Literature and Society in Imperial Russia, 1800-1914

Edited by William Mills Todd III. Ranging in topic from general discussions of literary theory to close readings of well-known literary works, these nine papers treat nearly every literary movement of the period, and a number of major Russian writers, including Pushkin, Gogol, Turgenev, and Dostoevsky. The result is an approach to Russian literature that neglects neither the dynamics of social interaction nor the forms and traditions of literature. \$17.50

The Young Czech Party, 1874-1901, and the Emergence of a Multi-Party System

Bruce M. Garver

This is an exemplary account of a crucial period of Czech politics, when the Young Czech party planted the seeds of national autonomy and succeeded in promoting economic growth, public education, and universal male suffrage. Beyond its critical importance to the history of Czechoslovakia, modern historiographers will find in Garver's method a model for the study of political institutions in any country.

"The work deserves praise for every one of its aspects. No one in this country has yet reached so widely and deeply into the full riches of relevant sources. No one has yet familiarized himself so thoroughly with the basic concepts of Czech political thought and organization in this period."—Josef Anderle \$20.00
