Environmental Conservation – Instructions for Authors

Environmental Conservation is an international quarterly journal which welcomes

- subject reviews (normally <12 000 words),
- research papers (up to 10 000 words; <4000 for rapid processing),
- guest editorials/comments (<1000 words),
- meeting reports (<1000 words), and
- book reviews (<1000 words),

relevant to scientifically-based conservation of the Earth's environment. The main criteria for acceptance of subject reviews and research papers are originality, scientific rigour, comprehensiveness, appeal to a wide readership, and acceptability of style. Research papers may be in the form of experimental, monitoring or other quantitative studies; case histories are also acceptable. Submission of material implies that it is original, has not been published in more than abstract form, is not being considered for publication elsewhere and that, if published in *Environmental Conservation*, copyright will be vested in the Foundation for Environmental Conservation. It is further understood that any regulations or obligations pertaining to acquisition and dissemination of the data have been complied with, and that the underlying work has been conducted in an environmentally and socially responsible manner. Research papers and subject reviews will be stringently refereed, and actively edited where necessary.

Initial presentation of typescripts

Typescripts (no diskette version at this stage) must be double-spaced with wide margins, in English (spelling to follow *The Concise Oxford Dictionary*, 9th Edition, 1995, ISBN 0 19 861319 9) and four copies submitted, together with one set of originals of any illustrations. Submissions are to be sent directly to the Editor, who will normally acknowledge receipt, but cannot be held responsible for safety in transit. The Editor will upon request provide a cost estimate for improving the English of a text and restyling it as necessary. A case for rapid processing of a paper should be made at submission and assumes appropriate length and style. The first page must include in the following order the title, name(s) of author(s), address(es), six keyword entries, a suggested running head, contact information for quick communication with the corresponding author (telephone, facsimile, and email if used) and a word count. It is assumed that contact details are publishable, unless the author at submission expressly asks that they are not to be. The second page must bear a Summary $\leq 5\%$ of the paper's word count which, independently of the main text, succinctly expresses the purpose, methods, results and implications of the study. A research paper will normally have such sections as: Introduction, Methods (details of study area, analyses, sources of data), Results, Discussion, Acknowledgements and References. The sections should accordingly be so ordered. A subject review should have sections appropriate to the topic addressed, but any methods and sources should preferably be detailed in a separate section.

Text styles

A recent issue of the journal from Volume 23 onwards should be consulted for style. Units, symbols and related matters are based on the CBE Manual *Scientific Style and Format* (6th Edition, 1994, ISBN 0 521 47154 0). All currencies should at first mention have a US\$ exchange rate (e.g. '£1=US\$1.55, December 1995'). Authors presenting equations are advised to use software available for the purpose. Common names of organisms should at first mention be accompanied by their full scientific names based on authoritative texts. Scientific names of genera, species and subspecies, but not of higher groups, words foreign to the English language and others suitable for italicization should be underlined, even if typed in actual

italics. Points listed for emphasis should be given as 'bullet' points (as exemplified above), unless specific numbering or lettering is essential. Footnotes will not normally be used. Year of signing, or other details of current status, must be given for international treaties and legal instruments.

References

A recent issue of *Environmental Conservation* from Volume 23 onwards will give examples of most items of stylization. All References must be cited in the text, with three or more authors being represented as 'et al.'. Where a Reference is not to a recognized periodical or substantive book, but rather to, e.g., an official document, internal technical or consultancy report, greater flexibility may be exercised. Submitted and otherwise unpublished papers should be mentioned in the text only (e.g. 'H. Harrison & N.V.C. Polunin, unpublished data 1996', or 'H. Harrison, personal communication 1996'). The chief criterion for correct referencing is that a reader be provided with the information necessary to find the item cited. References should also be given international treaties (UNTS number).

Figures and Tables

There should be no duplication of data amongst text, Figures and Tables. All Figures and Tables must be referred to in the text using Arabic numerals in order of use. Figures must be identified on the back with the first author's name and Figure number. Figures must be succinct but clear, necessary and ready for reproduction; photographs must be especially so. Maps must bear scales and photographs should include some indication of scale. Colour illustrations are acceptable if they significantly enhance the text, but authors will be charged for their publication. Figure legends ('captions') should be listed separately from the Figures, while Tables should be presented one per page complete with headings. Figure legends and Table headings should be comprehensive and incorporate any statistical, scale, key, symbol and other reference details necessary for understanding the information involved (see CBE Manual cited above).

Resubmission of revised typescripts

Authors can expect normally to have their paper returned to them, with comments of both referees and the Editor. Resubmitted typescripts should be in duplicate with one set of originals of any new or revised illustrations. These should be accompanied by a letter detailing how substantive points raised have now been addressed and by IBM-compatible file(s) on a diskette labelled with details of machine, operating system and word-processing software used. Acceptance of a paper for publication in *Environmental Conservation* will normally be confirmed when any outstanding points have been clarified with the Editor, and a copyright transfer form will then be issued for the author(s) to sign.

Proofs and offprints

Corresponding authors of subject reviews and research papers will receive 25 free offprints (5 for comments). Proofs and offprint order forms will be sent to corresponding authors of subject reviews, research papers and guest editorials/comments. Only typographical errors should normally be corrected at proof stage. Any substantial alterations of content for other reasons must be referred to the Editor.

Dr N.V.C. Polunin, Editor, & Dr Gillian Wilson, Editorial Assistant, *Environmental Conservation*, Department of Marine Sciences & Coastal Management, University of Newcastle, Newcastle upon Tyne NE1 7RU, UK.

ENVIRONMENTAL CONSERVATION

An International Journal of Environmental Science

VOLUME 23 No. 4 DECEMBER 1996

CONTENTS

EDITORIAL

- Explosive remnants of war in the human environment. By *Arthur H. Westing* 283

COMMENTS

- Gauthier's 'Linear City'. By *Richard B. Cathcart* 286
Letter from Belarus: legacy of the Chernobyl nuclear incident. By *Ivan J. Antanovich* 287

ERRATUM

- The effect of the reunification of Germany on the water chemistry and ecology of selected rivers. By *Michael S. Adams, Hartmut Kausch, Thomas Gaumert and Karl-Ernst Krüger*. In issue 23.1. p. 35 289

PAPERS

- Forest fragmentation and biodiversity: the case for intermediate-sized conservation areas. By *Pieter A. Zuidema, Jeffrey A. Sayer and Wim Dijkman* 290
A review of plastics recycling in the USA with policy recommendations. By *Constantine Hadjilambrinos* 298
Between the forests and the trees – an emerging international forest law. By *Jutta Brunnée and André Nollkaemper* 307
Assessment of global forest change between 1986 and 1993 using satellite-derived terrestrial net primary productivity. By *Christine J. Jang, Yasuko Nishigami and Yukio Yanagisawa* 315
The social role of protected areas in the new South Africa. By *Michael P. Wells* 322
Dynamic modelling of multispecies fisheries for consensus building and management. By *Matthias Ruth and James Lindholm* 332
Household energy and common lands: in rural Haryana, India. By *Mohammad Hashim Qureshi and Suresh Kumar* 343
Community perceptions of the Cross River National Park, Nigeria. By *Uwem E. Ite* 351
Preventing lead toxicosis of European waterfowl by regulatory and non-regulatory means. By *Vernon G. Thomas and Myrfyn Owen* 358

MEETING REPORTS

- Seeking Balance: Conflict, Resolution and Partnership* (Kris Freeman); *The Third International Conference on the Marine Biology of the South China Sea* (Brian Morton); *Effects of Trawling on Marine Ecosystems* (Michael J. Kaiser); *6th International Symposium on Society and Resource Management* (A.E. Luloff); *Remote Sensing (RS) and Geographical Information Systems (GIS) for Natural Resources Management* (Clare Power); *Plenary Meeting of the European Federation of Consulting Engineers Associations (EFCA)* (Roger H. Charlier); *Sustainability of Irrigated Agriculture, 16th ICID International Congress on Irrigation and Drainage* (K.N. Sharma); *7th Global Warming International Conference & Expo (GW7)* (James McCarthy); *Effects of Logging on Wildlife in the Tropics* (William F. Laurance); *The United Nations Conference on Human Settlements (Habitat II)* (Margaret R. Biswas) 365

BOOK REVIEWS

- Conservation Biology*, edited by Ian F. Spellerberg (J.L. Cloudsley-Thompson); *Amazonia: Resiliency and Dynamism of the Land and its People*, by Nigel J.H. Smith, Emanuel Adilson Serrão, Paulo T. Alvim and Italo C. Falesi (Philip M. Fearnside); *Conservation and Social Development. A study based on an assessment of Wolong and other panda reserves in China*, by K.B. Ghimire (Peter Cotgreave); *A Conservation Assessment of the Terrestrial Ecoregions of Latin America and the Caribbean*, by Eric Dinerstein, David M. Olson, Douglas J. Graham, Avis L. Webster, Steven A. Primm, Marnie P. Bookbinder and George Ledec (Kenneth R. Young); *Extractivism in the Brazilian Amazon: Perspectives on Regional Development*, edited by Miguel Clüsener-Godt and Ignacy Sachs (Philip M. Fearnside); *Natural Woodland: Ecology and Conservation in Northern Temperate Regions*, by George F. Peterken (Arthur H. Westing); *Characterization and Treatment of Sludge, Proceedings of CATS III Congress*, edited by G. de Brabandere (Roger H. Charlier); *Neotropical Birds: Ecology and Conservation*, by Douglas F. Stotz, John W. Fitzpatrick, Theodore A. Parker III and Debra K. Moskovits (David Snow); *The Fragile Tropics of Latin America: Sustainable Management of Changing Environments*, edited by Toshie Nishizawa and Juha I. Uitto (Philip M. Fearnside); *Overcoming Obstacles in Environmental Policymaking: Creating Partnerships through Mediation*, by John K. Gamman (Arthur H. Westing); *Natural Capital and Human Economic Survival*, by Thomas Prugh with Robert Costanza, John H. Cumberland, Herman Daly, Robert Goodland and Richard B. Norgaard; *Getting Down to Earth: Practical Applications of Ecological Economics*, edited by Robert Costanza, Olman Segura and Juan Martinez-Alier (Norman Myers) 376
