## *Research Papers*

- 1 CHRIS SHERLOCK. Optimal scaling of the random walk Metropolis: general criteria for the 0.234 acceptance rule
- 16 JOSH REED, AMY WARD AND DONGYUAN ZHAN. On the generalized drift Skorokhod problem in one dimension
- 29 ALEXANDRA CHRONOPOULOU AND GEORGIOS FELLOURIS. Optimal sequential change detection for fractional diffusion-type processes
- 42 GIOVANNI PUCCETTI AND LUDGER RÜSCHENDORF. Sharp bounds for sums of dependent risks
- 54 KEISUKE MATSUMOTO AND TOSHIO NAKATA. Limit theorems for a generalized Feller game
- 64 DENIS DENISOV AND VSEVOLOD SHNEER. Asymptotics for the first passage times of Lévy processes and random walks
- 85 JOHAN S. H. VAN LEEUWAARDEN AND KILIAN RASCHEL. Random walks reaching against all odds the other side of the quarter plane
- 103 KRZYSZTOF DĘBICKI, IWONA SIERPIŃSKA AND BERT ZWART. Asymptotics of hybrid fluid queues with Lévy input
- 114 HANJUN ZHANG AND YIXIA ZHU. Domain of attraction of the quasistationary distribution for birth-and-death processes
- 127 BO JIANG, JIAN TAN, WEI WEI, NESS SHROFF AND DON TOWSLEY. Heavy tails in queueing systems: impact of parallelism on tail performance
- 151 HENDRIK BAUMANN AND WERNER SANDMANN. Computing stationary expectations in level-dependent QBD processes
- 166 HOLGER FINK, CLAUDIA KLÜPPELBERG AND MARTINA ZÄHLE. Conditional distributions of processes related to fractional Brownian motion
- 184 DÉBORAH FERRÉ, LOÏC HERVÉ AND JAMES LEDOUX. Regular perturbation of  $V$ -geometrically ergodic Markov chains
- 195 BIN LI, QIHE TANG AND XIAOWEN ZHOU. A time-homogeneous diffusion model with tax
- 208 AMAURY LAMBERT AND PIETER TRAPMAN. Splitting trees stopped when the first clock rings and Vervaat's transformation
- 228 KEVIN LECKEY AND RALPH NEININGER. Asymptotic analysis of Hoppe trees
- 239 SHUHEI MANO. Ancestral graph with bias in gene conversion
- 256 SHUHEI MANO. Duality between the two-locus Wright–Fisher diffusion model and the ancestral process with recombination
- 272 M. BURKSCHAT AND J. NAVARRO. Dynamic signatures of coherent systems based on sequential order statistics

## *Short Communications*

- 288 OFFER KELLA AND WOLFGANG STADJE. Asymptotic expected number of passages of a random walk through an interval
- 295 ADAM METZLER. The Laplace transform of hitting times of integrated geometric Brownian motion
- 300 YI-CHING YAO. A duality relation between the workload and attained waiting time in FCFS  $G/G/s$  queues

*Research Papers*

- 309 ZECHUN HU AND BIN JIANG. On joint ruin probabilities of a two-dimensional risk model with constant interest rate
- 323 RENAUD MARTY. From Hermite polynomials to multifractional processes
- 344 YOUNG LEE AND THORSTEN RHEINLÄNDER. The minimal entropy martingale measure for exponential Markov chains
- 359 P. PATIE. Asian options under one-sided Lévy models
- 374 ERIK EKSTRÖM AND CARL LINDBERG. Optimal closing of a momentum trade
- 388 XIANYI WU AND XIAN ZHOU. Open bandit processes with uncountable states and time-backward effects
- 403 ABBA M. KRIEGER AND ESTER SAMUEL-CAHN. Generalized bomber and fighter problems: offline optimal allocation of a discrete asset
- 419 XIAONAN CHE AND ANGELOS DASSIOS. Stochastic boundary crossing probabilities for the Brownian motion
- 430 LOTHAR BREUER. The resolvent and expected local times for Markov-modulated Brownian motion with phase-dependent termination rates
- 439 OFFER KELLA AND ONNO BOXMA. Useful martingales for stochastic storage processes with Lévy-type input
- 450 ANTONIO DI CRESCENZO, ANTONELLA IULIANO, BARBARA MARTINUCCI AND SHELEMYAHU ZACKS. Generalized telegraph process with random jumps
- 464 ANTONIO DI CRESCENZO, ESTHER FROSTIG AND FRANCO PELLERÉY. Stochastic comparisons of symmetric supermodular functions of heterogeneous random vectors
- 475 XIUYING FENG, SHUHONG ZHANG AND XIAOHU LI. A note on the mixture representation of the conditional residual lifetime of a coherent system
- 486 GIACOMO ALETTI, ANDREA GHIGLIETTI AND ANNA MARIA PAGANONI. Randomly reinforced urn designs with prespecified allocations
- 499 YUNJIANG JIANG AND WEIJUN XU. On the number of turns in reduced random lattice paths
- 516 QUNQIANG FENG AND ZHISHUI HU. Phase changes in the topological indices of scale-free trees
- 533 ALEXANDER SHAPIRO. Consistency of sample estimates of risk averse stochastic programs
- 542 RUDOLF GRÜBEL AND PAWEŁ HITCZENKO. Pruned discrete random samples
- 557 MICHAEL R. TEHRANCHI. On the uniqueness of martingales with certain prescribed marginals
- 576 JYY-I HONG. Coalescence on subcritical Bellman–Harris age-dependent branching processes

*Short Communications*

- 592 YAOZHONG HU AND CHIHOON LEE. Drift parameter estimation for a reflected fractional Brownian motion based on its local time
- 598 LOÏC HERVÉ AND JAMES LEDOUX. Geometric  $\rho$ -mixing property of the interarrival times of a stationary Markovian arrival process

Volume 50 Number 3

*The 2012 Applied Probability Trust Lecture*

- 603 JEAN BERTOIN. Almost giant clusters for percolation on large trees with logarithmic heights

*Research Papers*

- 612 D. PERRY, W. STADJE AND S. ZACKS. A duality approach to queues with service restrictions and storage systems with state-dependent rates
- 632 BRIAN H. FRALIX, JOHAN S. H. VAN LEEUWAARDEN AND ONNO J. BOXMA. Factorization identities for reflected processes, with applications
- 654 JAMES HOOK. Critical path statistics of max-plus linear systems with Gaussian noise
- 671 MATS PIHLGÅRD AND PETER W. GLYNN. On the dynamics of semimartingales with two reflecting barriers
- 686 ANGELOS DASSIOS AND HONGBIAO ZHAO. A risk model with delayed claims
- 703 ANKUSH AGARWAL, SANTANU DEY AND SANDEEP JUNEJA. Efficient simulation of large deviation events for sums of random vectors using saddle-point representations
- 721 JENNIE C. HANSEN AND JERZY JAWORSKI. Predecessors and successors in random mappings with exchangeable in-degrees
- 741 JOCHEN BLATH, ADRIÁN GONZÁLEZ CASANOVA, NOEMI KURT AND DARIO SPANÒ. The ancestral process of long-range seed bank models
- 760 LINGJIONG ZHU. Central limit theorem for nonlinear Hawkes processes
- 772 ROMAIN ABRAHAM AND JEAN-FRANÇOIS DELMAS. A construction of a  $\beta$ -coalescent via the pruning of binary trees
- 791 JEAN BERTOIN. On largest offspring in a critical branching process with finite variance
- 801 KAI DU AND ARIEL DAVID NEUFELD. A note on asymptotic exponential arbitrage with exponentially decaying failure probability
- 810 JI HWAN CHA. On stochastic predictions of failure processes under population heterogeneity
- 827 CLAUDE LEFÈVRE AND STÉPHANE LOISEL. On multiply monotone distributions, continuous or discrete, with applications
- 848 NITIN GUPTA. Stochastic comparisons of residual lifetimes and inactivity times of coherent systems
- 861 JUSTIN SALEZ. Joint distribution of distances in large random regular networks
- 871 SHAUL K. BAR-LEV, ERNST SCHULTE-GEERS AND WOLFGANG STADJE. Conditional limit theorems for the terms of a random walk revisited

*Short Communications*

- 883 DAVID ARISTOFF AND CHARLES RADIN. Emergent structures in large networks
- 889 WILLIAM GARNER AND DIMITRIS N. POLITIS. The correct asymptotic variance for the sample mean of a homogeneous Poisson marked point process
- 893 K. B. ATHREYA AND JYY-I HONG. An application of the coalescence theory to branching random walks
- 900 XIN LIAO, ZUOXIANG PENG AND SARALEES NADARAJAH. Tail properties and asymptotic expansions for the maximum of the logarithmic skew-normal distribution

Volume 50 Number 4

*Research Papers*

- 909 M. BONDAREVA. Nondecreasing lower bound on the Poisson cumulative distribution function for  $z$  standard deviations above the mean
- 918 MARIE-ANNE GUERRY. On the embedding problem for discrete-time Markov chains
- 931 TAKAYUKI FUJII. Nonparametric estimation for a class of piecewise-deterministic Markov processes
- 943 GUAN-YU CHEN AND LAURENT SALOFF-COSTE. Comparison of cutoffs between lazy walks and Markovian semigroups
- 960 KONSTANTIN AVRACHENKOV, ALEXEY PIUNOVSKIY AND YI ZHANG. Markov processes with restart
- 969 THOMAS MIKOSCH, GENNADY SAMORODNITSKY AND LALEH TAFAKORI. Fractional moments of solutions to stochastic recurrence equations
- 983 HOLGER FINK. Conditional characteristic functions of Molchan-Golosov fractional Lévy processes with application to credit risk
- 1006 FENG CHEN AND PETER HALL. Inference for a nonstationary self-exciting point process with an application in ultra-high frequency financial data modeling
- 1025 NICOLE BÄUERLE AND ZEJING LI. Optimal portfolios for financial markets with Wishart volatility
- 1044 NAFNA BLANGHAPS, YUVAL NOV AND GIDEON WEISS. Sojourn time estimation in an  $M/G/\infty$  queue with partial information
- 1057 SOPHIE MERCIER AND I. T. CASTRO. On the modelling of imperfect repairs for a continuously monitored gamma wear process through age reduction
- 1077 PREDRAG R. JELENKOVIĆ AND MARIANA OLVERA-CRAVIOTO. Convergence rates in the implicit renewal theorem on trees
- 1089 TUNG-LUNG WU, JOSEPH GLAZ AND JAMES C. FU. Discrete, continuous and conditional multiple window scan statistics
- 1102 DANIEL WEI-CHUNG MIAO. Analysis of the discrete Ornstein–Uhlenbeck process caused by the tick size effect
- 1117 STEPHEN CONNOR. Optimal coadapted coupling for a random walk on the hyper-complete graph
- 1131 JOHANNES KUGLER AND VITALI WACHTEL. Upper bounds for the maximum of a random walk with negative drift
- 1147 FRANK BALL AND DAVID SIRL. Acquaintance vaccination in an epidemic on a random graph with specified degree distribution
- 1169 MAY-RU CHEN AND MARKUS KUBA. On generalized Pólya urn models
- 1187 LARRY GOLDSTEIN AND GESINE REINERT. Stein’s method for the beta distribution and the Pólya–Eggenberger urn

*Short Communications*

- 1206 LARS HOLST. Probabilistic proofs of Euler identities
- 1213 Index

**Applied Probability journals online at**  
**<http://projecteuclid.org/jap>**  
**<http://projecteuclid.org/aap>**

*Journal of Applied Probability* and *Advances in Applied Probability* are now available online, in partnership with Project Euclid, at no extra cost to subscribers.

The online editions include

- an electronic version of each new issue (in PDF format) some weeks before the printed version becomes available
- an archive of all issues since 1998
- full bibliographic details of each article, along with its abstract and an actively linked list of references
- a search facility, allowing users to search by author name, article title, subject or keyword, or through the full text of the abstract or the article itself

## Access

The abstract and reference list of each article are available free to all users; full access to the archive, including the full text of articles, is currently available at no extra charge to subscribers to the print editions.

Individual subscribers should register with Project Euclid by creating a user profile, entering their JAP and/or AAP subscription number where a 'subscriber code' is requested.

Institutional subscribers should complete and return a licence agreement (available at <http://www.appliedprobability.org>) to the Applied Probability office along with the details of their IP range.

Non-subscribers can gain access to individual articles on a pay-per-view basis.

For further information, please contact Sue Boyles: telephone +44 114 222 3922, fax +44 114 222 3926, email [s.c.boyles@sheffield.ac.uk](mailto:s.c.boyles@sheffield.ac.uk), write to

Applied Probability  
School of Mathematics and Statistics  
University of Sheffield  
Sheffield S3 7RH, UK

## CELEBRATING 50 YEARS OF THE APPLIED PROBABILITY TRUST

The Applied Probability Trust presents the

### *50th Anniversary*

*Journal of Applied Probability* special lectures

Sir John Kingman

Applied Probability and applied probability;  
now, then and in the future

Dan Crisan  
(Imperial)

Classical and modern results in the theory  
and applications of stochastic filtering

Alexander Gnedin  
(Queen Mary)

A survey of lambda-coalescents

*Wednesday 9 April 2014, 2–5pm*

The lectures will take place at

The University of Sheffield  
Hicks Building  
Lecture Theatre 7  
Hounsfield Road, UK

For further information, please contact Sue Boyles  
by email [s.c.boyles@sheffield.ac.uk](mailto:s.c.boyles@sheffield.ac.uk) or visit  
<http://www.appliedprobability.org>

## Subscription rates

Subscription rates for volume **50** (2013) of *Journal of Applied Probability* (JAP) are as follows (post free and including online access at <http://projecteuclid.org/jap/>): US\$326.00; A\$316.00; £206.00 for libraries and institutions; or US\$109.00; A\$106.00; £69.00 for individuals belonging to a recognised scientific society. The subscription rates for volume **45** (2013) of *Advances in Applied Probability*, the companion publication, are the same; if both journals are ordered directly from the Applied Probability office at the same time, the combined price is discounted by 10%. Please send all enquiries to: Applied Probability Subscriptions, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK (telephone +44 114 222 3922; fax +44 114 222 3926; email [s.c.boyles@sheffield.ac.uk](mailto:s.c.boyles@sheffield.ac.uk)). Cheques, money orders, etc. should be made payable to 'Applied Probability'. Payment is acceptable in US, Australian or UK currency, or by Visa or Mastercard. We can provide back issue prices on application.

## Notes for contributors

Research papers are published in both *Journal of Applied Probability* (JAP) and *Advances in Applied Probability* (AAP), with longer papers typically appearing in AAP. However, assignment of papers between the two journals is made by the Editor on an issue-by-issue basis. A submission to Applied Probability is considered as a submission to either journal. In addition, AAP publishes letters specifically related to papers that have appeared in AAP and JAP publishes short communications of a few printed pages in the nature of notes and letters specifically related to papers that have appeared in JAP. Review papers and papers in *stochastic geometry and statistical applications* are published in AAP.

Fifty offprints of each paper will be provided free, with additional offprints available at cost.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Submitted papers should be in English. It is the author's responsibility to ensure an acceptable standard of language, and a paper failing to meet this requirement may go back to the author for rewriting before being sent out for review.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2010 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the  $\LaTeX$  class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted as hard copy or as electronic files. All submissions will be acknowledged on receipt and **must be accompanied by a covering letter stating the author's postal address and affiliation**. Hard copy: Send **all** submissions to the Applied Probability office in Sheffield, and not to individual editors. Two copies of the paper, at least one of which should be double spaced, should be sent to: **Executive Editor, Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK**. Electronic submission: Please email a **double-spaced PostScript™ (.ps)** or portable document format (.pdf) file, not exceeding 1 Mb. **The files must be clearly identified by name in a separate covering message**. The address for email submissions is [submissions\\_japaap@sheffield.ac.uk](mailto:submissions_japaap@sheffield.ac.uk).

## Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021–9002/13
