance when justified.

The Weed Science Society of America fully subscribes to the belief that progress in science depends upon the sharing of ideas, information, and materials among qualified investigators. Authors of papers published in *Weed Technology* are therefore encouraged, whenever practicable and when state and federal laws permit, to share genotypically unique propagative materials they might possess with other workers in that area who request such materials for the purpose of scientific research.

Cover

Cereal rye cover crop that was terminated 21 days (top photo) and 7 days (bottom photo) prior to planting. See article in this issue titled “Integration of residual herbicides with cover crop termination in soybean” (p. 11). Photo credits: Kevin Bradley.

WEED TECHNOLOGY

VOLUME 34

JANUARY–FEBRUARY 2020

NUMBER 1

• RESEARCH ARTICLES

- Herbicide programs for the termination of grass and broadleaf cover crop species
Derek M. Whalen, Mandy D. Bish, Bryan G. Young, Shawn P. Conley, Daniel B. Reynolds, Jason K. Norsworthy and Kevin W. Bradley 1
- Integration of residual herbicides with cover crop termination in soybean
Derek M. Whalen, Lovreet S. Shergill, Lyle P. Kinne, Mandy D. Bish and Kevin W. Bradley 11
- Control of thiocarbamate-resistant rigid ryegrass (*Lolium rigidum*) in wheat in southern Australia
David J. Brunton, Peter Boutsalis, Gurjeet Gill and Christopher Preston 19
- Herbicide carryover to various fall-planted cover crop species
Lucas S. Rector, Kara B. Pittman, Shawn C. Beam, Kevin W. Bamber, Charles W. Cahoon, William H. Frame and Michael L. Flessner 25
- Interseeded annual ryegrass, oilseed radish, and crimson clover tolerance to residual herbicides commonly used in corn
Aaron P. Brooker, Christy L. Sprague and Karen A. Renner 35
- Spring-seeded cereal rye suppresses weeds in watermelon
Kurt M. Volmer, Thierry E. Besançon, Baylee L. Carr, Mark J. VanGessel and Barbara A. Scott 42
- Herbicide selection to terminate grass, legume, and brassica cover crop species
Kara B. Pittman, Charles W. Cahoon, Kevin W. Bamber, Lucas S. Rector and Michael L. Flessner 48
- Reduced herbicide rates for control of living mulch and weeds in fresh market tomato
Vinay Bhaskar, Robin R. Bellinder, Stephen Reiners and Antonio DiTommaso 55
- Integrating fall and spring herbicides with a cereal rye cover crop for horseweed (*Conyza canadensis*) management prior to soybean
Austin D. Sherman, Erin R. Haramoto and J. D. Green 64
- Cover crops and topography differentially influence weeds at a watershed scale
Gurbir Singh, Gurpreet Kaur, Karl W. Williard, Kelly A. Nelson and Jon E. Schoonover 73
- Non-2,4-D-resistant cotton response to glyphosate plus 2,4-D choline tank contamination
Misha R. Manuchehri, Peter A. Dotray, J. Wayne Keeling, Gaylon D. Morgan and Seth A. Byrd 82
- Tank contamination with dicamba and 2,4-D influences dry edible bean
Scott R. Bales and Christy L. Sprague 89
- Cotton response to preplant applications of 2,4-D or dicamba
Katilyn Price, Xiao Li, Ramon G. Leon and Andrew Price 96
- Efficacy of dicamba and glyphosate as influenced by carrier water pH and hardness
Pratap Devkota and William G. Johnson 101
- Weed control by 2,4-D dimethylamine depends on mixture water hardness and adjuvant inclusion but not spray solution storage time
Geoffrey P. Schortgen and Aaron J. Patton 107
- Sensitivity of dry edible bean to dicamba and 2,4-D
Scott R. Bales and Christy L. Sprague 117
- Bermudagrass tolerance of indaziflam PRE applications in forage production
Nicholas L. Hurdle, Timothy L. Grey, Patrick E. McCullough, Donn Shilling and Jason Belcher 125
- Distribution of herbicide-resistant waterhemp (*Amaranthus tuberculatus*) across row crop production systems in Texas
Vijay Singh, Russ Garetson, Josh McGinty, Peter Dotray, Gaylon Morgan, Scott Nolte and Muthukumar Bagavathiannan 129
- Comparing responses of sensitive and resistant populations of Palmer amaranth (*Amaranthus palmeri*) and waterhemp (*Amaranthus tuberculatus* var. *rudis*) to PPO inhibitors
Kathryn J. Lillie, Darci A. Giacomini and Patrick J. Tranel 140

• NOTE

- 2,4-D deposition is reduced and more variable immediately adjacent to cereal rye cover crop rows
Erin R. Haramoto, Austin D. Sherman and Jonathan D. Green 147

• CORRIGENDUM

- Using energy requirements to compare the suitability of alternative methods for broadcast and site-specific weed control – CORRIGENDUM
Guy R. Y. Coleman, Amanda Stead, Marc P. Rigter, Zhe Xu, David Johnson, Graham M. Brooker, Salah Sukkarieh and Michael J. Walsh 153
