Unprecedented Access to Rare and Hard-to-Find Texts

In the *Digital Library of Classic Protestant Texts* and the *Digital Library of the Catholic Reformation* scholars of 16th- and 17th-century Europe will discover a treasury of meticulously transcribed period editions of some of the most significant documents in Western religious history. No single library in the world holds all the titles in these collections—now students of the Renaissance can have round-the-clock access to a virtual rare book room developed specifically for them.

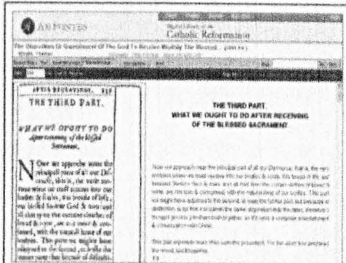

Advanced Search Technology Opens New Avenues of Research

But we offer much more than accessible content. Ad Fontes has also designed a sophisticated search engine that allows users to craft incredibly detailed queries using multiple criteria. Keywords and phrases, biblical citations, theological and cultural topics, publication data, and more can be explored individually or combined to launch targeted searches that return specific, highly relevant results in seconds.
