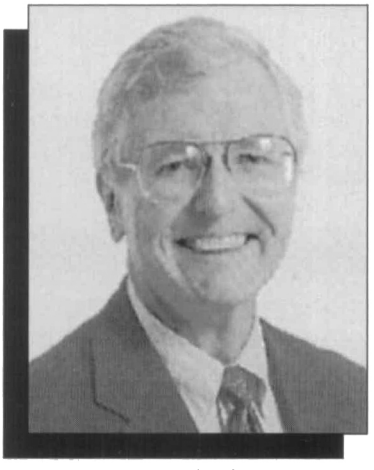
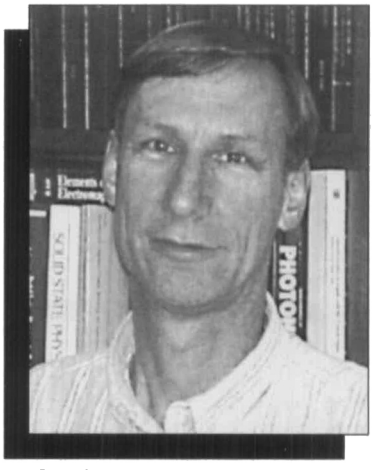
Craford, Forrest Named 1999 MRS Medalists

The Materials Research Society (MRS) has selected two scientists to receive the 1999 MRS Medal awards, which recognize a specific outstanding recent discovery or advancement that is expected to have a major impact on the progress of any materials-related field. M. George Craford of Hewlett Packard and Stephen Forrest of Princeton University will receive their medals at the 1999 MRS Fall Meeting during the Awards Ceremony on Wednesday, December 1, at 6:00 p.m. in Salon E of the Boston Marriott Hotel.



M. George Craford



Stephen Forrest

M. George Craford is named MRS Medalist "for pioneering contributions and leadership in the development of visible-spectrum light-emitting diode materials and devices." During the past 30 years of research, Craford, with his research groups, introduced the yellow light-emitting diode (LED) (GaAsP:N) and the transparent-substrate high brightness red-orange-yellow In(AlGa)P LEDs and lamps which exceed in performance the standard incandescent lamp.

Craford's numerous seminal contributions to LED research is leading the transition from conventional lighting sources to solid-state emitters. The commercial quality of LEDs that Craford has developed results from several risks and challenges that he had undertaken. Craford's research group introduced commercial yellow and orange LEDs based on research on the effects of N isoelectronic doping in GaAsP ternary alloys grown by hydride vapor-phase epitaxy (VPE). This work advanced understanding of the fundamental role of isoelectronic impurities in compound semiconductors.

Subsequently, Craford used the previously unproven technique of metalorganic chemical vapor deposition (MOCVD) crystal growth to produce high-efficiency LEDs from Al-containing III-V materials. He and his co-workers demonstrated the first high-brightness yellow AlGaInP LEDs that exhibited higher lm/W than unfiltered incandescent lamps. He and his group developed the wide bandgap process for the deposition of thick lattice-mismatched GaP cap layers on MOCVD-grown InAlGaP heterostructures grown on GaAs substrates.

More recently, Craford and his research team have implemented new techniques of compound semiconductor wafer bonding in order to produce orange-red spectrum devices whose efficiency (lm/W) exceed unfiltered incandescent sources along with several other conventional lighting sources such as halogen lamps. This technique involves development of a full, 2.0 in. diameter wafer bonding and epitaxial lift-off process that permits researchers to completely remove the GaAs absorbing substrate from an InAlGaP heterojunction LED wafer and to bond it to a transparent GaP wafer.

Since 1982, Craford has been the research and development manager of the HP Optoelectronics Division. Prior to joining HP in 1979, Craford worked for 12 years at Monsanto, advancing to technology director in the Monsanto Electronics Division in 1974. He received his MS (1963) and PhD (1967) degrees in physics at the University of Illinois. Among his several honors and memberships are the National Academy of Engineering, Institute of Electrical and Electronics Engineers (IEEE) Fellowship, and IEEE Morris N. Liebmann Memorial Award. He has over 50 publications, including a comprehensive reference text, *High Brightness Light-Emitting Diodes* (Academic Press, San Diego, 1997), and several patents.

Craford will deliver his Medalist talk in Symposium X on Wednesday, December 1, 12:45 p.m., in Room 208 of the Hynes Convention Center, on "Visible Light Emitting Diodes (LEDs): Past, Present, and Very Bright Future."

Stephen Forrest is named MRS Medalist "for pioneering contributions to the growth and optoelectronic applications of organic semiconductor thin films." He has set and continues to set the standard of growth and characterization in the emerging area of electrical properties and device structures based on ultrathin organic films.

With his research team, Forrest's studies led to the discovery and unraveling of many growth modes of van der Waals (vdW) bonded organic thin films onto a wide range of substrates. This has led to the development of models for understanding and predicting the structure these growth modes. This work also led to the first demonstration of the growth of organic multiple quantum well (MQW) structures, which exhibited quantum effects on the excitonic spectrum in close-packed vdW solids, then to the development of a quantitative model for quantum confinement of charge-transfer excitons in organic MQWs. Forrest's work has furthermore led to the development of novel organic/inorganic integrated devices for which he engineered a process where a molecular-beam-epitaxially grown III-V semiconductor is combined with an organic-molecular-beam-deposition-grown organic thin film in a single, ultrahigh vacuum environment.

Forrest's work has led to fundamental and applied advances in organic electroluminescent devices (OLEDs), and most recently in a 12-layer, 3-color stacked OLED (SOLED) which combines layers of crystalline and amorphous organics, conducting oxides and metals in a single stacked structure. Forrest and his colleagues were the first to identify fundamental current limiting mechanisms in molecular OLEDs, to demonstrate a fully transparent OLED, and to fabricate efficient OLEDs with the same metal oxide (indium-tin-oxide) used as both the anode and cathode.

Finally, Forrest and co-workers demonstrated lasing in semiconducting organic molecular thin films, opening the possibility for the eventual realization of all organic electrically pumped lasers.

Forrest's work has opened research in the areas of organic epitaxy and utilization of quantum effects in vdW solids and in

https://doi.org/10.1557/S0883769400053343 Published online by Cambridge University Press

polymers; in fundamental physics and applications of these heterojunctions; and toward the design and fabrication of electrically pumped organic lasers.

After receiving his MS (1974) and PhD (1979) degrees in physics from the University of Michigan—Ann Arbor, Forrest worked for Bell Laboratories, the University of Southern California, and in 1992 joined Princeton University. He has over 230 publications, several patents, and has received numerous honors and is an IEEE Fellow.

Forrest will deliver his talk in Symposium X on Monday, November 29, 12:45 p.m., in Room 208 of the Hynes Convention Center, on "Science and Technology at the Nanometer Scale Using Vacuum-Deposited Organic Thin Film." MRS

1999 MRS Fall Meeting

Hotel Reservations

A block of rooms has been reserved for MRS meeting attendees at the Boston Marriott, Westin, Sheraton Boston, and Back Bay Hilton Hotels. When making your reservations, mention the Materials Research Society's meeting to receive the special rate. A hotel reservation form is available on the MRS Web site (www.mrs.org) and in the Program Book.

DEADLINE FOR HOTEL RESERVATIONS: November 8, 1999
Rooms are limited - reserve yours early!

Boston Marriott/Copley Place
110 Huntington Avenue, Boston, MA 02116
800-228-9290 • 617-236-5800 (Direct)
Fax 617-578-0685
Room Rate: $130 Single* • $144 Double*

Westin Hotel/Copley Place
10 Huntington Avenue, Boston, MA 02116
800-937-8461 • 617-262-9600 (Direct)
Fax 617-424-7502
Room Rate: $133 Single* • $150 Double*

Sheraton Boston Hotel and Towers
39 Dalton Street, Boston, MA 02199
617-236-2020
Fax 617-236-1702
Room Rate: $123 Single* • $134 Double*

Back Bay Hilton
40 Dalton Street, Boston, MA 02115
617-236-1100
Fax 617-867-6139
Room Rate: $130 Single* • $145 Double*

* plus Massachusetts tax, currently 12.45%

Transportation

Airline Transportation
This fall MRS is offering special, discounted airfares through a designated travel agency as a service to MRS Fall Meeting attendees. Refer to the MRS Web site (www.mrs.org) or the Program Book for the Discount Air Fare Form.

Local Transportation
Taxicabs are available around the clock. Fares range from $10-$15 to the Back Bay area hotels.

City Transportation Service, 617-321-2282, is located outside the baggage claim areas at the airport and stops at various Boston hotels. The fare is $7.50 per person one way. The shuttle departs every half hour, Sunday through Friday, 7:00 a.m.-10:00 p.m.; on Saturday, every hour, 8:00 a.m.-8:00 p.m.

For more information on other ground transportation to and from Logan International Airport, call MASSPORT, 24 hours a day, at 1-800-23-LOGAN.

Parking
Parking costs in the city range from $15-$25 per day. Parking is available in the garage between the Boston Marriott and the Westin Hotels at Copley Place. There is also parking at the Prudential Center Complex.

Child Care
Check with the Concierge Desk at the individual hotels for a comprehensive roster of licensed and bonded sitters.

MRS 1999 Fall Exhibit — The Hynes Convention Center • Second Level

Exhibit Hours:

Tuesday, November 30	11:30 am - 6:00 pm
Wednesday, December 1	9:00 am - 6:00 pm
Thursday, December 2	9:00 am - 2:00 pm

The MRS Fall Exhibit offers everything you need... all under one roof!

The MRS Exhibit, held in conjunction with the 1999 MRS Fall Meeting, will feature more than 225 international exhibitors from all sectors of the global materials science and engineering communities. Learn about the latest techniques, advances, and the future of materials science and engineering directly from the manufacturers, suppliers and developers. Or browse the new releases, publications and journals from the various publishers. As always, the exhibit is convenient to the technical session rooms and scheduled to coincide with the program. Complimentary coffee will be available during morning and afternoon breaks in the exhibit hall.

Partial List of 1999 Fall Exhibitors (as of September 20, 1999)

www.ancorp.com

A & N Corporation has been a manufacturer of high-quality vacuum components for over 30 years. Our product line includes flanges and fittings in the following styles: ISO-KF (QF), ISO-MF (LF), UHV (CF), ASA, tri-seal, vacuum couplings, feedthroughs, vacuum ball valves, and special fabrications. New for 1999: right angle valves, in-line valves, gate valves, and vacuum line heaters/controllers.

◆ ABB Extrel #1003

575 Epsilon Drive
Pittsburgh, PA 15238-2838
Tel: 412-967-5752
Fax: 412-963-6578
E-mail: qms@extrel.com
www.abb.com/extrel

ABB Extrel has been manufacturing quadrupole mass spectrometers and systems since 1964. Our instruments' high sensitivity and resolution allows us to monitor and control processes that simple residual gas analysis (RGA) cannot detect. We place special emphasis on plasma and CVD, SIMS, molecular beam, environmental abatement, and high-purity gas applications.

Academic Press #1024

525 B Street, Suite 1900
San Diego, CA 92101
Tel: 800-321-5068
Fax: 800-874-6418
E-mail: ap@acad.com
www.academicpress.com

Visit Academic Press to browse our outstanding selection of new and recent titles including: *Electrodynamics of Materials, Experimental Methods in Polymer Science, Intersubband Transitions in Quantum Wells, Chemical Mechanical Polishing in Silicon Processing, Handbook of Giant Magnetorestrictive Materials, Optical Properties of Materials, Handbook of Low and High Dielectric Constant Materials, Handbook of Nanostructured Materials, Handbook of Superconductivity, Solid State Physics, Database of Palladium Chemistry Version 1.1, Adsorption by Powders of Porous Solids, Cracks and Fractures.* Journals on display include Superlattices and Microstructures and Journal of Chemical Thermodynamics. Substantial discounts offered on all books purchased at the booth.

◆ Advanced Control Systems Corporation #100

10 Old Mine Rock Way
Hingham, MA 02043
Tel: 781-740-0223
Fax: 781-740-4227
E-mail: info@acsmotion.com
www.acsmotion.com

Manufacturer of stepping motor control systems. Standard products include drivers for two, three, four and five phase motors, up to eight channel indexers and power supplies. High reliability, efficiency and low noise operation are our specialty. Custom built systems also available.

Advanced Research Systems, Inc. #600, 602

905 Harrison Street, Suite 109
Allentown, PA 18103
Tel: 610-439-8022
Fax: 610-439-1184
E-mail: arscryo@aol.com

Advanced Research Systems, Inc. offers a complete range of laboratory cryogenic systems for low temperature research. Products include the Displex®, closed-cycle systems from a temperature range of 6.5 K to 800 K for spectroscopy (UV, Vis, IR and Raman), transport, x-ray diffraction, UHV, etc. ARS also sells the Helitran®, flow cryostats for all research applications as well. Advanced Research Systems is uniquely qualified to offer customized cryostats as well as cryogenic accessories.

◆ AIXTRON, Inc. #304

1670 Barclay Blvd.
Buffalo Grove, IL 60089
Tel: 847-215-7335
Fax: 847-215-7341

AIXTRON is the world leading manufacturer of MOCVD and VPE equipment for the growth of all III-V, including nitrides, II-VI, oxides and SiC. Systems are manufactured with outstanding quality and care, with excellent reliability, and with award-winning technical and service support. Systems include: AIX-200; AIX200/4; AIX-2400; the world's largest, the AIX-3000; and the new, automated 2600 G3.

AJA International, Inc. #313

P.O. Box 246
809 Country Way
N. Scituate, MA 02060
Tel: 781-545-7365
Fax: 781-545-4105
E-mail: topgun@ajaint.com
www.ajaint.com

Product line includes: circular and rectangular magnetron sputtering sources and targets, ATC R&D sputtering systems, substrate heaters, RF and DC power supplies, microwave power supplies and components, microwave plasma sources (downstream, surfaguide, SLAN, surfatron), diamond film equipment, electrostatic chucks and ESC power supplies.

◆ Akzo Nobel Chemicals Inc. #220

300 South Riverside Plaza
Chicago, IL 60606
Tel: 800-828-7929
Fax: 312-906-7633
E-mail: metalorganics@akzonobel.com
www.akzonobel.com

Akzo Nobel metalorganics meet your III-V deposition needs from antimony to zinc. Our completely modernized and expanded production facilities utilize all in-plant manufactured raw materials for advanced quality and inventory control. Proprietary purification and analysis techniques effectively eliminate silicon and oxygen without introducing adducts. Akzo Nobel *FT-NMR oxygen monitoring is an* industry benchmark. Visit our exhibition booth for more information on Akzo Nobel ultra-low oxygen and silicon sources including trimethylgallium, trimethylindium, and trimethylaluminum.

Alcatel Vacuum Products, Inc. #219

67 Sharp Street
Hingham, MA 02043
Tel: 781-331-4200
Fax: 781-331-4230

Manufactures a complete and comprehensive range of DRY pumps and pumping systems, ceramic ball bearing, turbomolecular pumps, DRYTEL pumping systems, maglev turbomolecular pumps, helium leak detector line (including cleanroom, compatible dry leak detectors), rotary vane direct drive pumps and blower packages, valves, gauges and accessories.

◆ Aldrich Chemical Company, Inc. #1020

P.O. Box 355
Milwaukee, WI 53201
Tel: 414-298-7910
Fax: 414-298-7960
E-mail: crecatto@sial.com
www.sigma-aldrich.com

Aldrich produces and stocks a comprehensive range of chemical products including, but not limited to, OMCVD precursors, metal alkoxides, metal ß-diketonates, CVD gases, high purity metals, battery materials, conducting polymers, anhydrous metal halides, organic photonic materials, dopant/intercalation compounds, sol-gel compounds, catalysts, silsesquioxanes, hyperbranched polymers, superconductor precursors, ACS reagents and analytical standards. These products are used in scientific research, product development, testing, and analysis in the various fields encompassing materials research.

◆ Alfa Aesar #907

A Johnson Matthey Company
30 Bond Street
Ward Hill, MA 01835
Tel: 978-521-6300
Toll Free: 800-343-0660
(catalog sales)
Toll Free: 888-343-8025
(bulk/special sales)
Fax: 978-521-6350
E-mail: info@alfa.com
www.alfa.com

Alfa Aesar, a Johnson Matthey Company, is a leading manufacturer and supplier of research chemicals, metals and materials. Our product line includes fabricated metals from aluminum to zirconium, offered in a comprehensive range of forms (sheet, wire, rod, targets, etc.). Other products include inorganic and organic research chemicals, pure elements, alloys, precious metal compounds and catalysts, rare earths, analytical products and more. Products are available from our two catalogs (which combine to offer over 22,000 products) or through our Specialty Group which supplies larger quantities or products that are not listed in the catalogs. Visit our booth for a copy of our new periodic table desk reference featuring the recently named elements.

Altran Corporation #209

451 D Street
Boston, MA 02210
Tel: 617-204-1000
Fax: 617-204-3080
E-mail: takeuchi@altran.com
www.altran.com

Altran Corporation is a consulting engineering firm with over a decade of experience working with quality-sensitive industries such as nuclear and medical. Altran's engineers span a range of disciplines including biomedical, chemical, civil, electrical, mechanical, metallurgical and polymer engineering. Our specific engineering services include forensic analysis (metallography, optical/electron microscopy, EDS, WDS, XRD, AAS, GCMS, FTIR, DSC, etc.), testing services (corrosion, fatigue, fracture, microbiology, product simulations, etc.), and design/engineering services (FEA, CFD, product development, systems analysis, etc.). Over 150 professionals are located in Boston (headquarters and materials laboratory), Charlotte, San Francisco, and Toronto.

American Chemical Society #826

1155 Sixteenth Street N.W.
Washington, DC 20036
Tel: 202-872-4600
Fax: 202-872-4615
E-mail: help@acs.org
pubs.acs.org

Display includes American Chemical Society publications relevant to the field of materials science. Both print and web editions are available for *Chemistry of Materials, Macromolecules, Langmuir, Journal of Combinatorial Chemistry, Industrial & Engineering Chemistry Research*, and *The Journal of Physical Chemistry* (both editions). Web edition special features will be demonstrated.

American Institute of Physics #1026

2 Huntington Quadrangle,
Suite 1N01
Melville, NY 11747-4502
Tel: 516-576-2484
Fax: 516-576-2374
E-mail: corr@aip.org
www.aip.org

Save up to 40% off our already low member and affiliate society rates with new online-only journal subscriptions from AIP. Learn more about SPIN Web, our latest portal to the powerful SPIN database. And don't forget to pick up your free sample copy of *Computing in Science and Engineering*, the new magazine published by AIP and IEEE Computer Society.

The American Physical Society #822

One Physics Ellipse
College Park, MD 20740-3844
Tel: 301-209-3283
Fax: 301-209-0844
E-mail: assocpub@aps.org
publish.aps.org

Explore *Physical Review Online Archive (PROLA)*, an archival database containing full 1985-1996 Physical Review articles. Come see also APS online research journals and publications: *Physical Review A-E, Physical Review Letters, Reviews of Modern Physics, Physical Review Special Topics-Accelerators and Beams*, and *Physical Review Focus*.

American Superconductor #207

2 Technology Drive
Westborough, MA 01581-1727
Tel: 508-836-4200
Fax: 508-836-4714
E-mail: gdriscoll@amsuper.com
www.amsuper.com

American Superconductor will be displaying its full line of HTS current leads. American Superconductor has recently purchased AET and will also be displaying their full cryogenic product line. Information will be available on American Superconductor's SMES units as well information on ongoing HTS motor and HTS cable programs.

◆ Andeen-Hagerling, Inc. #425

31200 Bainbridge Road
Cleveland, OH 44139-2231
Tel: 440-349-0370
Fax: 440-349-0359
E-mail: info@andeen-hagerling.com
www.andeen-hagerling.com

Manufacturers of ultra-precision capacitance bridges and standards. The AH 2500A/Option E automatic capacitance/loss bridge can resolve to 0.5 attofarad and measure loss down to a dissipation factor of 1.5×10^{-8} δ tan at 1 KHz. An automatic, multi-frequency bridge (50 Hz to 20 KHz), with an analog output, is near completion (AH2700A).

Angstrom Sciences, Inc. #509

40 South Linden Street
Duquesne, PA 15110
Tel: 412-469-8466
Fax: 412-469-8511
E-mail: sales@angstrosciences.com
www.angstromsciences.com

Angstrom Sciences specializes in the design and manufacture of the ONYX™ high performance magnetron sputtering cathodes for both research and development and production applications. Angstrom Sciences also provides a complete line of sputtering targets, evaporation materials, target backing plates and target bonding services. Angstrom Sciences has the experience and technology to assist you in achieving your process requirements.

Applied Nano Metrics, Inc. #1211

P.O. Box 26
605 Eder Road
Stormville, NY 12582
Tel: 914-226-6961
Fax: 914-226-8381
E-mail: info@appliednano.com
www.appliednano.com

Need to know the hardness or elastic modulus of a thin coating or small volume? Applied Nano Metrics, Inc. is a service laboratory that specializes in nanoindentation and other small-scale mechanical tests. Call us to discuss your application or visit us on the web at www.appliednano.com!

Applied Surface Technologies #620

15 Hawthorne Drive
New Providence, NJ 07974
Tel: 908-464-6675
Fax: 908-464-7475
E-mail: co2clean@aol.com
www.co2clean.com

The CO2 Snow Jet will be demonstrated. The Snow Jet cleaning process is a simple, yet novel, surface cleaning process that can remove particles of all sizes and also organic residues from surfaces. The process works well for many substrates, vacuum parts, analytical samples (AFM, XPS, AES), and many other applications. The Snow Jet process is, nondestructively, residue-free with no environmental limitations.

◆ Avanti Polar Lipids, Inc. #218

700 Industrial Park Drive
Alabaster, AL 35007
Tel: 205-663-2494
Fax: 205-663-0756
E-mail: avanti@quicklink.net
www.avantilipids.com

For 30 years Avanti has been supplying the research and pharmaceutical community with high purity lipids for biomedical applications. Since we have extensive experience in the production and quality control of phospholipids, and have knowledge of the physical and chemical properties of these products, we will have answers to solve your phospholipid problems.

◆ Bede Scientific Incorporated #901, 903

14 Inverness Drive East
Suite G-104
Englewood, CO 80112
Tel: 303-790-8647
Fax: 303-790-8648
E-mail: info@bede.com
www.bede.com

Bede Scientific is a world leader in materials characterization, established for 20 years in high resolution x-ray diffraction and scattering techniques, largely in the semiconductor industry. Bede developed the world's first commercial computer-controlled high resolution diffractometers and reflectometers, comprehensive Windows analytical software including novel automated parameter extraction using genetic algorithms, the new highly versatile D1 diffractometer with complete computer-controlled alignment, and the innovative Microsource® x-ray generator for high-intensity XRD in sub-300 μm areas.

Bicron Crystal Products #805

750 South 32nd Street
Washougal, WA 98671
Tel: 360-835-9815
Fax: 360-835-9848
E-mail: cheikkinen@bicron.com
www.bicron.com

Crystal Products, located in the Pacific Northwest, offers Czochralski-grown sapphire substrates for blue LED and laser diodes, superconductors, and SOI, radiation-hardened, IC devices. Sizes are 2-in. and 3-in. diameter C-plane and 2-in. to 6-in. diameter R-plane wafers. See our Sapphire Research Kits containing substrates oriented to A, R and C axes.

Bio-Rad, Spectroscopy Division #322

237 Putnam Avenue
Cambridge, MA 02139
Tel: 617-868-4330
Fax: 617-868-4026
E-mail: sales.digilab@biorad.com
www.biorad.com

Bio-Rad, Spectroscopy Division will be exhibiting their line of FT-IR spectrometers including the latest in fast infrared imaging technology. This includes micro-imaging, macro-imaging and surface imaging using attenuated total reflectance (ATR). Also on display will be latest in surface and thin film infrared spectroscopy systems which include grazing angle, IRRAS and micro-grazing angle.

Bioanalytical Systems, Inc. (BAS) #623

2701 Kent Avenue
West Lafayette, IN 47906-1382
Tel: 800-845-4246
Fax: 765-497-1102
E-mail: echem@bioanalytical.com
www.bioanalytical.com

BAS manufactures and distributes a comprehensive line of electrochemical equipment, including potentiostats, galvanostats, impedance analyzers, and electrodes. BAS will be exhibiting the BAS 100 B/W Electrochemical Workstation, the RDE-1 Rotating Disk Electrode, the BAS-Zahner IM6 Impedance Analyzer, and software for simulation of cyclic voltammetry (DigiSim®).

◆ Blake Industries, Inc. #911, 913

660 Jerusalem Road
Scotch Plains, NJ 07076
Tel: 908-233-7240
Fax: 908-233-1354
E-mail: blake4xray@worldnet.att.net

Blake Industries will be exhibiting Huber rotary tables, translation stages, goniometer heads, X-Y slits for synchrotron and rotating anode experiments. Blake monochromators, thin-film cameras, and Laue equipment will also be displayed.

BOC Edwards #610

301 Ballardvale Street
Wilmington, MA 01887
Tel: 800-848-9800
Fax: 978-658-7969
www.bocedwards.com

BOC Edwards manufactures and services a complete line of high quality vacuum components and systems. Products include dry-pumps, rotary vane pumps, turbo-molecular pumps, vacuum instrumentation, leak detectors, thin film coating systems, chillers, exhaust management systems and a wide range of vacuum accessories. Our BOC Edwards Vacuum Training Center offers a variety of courses ranging from general vacuum practices to specific product reviews. Our Applications Engineering team offers innovative solutions to optimize your vacuum system and 24-hour product support is available. Contact us at 1-800-848-9800 or www.bocedwards.com.

◆ Bruker AXS, Inc. #505, 507

6300 Enterprise Lane
Madison, WI 53719
Tel: 608-276-3000
Toll Free: 800-234-XRAY
Fax: 608-276-3006
E-mail: info@bruker-axs.com
www.bruker-axs.com

Bruker specializes in x-ray diffraction and fluorescence instrumentation, including configurations for phase identification, wafer analysis, thin film analysis, quantitative analysis, and single-crystal molecular structure determination. Specialized equipment and software developments include high-resolution optics for analyzing epitaxial materials, two-dimensional detectors for texture and stress analysis, small angle scattering and micro-diffraction, and advanced optics to increase x-ray flux.

Buehler, Ltd. #724

41 Waukegan Road
Lake Bluff, IL 60044
Tel: 847-295-6500
Fax: 847-295-7929
www.buehlerltd.com

Buehler will be displaying the all new MPC 3000 Integrated Circuit Back-side Grinding System. This system is designed to accurately remove a pre-specified amount of material from a microelectronic sample without the need for operator intervention. The MPC 3000 is designed for precision (±2 micron) back-side grinding of semiconductor packages. A custom designed vacuum mounting system gives 5-micron parallelism across the chip.

Burleigh Instruments, Inc. #508

P.O. Box E
7647 Main Street
Burleigh Park
Fishers, NY 14453-0755
Tel: 716-924-9355
Fax: 716-924-9072
E-mail: info@burleigh.com
www.burleigh.com

Burleigh Instruments designs and manufactures precision surface imaging and measurement products for use in industrial and academic research applications and for quality control. Visit Booth No. 508 to see the company's full line of scanning probe microscopes and optical profilers including VISTA™ and METRIS™ SPMs and the HORIZON™ non-contact optical profilometer.

Caburn-International, Inc. #1106

20360 West Rue Crevier
Unit #612
Canyon Country, CA 91351
Tel: 661-298-3086
Fax: 661-298-4775
E-mail: alecmike@aol.com
www.caburn-kohzu.com

Caburn-International, Inc. is proud to introduce Kohzu Seiki of Japan. For the first time in the U.S., Kohzu's range of superb equality air-side precision stages and goniometers are now available on short delivery. Visit us at Booth No. 1106 to view a representative sample of these high-quality movement devices from the simplest manual x-y stage to motorized goniometer cradles and circular tables. Pick up a free copy of the new Caburn-Kohzu catalog, which details hundreds of standard components with full specifications.

Cambridge University Press #824

40 West 20th Street
New York, NY 10011-4211
Tel: 212-924-3900
Fax: 212-691-3239
E-mail: marketing@cup.org
www.cup.org

Stop by the Cambridge University Press booth to receive your 20% discount on *Polymers at Surfaces and Interfaces* by Richard A.L. Jones and Randal W. Richards, *Fractography: Observing, Measuring and Interpreting Fracture Surface Topography* by Derek Hull, *The Nature of Mathematical Modeling* by Neil Gershenfeld, and other fine titles. Science editor Simon Capelin will be available to discuss possible new book projects at the booth throughout the conference.

◆ Cameca Instruments, Inc. #104

204 Spring Hill Road
Trumbull, CT 06611-1356
Tel: 203-459-0623
Fax: 203-261-5506
E-mail: sales@cameca.com
www.cameca.fr

Cameca Instruments will be highlighting their "NEW" SC ULTRA, SIMS for the most flexible support of wafer fabrication as well as its analytical instrument product line at this year's MRS Fall Exhibit. Please stop by the Cameca Booth No. 104 to learn more about the SC ULTRA, SIMS and the following products:

- IMS Wf, in-line wafer tool
- NanoSims 50, the SIMS with the highest lateral resolution and sensitivity
- IMS 6f, workhorse of semiconductor and geochemical research
- IMS 1270, high-performance analyzer for geochronology and geochemistry
- TOF SIMS IV and 300
- Cameca's SX100 EPMA, proving once again that Cameca is the innovator in x-ray microanalysis

◆ Capovani Brothers Inc. #221

704 Corporation Park
Scotia, NY 12302
Tel: 518-346-8347
Fax: 518-381-9578
E-mail: cbi@capovani.com
www.capovani.com

Capovani Brothers Inc. is in the business of buying and selling equipment for science and industry. We offer a wide variety of equipment including but not limited to microscopes of all types, SEMs, lasers, optics, optical tables, breadboards, semiconductor process and fabrication equipment, thin film deposition and inspection, high vacuum, leak detection, ovens, furnaces, thermal shock, and environmental chambers, electronic test, mechanical test, including tensile, compression, vibration, shock, and much more. Capovani Brothers Inc. has been in business for the past ten years and takes pride in the service we provide to industry. All items are sold with a guarantee, and the satisfaction of our customers is our first priority.

CERAC, Inc. #202

P.O. Box 1178
Milwaukee, WI 53201-1178
Tel: 414-289-9800
Fax: 414-289-9805
E-mail: marketing@cerac.com
www.cerac.com

CERAC manufactures an unparalleled selection of specialty inorganic chemicals, evaporation materials and sputtering targets. We are a leading supplier to industries such as optics and ophthalmics, semiconductor, disk drive, aerospace and more. Request a copy of the new 1999 CERAC full line catalog or browse the on-line version at www.cerac.com.

Ceramaseal #418

P.O. Box 260
1033 Route 20
New Lebanon, NY 12125
Tel: 518-794-7800
Fax: 518-794-8080
E-mail: info@ceramaseal.com
www.ceramaseal.com

Ceramaseal offers a full range of standard ultra-high vacuum feedthroughs, connectors, thermocouples, cables, viewports and related hardware. New products include baseplate and crystal sensors line, glass-ceramic "D" series, 50 ohm SMA connectors, and high-density circular connectors.

◆ Chemat Technology, Inc. #801

9036 Winnetka Avenue
Northridge, CA 91324
Tel: 818-727-9786
Fax: 818-727-9477
E-mail: chemat@aol.com
www.chemat.com

Chemat Technology, Inc. is the leading resource for total sol-gel processing. With centers worldwide, services offered include research and development, manufacture and distribution of metalorganic precursors for CVD and sol-gel, and the design and construction of thin film coating equipment. Standard and customized equipment range from low-cost spincoaters to sophisticated dip-coating systems. Chemicals are available in research and bulk quantities. Chemat's distinguishing feature is the ability to satisfy unique individual requirements.

ChemIcon Inc. #103

7301 Penn Avenue
Pittsburgh, PA 15208
Tel: 412-241-7335
Fax: 412-241-7311
E-mail: chemicon@chemimage.com
www.chemimage.com

ChemIcon Inc. is an innovative manufacturer of high performance materials characterization instruments. ChemIcon offers a broad range of instrumentation and chemical imaging services. ChemIcon manufactures the Falcon™ Raman Chemical Imaging Microscope that provides two-dimensional molecular images detailing materials morphology, composition and structure. Chemical imaging technology has successfully been applied by ChemIcon in many application market segments including polymers and coatings, semiconductors and pharmaceuticals.

Clemex Technologies, Inc. #802

800 Guimond
Longueuil, Quebec J4G 1T5
CANADA
Tel: 450-651-6573
Fax: 450-651-9304
E-mail: info@clemex.com
www.clemex.com

Clemex Technologies will be exhibiting its CLEMEX IMPAK image analysis system and CLEMEX R'Kive Explorer archiving database. The CLEMEX IMPAK system is an affordable system that combines "best-of-breed" hardware components with Clemex Vision—the industry leading image analysis software solution. Used by quality control and research labs, the CLEMEX IMPAK system allows users to rapidly quantify images with minimal training. CLEMEX R'Kive is a revolutionary image archiving application, integrated within MS Explorer.

Commonwealth Scientific #213

A Division of CVC, Inc.
500 Pendleton Street
Alexandria, VA 22314
Tel: 703-548-0800
Fax: 703-548-3138
E-mail: csc@ionbeam.com
www.ionbeam.com

Commonwealth Scientific, a division of CVC, Inc., offers a complete line of ion beam sources and integrated systems for ion beam etching and deposition, PVD, CVD, and DLC processes. Our products are successfully employed in numerous vacuum process applications, including magnetic, electro-optical, optical, superconductor, diamond-like carbon, and semiconductor.

◆ Cree Research, Inc. #1203

4600 Silicon Drive
Durham, NC 27703
Tel: 919-313-5300
Fax: 919-313-5451
www.cree.com

Cree manufactures 4H-SiC and 6H-SiC substrates and epitaxy, semi-insulating 4H-SiC substrates, high intensity blue LEDs and SiC UV photodiodes. SiC is an exceptional material for nitride deposition and the fabrication of semiconductor devices for high temperature, high power, high frequency power and optoelectronic applications. Custom device/design services available.

Cressington Scientific Instruments #211

508 Thomson Park Drive
Cranberry Twp., PA 16066-6425
Tel: 724-772-0220
Fax: 724-772-0219
E-mail: info@cressington.com
www.cressington.com

Cressington will exhibit its newest benchtop vacuum coater, the 308. Designed as a true multipurpose coater, the 308 can be configured for a wide variety of applications, from EM sample prep to thin film R&D research. A 13 inch diameter baseplate allows for standard 12 inch bell jars or custom metal chambers to be used. Deposition methods include sputtering, thermal and electron beam evaporation. High vacuum pumps connect to an ISO 100 flange maximizing pump choice.

CRI, Inc. #222

80 Ashford Street
Boston, MA 02134
Tel: 617-787-5700
Fax: 617-787-4488
E-mail: cri@cri-inc.com
www.cri-inc.com

CRI announces a revolutionary new imaging system, StressView™. This system enables QC professionals to see and measure residual stress in many materials. Developed for the glass and semiconductor industries, StressView is a nondestructive test for microscopic and large-scale defect detection. Based on a patented imaging technique, StressView has an easy-to-use software and optics package that is suitable for both macro and microscopic test setups. CRI can customize the software to interface with process control software for fast production feedback.

CRYO Industries of America, Inc. #611

11124 S. Willow Street
Manchester, NH 03103
Tel: 603-621-9957
Fax: 603-621-9960
E-mail: cryo@cryoindustries.com
www.cryoindustries.com

'Performance by Design' cryogenic systems, traditional liquid helium/nitrogen systems and the latest cryogen-free refrigerator systems. We have it all! Come see what's new—14 T superconducting magnet, 1.5 K optical cryostat, A.C. susceptibility—all cryogen free, plus, economical 5.5 K refrigerator, crystallography CRYO cooler, microscopy cryostats and more.

Cryogenic Control Systems, Inc. #1208

P.O. Box 7012
Rancho Santa Fe, CA 92067
Tel: 858-756-3900
Fax: 858-759-3515
E-mail: sales@cryocon.com
www.cryocon.com

Cryogenic Control Systems, based in Rancho Santa Fe, CA, is a manufacturer of precision cryogenic electronic instrumentation for both laboratory and industrial process control applications. We will be featuring the new Cryo-con Model 62 AC Bridge-based autotuning cryogenic temperature controller as the latest addition to our line of temperature monitor and control products.

Cryomech, Inc. #803

113 Falso Drive
Syracuse, NY 13211
Tel: 315-455-2555
Fax: 315-455-2544
E-mail: specs@cryomech.com
www.cryomech.com

NEW FROM CRYOMECH: A 4.2 K Pulse Tube Cryorefrigerator with 0.500 watts at 4.2 K. Cryomech also manufactures standard laboratory cryostats, Gifford-McMahon cycle cryorefrigerators and liquid nitrogen plants. Customized cryostats for the unique experiment are available.

◆ DCA Instruments, Inc. #909

1 Hilltop Lane
White Plains, NY 10607-1709
Tel: 914-421-1969
Fax: 914-946-6766
E-mail: dcausa@att.net
www.dca.co.uk

DCA Instruments specializes in the design and manufacture of high-quality UHV deposition systems, offering standard systems for the following deposition techniques: III-V, II-VI, CMT-MBE, metal MBE, UHV sputtering, UHV laser ablation, and UHV CVD. DCA Instruments also offers a wide range of MBE components which are retrofittable to the majority of existing systems. Components include effusion cells, soft-action magnetically driven linear shutters, a 'zero-wobble' substrate manipulator and a self-regulating mercury source.

Del Electronics, Power Conversion Products #1116-1120

One Commerce Park
Valhalla, NY 10595
Tel: 914-686-3600
Fax: 914-686-2870
E-mail: ewilliams@delpower.com
www.delpower.com

Del Power Conversion Group is a world leader in the design and manufacture of high voltage power supplies, transformers, noise suppression filters and high voltage capacitors. Our family of companies (Del Electronics, Bertan High Voltage and RFI Corp.) together comprises 140,000 sq. ft. and over 40 years experience in producing high voltage sub-systems for analytical, medical, industrial, scientific and defense applications. Virtually every major OEM, national lab and university uses a power supply, transformer or filter made by a division of Del. From off-the-shelf rack instruments for everyday lab use, to custom modules and specialized systems for analytical XRD/XRF, CT imaging, semiconductor processing, and fundamental research, Del Power Conversion Group offers the knowledge, innovation and application support to meet all of your high voltage requirements.

◆ Denton Vacuum LLC #910, 912

1259 North Church Street
Moorestown, NJ 08057
Tel: 609-439-9100
Fax: 609-439-9111
E-mail: info@dentonvacuum.com
www.dentonvacuum.com

Denton Vacuum will be exhibiting the Discovery®-18 Sputtering System with the new Process Pro operating software. This system provides cutting edge technology in a system that is suitable for advanced research and pilot production. It is capable of multi-source deposition using normal DC, pulsed DC or solid-state RF power supplies. The system, operating in the confocal mode with 3 inch targets, can provide a deposition uniformity of better than ±5% over a diameter of 6 inches.

◆ Digital Instruments, Veeco Metrology Group #1010, 1012

112 Robin Hill Road
Santa Barbara, CA 93117
Tel: 805-967-1400
Fax: 805-967-7717
E-mail: info@di.com
www.di.com

Digital Instruments, Veeco Metrology Group, offers a full spectrum of surface metrology systems. Our complete line of NanoScope® SPMs includes the MultiMode™ SPM, the world's highest resolution SPM; the Dimension™ SPMs, offering the complete range of AFM and STM techniques for small or large samples; and the BioScope™ AFM, which combines optical and AFM techniques specifically for the biological sciences. We also offer a full range of Dektak® stylus-based surface profiler systems for step height thin film measurement and surface roughness applications. Finally, the revolutionary Dimension Vx Atomic Force Profilers combine the cutting-edge technologies of AFMs and surface profilers to offer a long scan metrology tool with atomic force resolution.

Duniway Stockroom Corp. #114

1305 Space Park Way
Mountain View, CA 94043-1336
Tel: 650-969-8811
Toll Free: 800-446-8811
Fax: 650-965-0764
E-mail: info@duniway.com
www.duniway.com

Specializes in vacuum equipment and supplies: Ion pumps and controls; components (flanges, gaskets, bolts, nuts); vacuum gauges and controls from Terranova; mechanical pumps and rebuild kits; supplies (oils, greases, hoses, bell jars); and diffusion pumps and leak detectors. We offer rebuilding services and a large collection of reconditioned equipment. Free catalog.

Eagle-Picher Technologies, LLC #308

Electro-Optic Materials
P.O. Box 737
Highway 69A
Quapaw, OK 66781
Tel: 918-673-1650
Fax: 918-673-2121
E-mail: epi-eom@mmind.net

The "EOM" Department of Eagle-Picher Industries is a manufacturer of ultra high purity gallium metal, gallium trichloride, gallium sesquioxide, germanium tetrachloride, germanium dioxide, intrinsic germanium metal, germanium substrates, germanium, and silicon infrared optical materials. Eagle-Picher also purchases scrap gallium and germanium, in many forms, for recycling.

◆ EDAX Inc. #817

91 McKee Drive
Mahwah, NJ 07430
Tel: 201-529-4880
Fax: 201-529-3156
E-mail: info@edax.com
www.edax.com

EDAX Inc., established in 1962, is a leading innovator in the design and manufacture of energy dispersive x-ray analysis systems. On an international basis, EDAX supplies the microanalytical and x-ray spectrometry markets with PC-based systems for qualitative and quantitative elemental analysis. EDAX offers a full range of analytical systems including: the Phoenix which features the most advanced energy-dispersive x-ray analyzer system; the Eagle series featuring elemental analysis utilizing sophisticated capillary optics; and the Falcon which offers automatic peak identification and

deconvolution with the various data reduction routines for quantification. Grain orientation and phase identification is carried out with the TSL product line using electron backscatter diffraction. Grain mapping and grain size analyses combined with automatic spot pattern indexing in the TEM for nanocrystalline thin films are also provided by TSL.

◆ EG&G Instruments, Inc. #310

801 S. Illinois Avenue
Oak Ridge, TN 37830
Tel: 423-483-2121
Toll Free: 800-366-2741
Fax: 423-425-1334
E-mail: sales_echem@egginc.com
www.eggpar.com

EG&G Instruments, Inc. is a manufacturer and global distributor of instrumentation used for materials characterization, electrochemistry, corrosion, and impedance measurements. EG&G Instruments, Inc. provides a full suite of potentiostats, galvanostats, analyzers, imaging equipment, cells and accessories. EG&G Instruments, Inc. has a team of application experts to assist and support you with all your application needs.

◆ Elsevier Science Inc. #1023-1027

655 Avenue of the Americas
New York, NY 10010-5107

Fax: 212-633-3112
E-mail: usinfo-@elsevier.com
www.elsevier.com

Elsevier Science publishes a large number of journals and books in the field of materials science covering subjects from electronic materials, surface sciences, metals, materials chemistry and polymers. Our latest journal titles include *Materials Science in Semiconductor Processing* and *Journal of Inorganic Materials*. Visit our booth for sample copies of journals, 20% discount on books, copies of *Materials Today* magazine and online access to our Internet catalogue.

◆ EMCORE Corporation #709

394 Elizabeth Avenue
Somerset, NJ 08873
Tel: 732-271-9090
Fax: 732-271-9686
E-mail: info@emcore.com
www.emcore.com

EMCORE Corporation is the leading materials science company in the field of compound semiconductors. The company operates six divisions: EMCORE Research & Application Laboratory (E.R.A.), *Turbo*Disc Systems, EMCORE Electronic Materials (E^2M), EMCORE Electronic Devices (E^2M), PhotoVoltaics, and MODE. These divisions cover the spectrum from basic R&D on materials and production tools, to the design and manufacture of discrete devices. Each division provides the leading technology in its market. The core of the company is its in-depth materials science process expertise, which provides value-added service for its customers and each of its operating divisions. EMCORE is recognized throughout the world for the complete support provided to its customers, including full technical support for processes and systems. EMCORE provides continuing support from the early stages of design and installation through training and field service. EMCORE views its customers as its most valuable assets and is committed to their success.

EOS-EyeOnScience #1206

913A Cloister Road
Wilmington, DE 19809
Tel: 302-793-0321 or 908-359-9825
Fax: 360-397-1364
E-mail: jigyasa@aol.com
members.aol.com/jigyasa

EOS, a division of Jigyasa, Inc., is a startup company developing multimedia-based informal science education software. Our products aim to present fundamental concepts and the scientific process underlying observed phenomena. Our product line, "Eye on Materials: An Interactive Multimedia Exposition," is designed to expose frontline issues in materials science with a view to attract undergraduate students towards research. At our exhibit, we will demonstrate a package on carbon that illustrates interesting structure-property interactions in carbon allotropes along with an overview of carbon as a material of current research. This endeavor is funded by a grant from the National Science Foundation. We are also developing a line of products based on allegorical science stories for children K-12.

◆ EPI MBE Products Group #705

4900 Constellation Drive
St. Paul, MN 55127
Tel: 651-482-0800
Fax: 651-482-0600
E-mail: info@epimbe.com
www.epimbe.com

EPI leads the MBE industry with its innovative designs. Many of the world's leading research and production facilities are utilizing EPI's patented effusion cell technology to enhance the performance of their MBE systems. With over 10 years experience, EPI has pioneered the development of material-specific effusion cells and systems. Contact EPI for more information.

Epichem Inc. #208

4905 Tilghman Street, Suite 240
Allentown, PA 18104
Tel: 610-706-0606
Fax: 610-706-0888
E-mail: muhrgt@epichem.com
www.epichem.com

Epichem is the world's leading supplier of high purity metalorganics to the compound semiconductor industry. We offer over 50 products including volatile precursors of aluminum, gallium, indium, magnesium, iron, nitrogen, carbon, zinc, antimony, phosphorus, and arsenic. Epichem's proprietary adduct purification and reduced oxygen technology allow you to choose from a variety of grades—EpiPure, Adduct, and Electronic that best suit your application. Visit Epichem's booth to find out why Solution TMI™ has become the precursor of choice in III-V production environments.

◆ Epion Corporation #423

37 Manning Road
Billerica, MA 01821
Tel: 978-670-1910
Fax: 978-670-9119
E-mail: sales@epion.com
www.epion.com

Epion Corporation is a supplier of ion and laser beam equipment for surface processing and deposition of thin films. The company has established unique expertise in emerging new technology for surface smoothing and atomic scale processing of surfaces by gas cluster ion beams and for deposition of thin film coatings by pulsed laser deposition. Services include ion implantation and diamondlike carbon coatings.

ESCETE Single Crystal Technology B.V. #906

P.O. Box 3896
Ir. Schiffstraat
Enschede NL-7500 RD
THE NETHERLANDS
Tel: 31-53-4356146
Fax: 31-53-4352134

www.escete.com
U.S. Agent: First Reaction
Tel: 603-929-3583
Fax: 603-929-5023
E-mail: firstrxn@aol.com

ESCETE Single Crystal Technology B.V. is a producer of high-quality oxide single crystal substrates, with a leading position in manufacturing HTSC-substrates, blue LED/laser sapphire substrates, optical isolators, laser rods, and other components for the electrical and photonic industry. ESCETE is also involved in research projects to develop future materials and devices in national and international projects.

◆ ESM Software #727

2234 Wade Court
Hamilton, OH 45013
Tel: 513-738-4773
Fax: 216-274-9026
E-mail: info@esm-software.com
www.esm-software.com

ESM Software will demonstrate its materials science software collection including the new version of the TAPP materials properties database, an updated NIST Crystal Data collection, new polymer modeling software, and updates of software for crystallography, thermochemistry, phase diagrams, kinetics, thin films, and materials properties.

◆ Evans Analytical Group #809

104 Windsor Center, Suite 101
East Windsor, NJ 08520
Tel: 609-371-4800
Fax: 609-371-5666
E-mail: staff@evanseast.com
www.evanseast.com

The Evans Analytical Group specializes in materials characterization, contamination identification, failure analysis, quality control, surface, thin film, and trace element characterization. We apply our experience in high technology materials and state-of-the-art analytical techniques, such as dynamic SIMS (magnetic and quadrupole), TOF-SIMS, XPS, AES, SEM/EDS, AFM, FTIR, Raman, and GC/MS to solve customer problems quickly and cost

effectively. The Evans Analytical Group consists of four separate labs across the United States and Europe including Charles Evans & Associates in Redwood City, California; Evans East in East Windsor, New Jersey; Evans Texas in Round Rock, Texas and Evans Europe in the United Kingdom.

EXAKT Technologies, Inc. #323

7416 N. Broadway Ext., Suite E
Oklahoma City, OK 73116-9066
Tel: 405-848-5800
Toll Free: 800-866-7172
Fax: 405-848-7701
E-mail: linda.durbin@exaktusa.com

EXAKT Technologies, Inc. provides precision equipment designed for use in the materials development/R&D lab. Our equipment includes cutting machines specifically engineered to prepare specimens for evaluation of interfaces between materials; grinding devices that prepare multiple material samples with less than 0.5 micron deviation between material surfaces; and three roll mills for the preparation of difficult to process suspensions, pastes, inks or films for electronics, ceramics and other applications.

◆ FEI Company/Philips Electron Optics #700, 702

7451 NW Evergreen Parkway
Hillsboro, OR 97124-5830
Tel: 503-640-7500
Fax: 503-844-2615
E-mail: semisales@feico.com
www.feic.com

FEI offers the broadest range of charged particle optics solutions available from a single source: Philips SEMs, TEMs and ESEMs, and FEI FIB, Wafer SEM and DualBeam FIB/SEM workstations. Our solutions serve a broad range of materials research applications: from general materials analysis with SEM, to high magnification imaging and analysis of dynamic, hydrated or heated specimens using ESEM; from high resolution, atomic-level TEM evaluation of structures and interfaces, to FIB-based failure analysis and defect classification on integrated circuits. All FEI instruments are designed for easy integration of additional analytical hardware, and operate under Windows NT 4.0, making them familiar and easy-to-use for all skill levels.

◆ Fischione Instruments #900, 902

9003 Corporate Circle
Export, PA 15632
Tel: 724-325-5444
Fax: 724-325-5443
E-mail: info@fischione.com
www.fischione.com

Fischione Instruments manufactures a full line of instrumentation for electron microscopy. The family of specimen preparation instruments includes the twin-jet electropolisher, the specimen punch, the dimpling grinder, the specimen grinder, the ultrasonic disk cutter, and the low-angle milling and polishing (LAMP) ion mill. This line also includes the plasma cleaner, an instrument for preventing and eliminating carbonaceous contamination in TEM, SEM, and surface science applications. The TEM specimen holders include single tilt-360° rotate holder, the single tilt holder for fine tip specimens, and the analytical double tilt holder. Cryogenic TEM specimen holders include the single tilt analytical cryo holder, the TEM cryotransfer system, and the TEM anti-contaminator. Imaging instruments include the high angle annular dark field (HAADF) STEM detector capable of single electron detection. In North America, Fischione Instruments markets the chemical microscope, a bench-top imaging SIMS system manufactured by Millbrook Instruments.

FRT of America #519

121R North Plains Industrial Road
Wallingford, CT 06492
Fax: 011-49-2204-842431
E-mail: info@FRTofAmerica.com
www.FRTofAmerica.com

Products include surface analysis instruments, MicroGlider®, MicroProf® and evaluation and control software (SPM [Mark III], LEED, AES). Services include surface analysis (damage analysis, quality assurance, processing optimization, development); in-line control (manufacture and integration); consultancy work (surfaces, new materials, new technology); and applied basic research. In addition, special services include scanning probe microscopy; examining nano hardness; and project work and studies.

Fujikin of America, Inc. #622

2028 E. Ben White Blvd.
Suite 320
Austin, TX 78741
Tel: 512-912-9095
Fax: 512-912-8095
E-mail: sales@fujikin.com
www.fujikin.com

Fujikin is the world's leading manufacturer of valves and fittings for UHP applications. With surface finishes as low as 2μ in. *Ra*, very low internal volume and extremely low particle generation, our conventional and surface mount products can take you to 300 mm, 180 nm and beyond. Contact us about our UHP steam generator and other cutting-edge products.

Genus, Inc. #720

1139 Karlstad Drive
Sunnyvale, CA 94089
Tel: 408-747-7120
Fax: 408-747-7199
E-mail: pr@genus.com
www.genus.com

Genus, Inc. provides atomic layer deposition (ALD) technology that provides a strategic pathway to ultra-thin films. ALD bridges the gap for ultra-thin film requirements from now to beyond the horizon (2014) of the International Technology Roadmap for Semiconductors (ITRS). Genus is demonstrating films and systems in 2000 for advanced R&D environments. Initially, films will include aluminum and tantalum oxide as dielectrics, and titanium, tantalum and tungsten nitride as barriers, but the system is multipurpose capable. For more information, visit Genus' web site at www.genus.com.

GFS Chemicals, Inc. #522

P.O. Box 245
Powell, OH 43065-0245
Tel: 740-881-5501
Toll Free: 800-858-9682
Fax: 740-881-5989
E-mail: gfschem@gfschemicals.com
www.gfschemicals.com

Custom capabilities in both organic and inorganic specialties reflect the value GFS Chemicals offers to materials scientists. Organics include cholesteryl testers for liquid crystals; various phenylethynyl aromatics for luminescent materials; other acetylenic intermediates for coatings and sensors. Inorganics include high purity salts as precursors to optical materials; lithium perchlorate and other salts and electrolyte blends for battery research; anhydrous rare earth halides and other specialty dry salts for composite R&D; metal complexes of phenanthrolines and other aromatics. Build your research program on our 70 years of experience manufacturing custom and specialty materials.

◆ Goodfellow Corporation #920

800 Lancaster Avenue
Berwyn, PA 19312-1780
Toll Free: 800-821-2870
Fax: 800-283-2020
E-mail: info@goodfellow.com
www.goodfellow.com

Goodfellow supplies small quantities of metals and materials for research and development. Our capabilities range from one off prototypes to small production quantities.

◆ Gordon and Breach/Harwood Academic #926

c/o International Publishers Distributor
P.O. Box 32160
Newark, NJ 07102
Tel: 973-643-7500
Fax: 973-643-7676
E-mail: info@gbhap.com
www.gbhap.com

Gordon and Breach/Harwood Academic publishes books and journals of interest to scientists and engineers in condensed matter physics and materials science, including nanotechnology, optics and lasers, surface physics, nonlinear dynamics, and superconductivity.

Hamamatsu Corporation #806

360 Foothill Road
Bridgewater, NJ 08807
Tel: 908-231-0960
Fax: 908-231-1218
www.hamamatsu.com

Hamamatsu Corporation is one of the world leaders in photo detector and light source manufacturing. Hamamatsu Corporation is introducing a new advanced detector for the near infrared region. The R5509-42/72 has a response range to 1.4 μm or 1.7 μm. These detectors feature fast response time as well as single photon counting performance, allowing weak light detection in the near infrared region. Technical contact: Hamamatsu Corporation at 800-524-0504.

High Voltage Engineering, an engineering-oriented company, designs, manufactures, sells and markets custom-made, high-tech capital equipment for the world market. Specializing in the development and manufacture of ion beam technology-based equipment, High Voltage Engineering is the largest and most diverse manufacturer of particle accelerator systems for the scientific, educational and industrial research communities. Major product lines include: Ion Accelerator Systems, Research Ion Implanters, Systems for Ion Beam Analysis, and various components such as HV power supplies, electron and ion accelerator tubes, ion sources, beamline components, beam monitoring equipment, etc.

Hinds Instruments, Inc. #1110, 1112

3175 NW Aloclek Drive
Suite 170
Hillsboro, OR 97124-7135
Tel: 503-690-2000
Fax: 503-690-3000
E-mail: info@hindspem.com
www.hindspem.com

Hinds Instruments manufactures PEM-90™ photoelastic modulators (PEMs) and Exicor™ birefringence measurement instrumentation. PEMs operate in the vacuum UV to mid-IR spectral regions at frequencies of 20 to 100 kHz. These devices provide polarization modulation for the following applications: Stokes polarimetry, Rheology, ellipsometry, spectroscopy and optical rotation. Exicor™ provides unprecedented sensitivity and repeatability in low-level birefringence measurement.

◆ Hitachi Scientific Instruments #401 ISLE

Nissei Sangyo America, Ltd.
755 Ravendale Drive
Mountain View, CA 94043

E-mail: sidsales@nissei.com
www.nissei.com

The HD-2000 dedicated Scanning Transmission Electron Microscope (STEM) is a powerful, high-performance, easy-to-use research and inspection tool. The system operates on a familiar Windows 95 platform with operational ease-of-use the same as a SEM, and is capable of resolving 2.35Å guaranteed. When coupled with Hitachi's Focused Ion Beam (Model FB-2000A), it gives the user a rapid TEM/STEM sample preparation system for failure analysis that provides pinpoint accuracy, cross-sectioning with quality results. Alternating between the FB-2000A and HD-2000 STEM, the user can return to precise areas of interest using the high voltage SEM/STEM image on the HD-2000 before returning to the FIB for further milling.

Fax: 717-843-0705
E-mail: istn@blazenet.net
www.istn-thermal.com

ISTN offers innovative products in two major areas—thermal conductivity measurement and absorption of heavy metals from wastewater. Measurement of thermal conductivity on materials such as insulation and composite sheet is available both through service and instrument sales. Equipment that provides fast and accurate measurement on liquid samples is our newest product line. Our second area of expertise is in absorption of heavy metals from wastewater. We currently manufacture several different products with super absorbent properties that can be tailored to meet your remediation and recovery needs. Additionally, ISTN performs contract research in a variety of areas.

www.iop.org

Institute of Physics Publishing, a not-for-profit scientific publisher, produces a variety of journals, books

and magazines. At the 1999 MRS Fall Exhibit, IoP features *Smart Materials and Structures, Modelling and Simulation in Materials Science and Engineering and High Performance Polymers*. Stop by for a free sample copy of these and other IoP journals. We also offer a 20% discount on our books, which are now available online at bookmark.iop.org. Visit our website at www.iop.org.

Institution of Electrical Engineers/INSPEC #1021

379 Thornall Street
Edison, NJ 08837
Tel: 732-321-5575
Fax: 732-321-5702
www.iee.org.uk

Stop by our booth to learn more about the EMIS Datareviews Series published by the Institution of Electrical Engineers (INSPEC division). The EMIS Series comprises over 20 books of tables, text and figures on electronic materials, including the recently published *Properties of Crystalline Silicon*, edited by former MRS president Robert Hull. Also on display will be the full range of INSPEC and IEE products and services for scientific and technical researchers. Visit us online at www.ieee.org.uk/publish/.

Instruments S.A., Inc./ Horiba Group/ JY Emission Division

(See Jobin Yvon/HORIBA)

Instruments S.A., Inc./ Horiba Group #412

Raman Division
3880 Park Avenue
Edison, NJ 08820

Fax: 732-549-2571
E-mail: raman@isainc.com
www.isainc.com

ISA's state-of-the-art Raman and thin film products continue to provide analytical capabilities by integrating emerging technologies. The LabRam is a compact, benchtop microprobe with options for confocal imaging, macro-sampling, and remote probes, including a multipass gas probe. The XY provides similar functions but with higher spectral resolution. The UVISEL provides information on thickness, optical properties, composition, surface properties and morphology of thin films.

◆ Insulator Seal, Inc. #810

6460 Parkland Drive
Sarasota, FL 34243
Tel: 941-751-2880
Fax: 941-751-3841
E-mail: sales@isi-seal.com
www.isi-seal.com

ISI, the leader in ceramic-to-metal joining, serves vacuum science and industry worldwide. ISI's leadership in seal technology is maintained by a core of engineers, providing unique solutions to a continuously expanding market. Standard product lines include multi-pin, coaxial, thermocouple and power feedthroughs; also, breaks, viewports and custom design products.

◆ Ion Tech, Inc. #511, 513

2330 East Prospect
Fort Collins, CO 80525
Tel: 970-221-1807
Fax: 970-493-1439
E-mail: info@iontechinc.com
www.iontechinc.com

Ion Tech, Inc. is the industry leader in the design and manufacture of ion beam systems and sources to meet any research or production requirement. Our product line features thin film deposition and etch systems, DC and filamentless RF ion beam sources in both linear and round configurations, cylindrical magnetrons and power supplies.

Janis Research Company, Inc. #908

P.O. Box 696
Two Jewel Drive
Wilmington, MA 01887-0696
Tel: 978-657-8750
Fax: 978-658-0349
E-mail: janis@janis.com
www.janis.com

Janis combines over 35 years of manufacturing experience with extensive engineering capabilities to provide cryogenic systems for all research applications. Janis offers closed-cycle refrigerators, 4 K refrigerators, continuous flow and variable temperature cryostats, superconducting magnet systems, detector cooling dewars, dilution refrigerators, Helium-3 cryostats, and custom designs to meet any specific requirements.

◆ JCPDS-ICDD #1004

12 Campus Blvd.
Newtown Square, PA 19073-3273
Tel: 610-325-9810
Fax: 610-325-9823
E-mail: info@icdd.com
www.icdd.com

The International Centre for Diffraction Data maintains and distributes the Powder Diffraction database for use in materials characterization via x-ray analysis. The most recent version of the database, Release 99, comprises over 120,000 numeric diffraction patterns of crystalline phases on CD-ROM and in print. Specialized products such as computer software; minerals subfiles; metals and alloys subfiles; educational products; and the *Advances in X-Ray Analysis* on CD-ROM are also available.

◆ JEOL USA, Inc. #800

11 Dearborn Road
Peabody, MA 01960
Tel: 978-535-5900
Fax: 978-536-2205
E-mail: eod@jeol.com
www.jeol.com

A 200 kV computer-controlled FEG with better than 0.2 nm point resolution in STEM HAADF; a 4.0° K UHV STM; a UHV AFM/STM with non-contact, atomic resolution; a new ambient/environmental SPM with cold and hot stage; a new UHV scanning auger microprobe with TFEG gun; a new SEM with 1.5 nm resolution and a new, NT-based user interface; all the other high performance, reliable instruments in the JEOL product line. Ask for more information.

◆ J.I.P.ELEC #317, 319

11 Chemin du Vieux Chêne
F38240 Meylan
FRANCE
Tel: 33-476-040606
Fax: 33-476-048140
E-mail: jipelec@jipelec.com
www.jipelec.com

J.I.P.ELEC supplies cold wall RTP and RTCVD reactors. Fast thermal switching, vacuum and gas mixing capabilities are standard features. Equipment for RTCVD, LPCVD and MOCVD are available. Our product line includes JetFirst, a low-cost RTP processor; Inject, a liquid delivery system for MOCVD; TubeSTAR, a LPCVD tubular furnace; and SiC furnace, an induction furnace for silicon carbide anneling up to 2000°C.

Jobin Yvon/HORIBA #410

(previously Instruments S.A., Inc./ HORIBA Group/JY Emission)
3880 Park Avenue
Edison, NJ 08820
Tel: 732-494-8660
Toll Free: 800-533-5946
Fax: 732-494-8796
www.jyhoriba.com

Manufacturer of diffraction gratings and spectroscopic systems including spectrometers, imaging spectrographs, CCD detectors, spectrofluorometers, Raman microprobes, emission spectroscopy systems, OEM systems and optical subassemblies, semiconductor process control instrumentation, semiconductor end-point control systems, thin-film measurement systems, ellipsometry systems and forensics systems.

◆ Johnsen Ultravac #1019

3470 Mainway
Burlington, Ontario L7M 1A8
CANADA
Tel: 905-335-7022
Toll Free: 800-268-4980
Fax: 905-335-3506
E-mail: juvinfo@ultrahivac.com
www.ultrahivac.com

Johnsen Ultravac manufactures a complete line of vacuum products for R&D, production and light sources including six axis manipulators featuring maximum ±4.00 inch XY motion, heating/cooling stages with 10 K to 1500 K temperature range, ultra-long stroke linear motion translators, UHV XYZ translators with 500 lbs. payload capacity, XYZ stages for *in situ* analysis, $5x10^{-11}$ Torr UHV chambers, beam line components, monochromators and a wide range of vacuum systems for surface analysis, semiconductor, optoelectronics and coating. We specialize in unique, one-of-a-kind projects.

Johnson Matthey Electronics #307

M/S 3-33
15128 E. Euclid Avenue
Spokane, WA 99216
Tel: 509-924-2200
Fax: 509-252-8734
www.jmei.com

Johnson Matthey Electronics, a major supplier of single-crystal compound semiconductors used in infrared systems and optoelectronic devices, is a primary producer of high-quality sapphire products for semiconductor and optical applications. JME refines and fabricates

high-purity metals used in single-crystal semiconductors, die attach materials, sputtering targets, seal lids, and profiling thermocouples.

◆ k-Space Associates, Inc. #719

555 S. Forest Avenue, Suite 4B
Ann Arbor, MI 48104
Tel: 734-668-4644
Fax: 734-668-4663
E-mail: ksa@k-space.com
www.k-space.com

k-Space specializes in thin-film characterization and high-performance scientific imaging products. Our kSA 300/400 systems set the standard for analytical RHEED. Our new kSA MOS (Multibeam Optical Sensor) system provides *in situ*, 2-dimensional thin-film stress and thickness characterization. For general vision-based experiments, nothing beats EyeSpy for performance, flexibility and affordability.

◆ Keithley Instruments, Inc. #510

28775 Aurora Road
Solon, OH 44139
Tel: 440-248-0400
Fax: 440-248-6168
E-mail: product_info@keithley.com
www.keithley.com

Keithley will display its line of sensitive test instrumentation designed for materials research applications. Keithley has added to its family of electrometers with the new Model 6514 programmable electrometer. The Model 6514 is ideal for applications that demand fast, precise measurements of low currents or high resistances. Also highlighted will be the Model 65 high resistivity measurement package and the Model 2182 nanovoltmeter.

◆ Kimball Physics, Inc. #612

311 Kimball Hill Road
Wilton, NH 03086
Tel: 888-KIM-PHYS (888-546-7497)
Fax: 603-878-3700
E-mail: info@kimphys.com
www.kimphys.com

UHV Electron and Ion Sources/Systems: Beam energies 5 eV to 100 keV, high brightness sources, cathodes, cathode cartridges, Faraday cups, phosphor screens. System Options: Energy sweeping, rastering, fast pulsing. UHV Components: Multi-CF fittings, miniature vacuum systems, eV parts. Applications: Surface physics, vacuum physics, charge neutralization, cathodoluminescence, phosphor testing, semiconductor processing, RHEED, ESD. Custom designs. Visit us at www.kimphys.com.

◆ KLA-Tencor Corporation #718

160 Rio Robles
San Jose, CA 95134-1809
Tel: 408-875-3000
Fax: 408-875-4144
www.kla-tencor.com

KLA-Tencor is the world's leading manufacturer of yield management and process control systems for the semiconductor industry. KLA-Tencor offers a broad range of products including automated systems for in-line defect monitoring on patterned and unpatterned wafers, reticle and photomask defect inspection, thin film and resistivity measurement, wafer overlay and CD-SEM metrology, flat panel display measurement, thin film head and disk inspection and metrology. Also provided are defect data analysis products and yield management consulting services which span the company's product lines.

◆ Kluwer Academic/Plenum Publishers #922, 924

101 Philip Drive
Norwell, MA 02061
Tel: 781-871-6600
Fax: 781-871-6528
E-mail: kluwer@wkap.com
www.wkap.nl

Kluwer Academic/Plenum Publishers, a leading publisher of scholarly, scientific and technical books and journals, invites you to visit our booth at MRS. Browse through our latest publications in materials science. A 20% discount is available on all books on display.

◆ Kratos Analytical, Inc. #606

100 Red Schoolhouse Road
Building A
Chestnut Ridge, NY 10977
Tel: 914-426-6700
Fax: 914-426-6192
E-mail: jd@kratos.com
www.kratos.com

Kratos proudly announces that it now offers a complete range of instrumentation (benchtop and ultra high performance models) for materials analysis. Techniques include XPS/ESCA, AES/SAM, UPS, ISS, SIMS, WDXRF, EDXRF and XRD. These instruments perform fast, reliable analysis ranging from a material's surface chemistry to the total elemental composition.

◆ Kurt J. Lesker Company #712

1515 Worthington Avenue
Clairton, PA 15025-2700
Tel: 412-233-4200
Toll Free: 800-245-1656
Fax: 412-233-4275
E-mail: sales@lesker.com; international@lesker.com
www.lesker.com

Worldwide distribution of: linear and circular Torus® sputtering magnetrons; e-beam, thermal and epitaxy sources; targets and materials of all purities; custom UHV chambers; electrical, gas/liquid, motion feedthroughs; and the AccuQuad® RGA. Also offering high vacuum and UHV sample manipulation and surface science components.

Ladd Research Industries, Inc. #520

13 Dorset Lane
Williston, VT 05495
Tel: 802-878-6711
Fax: 802-878-8074
E-mail: sales@ladd.cc
www.ladd.cc

Specialties include:

- Apertures—All electron microscopes. Platinum, molybdenum strips and discs 5 μm and above.
- Microholes—Slits/holes, various metals and sizes. Applications include x-ray, gas flow, ion beam, E-beam, light flow and solder droplets
- Equipment—Vacuum evaporators, sputter coaters, ultra sonic cleaners, etc.
- Supplies—Tweezers, specimen mounts, standards, precision tools, chemicals, photographic supplies, etc.

◆ Lake Shore Cryotronics, Inc. #512

575 McCorkle Blvd.
Westerville, OH 43082-8888
Tel: 614-891-2243
Fax: 614-818-1600
E-mail: sales@lakeshore.com
www.lakeshore.com

Integrated Hall effect and magnetoresistance semiconductor material characterization systems with Van der Pauw resistivity measurements; features QMSA, a new data-manipulation algorithm which simultaneously derives concentrations and mobilities for multiple distributions of electrons and holes in layered semiconductor device structures. Also vibrating sample magnetometers, AC susceptometers/DC magnetometers, cryogenic platforms; high-level, Windows™-based instrument management software; new Model 340 dual loop temperature controller with multiple sensor inputs, cryogenic temperature sensors, gaussmeters, Hall generators, electromagnets, and four-quadrant power supplies.

Lambda Physik, Inc. #616

3201 West Commercial Blvd.
Suite 110
Fort Lauderdale, FL 33309
Tel: 954-486-1500
Toll Free: 800-EXCIMER
Fax: 954-486-1501
E-mail: marketingusa@lambdaphysik.com
www.lambdaphysik.com

Lambda Physik is the leading manufacturer of UV-lasers and produces excimer, dpssl Nd:YAG and tunable lasers for industry, microlithography (248, 193, 157 nm), medicine and science. The new F_2 lasers (157 nm) enable still higher precision in ablation and structuring, especially for tough materials such as silicon, fused silica and PTEE (Teflon). The laser spectrum also includes industrial excimer lasers for PLD and recrystallization of amorphous silicon.

◆ LEO Electron Microscopy Inc. #601, 603

One Zeiss Drive
Thornwood, NY 10594
Tel: 914-747-7700
Fax: 914-681-7443
E-mail: MDeLulio@compuserve.com
www.leo-em.co.uk

LEO Electron Microscopy Inc. is pleased to announce the introduction of the LEO 1400 Series, a family of six high performance, conventional and variable pressure scanning electron microscopes. Our Integrated Computer Environment, ICE, brings together all of the major control functions of the SEM. More than a digitally interfaced add-on PC, ICE merges the hardware and software of the microscope so that every operating parameter is available for control or automation. LEO-32, the intuitive graphical user interface of the SEM, is the culmination of 13 years of software control experience. Full operating system compatibility with either Windows® 98 or Windows® NT is guaranteed, as is full Year 2000 compliance. The

new LEO VPSE detector provides a secondary electron image while operating in VP mode. Operated through mouse, keyboard or multi-functional control panel, the LEO 1400 Series provides ease of use to the novice or occasional operator while meeting the needs of the most challenging applications. All LEO Electron microscopes are equipped with clean, fast, turbo-molecular pumps as standard. This eliminates the possibility of sample contamination and reduced EDS detector performance.

◆ Leybold Vacuum Products, Inc. #706

5700 Mellon Road
Export, PA 15632-8900
Tel: 724-327-5700
Fax: 724-733-1217
E-mail: info@leyboldvacuum.com
www.leyboldvacuum.com

Leybold Vacuum is a full-line supplier of vacuum pumps and pumping systems, well suited for research applications. Our products range from mechanical and magnetic bearing turbomolecular pumps, rotary vane pumps to dry pumps, and pumping systems. The EcoDry L dry piston pump offers low cost-of-ownership through less power consumption, no cooling water, nitrogen or oil needed, and less parts. Our turbo pumps feature state-of-the-art rotor design for increased reliability and performance. Visit our online store at www.buyvacuum.com.

Logitech Product Group #200

810 Sharon Drive
Westlake, OH 44145
Tel: 440-871-0071
Fax: 440-871-8188
E-mail: info@logitech-us.com
www.logitech-us.com

Logitech is a manufacturer of high precision sawing, lapping and polishing equipment. Research and small-scale production systems are available for substrate backthinning and polishing GaAs, InP, sapphire, silicon and other semiconductor wafers, electro-optic crystals, ceramics, waveguides, laser rods and optical components. We also supply a full range of lapping and polishing consumables. For additional information call Keith Torrance at 800-321-5834.

MBRAUN, Inc. #905

65 Parker Street, Unit 5
Newburyport, MA 01950
Tel: 978-462-1770
Fax: 978-462-1862
E-mail: mbgloveboxes@msn.com
www.mbraun.de

MBRAUN produces inert atmosphere glove boxes (UNIlab, Labmaster, MB150BGII, isolators, welding chambers) and a position sensitive detector for x-ray diffraction. Glovebox operates at <1 ppm H_20/O_2 with 50 cfm circulation, high capacity purifier. Simple PLC operation, solid state analyzers, freezers, ovens, microscope assembly, solvent removal, nitrogen removal. New Options: solvent purification, stand-alone solid state analyzers. PSD uses Windows software, four versions of measurement, up to 80 microns position resolution.

◆ MDC Vacuum Products Corporation #812

23842 Cabot Blvd.
Hayward, CA 94545
Tel: 510-265-3500
Fax: 510-887-0626
E-mail: sales@mdc-vacuum.com
www.mdc-vacuum.com

Complete line of UHV components including: flanges and fittings, valves, roughing components, instrumentation, electrical feedthroughs, XYZ manipulators, rotary and linear feedthroughs, fast-entry load-lock systems, all-metal sealed right angle valves and M.E.S.A. compatible rectangular gate valves. A complete line of electron beam evaporation sources in single-pocket and multi-pocket configuration with matching 6 kw, 10 kw, and 15 kw solid-state switching power supplies.

◆ Micro Photonics, Inc. #1016, 1018

4972 Medical Center Circle
P.O. Box 3129
Allentown, PA 18106-0129
Tel: 610-366-7103
Fax: 610-366-7105
E-mail: info@microphotonics.com
www.microphotonics.com

Micro Photonics supplies nano-hardness testers, micro-scratch testers and tribometers for measuring thin film hardness, adhesion, and wear resistance; ellipsometers and reflectometers for measuring thin film thickness and optical properties; non-contact 2D and 3D profilometers for measuring surface topography; x-ray microtomographs for measuring material microstructure; and CCD cameras for x-ray imaging.

Microcal Software, Inc. #921

One Roundhouse Plaza
Northampton, MA 01060
Tel: 800-969-7720
Fax: 413-586-9665
E-mail: info@microcal.com
www.microcal.com

Offering Origin, the "fastest path from data to presentation." These powerful data analysis tools include linear and nonlinear curve fitting, FFT, digital signal analysis, baseline and peak analysis, statistics and more. Create publication ready graphs in Origin or add your Origin graphs to your favorite presentation software.

◆ MKS Instruments, Inc. #916, 918

Six Shattuck Road
Andover, MA 01810
Tel: 978-975-2350
Fax: 978-975-0093
E-mail: mks@mksinst.com
www.mksinst.com

MKS Instruments, Inc. will feature several products across its entire product line oriented towards advanced materials research, such as low- and high-K dielectrics and copper manufacturing processes. These products represent the latest in measurement and control technology as well as *in situ* process diagnostics.

◆ MMR Technologies, Inc. #1007

1400 N. Shoreline Blvd., Suite A-5
Mountain View, CA 94043-1346
Tel: 650-962-9620
Fax: 650-962-9647
E-mail: mmr@mmr.com
www.mmr.com

MMR Technologies manufactures temperature controlled systems—cryogenic cooling systems and wide temperature range thermal stages—which find application in materials research in electrical engineering, physics, biology and chemistry applications over the temperature range of 10 K to 730 K. They are also used in the cooling of computer chips, electronic devices, laser diodes, and thermal imaging devices, and in the characterization of the performance and properties of such devices as a function of temperature.

Molecular Metrology, Inc. #205

141 Bridge Road
Salisbury, MA 01952
Tel: 978-499-0899
Fax: 978-499-2917
E-mail: info@molmet.com
www.molmet.com

Molecular Metrology, Inc. designs and manufactures x-ray diffraction equipment, specializing in customized instruments for surface and small angle scattering. Our products include user-friendly instruments for SAXS, ultra-SAXS, rapid x-ray reflectivity, x-ray standing wave fluorescence, x-ray scattering from liquid surfaces, as well as x-ray focusing optics. We have developed an open platform design that allows integration of x-ray measurement tools into other processes for *in situ* studies and quality control.

Molecular Simulations Inc. #704

9685 Scranton Road
San Diego, CA 92121
Tel: 858-458-9990
Fax: 858-458-0136
E-mail: byronk@msi.com
www.msi.com

Visit MSI to find out how computer modeling predicts properties, designs and characterizes new materials, and helps you to optimize processes. Applications include solid state materials, where researchers apply MSI's CASTEP and DMol3 codes to predict structure and properties with high accuracy, and polymeric and soft materials, where MSI's industry-leading simulation tools are now complemented with new capabilities to model the mesoscale.

Morton International, Inc.

(see Rohm and Haas Company)

MTI Corporation #318

5327 Jacuzzi Street, Unit 3G
Richmond, CA 94804
Tel: 510-525-3070
Fax: 510-234-5235
E-mail: mtixpj@aol.com
www.mticrystal.com

Our primary products are high quality single crystals of oxides, compound semiconductors and advanced optical materials as well as our nanopowders that are produced by an innovative process of laser decomposition. We also market ultra-pure rare earth oxides and high purity alumina ceramics. Tailoring to customer's special requirements and very competitive pricing are our strengths.

Houston, TX 77058-3696
Tel: 281-244-8839
Fax: 281-244-8292
station.nasa.gov/science

The International Space Station (ISS) will be an exciting laboratory for scientific and technological exploration. It will use modern technology and draw on past experience to continue human exploration and development of space for the benefit and enlightenment of all peoples and nations. As a unique multidisciplinary laboratory, testbed and observatory , the ISS is expected to provide researchers with an unprecedented undertaking in scientific, technological, and international research.

◆ National Electrostatics Corp. #708

P.O. Box 620310
7540 Graber Road
Middleton, WI 53562-0310
Tel: 608-831-7600
Fax: 608-256-4103
E-mail: nec@pelletron.com
www.pelletron.com

National Electrostatics Corp. manufactures a wide variety of ion beam systems from below 100 keV to the hundreds of MeV region. These systems include complete materials analysis systems using MeV ion beams including RBS, PIXE, NRA, ERD and AMS. NEC also manufactures a wide range of beam handling and vacuum components including vacuum isolators for vacuum pumps.

◆ Neocera, Inc. #618

10000 Virginia Manor Road
Suite 300
Beltsville, MD 20705-4215
Tel: 301-210-1010
Fax: 301-210-1042
E-mail: gdoman@neocera.com
www.neocera.com

Neocera, Inc. is a microelectronics and sensor-based technology company with leading edge materials expertise in thin film development and production. Neocera products include pulsed laser deposition systems, metal oxide thin films and thin film devices, cryogenic temperature controllers, cryogenic temperature sensors and HTS SQUID microscopy and microwave microscopy systems.

New Wave Research #204

47613 Warm Springs Blvd.
Fremont, CA 94539
Tel: 510-249-1550
Fax: 510-249-1551
E-mail: lasers@new-wave.com
www.new-wave.com

New Wave Research manufactures and delivers complete compact, high performance Nd:YAG laser micromachining systems. The QuikLaze operates at repetition rates up to 40 Hz, with multiple wavelengths easily available from the infrared to the ultraviolet. Applications include marking, failure analysis, resistor trimming, LCD repair, material processing, micromachining and your application.

NFT-Nanofilm Technologie GmbH #523

Anna-Vandenhoeck-Ring 5
37081 Göttingen
GERMANY
Tel: 49-551-999600
Fax: 49-551-9996010
E-mail: info@nanofilm.de
www.nanofilm.de

NFT specializes in advanced inspection technology best suited for surface, coating and thin film analysis. NFT's ellipsometers and Brewster angle microscopes achieve an outstanding lateral resolution of 1 μm and provide a real-time video image of the sample. This is made possible by using the basic principle of ellipsometry or Brewster angle microscopy and using a CCD camera as the detector. All NFT instruments feature state-of-the-art software with user-friendly interfaces and complete hands-off operation. NFT also supplies accessories for monolayer handling such as Langmuir film balances and active anti-vibration systems, with the capability to even dampen vibrations in the critical 1 Hz region effectively.

Nicolet Instrument Corporation #624

5225 Verona Road
Madison, WI 53711

www.noran.com

NORAN Instruments Inc. presents new answers for x-ray microanalysis and microstructure applications. ORKID and PHASE ID systems for crystallographic analysis of electron backscattered diffraction patterns; NEW MAXray-ER for high resolution elemental x-ray analysis; SIGMA and VANTAGE x-ray microanalysis systems which feature our exclusive no-LN detectors or high resolution LN-cooled detectors. All backed by the world's largest dedicated microanalysis support group.

NYS Center for Advanced Thin Film Technology #1104

CESTM
251 Fuller Road, B-110
Albany, NY 12203
Tel: 518-437-8686
Fax: 518-437-8687
E-mail: lahill@csc.albany.edu
www.albany.edu/cat

The Center acts as a research, development, education and economic outreach resource for industries, which manufacture, use or supply microelectronic, electronic, optoelectronic and photonic devices. The Center boasts a 200 mm tool set including 8 cluster tools and 30 standalone process cells. Extensive thin film characterization instruments are also available. Copper metalization and low temperature CVD are specialties at the Center.

Olympus America Inc. #309

Scientific Equipment Division
Two Corporate Center Drive
Melville, NY 11747-3157
Tel: 800-446-5967
Fax: 516-844-5112
E-mail: micro@olympus.com
www.olympus.com

Olympus features the SZX12 research stereo microscope with the largest zoom ratio of 12.86:1; Provis AX70M microscope with multi-port observation tube for simultaneous attachment of image analysis and photographic (or digital) cameras; the MX general inspection microscope, and the OLY750 color video camera with 750 lines resolution.

◆ Omicron Associates #416

1226 Stoltz Road
Bethel Park, PA 15102
Tel: 412-831-2262
Fax: 412-831-9828
E-mail: omiassoc@sgi.net
www.omicron-instruments.com

Omicron continues to excite the surface science community with product innovation. A recent agreement with the company Oxford Instruments Ltd. opens a new phase in the world of low temperature physics research. Integrating Omicron's established SPM expertise with Oxford's internationally recognized cryogenic experience will yield unique research equipment specifically designed for investigation of material properties below 5 K. The practical objective is observation of surface structures/effects with atomic level resolution. A selection of the wide range of Omicron "Instruments for Surface Science" will be displayed including the TwinSNOM Transmission/Reflection, Scanning Near-Field Optical Microscope.

Oriel Instruments #625

150 Long Beach Blvd.
Stratford, CT 06615
Tel: 203-377-8282
Fax: 203-378-2457
E-mail: res_sales@oriel.com
www.oriel.com

Oriel Instruments exhibits its Raman-PL system and FT-IR spectrometer. These modular instruments allow you to evaluate structural and chemical characteristics of solid, liquid, and gaseous samples. The instruments complement each other in the lab as materials emitting strong IR signals tend to exhibit weak Raman signals and vice versa. Our flexible design allows a lab to reasonably consider using both of our economical instruments for materials evaluation.

◆ Osmic, Inc. #703

1788 Northwood Drive
Troy, MI 48084
Tel: 248-362-1290
Toll Free: 800-366-1299
Fax: 248-362-4043
E-mail: makowske@osmic.com
www.osmic.com

Osmic manufactures multilayer coated x-ray and neutron optics. Osmic's distinctive optic assemblies are key components of many x-ray analytical instruments. Now available for retrofit onto Cu, Cr, Co and Mo diffractometers, Max-Flux™ Optics offer high flux and good resolution from a well collimated monochromatic beam. Confocal Max-Flux™ Optics can simultaneously monochromatize and either focus or collimate a divergent x-ray beam. Ovonyx™ multilayers provide the best light element analysis in WD-XRF spectrometers. Osmic engineers and designs custom components and instrument assemblies.

Oxford Applied Research #424

Crawley Mill, Witney
Oxon OX8 5TJ
UNITED KINGDOM

Fax: 44-1993-702326
E-mail: sales@
oxfordar.demon.co.uk
www.oaresearch.co.uk

Manufacturer of growth, processing and characterization equipment for semiconductor or thin film research including RF atom sources for high-quality oxide/nitride growth and effective H-atom precleaning of sensitive substrates. Also supplies e-beam evaporators, ECI nanocluster deposition sources for contact metallization or nanofabrication, ion sources for sputter deposition/cleaning and electron guns.

Oxford Instruments America, Inc. #417

Microanalysis Group
130A Baker Avenue Ext.
Concord, MA 01742
Tel: 978-369-9933
Fax: 978-369-8287
E-mail: maginfo@oxford.usa.com
www.oxford-instruments.com

Oxford Instruments is the world's leading supplier of integrated microanalytical tools for the materials and microelectronic industries. These tools are interfaced to scanning electron microscopes and include chemical microanalysis by EDX and WDX, grain orientation analysis and cathodoluminescence for optoelectronic device characterization. The XGT 2000W is a stand-alone x-ray microscope with a scanning stage providing combined transmitted x-ray imaging, quantitative microanalysis and elemental x-ray mapping capability all carried out with no vacuum involved.

Presenting systems for materials characterization, scanning probe microscopy and spectroscopy:

- Vibrating Sample Magnetometer, providing applied fields up to 16 tesla with sensitivities of 10^{-6} EMU
- MagLab^{EXA}, a low-cost measurement platform system using a variety of techniques; e.g., AC susceptibility, magnetization, transport and heat capacity measurements (adiabatic/relaxation)
- MagLab^{CMP}, a highly-sensitive, micro-cantilever magnetometer
- CryoSTM, atomic resolution UHV variable temperature scanning tunneling microscopy over temperature range <10 K to 300 K
- CryoSXM, versatile scanning probe microscope for STM, NSOM, AFM and other probe techniques in variable temperature from 1.5 K to 300 K and optional high magnetic field
- TOPS III PC Windows-based SPM contract electronics and software and more cryogenic and superconducting technology related equipment
- *VTSTM variable temperature* UHVSTM from 50 K to 100 K

The LAMBDA 900 is the ideal tool for research, design, manufacturing and QC where UV/VIS/NIR spectroscopy is the technique of choice. Characterization of thin film coatings, mirrors, high performance optics and many other applications can be accomplished with one instrument. Enhanced UVWINLAB software provides a simple but powerful user interface for the LAMBDA 900.

◆ Pfeiffer Vacuum #320

24 Trafalgar Square
Nashua, NH 03063
Tel: 603-578-6500
Toll Free: 800-248-8254
Fax: 603-578-6550
E-mail: contact@pfeiffer-vacuum.com
www.pfeiffer-vacuum.com

Pfeiffer Vacuum is a global leader in the production of vacuum products used in a broad spectrum of high technology applications including electronics, materials science and research. Products include a complete line of turbomolecular, mechanical and dry vacuum pumps, quadrupole mass spectrometers, residual gas analyzers, helium leak detectors, compact gauges, valves, flanges and fittings.

◆ Philips Analytical #1000, 1002

12 Michigan Drive
Natick, MA 01760
Tel: 508-647-1100
Fax: 508-647-1111
E-mail: diane.donati@philips.com
www.analytical.philips.com

Philips Analytical is the leading manufacturer of x-ray diffraction and x-ray fluorescence equipment as well as wafer analyzing and photoluminescence mapping systems. Information is available on all product lines. Philips Analytical is ISO 9001 certified. We adhere to the most stringent of the three ISO classifications which requires an established, effective quality system be in place.

Philips Electron Optics

(See FEI Company/Philips Electron Optics)

◆ Physical Electronics #811, 813

6509 Flying Cloud Drive
Eden Prairie, MN 55344
Tel: 612-828-6100
Fax: 612-828-6322
E-mail: marketing@phi.com
www.phi.com

Physical Electronics (PHI) develops, manufactures and markets surface analysis instrumentation to perform auger electron spectroscopy (AES), x-ray photoelectron spectroscopy (XPS), secondary ion mass spectrometry (SIMS) and time-of-flight SIMS. These techniques characterize the top few atomic layers of a surface, providing spatially resolved information about elemental composition, chemical bonding and molecular structure.

◆ PIEZOMAX Technologies, Inc. #1204

505 South Rosa Road
Madison, WI 53719
Tel: 608-238-4850
Fax: 608-238-5120
E-mail: draeger@piezomax.com
www.piezomax.com

PIEZOMAX Technologies, Inc. manufactures precision nanopositioners, driver and feedback electronics, and ProbeMAX™ carbon nanotube tips for scanning probe microscopy. Nanopositioners can be designed for X, XY, or XYZ motion, with closed loop function, 100 micrometers or greater range of motion, position resolution finer than 1 angstrom, and resonant frequency as high as 7 kHz. The positioners utilize flexure hinges designed by finite element analysis, and are driven by piezostack actuators with capacitance position sensing. Applications include surface metrology and profilometry, precision machining, optical transmission control, laser positioning, scanning probe microscopy, electron-beam positioning, mask and wafer alignment, nanoindentation techniques, and molecular biology research.

Polytec PI, Inc. #421

23 Midstate Drive, Suite 212
Auburn, MA 01501
Tel: 508-832-3456
Fax: 508-832-0506
E-mail: info@polytecpi.com
www.polytecpi.com

Polytec PI offers a wide range of laser products including excimers, cw and pulsed Nd:yag, Ti: sapphire, ruby, argon, HeNe, diode lasers and other tunable sources available with our new diode array spectrometers to cover 350 to 2,200 nm at a resolution as low as 0.06 nm. Polytec can cover the many applications in the scientific and industrial field (spectroscopy, holography, PIV, interferometry, ablation, micromaching, Lidar, etc.)

Praxair Specialty Ceramics #224

16130 Wood-Red Road NE
Suite 7
Woodinville, WA 98072
Tel: 425-487-1769
Fax: 425-487-1859
E-mail: Ron_Ekdahl@praxair.com
www.praxair.com

Praxair Specialty Ceramics manufactures a wide array of metallic oxide powders and deposition materials. Multi-component oxide powders are produced with the patented technology Combustion Spray Pyrolysis (CSP), a solution synthesis process which yields fine homogeneous powders. Deposition materials include electron beam evaporation ingots, evaporation pellets and sputtering targets up to 13 inches in diameter. Standard and specialized products are offered for research and large scale production. Common markets served include superconductor, solid oxide fuel cell, ferroelectric, and photovoltaic applications.

◆ Princeton Gamma-Tech, Inc. #804

C/N 863
Princeton, NJ 08540-0863
Tel: 609-924-7310
Fax: 609-924-1729
E-mail: sales@pgt.com
www.pgt.com

On display will be PGT's full line of energy dispersive x-ray microanalysis systems for electron column instrumentation. Included in this are the new Avalon 4000 and Avalon 8000 microanalysis systems. The IMIX family of microanalysis systems with superior advanced x-ray and imaging capabilities will also be on hand for demonstrations.

◆ Princeton Scientific Corp. #604

P.O. Box 143
Princeton, NJ 08542
Tel: 609-924-3011
Fax: 609-924-3018
E-mail: psc1@IDT.com
www.princesci.com

Princeton Scientific Corp. offers various metal and oxide single crystals, like W, Mo, Au, $SrTiO_3$, TiO_2 and MgO, as well as a number of III-V materials such as GaAs, GaP, InSb, InAs, InP, and more. Cutting and polishing services are also provided. Also on display is a precision wire saw which allows for a very accurate cutting process and yields surfaces with almost 'lapped' quality.

Proxitronic/Stanford Computer Optics #108

3193 David Avenue
Palo Alto, CA 94303
Tel: 650-494-7797
Fax: 650-494-6711
E-mail: 103013.1637@compuserve.com

Manufacturer of microchannel plate and diode image intensifiers and spectral converters for wavelength range from 110 to 900 nanometers and light amplification from 10^1 to 10^9:1. Used in applications in vacuum UV, ellipsometry, spectrometry, plasma research, LIF, particle analysis, optical measuring instrumentation and intensified CCD cameras where low light, down to single photon levels (nanoLUX), must be imaged, analyzed or converted. Spectral conversion from UV to visible. Also intensified, gated cameras with shutter speeds as fast as 200 picoseconds.

◆ Pure Tech #217

A Subsidiary of Williams Advanced Materials, Inc.
P.O. Box 1319
Commerce Drive
Carmel, NY 10512
Tel: 914-878-4499
Fax: 914-878-4727
www.puretechinc.com

Pure Tech is an ISO 9002 certified American manufacturer of high purity materials for sputtering and evaporation. Pure Tech produces both standard and custom materials for R&D as well as production applications. In-house capabilities include vacuum melting, inert gas hot pressing, metal and ceramic machining, custom-designed backing plates, target bonding, and analytical services.

◆ Quad Group, Inc. #613

1815 South Lewis Street
Spokane, WA 99224

Fax: 509-458-4555
E-mail: info@quadgroupinc.com
www.quadgroupinc.com

A Complete Material Science Test Lab (and Coatings Lab) in a Box...Romulus III-A executes tensile stress/strain (eng. and true), or in seconds switches to Flexural Modulus of Rupture (3 or 4 point loading) with automatic operation and parameter reporting—no operator judgment or errors. For the coating test lab, execute optional stud pull adhesion, shear, peel, tear, blade cutting, scratch, for electronics and functional coatings, or disk and head coatings. And, microrange tests for multiple microelectronic applications. NEW, our instrumented indentation tester, Alexandra I, measures hardness, Young's Modulus, yield strength and strain hardening in minutes. Uses proven Hertzian concepts and simple polished metallurgical sample prep.

Excellent for characterizing all materials above 5 micrometers. Valuable in determining properties as a function of depth, such as with IBMM and composites. Wonderful teaching lecture aid.

◆ Quantum Design, Inc. #407, 409

11578 Sorrento Valley Road
San Diego, CA 92121
Tel: 858-481-4400
Fax: 858-481-7410
E-mail: info@quandsn.com
www.quandsn.com

Quantum Design manufactures its magnetic property measurement system (MPMS) and physical property measurement system (PPMS). The MPMS SQUID magnetometer is the industry standard for ultrasensitive magnetic measurements. The PPMS is an innovative device designed to provide automated magnetic, torque, transport, specific-heat and user designed measurements over a broad range of temperatures and applied magnetic fields.

Quesant Instrument Corporation #225

29397 Agoura Road, Suite 104
Agoura Hills, CA 91301
Tel: 818-597-0311
Fax: 818-991-5490
E-mail: quesant@quesant.com
www.quesant.com

Quesant produces easy-to-use, innovative and affordable scanning probe microscopes. Q-Scope™ SPMs offer multiple scanning modes and include innovative features such as our patented Isotopic Focal System™, fast scanning (up to 10 times faster than other SPMs), an open architecture for optimal sample access, and Windows-based software. All at prices that make sense.

Radiant Technologies, Inc. #1009

2021 Girard, SE, Suite 100
Albuquerque, NM 87106
Tel: 505-842-8007
Toll Free: 800-289-7176
Fax: 505-842-0366
E-mail: radiant@ferrodevices.com
www.ferrodevices.com

Radiant Technologies announces the introduction of our Precision Materials Analyzer Family which extends the precision, flexibility and ease of Radiant's testers into the megahertz measurement range. The Precision Pro introduces 1 μs ground hardware driven by Windows NT V4.0™ user interface, revolutionary software design that provides exceptional freedom to design, conduct and review tasks associated with any materials experiment. The Precision Workstation serves the test and measurement role in the laboratory. Radiant Technologies also provides World Wide Web customer support and universal user communication capabilities, memory technology, engineering services and clean room facilities.

Refining Systems, Inc. #105

P.O. Box 72466
Las Vegas, NV 89117
Tel: 702-368-0579
Fax: 702-368-0933
www.refiningsystems.com

Refining Systems manufactures sputtering targets and evaporation materials for thin film deposition, platinum crucibles and labware for crystal growth, and various fabricated products such as tubing, wires, ribbons, foils, etc. Visit our booth at the MRS Fall Exhibit in Boston.

Renishaw Inc. #621

623 Cooper Court
Schaumburg, IL 60173
Tel: 847-843-3666
Fax: 847-843-1744
E-mail: raman.usa@renishaw.com
www.renishaw.com

Renishaw will demonstrate exciting instrument developments in Raman microscopy and process Raman analyzers. Renishaw is the recognized world leader in Raman microscopy. Very high efficiency spectrometers allow superb performance from the deep UV to the NIR including direct 2-D Raman and photoluminescence imaging. Fast new process Raman instruments suitable for applications involving multiple fiber optic probes, rugged and high temperature probes will also be displayed.

◆ Research and PVD Materials Corporation #716

P.O. Box 4796
Wayne, NJ 07474
Tel: 973-575-4245
Fax: 973-575-6460

Research and PVD Materials Corporation manufactures a wide variety of highly characterized, high purity materials for the diverse and sophisticated requirements of the semiconductor, electronics, electro-optic and related research communities. Products from this single-quality source include but are not limited to sputtering targets, thin-film deposition materials, fabricated forms of specialty and exotic metals, alloys, ceramics, intermetallics, custom fabrications and "one off" components.

Reveo, Inc. #422

8 Skyline Drive
Hawthorne, NY 10532
Tel: 914-345-9556
Fax: 914-345-2095
E-mail: bdg@reveo.com
www.reveo.com

Reveo's technical problem-solving service is the key to your R&D success. We have proven our effectiveness in solving problems and providing advanced solutions in diverse fields. Our service includes frontier research in fundamental problems, technology development and prototyping, technology consulting, and intellectual property licensing. For more information on our areas of expertise please visit our website at www.reveo.com.

Rheometric Scientific, Inc. #821

One Possumtown Road
Piscataway, NJ 08854
Tel: 732-560-8550
Fax: 732-560-7451
E-mail: marketing@rheosci.com
www.rheosci.com

Rheometric Scientific, Inc. designs, builds, markets and sells the broadest line of test instruments available for materials characterization. The product line includes rheometers, viscometers, thermal analyzers, tensile testers and on-line process control monitors. RSI has a worldwide network of sales, applications engineering and technical support personnel to help customers solve material problems. RSI is ISO 9001 certified.

◆ RHK Technology, Inc. #808

1050 E. Maple Road
Troy, MI 48083
Tel: 248-577-5426
Fax: 248-577-5433
E-mail: info@rhk-tech.com
www.rhk-tech.com

RHK Technology, the leading supplier of SPM equipment for research, will feature our NEW DSP-based control system with the SHARC. We will be demonstrating the new controller and software features along with our Model UHV 300 Variable Temperature UHV STM system throughout the show. The UHV 300VT is available with LHe or LN_2 cooling options and is the only commercial "Beetle" design offering variable temperature and *in situ* tip change. Our NSOM microscope from Nanonics will also be on display along with our Cathodic Arc Pulsed Plasma Deposition package and full compliment of SPM control accessories and interface options. We will also be demonstrating the world's lowest cost ($7,900) turnkey, atomic resolution STM system, the easyScan from NanoSurf AG.

◆ Riber, Inc. #525

3880 Park Avenue
Edison, NJ 08820
Tel: 732-603-0680
Fax: 732-603-8611
E-mail: riber@isainc.com
www.riber.com

Riber is the leading supplier of epitaxial reactors (MBE, CBE, MOMBE and UHV/CVD for SiGe) and components. Reactors range from the new R&D system for nitrides, Model Compact 21, through fully automated multiwafer production for 4x4 inch and 9x4 inch. Components include valved cracker cells for phosphorus and arsenic and high precision gas flow lines for C doping for NH_3 for nitrides.

◆ Rigaku/USA, Inc. #406, 408

9009 New Trails Drive
The Woodlands, TX 77381
Tel: 281-367-2685
Fax: 281-364-3628
E-mail: info@rigaku.com
www.rigaku.com

Rigaku provides the world's most complete line of x-ray diffraction and fluorescence instruments including: desktop and laboratory powder diffractometers, high-resolution thin film diffractometers, x-ray reflectometers, diffraction and topography tools for the semiconductor industry, small-angle scattering systems, rotating-anode generators, sequential and simultaneous x-ray spectrometers, TXRF systems, and wafer analyzers.

◆ RJ Lee Instruments Limited #300, 302

515 Pleasant Valley Road
Trafford, PA 15085
Tel: 724-744-0100
Fax: 724-744-0506
E-mail: pssales@rjleeinst.com
www.rjleeinst.com

RJ Lee Instruments Limited, "The Applications Specialists," designs, manufactures and services fully

integral microanalysis systems (SEM/EDX) for specific and general applications. Our tightly integrated products provide maximum flexibility, speed and reliability. Exclusive Automated Feature Analysis™ (AFA) provides completely unattended microanalysis and detailed reports.

◆ Rohm and Haas Company #311

60 Willow Street
North Andover, MA 01845
Tel: 978-557-1700
Fax: 978-557-1701

Rohm and Haas Company (formerly Morton International) is the leading manufacturer of high purity metalorganic sources for MOVPE and related growth technologies. Our trimethylgallium, trimethylaluminum, trimethylindium and magnesium dopant sources deliver peak film performance for gallium nitride applications.

RÖNTEC USA, Inc. #112

20 Main Street
Acton, MA 01720
Tel: 978-266-2900
Fax: 978-929-9313
E-mail: sales@rontecusa.com
www.rontecusa.com

RÖNTEC will show its new Macres Award-winning EDX detector technology...the XFlash®, a reliable, high performance silicon drift chamber x-ray detector (SDCD). XFlash® is a small, low cost, LN2 free, room temperature x-ray detector for SEMs and diffractometers which can process up to 1 million cps with excellent energy resolution. RÖNTEC offers complete Windows-based EDS systems, its own advanced design, low consumption LN2 cooled UHV detectors and upgrades to most existing EDX detectors.

Schott Glass Technologies Inc. #617, 619

400 York Avenue
Duryea, PA 18642
Tel: 570-457-7485
Fax: 570-457-6960
E-mail: sgt@sg23L.attmail.com
www.schottglasstech.com

Schott Glass Technologies features technical glasses and glass ceramics for industrial and scientific uses. Industries served include electro-optics, photonics, aerospace, astronomy, ophthalmic, semiconductor, government sectors, and others. We melt glasses in various types of crucibles and continuous tanks each with daily outputs between one-half liter and many tons, and have a glass research and development laboratory staffed with experts in physics, engineering and materials science.

Scintag, Inc. #325

10040 Bubb Road
Cupertino, CA 95014
Tel: 408-253-6100
Toll Free: 800-TEL-XRAY
Fax: 408-253-6300
E-mail: sales@scintag.com
www.scintag.com

Scintag provides system solutions to the diverse needs of the x-ray diffraction community. Be it quality control, research or teaching, Scintag offers the right system for every application and budget. Scintag offers standard and customized system designs, accessories and Windows NT-based software packages.

SciVision #1022

200 Wheeler Road
Burlington, MA 01803
Tel: 781-272-4949
Fax: 781-272-6868
www.scivision.com

Headquartered in Burlington, Massachusetts, SciVision was founded in 1992 to create software that delivers mission-critical information to the desktops of research and development scientists. SciVision has released several products relating to glass, polymers, and analytical chemistry. The software includes large, relational databases, property prediction tools, visualization tools, and discipline-specific analytical tools.

SELA USA, Inc. #201, 203

1030B East Duane Avenue
Sunnyvale, CA 94086
Tel: 408-736-3700
Fax: 408-524-5439
E-mail: info@sela.com
www.sela.com

Incorporating the latest development in microcleaving technology, the SELA MC500 System has been designed to allow fully automatic, reliable, and speedy cross-sectioning of both integral die and wafer level samples. An innovative approach facilitates processing of segments down to a minimum size of 4.2x2.1 mm, and results in two accurate, completely artifact free, mirror-image sections. Dedicated software enables automatic mapping and planning of a single or multiple targets (optional) and off-loading for immediate inspection. This accessibility, together with high throughput (15 min/sample), high accuracy (0.5μ), and excellent quality cross-sections, significantly reduces the diagnostic cycle for both failure analysis and process monitoring. The SELA TEMstation allows automatic, reliable and rapid TEM sample pre-preparation. This stand-alone unit produces a sample thinned to 20 microns in 20 minutes, and features the capability to control and program the target location within this width. The completed sample is automatically packaged for direct loading into both a FIB workstation and TEM holder.

Sigma Instruments #725

1318 Duff Drive
Fort Collins, CO 80524
Tel: 970-416-9660
Fax: 970-416-9330

www.sig-inst.com

Sigma Instruments specializes in instrumentation for the control of vacuum processes and thin film deposition. The SQM-160 Deposition Monitor provides multi-sensor monitoring in a low cost package. Our new SQC-122 Deposition Controller provides an easy-to-use solution for basic deposition control. The powerful SID-142 Deposition Controller can monitor and control up to four codeposition sources.

Silicon-MDT Ltd. #107

P.O. Box 50
103035 Moscow
RUSSIA
Tel: 7-095-532-5535
Fax: 7-095-532-9338
E-mail: info@siliconmdt.com
www.siliconmdt.com

Silicon-MDT Ltd. is a manufacturer of the cantilevers and calibration gratings for scanning probe microscopy. We develop and fabricate customized micromechanic devices for OEMs and special scientific applications. Ultimately optimized technology allows us to achieve high quality for the lowest prices on the market.

◆ Silicon Sense, Inc. #1006, 1008

110 Daniel Webster Highway
Nashua, NH 03060-5252
Tel: 540-547-3893
Fax: 540-547-2120
E-mail: npcook@monumental.com
www.siliconsense.com

MEMS/MST, semiconductor and hybrid foundry services, with packaging; RIE and ion milling processing; silicon wafers, both Cz (2 inch to 300 mm diameter) and Fz (2 inch to 100 mm diameter) with and without thin films, epitaxy or metallization, as prime, monitor/test, single/double-side polished; Ge and GaAs materials; and RotoTool™ equipment and services; all offered for R&D through large volume production applications. Small quantity needs, for all of the above, are served.

SKION/InnoVac Corporation #411, 413

50 Harrison Street
Hoboken, NJ 07030
Tel: 201-963-5450
Fax: 201-963-5449
E-mail: info@skion.com
www.skion.com

InnoVac is a manufacturer and distributor of custom vacuum chambers, systems and components. Components include deposition systems ranging from magnetron sputtering, evaporation and ion sources to specialized substrate handling devices including load lock assemblies and linear motion stages. SiC substrate heaters for use in oxygen environments and liquid nitrogen cooling stages are also available.

◆ Solartron Inc. #212

964 Marcon Blvd., Suite 200
Allentown, PA 18103
Tel: 610-264-5034
Toll Free: 800-225-5765
Fax: 610-264-5329
E-mail: lab_info@solartron.com
www.solartron.com

Solartron is a leading supplier of materials, electrochemical and impedance analysis systems and software. Solartron products set the world standard in high performance measurements for batteries and energy storage devices. The Solartron Frequency Response Analyzers offer the highest accuracy, repeatability and versatility in the market today. Solartron offers total system solutions for analysis of electrochemical, corrosion and materials

characterization applications across a range of markets and industries. Solartron also provides consultation, technical support, applications engineering, test cells, accessories and product support.

SOPRA, Inc. #816

P.O. Box 2619
33 Nagog Park
Acton, MA 01720-6619
Tel: 978-263-2520
Fax: 978-263-2790
www.sopra-sa.com

Manufacturer of high accuracy and precision instrumentation and equipment for thin film characterization, ranging from *in situ* instruments for monitoring deposition and growth process, to tabletop for advanced R&D applications, to fully automated equipment used in the manufacturing of semiconductors and flat panel displays. The SOPRA Thin Film Characterization Station combines variable angle spectroscopic ellipsometer with grazing incidence angle x-ray reflectometer for very precise and accurate characterization of layers and materials. IR option extends spectral range up to 30 μm wavelength. SOPRA's new DUV spectroscopic ellipsometer covers the 145 nm to 300 nm spectral range for characterization of layers and materials at 157 nm, 193 nm and 248 nm wavelengths. Developer and manufacturer of high energy excimer lasers for annealing and processing of materials such as amorphous silicon used in the manufacturing of flat panel displays. Manufacturer of very high resolution spectrometers for optical spectroscopic characterization of materials or for very fine characterization of laser spectral lines.

◆ South Bay Technology, Inc. #501, 503

1120 Via Callejon
San Clemente, CA 92673
Tel: 949-492-2600
Toll Free: 800-728-2233
Fax: 949-492-1499
E-mail: sbt@southbaytech.com
www.southbaytech.com

South Bay Technology, Inc., a leading manufacturer of sample preparation equipment, has acquired the assets of VCR Group, Inc. VCR Group pioneered the development of the Dimpler® for TEM sample preparation and has remained a dominant force in the EM products industry. South Bay Technology will continue the production of the Dimpler® D500i as well as the new XLA/2000 computer-controlled ion milling system and the IBSE 250 for ion beam sputtering and etching. The acquisition of the VCR Group's products complements South Bay's current line of sample preparation products which include an extensive offering of products for lapping, polishing, cutting, and crystal orientation.

SPECS USA, Inc. #518

Surface Analysis Division
635 South Orange Avenue
Sarasota, FL 34236
Tel: 941-362-4877
Fax: 941-364-9706
E-mail: support@specs.com
www.specs.de

SPECS will present its new high performance UHV surface analysis components at the MRS Fall Meeting which include the high resolution electron energy analyzer, PHOIBOS 100/150; high performance, low energy electron diffraction optics, Er-LEED 100/150; and the high resolution electron energy loss spectrometer, DELTA 0.5. SPECS, with over 15 years of experience in the field of ultra-high vacuum products, is a leading manufacturer of surface analysis components and systems for XPS, UPS, ISS, AES, SAM, SEM, LEED, EELS, SIMS, SNMS, MBE components, effusion cells, plasma sources, synchrotron beam lines and magnetic sectorfield mass spectrometers.

SPI Supplies #101

P.O. Box 656
569 E. Gay Street
West Chester, PA 19381-0656
Tel: 610-436-5400
Fax: 610-436-5755
E-mail: spi2spi@2spi.com
www.2spi.com

Structure Probe, Inc. is an independent analytical laboratory providing innovative electron microscopy and surface analysis services for solving materials science problems including HTC materials, diamond coatings and complex polymer systems. SPI Supplies: Sample preparation instruments and consumable supply items for electron microscopy and surface analysis laboratories. Exclusive SPI-Module™ sputter/carbon coating system, Plasma Prep II™ etcher/asher, Plasma Prep X™ parallel plate all solid-state plasma etcher for anisotropic etching and "Tacky Dot" slides.

◆ STAIB Instruments, Inc. #717

813 Diligence Drive, Suite121E
Newport News, VA 23606-4285
Tel: 757-873-0099
Fax: 757-873-0130
E-mail: staib-us@staib-instruments.com
www.staib-instruments.com

Designs and manufactures compact, high-performance electron-optical equipment for *in situ* material analysis, including: electron sources, RHEED systems and RHEED energy analyzer to study structure and quality of thin films; PhotoEmission Electron Microscopy (PEEM), a new technique for dynamic studies of chemical distribution with high time and space resolution; and electron spectrometers for Auger, XPS and UPS analytical surface studies.

◆ Strem Chemicals, Inc. #321

7 Mulliken Way
Newburyport, MA 01950-4098
Tel: 978-462-3191
Fax: 978-465-3104
E-mail: info@strem.com
www.strem.com

Strem Chemicals manufactures a wide variety of chemicals for research and commercial scale production for the materials community including metals, inorganics and organometallics. Volatile precursors for MOCVD include metal alkyls, alkyl amides, carbonyls, alkoxides, beta-diketonates, fluorinated derivatives, organometallics and electronic grade chemicals as well as new mixed alkoxide/beta-diketonate complexes for metal and mixed metal oxide deposition. Custom synthesis services are also provided.

Structured Materials Industries, Inc./ Nanopower Enterprises Inc. #324

120 Centennial Avenue
Piscataway, NJ 08854-3908
Tel: 732-885-5909
Fax: 732-885-5910
E-mail: sales@structuredmaterials.com
www.StructuredMaterials.com

Structured Materials is a developer and provider of OXIDE Metal Organic Chemical Vapor Deposition (MOCVD) processes and equipment (components as well as fully automated systems) as well as providing film deposition development services, specializing in complex oxides such as ferroelectrics, dielectrics, superconductors and display materials. We also represent COVA Technologies Liquid Delivery Flash Evaporator systems. Nanopowder Enterprises produces very high surface area nanopowders with minimum aggregation and sells processing equipment for such nanopowders.

Superconductive Components, Inc. #707

1145 Chesapeake Avenue
Columbus, OH 43212
Tel: 614-486-0261
Fax: 614-486-0912
E-mail: sales@superconductivecomp.com
www.superconductivecomp.com

SCI manufactures ceramic powders, sputtering targets, evaporation materials and engineered ceramics for the research and commercialization of superconductors, solid oxide fuel cells, ceramic membranes, lithium ion batteries, dielectrics, electrochemical and other applications. The company's patented processes for YBCO and BSCCO powder assure consistency and high performance in thin films and wires. Powders are available with purity to 99.999% and particle size down to 0.1 microns. Visit our booth for a demonstration of high temperature superconductivity.

◆ SURFACE #521

Rheinstrasse 7
D-41836 Hueckelhoven
GERMANY
Tel: 49-2433-970305
Fax: 49-2433-970302
E-mail: surface@compuserve.com
www.surface-tec.com

SURFACE is known for its advanced laser deposition systems

and components. The LASER-Star cluster PLD system is the first production-oriented, UHV-based PLD system. It combines high performance PLD technology with advanced UHV multichamber equipment design. The system is an excellent production platform for HTSC deposition of SQUID devices and filters—substrate sizes up to 6″ can be deposited. SURFACE oxygen resistant heaters are available from 1″ to 8″ substrate diameter up to 800°C or 1000°C for HV or UHV applications. SURFACE also offers a new plasma-related product, THE SOURCE. THE SOURCE is a new hollow cathode high-density plasma source for PECVD which is ideal for industrial needs—large plasma volume, easy-to-use DC technology, upgradable to several m3 plasma volume, and low price level. THE SOURCE delivers the plasma density and ion energy of ECR sources in a much larger volume and for a much lower price.

The newest product is a complete new line of MW power supplies. The POWER HEAD design incorporates the complete MW power supply in the magnetron head. The result is the most compact MW generator on the market. The advantage is not only the compactness but also the maintenance friendly setup and the low price. It is designed as a switch mode power supply and has a low ribble output with pulse capability. 1, 2, and 6 kW units are available.

◆ Surface/Interface, Inc. #524

260 Santa Ana Court
Sunnyvale, CA 94086
Tel: 408-732-7111
Fax: 408-732-7191
E-mail: sii@surfaceinterface.com
www.surfaceinterface.com

Surface/Interface provides innovative products to industry from its Vacuum Products and Metrology Groups. The Vacuum Products Group focuses on OEM, end-user and R&D markets specializing in wafer/sample transfer systems and loadlocks, magnetic linear and rotary feedthroughs for UHV/HV as well as spectroscopy-based thin film thickness monitor systems for the media industry. The Metrology Group offers the Stylus NanoProfilometer™ (SNP), a 3D non-destructive CD measurement tool for semiconductor and mask producers.

◆ SVT Associates, Inc. #608

7620 Executive Drive
Eden Prairie, MN 55344
Tel: 612-934-2100
Fax: 612-934-2737
E-mail: svta@svta.com
www.svta.com

SVT Associates, Inc. offers a full range of thin film deposition and process monitoring components and systems including MBE systems for III-V, II-VI and SiGe; UHV/CVD for SiGe production; SiC CVD and bulk growth; metal/oxide CVD; and UHV sputtering. Newly developed A1GaInN MBE systems guarantee material specifications. Components include RF plasma sources and thermal effusion cells. Contact us for nitride Epi-service.

Sycon Instruments, Inc. #316

6757 Kinne Street
East Syracuse, NY 13057
Tel: 315-463-5297
Fax: 315-463-5298
E-mail: sales@sycon.com

Sycon Instruments, Inc. is a manufacturer of thin film deposition monitors and controllers utilizing the quartz crystal sensing techniques. A complete line of HV and UHV sensors and shutters for these products are available. A multi-pocket E-beam source indexer for the control of 4- and 6-pocket E-beam guns is also available from Sycon.

TA Instruments, Inc. #223

109 Lukens Drive
New Castle, DE 19720
Tel: 302-427-4000
Fax: 302-427-4001
E-mail: info@tainst.com
www.tainst.com

TA Instruments is the world's leading supplier of thermal analysis and rheology testing equipment. Its products include DSC, modulated DSC, TGA, HiRes and modulated TGA, simultaneous DSC/TGA, TMA, DMA, and DEA. The rheology products measure the viscosity and rheology of samples from water to solids and everything in between. The company offers a large network of local technical support.

Taylor & Francis #823

325 Chestnut Street
Philadelphia, PA 19106
Tel: 215-625-8900
Fax: 215-625-2940
E-mail: info@taylorandfrancis.com
www.taylorandfrancis.com

Taylor & Francis is an international publisher of academic books and journals. Stop by our booth to browse through our new titles, bestsellers, and our wide variety of journals for the materials research community.

Telemark #113

51 Whitney Place
Fremont, CA 94539
Tel: 510-770-8700
Fax: 510-70-8879
E-mail: garyh@telemrk.com
www.telemrk.com

Telemark manufactures the widest range of electron beam sources and power supplies, and a broad range of accessories such as quartz crystal deposition controllers, optical monitors, indexers and feedthroughs. An important new product is the Arc-Free Evaporation System consisting of an e-beam source, which is significantly different than traditional sources, together with a power supply. This set of components can completely overcome hostile coating environments; i.e., particulate rain and heavy ion background.

Textron Systems #106

201 Lowell Street, Room 2117
Wilmington, MA 01887
Tel: 978-657-2958
Fax: 978-657-2930
E-mail: mtreasur@systems.textron.com

Boron-coated Components for Semiconductor Fabrication Applications. Boron-coated graphite offers many advantages for various components in semiconductor processing equipment such as ion implanters and plasma etchers. Textron's unique CVD process enhances the bonding between high purity graphite and amorphous boron resulting in lower particulate and chemical contamination. Examples are presented of ion extraction slits, ion sources, ion optics components and chamber liner material. Textron Systems is a leading supplier of advanced materials including boron and silicon carbide fibers and composites.

M. Theiss Hard- and Software #1207

Dr.-Bernhard-Klein-Str. 110
D-52078 Aachen
GERMANY
Tel: 49-241-5661390
Fax: 49-241-9529100
E-mail: theiss@mtheiss.com
www.mtheiss.com

M. Theiss Hard- and Software offers software and hardware for optical spectroscopy. The focus is on thin film analysis and design. Spectrum simulation programs for research, design and production control are developed which may be coupled to spectrometers recording reflectance and transmittance of the layer stacks simultaneously.

◆ Thermionics Vacuum Products #1011, 1013

231-B Otto Street
Port Townsend, WA 98368
Tel: 360-385-7707
Toll Free: 800-962-2310
Fax: 360-385-6617
E-mail: sales@thermionics.com
www.thermionics.com

Thermionics manufactures vacuum components, systems and accessories for production and research applications including: our new HCR Rotary e-Gun™ for demanding production coating applications; 3-20 kW e-Gun™ evaporation sources; Hanks HM^2 e-Gun™ evaporation sources; PyraFlat™ rectangular and other flanges and fittings; TriBond™ flanges; gate and poppet valves; DRS-1000™ *in situ*, non-contact substrate temperature control system; sample handling and transfer systems; ion pumps; maTCheD™ thermocouple gauges; mechanical, electrical and fluid feedthroughs; and materials and surface science systems.

TherMold Partners, LP #102

652 Glenbrook Road
Stamford, CT 06906
Tel: 203-977-8161
Fax: 203-977-8237
E-mail: info@thermoldlp.com
www.thermoldlp.com

TherMold manufactures and distributes its thermally stimulated current spectrometer (TSC) on a global basis. Current applications of the TSC are in the research and development of high performance materials, pharmaceuticals and plastics. It is a more sensitive alternative to DSC or DMA for detecting transitions that are dependent on changes in the mobility of molecular scale structural units.

◆ ThermoMicroscopes #312

1171 Borregas Avenue
Sunnyvale, CA 94089-1306
Tel: 408-747-1600
Fax: 408-747-1601
E-mail: info@thermomicro.com
www.thermomicro.com

ThermoMicroscopes is a result of the merger between Park Scientific Instruments and TopoMetrix. The new company is now the premier supplier of atomic force and scanning probe microscopes. ThermoMicroscopes now offers instruments that operate in all environments (ambient, liquid and UHV) for research and industrial use. *Stop by our booth for more* information.

Thomas Swan & Co. Ltd. #210

Unit 1c, Button End
Harston
Cambridge CB2 5NX
UNITED KINGDOM
Tel: 44-1223-872282
Fax: 44-1223-871714
E-mail: sales@thomasswan.co.uk

Thomas Swan is a leading manufacturer of MOCVD reactors, from single wafer customized R&D to multi-wafer production systems, based on the close-coupled showerhead (CCS) concept for the growth of InP, GaAs and GaN based materials. Peripheral products include Epison reagent concentration monitor and waste gas scrubbing systems.

TORR International, Inc. #1210

12 Columbus Street
New Windsor, NY 12553
Tel: 914-565-4027
Toll Free: 888-622-TORR
Fax: 914-561-7731
E-mail: info@torr.com
www.torr.com

TORR International offers the following:

- Evaporation, E-beam, RF/DC sputtering systems, multigun, substrate heating, rotation, tilt; computer-controlled, standard/custom-built. Sputtering guns, stand/UHV/magnetic (flex), targets, gas controllers.
- Reactive ion etchers
- RF/DV power supplies, special systems
- Servicing, refurbishing of all types of thin film and vacuum systems/vacuum pumps

TPL, Inc. #710

Advanced Technologies
3921 Academy Parkway
North NE
Albuquerque, NM 87109-4416
Tel: 505-342-4448
Fax: 505-345-8155
E-mail: yspooner@tplinc.com
www.tplinc.com

TPL, Inc. produces electronic materials and nondestructive test instrumentation. The Porotec™ Thin Film Porosimeter is the only instrument capable of providing full BET and BJH analyses of thin films in their deposited forms. TPL produces 50 nm, capacitor-grade barium and strontium titanate powders which can be customized for specific applications.

Universal Voltronics Corporation #722

27 Radio Circle Drive
Mt. Kisco, NY 10549
Tel: 914-241-1300
Fax: 914-241-3129
E-mail: sales@voltronics.com
www.voltronics.com

Universal Voltronics Corporation makes high voltage DC output power supplies for various industrial uses including e-beam vapor deposition and x-ray applications. UVC has over 40 years of high voltage experience in both linear and switchmode designs. UVC's product range encompasses: voltage levels from 1 kV to 500 kV; power levels from 60 watts to 20 kW to 500 kW; tight regulation and ripple tolerances; and air, oil, and potted insulation designs.

Vacuum Atmospheres Company #807

4652 W. Rosecrans Avenue
Hawthorne, CA 90250
Tel: 310-644-0255
Fax: 310-970-0980
E-mail: sales@vac-atm.com
www.vac-atm.com/

Vacuum Atmospheres Company is a manufacturer of high quality, computer-controlled inert atmosphere glove boxes. Systems using our gas purification systems are capable of holding an atmosphere of less than 1 ppm oxygen and moisture. We also have instrumentation that will measure oxygen and moisture not only in our systems but are adaptable for use in any inert atmosphere. Contact us at our corporate office at 310-644-0255 or in our east coast office at 978-762-0085.

Vacuum Research Corporation #516

2419 Smallman Street
Pittsburgh, PA 15222

www.vacuumresearchcorp.com

- Dry Roughing Pumps: capacities from 6 to 32 cfm (170 to 960 l/min); ultimate pressures to 15 mTorr (.02 mbar); cost from $6,400 to $14,800; "Soft Start" available on all models.
- Smart Dry Pump™: 16 cfm (450 l/min); 20 mTorr ultimate pressure; $7,150.
- Wide Range Diaphragm Manometer: designed for CVD and other pump-out and backfill applications; 1 mTorr to 1500 Torr with a single transducer.
- Digital Pirani and Diaphragm Gauges: 10^{-5} to 1500 Torr linear analog output standard; high/low setpoints optional; 250° Pirani sensors.
- Convection Gauges: 10^{-3} Torr to atmosphere; analog and RS485 outputs.
- Vacuum Switches: ±2 mTorr from 1 to 2000 mTorr; ±1 Torr from 2 to 1500 Torr.
- Stainless Steel and Aluminum Valves: ANSI, ISO and JIS flanges from 2 inch to 12 inch (63 to 320 mm); bellows or o-rings stem seal; metal gasket or elastomer bonnet seal; motor operated throttle valves.
- Rectangular Port Aluminum Valves: for wafers to 300 mm and flat panel displays; port sizes to 6 inch x 24 inch (150 x 600 mm).
- Oil-sealed Rotary Vane Pumps: 100 l/min to 800 l/min; 3.5 cfm to 28 cfm.

Varian Vacuum Technologies #711, 713

121 Hartwell Avenue
Lexington, MA 02421
Tel: 508-528-1720
Fax: 508-528-1992

Varian Vacuum Technologies will exhibit a broad range of high vacuum equipment including the MacroTorr, maintenance-free ceramic-bearing turbo pump and the Starcell® ion pump. On display will be the Minuteman dry turbo station with the Eyesys self-contained gauge transducers, and the Model 979 leak detector.

◆ VAT, Inc. #701

500 West Cummings Park

We offer both standard and custom optics for use with x-rays and neutrons. Options for focusing, collimating, and beam bending are available. The useful range of energies for x-rays extends from ~200 eV to 30 keV. These optics are used to capture a large solid angle from the x-ray source and produce a quasi-parallel beam of increased flux for use in XRD (x-ray diffraction) or small focused beams of high intensity for XRF (x-ray fluorescence) spectroscopy. Other applications are also being developed.

Zygo Corporation #723
Laurel Brook Road

Zygo Corporation designs and manufactures noncontact measuring instruments and automated systems, providing productivity and yield improvement solutions for manufacturers of precision components for the data storage, semiconductor, and other industries. Zygo provides a range of inspection, surface analysis, precision displacement measurement, and automated solutions. Our precision noncontact measuring instruments and systems enable manufacturers to increase operating efficiencies and product yields by identifying and collecting quantitative data on product defects during and after the manufacturing process.
