

Tables should be as simple and as few as possible. When constructing tables, it would be helpful if authors would take into account the size and shape of the pages of *Animal Production*.

Summary: Every article should have a short summary complete in itself and understandable without reference to the paper.

References: Only papers closely related to the author's work should be referred to; exhaustive lists should be avoided. Bibliographical details should be in the following order: author's name, initials, year, title of paper, title of journal (abbreviated according to the World List of Scientific Periodicals), volume of journal, first and last page of paper. References should be listed in alphabetical order. When abstracts are referred to the page reference should be followed by (Abstr.).

Examples:

BLAXTER, K. L., & WILSON, R. S., 1962. The voluntary intake of roughages by steers. *Anim. Prod.*, 4: 351-358.

HAMMOND, J., 1932. *Growth and the Development of Mutton Qualities in the Sheep*. Oliver & Boyd, Edinburgh.

In the text, references should be made by giving author and year; at the first mention all authors should be named, thereafter the first author followed by *et al.* should be used for papers with more than two authors.

Proofs are supplied once in galley form and must be returned corrected to the Editors within seven days. Only essential corrections should be made.

Reprints: Twenty-five reprints of each paper will be supplied free to authors on request. Further copies may be purchased if the order is sent at the galley proof stage. No free reprints are supplied for *Notes*, but copies may be purchased.

Animal Production is published four times a year. Annual subscription for every four numbers is 90s. (or \$14.00 in the U.S.A. and Canada) and the price for a single number is 25s. (or \$4.00) net.

Business matters, including regular subscriptions and sales (the current Journal, back numbers, the *Proceedings of the British Society of Animal Production* (1944-58) and reprints), should be addressed to Messrs. Oliver & Boyd Ltd., Tweeddale Court, 14 High Street, Edinburgh 1.

L. E. MOUNT, A.R.C. Institute of Animal Physiology.

K. J. ROBERTSON, Livestock Records Bureau.

CONTENTS

	PAGE
HINTZ, H. F., and HEITMAN, H., Jr. Sewage-grown algae as a protein supplement for swine	135
COLE, D. J. A., DUCKWORTH, J. E., and HOLMES, W. Factors affecting voluntary feed intake in pigs. I. The effect of digestible energy content of the diet on the intake of castrated male pigs housed in holding pens and in metabolism crates	141
COLE, D. J. A., DUCKWORTH, J. E., and HOLMES, W. Factors affecting voluntary feed intake in pigs. II. The effect of two levels of crude fibre in the diet on the intake and performance of fattening pigs	149
STOBO, I. J. F., ROY, J. H. B., and GASTON, HELEN J. The protein requirement of the ruminant calf. III. The ability of the calf weaned at five weeks of age to utilise urea given as a supplement to a low-protein concentrate	155
LANGLANDS, J. P. Studies on the nutritive value of the diet selected by grazing sheep. II. Some sources of error when sampling oesophageally fistulated sheep at pasture	167
WIENER, G. A comparison of the body size, fleece weight and maternal performance of five breeds of sheep kept in one environment	177
KAY, M., MACLEOD, N. A., MCKIDDIE, G., and PHILIP, EUPHEMIA B. The nutrition of the early-weaned calf. X. The effect of replacement of fish meal with either urea or ammonium acetate on growth rate and nitrogen retention in calves fed <i>ad libitum</i>	197
SWAN, H., and LAMMING, G. E. Studies on the nutrition of ruminants. II. The effect of level of crude fibre in maize-based rations on the carcass composition of Friesian steers	203
HOLME, D. W., and COEY, W. E. The effects of environmental temperature and method of feeding on the performance and carcass composition of bacon pigs	209
TOPPS, J. H., and ELLIOTT, R. C. Partition of nitrogen in the urine of African sheep given a variety of low-protein diets	219
RICKABY, C. D. Protein levels in practical diets for bacon pigs	229
HEAP, F. C., and LODGE, G. A. Changes in body composition of the sow during pregnancy	237
EADIE, J. M., HOBSON, P. N., and MANN, S. O. A note on some comparisons between the rumen content of barley-fed steers and that of young calves also fed on a high concentrate ration	247
VEUM, T. L., POND, W. G., and VAN VLECK, L. D. A note on correlations between milk production and milk composition of sows and the growth and haemoglobin of their pigs	251
SMITH, W. C., TONKS, H. M., and LAWRENCE, N. A note on the use of back rasher ratios as predictors of lean percentage of pigs of bacon weight	255
LODGE, G. A. A note on the substitution of sorghum for barley in diets for fattening pigs	259
GUNN, R. G. A note on hill ewe mortality	263
