

ANIMAL PRODUCTION

JOURNAL OF THE BRITISH SOCIETY OF ANIMAL PRODUCTION

FEBRUARY 1972

VOL. 14 PART 1

LONGMAN

INFORMATION FOR CONTRIBUTORS TO *ANIMAL PRODUCTION*

Detailed notes for guidance in the preparation of manuscripts are printed in volume 13, pages ix to xx. A few general points are given below.

Animal Production publishes papers on original research provided that they have not been and, with the exception of authors' summaries, will not be published elsewhere without the Editors' written permission. Authors' summaries can be reproduced if full acknowledgement of the source is made.

Contributions may be in the field of animal production, or in any related scientific field. Reports on techniques will be published only as appendices to scientific papers. Results of research which do not warrant a comprehensive presentation may be submitted for consideration as *Notes*. *Notes* are not intended for the publication of interim results. They should not exceed 2000 words or the equivalent inclusive of tables and illustrations.

Manuscripts should be typewritten in double spacing with wide margins. Each page and the lines on each page should be numbered. *Two* copies of the typescript (and of illustrations) should be sent to

Dr. Gerald Wiener,
Animal Production,
A.R.C. Animal Breeding Research Organisation,
West Mains Road, Edinburgh EH9 3JQ, Scotland

Manuscripts are not returned with proofs; authors should therefore retain copies.

Units of measurement. Metric units should be used. SI units will be accepted but are not obligatory.

Symbols and abbreviations. Authors should consult the notes prepared for guidance. Levels of statistical significance which can be indicated without explanation are: * = $P < 0.05$, ** = $P < 0.01$, *** = $P < 0.001$.

Illustrations. The same material should not normally be presented in tables and figures. Legends should be typed on a separate sheet.

- (a) Diagrams should be drawn in Indian ink, about twice the size of the finished block, on Bristol board, stout tracing paper or plastic film. Photographed diagrams are also accepted. Lettering inside the framework of the diagram should be inserted in Indian ink. Marginal lettering may, if preferred, be inserted lightly in pencil.
- (b) Photographs intended for half-tone reproduction should be on glossy paper. They will be accepted only if found necessary by the Editors.
- (c) Colour plates are unlikely to be accepted unless authors bear the cost.

Tables should be as simple and as few as possible. When constructing tables, it would be helpful if authors would take into account the size and shape of the pages of *Animal Production*.

ANIMAL PRODUCTION

(Journal of the British Society of Animal Production)

INCREASED FREQUENCY OF PUBLICATION FROM 1972

To make provision for the continuing increase in the number of papers for publication and to permit further expansion, the Journal is published

SIX TIMES PER YEAR

from February 1972

in two volumes per year

each of three parts

The ANNUAL SUBSCRIPTION for two volumes will be £9·00 (\$24·00 in U.S.A. and Canada). Single parts will cost £1·75 (\$5·00)

ANIMAL BREEDING ABSTRACTS

In addition to preparing this world-famous journal, the Commonwealth Bureau of Animal Breeding and Genetics compiles annotated bibliographies on request. The following are among those likely to be of interest to poultry breeders:

Number	Subject	Period covered	Number of references	Price
85	Guinea Fowl. Breeding and management	1947-68	23	£0.30
100	Genetic aspects of the avian leucosis, Marek's disease (lymphomatosis) and Rous sarcoma group of diseases	1940-68	71	£1.05
113	Genotype-environment interaction in poultry	1951-69	50	£0.75
145	Random-sample testing	1965-70	14	£0.30
149	Inheritance of feather colour and skin colour in ducks	1940-70	14	£0.30
155	Breeding and performance of ducks	1961-71	89	£1.30

In addition to the full title reference, the abstract published in *Animal Breeding Abstracts* is reproduced. They can be obtained on application to the Director of the Bureau, The King's Buildings, West Mains Road, Edinburgh EH9 3JX. The prices include postage by ordinary mail, and the remittance should be sent with the order *unless you want it posted by air mail*. If the material is to be sent by air mail, do not send money with your request. You will receive an invoice which includes air mail postage.

PUBLISHED JANUARY 1972

MAMMALIAN HYBRIDS

A Check-List with Bibliography

by **Annie P. Gray**

This completely revised and greatly enlarged edition of a widely used reference book contains more than 570 entries, a bibliography of well over 1200 titles, and a 21-page index of species. The hybrids are grouped within families, and arranged alphabetically under the scientific names of the species involved; vernacular names are also given. Wherever possible, the direction of the cross and the degree of fertility of the hybrids have been indicated. Records of unsuccessful attempts at hybridisation are also included.

Technical Communication No. 10 (revised) of the Commonwealth Bureau of
Animal Breeding and Genetics, Edinburgh.

PERFORMANCE RECORDING IN SHEEP

by **J. B. Owen**

With a foreword by **J. L. Read**

The application of performance recording to sheep has lagged behind that of other forms of livestock production. Recently, however, interest has been growing in the role of recording in increasing efficiency in the production of wool, mutton, and sheep's milk for cheese. In collecting and making available the somewhat scattered information on sheep recording from various parts of the world, Dr. Owen of the School of Agriculture, Cambridge, has performed a most valuable service to an industry which seems to be at the crossroads.

The book opens with a look at the development of performance recording in livestock breeding in general. After a detailed examination of objectives in sheep improvement, the author considers the use of records in achieving these aims. Accounts of recording schemes already operating in sixteen countries are presented. In many cases, passages are quoted from the regulations of organising bodies, which illustrate how they deal with problems of recording under practical flock conditions.

Technical Communication No. 20 of the Commonwealth Bureau of Animal
Breeding and Genetics, Edinburgh.

The Indian Journal of Animal Sciences

The name of The Indian Journal of Veterinary Science and Animal Husbandry has been changed to The Indian Journal of Animal Sciences. With a view to accommodating the increasing flow of articles, the periodicity of this journal has also been changed into a bi-monthly from a quarterly. This journal, now in its 40th year of publication, presents articles reporting the original research work on different aspects of Animal Sciences—Animal Husbandry, Animal Health, Dairy Science, Dairy Technology, Animal Production, etc.—conducted in India and other countries.

Single copy : Sh.7 d6. \$0.85

Annual Subscription : Sh.45.00 \$5.00

Copies available from :

**The Business Manager,
Indian Council of Agricultural Research,
Krishi Bhavan, New Delhi 1.**

Does your colleague know something you don't know?

Check his pocket.

If you see a copy of "Current Contents" there, you can bet he does. That pocket-sized weekly publication reproduces the contents pages of every important journal published here or abroad in your field. All he has to do is scan *Current Contents* for comprehensive current awareness. If he sees something especially interesting, he sends off a card to us for original tear sheets of the article, or corresponds directly with the author, whose name and address is included.

Shouldn't you know as much as he does?

There are five editions of *Current Contents*, one or more specifically in your field. Check the one(s) you're interested in and we'll send you a sample copy along with full details, including advantageous group and educational subscription rates.

Index Veterinarius

A COMPLETE BIBLIOGRAPHY OF VETERINARY LITERATURE

This subject and author index of current literature on veterinary and related sciences is produced by the Commonwealth Bureau of Animal Health and was first published in 1933. It is issued quarterly and each year about 15,000 references are listed.

For compilation of the *Index* 700 periodicals in 22 languages are searched and coverage embraces the whole world.

Annual subscription is £22.50 (\$58.50) (reduced rate to residents in British Commonwealth or Republic of Ireland—£11.25). Orders may be sent to the Central Sales Branch, Commonwealth Agricultural Bureaux, Farnham Royal, Slough, Bucks.

The Journal of Agricultural Science

Vol. 77, Part 1, August 1971

Articles include:

- F. O. OLUBAJO and V. A. OYENUGA The measurement of yield, voluntary intake and animal production of tropical pasture mixtures. (With 1 text-figure)
- MAHENDRA SINGH and M. G. JACKSON The effect of different levels of sodium hydroxide spray treatment of wheat straw on consumption and digestibility by cattle
- SURESH CHANDRA and M. G. JACKSON A study of various chemical treatments to remove lignin from coarse roughages and increase their digestibility. (With 2 text-figures)
- IDRIS MOHMED NUR Different methods for determining leaf area of some oil crops. (With 1 text-figure)
- M. A. NAGA and K. EL-SHAZLY The prediction of the nutritive value of animal feeds from chemical analyses. (With 1 text-figure)
- M. A. SHARAFELDIN and A. A. KANDEEL Post-lambing maternal behaviour. (With 2 plates)
- G. C. TANEJA, P. K. GHOSH, R. K. ABICHANDANI and D. GOYAL Seasonal variations in blood composition in high and low potassium type Marwari sheep
- P. C. LONGDEN Advanced sugar-beet seed
- R. J. HAGGAR and M. B. AHMED Seasonal production of *Andropogon gayanus*. III. Changes in crude protein content and *in vitro* dry-matter digestibility of leaf and stem portions. (With 4 text-figures)
- P. J. SALTER, D. S. WEBB and J. B. WILLIAMS Effects of pulverized fuel ash on the moisture characteristics of coarse-textured soils and on crop yields. (With 1 text-figure)
- M. J. DURRANT and A. P. DRAYCOTT Uptake of magnesium and other fertilizer elements by sugar beet grown on sandy soils. (With 3 text-figures)
- M. E. CASTLE and J. N. WATSON A comparison between a diploid and a tetraploid ryegrass for milk production. (With 2 text-figures)
- Y. P. KALRA Application of split-root technique in orthophosphate absorption experiments
- T. D. JOHNSTON The effects of plant density and fertilizer application on yield components in three marrow-stem kale (*Brassica oleracea* L.) varieties
- V. C. MASON and F. WHITE The digestion of bacterial mucopeptide constituents in the sheep. 1. The metabolism of 2,6-diaminopimelic acid. (With 5 text-figures)
- V. C. MASON and G. MILNE The digestion of bacterial mucopeptide constituents in the sheep. 2. The digestion of muramic acid. (With 1 text-figure)
