

**NEW FROM BUTTERWORTHS**

## **Recent Advances in Animal Nutrition – 1983**

**Edited by W Haresign, PhD, University of Nottingham School of Agriculture**

This important new book is essential reading for all those concerned with improving the economic efficiency of farm animal production. Based on the proceedings of the 17th Nutrition Conference for Feed Manufacturers *Recent Advances in Animal Nutrition – 1983* discusses the latest research into the nutritional requirements of livestock together with the assessment and development of feedstuffs.

The major part of the book covers both pig and ruminant nutrition with particular attention to calf nutrition. As a review of recent technical developments in farm animal nutrition, this book will be invaluable to those in the feedstuffs industry as well as being a useful reference guide for research workers, advisory staffs and students.

**Contents:** How many replicates and other considerations in the design of field trials · The interpretation of response data from animal feeding trials · Errors in measurement and their importance in animal nutrition · Cereal replacers as alternative sources of energy for pigs · Predicting the energy content of pig feeds · The use of fat in sow diets · Vitamin responsive conditions in breeding pigs · Systems of calf rearing · Milk replacers for calves · Nutrient requirement of the breeding ewe · Growth promoters and their importance in ruminant livestock production · Some nutritional aspects of high yielding dairy herds · Feeding for high margins in dairy cows · Copper in animal feeds · List of participants · Index

July 1983      256 pages      234 × 156mm      0 408 71016 0      Hardcover      Illustrated      £24.00

Order from your local bookseller or direct from the publishers

**Butterworths**, Borough Green, Sevenoaks, Kent TN15 8PH

**Illustrations.** The same material should not normally be presented in tables and figures. Legends should be typed on a separate sheet.

- (a) Diagrams should be drawn in Indian ink, about twice the size of the finished block, on Bristol board, stout tracing paper or plastic film. Photographed diagrams are also accepted. Lettering inside the framework of the diagram should be avoided as far as possible but if unavoidable it should be included on a fly-leaf. Marginal lettering should be inserted lightly in pencil on the original diagram or on a fly-leaf.
- (b) Photographs intended for half-tone reproduction should be on glossy paper. They will be accepted only if found necessary by the Editors.
- (c) Colour plates are unlikely to be accepted unless authors bear the cost.

**Tables** should be as simple and as few as possible. Each table should be typed on a separate sheet.

**Abstract.** Every article should have a short abstract (not more than **250** words) complete in itself and understandable without reference to the paper. *The abstract will be printed at the beginning of the paper.*

**References.** Only papers closely related to the author's work should be referred to; exhaustive lists should be avoided. The arrangement of references should be as in recent papers in *Animal Production*; details are given in the notes for guidance.

**Proofs** are supplied once and must be returned corrected to the Editors *within 3 days*. Only essential corrections should be made.

**Reprints.** Twenty-five reprints of each paper will be supplied free to authors on request. Further copies may be purchased if the order is sent at the proof-stage.

*Animal Production* is published six times a year in two volumes. Annual subscription is £56·00 (or \$120·00 in the USA and Canada) and the price for a single part is £10·00 (or \$22·00) net.

*Proceedings of the British Society of Animal Production (New Series)* ceased publication in 1975 and the material is now published as a separate section in the June issue of *Animal Production*.

Correspondence regarding subscriptions and sales (current and back numbers of the Journal and the Proceedings), should be addressed to: Scottish Academic Press Ltd, 33 Montgomery Street, Edinburgh, Scotland EH7 5JX.

Other enquiries, including those concerning copyright, should be addressed to Durrant Periodicals, Winton Lea, Pencaitland, East Lothian, Scotland EH34 5AY.

## CONTENTS

PAGE

WOOD, P. D. P. and WILSON, P. N. Some attributes of very high-yielding British Friesian and Holstein dairy cows	157
LAND, R. B., CARR, W. R., HART, I. C., OSMOND, T. J., THOMPSON, R. and TILIKARATNE, N. Physiological attributes as possible selection criteria for milk production. 3. Plasma hormone concentrations and metabolite and hormonal responses to changes in energy equilibrium	165
STEWART, T. S. and MARTIN, T. G. Optimal mature size of Angus cows for maximum cow productivity	179
EDWARDS, SANDRA A. and POOLE, D. A. The effects of including sodium bicarbonate in the diet of dairy cows in early lactation	183
WILLIAMS, P. E. V., MACDEARMID, A., INNES, G. M. and BREWER, A. Turnips with chemically treated straw for beef production. 2. Effect of turnips on the degradability of straw in the rumen	189
THOMAS, C., TETLOW, R. M., GIBBS, B. G. and GILL, MARGARET. Beef production from silage. 3. The effect of supplements of hay and dried grass on the performance of beef cattle	195
MURPHY, J. J. and MORGAN, D. J. Effect of inclusion of protected and unprotected tallow in the supplement on the performance of lactating dairy cows	203
SIMM, G., ALLISTON, J. C. and SUTHERLAND, R. A. A comparison of live animal measurements for selecting lean beef sires	211
DUCKER, M. J., HAGGETT, ROSEMARY A., FISHER, W. J., BLOOMFIELD, GLENYS A. and MORANT, S. V. An evaluation of tail paint as an aid or alternative to oestrus detection	221
KAIM, M., FOLMAN, Y., NEUMARK, H. and KAUFMANN, W. The effect of protein intake and lactation number on post-partum body-weight loss and reproductive performance of dairy cows	229
PAHWA, G. S. and PANDEY, R. S. Hormonal changes in blood plasma and milk of post-partum buffaloes ( <i>Bubalus bubalis</i> )	237
ALBERRO, M. Comparative performance of F <sub>1</sub> Friesian × zebu heifers in Ethiopia	247
ELLIS, M., SMITH, W. C., HENDERSON, RUTH, WHITTEMORE, C. T., LAIRD, R. and PHILLIPS, P. Comparative performance and body composition of control and selection line Large White pigs. 3. Three low feeding scales for a fixed time	253
MITCHELL, K. G., PARTRIDGE, I. G., BARBER, R. S. and PITTMAN, R. J. Further studies on the value of liquid skimmed milk as a protein source for growing pigs	259
TAYLOR, S. J., COLE, D. J. A. and LEWIS, D. Amino acid requirements of growing pigs. 4. Methionine plus cystine	265
BUTCHER, CATHERINE, BRYANT, M. J., OWEN, E., LEACH, I. and MACHIN, D. H. The effects of slaughter weight upon the growth and carcass characteristics of rabbits fed diets of different dietary metabolizable energy concentrations	275
DONEY, J. M., PEART, the late J. N., SMITH, W. F. and SIM, D. A. Lactation performance, herbage intake and lamb growth of Scottish Blackface and East Friesland × Scottish Blackface ewes grazing hill or improved pasture	283
CUE, R. I. Correlated responses in lamb mortality due to long term selection for cannon bone length and fleece medullation in sheep	293
CAMERON, N. D. and DEEBLE, the late F. K. A note comparing lambs from three crossing-ram breeds	301
BEAL, W. E. A note on synchronization of oestrus in post-partum cows with prostaglandin F <sub>2</sub> and a progesterone-releasing device	305
WOOD, J. D., BAYNTUN, J. A. and KEMPSTER, A. J. A note on the comparison of two dissection methods used routinely in Britain for beef carcass evaluation	309
