The Correspondence of Charles Darwin

Volume 4: 1847-1850

Edited by **FREDERICK BURKHARDT** and the late **SYDNEY SMITH**

During the late 1840s Darwin's convictions about the origin of species greatly influenced him, providing insights that led to remarkable discoveries. These letters cover his study of barnacles, participation in geological debates and the growth and development of his own children.

Inventing the Industrial Revolution

The English Patent System, 1660-1800
CHRISTINE MACLEOD

This book examines the development of the English patent system and its relationship with technical change between 1660 and 1800, as the system evolved from an instrument of royal patronage into one of commercial competition.

Australian Science in the Making

Edited by **R. W. HOME**

Authors from all aspects of Australian science combine to celebrate 200 years of growth and development. Contributions range from Aboriginal conceptions of the workings of nature to the directions and priorities of the present day.

Physics for Pedestrians

An Inaugural Lecture
MICHAEL REDHEAD

In this inaugural lecture, delivered at the University of Cambridge, Professor Redhead tackles fundamental conceptual issues in the philosophy of science and concentrates on the metaphysical questions raised in the study of physics.

The Uses of Experiment

Studies in the Natural Sciences
Edited by **D. GOODING, T. PINCH** and **S. SCHAFFER**

Little study has been made of experiment, an essential factor of natural science. Scholars from a range of disciplines present original case studies to examine the tools that experimenters use, how scientists judge that experiments are working and argue from their results, and how to challenge these results.

Drifting Continents and Shifting Theories

The Modern Revolution in Geology and Scientific Change

H. E. Le GRAND

Professor Le Grand interweaves the historical background to the global theory of plate tectonics with discussion of the development of modern science. Readers are encouraged to participate; to draw conclusions; and to pose questions about how and why changes occur in scientific knowledge and practice.

Scientific Genius

A Psychology of Science
DEAN KEITH SIMONTON

Using existing models of creativity as a basis, Simonton develops a 'chance-configuration' theory which he uses to account for the mental processes and motivation of great creative scientists. The implications of his theory on the measurement and encouragement of scientific genius is also considered.

Einstein as Myth and Muse

A. J. FRIEDMAN and **C. C. DONLEY**
In this book a scientist and a literary critic combine their talents to assess the impact on literature of Einstein and his theories. The central thesis is that modern science has a deep influence on other aspects of culture, even those far removed, such as serious literature.

From Cardinals to Chaos

Reflections on the Life and Legacy of Stanislaw Ulam

Edited by **N. G. COOPER**

This explorative insight into the life and legacy of one of the most fascinating men of modern science will be essential reading for the professional scientist and students working in fields touched by his genius: physics, nonlinear science, mathematics and mathematical biology.

Absolute or Relative Motion?

Volume 1: The Discovery of Dynamics
JULIAN B. BARBOUR

This book considers the perennial problem of physics and philosophy: is motion absolute or relative? It covers the period from antiquity to the publication of Newton's *Principia*, and includes a detailed treatment of Greek astronomy, the work of Copernicus, Kepler, Galileo, Descartes, Huygens and Newton. It can be read independently of volume 2.

Herophilus: The Art of Medicine in Early Alexandria

HEINRICH VON STADEN

This book assembles the fragmentary evidence about Herophilus, who practised medicine in the third century BC. He was probably the first Western scientist to dissect the human body and made impressive contributions to many branches of anatomy.

The Evolution of Technology

GEORGE BASALLA

In presenting an evolutionary theory of technological change George Basalla challenges the popular notion that technology advances by the efforts of a few heroic individuals producing revolutionary inventions which owe little or nothing to the technological past.

THE BRITISH SOCIETY FOR THE HISTORY OF SCIENCE

Membership of the Society, which normally includes a subscription to *The British Journal for the History of Science*, is open to all persons approved by the Council of the Society and elected at an ordinary meeting. The annual subscription for the membership year 1989 is £17.00 (\$37.00) or £8.50 (\$18.50) for associate membership, which includes students at centres of higher education. There is an Introductory Offer for ordinary members who pay £12.00 (\$26.00) for the first year. Applications for membership should be made on a form which is available from the Society's Executive Secretary at the address below.

Meetings: The Society mounts an ambitious programme of meetings. The pattern is flexible, the only fixture being the three day summer meeting, held at a different British University or Polytechnic each year. About four other meetings, lasting for between one and three days, are held during the year, sometimes devoted to a clearly-defined theme or an important anniversary, and often arranged in conjunction with other scholarly societies.

The British Journal for the History of Science is the official organ of the Society. All correspondence on the contents of the *Journal* should be addressed to the Editor, Dr J.H. Brooke, Department of History, University of Lancaster, Lancaster LA1 4YG, England.

Books for review should be sent to the Reviews Editor, Dr John Hendry, 58 Canfield Gardens, London NW6 3EB.

Advertising: Contact the Advertising Department, Blackwell Scientific Publications, Osney Mead, Oxford, OX2 0EL. Fax no. (0865) 721205.

Other publications: BSHS Monograph Series is designed to allow the publication of monographic studies in the history of science quickly and cheaply. All correspondence on the subject of monographs, and any new suggestions for titles, should be sent to the Series Editor, Dr J. G. Smith, Department of History, University of Leicester, Leicester, Leics LE1 7RH, England. Monographs are available to members at a special price, post-free from the Society's Executive Secretary. Non-members may obtain them through bookshops, or post-free from the Executive Secretary. Titles are as follows:

2. *The Letters of Georges Cuvier: A Summary Calendar*. Ed. by Dorinda Outram. 1980. £4.50/\$10.00 (£3.50/\$8.00 to members).

3. *Rationality and Ritual: The Windscale Inquiry and Nuclear Decisions in Britain*. By Brian Wynne. 1982. £7.00/\$15.00 (£5.00/\$11.00 to members).

4. *The Royal Society and Its Fellows 1660–1700: The Morphology of an Early Scientific Institution*. By Michael Hunter. 1982, reprinted 1985. £9.00/\$19.00 (£6.50/\$14.00 to members).

5. *Francis Bacon's Natural Philosophy: A New Source. A Transcription of Manuscript Hardwick 72A with Translation and Commentary*. By Graham Rees, assisted by Christopher Upton. 1984. £7.90/\$17.00 (£5.60/\$12.00 to members).

6. *Archives of the British Chemical Industry, 1750–1914: A Handlist*. By Peter J. T. Morris and Colin A. Russell. Contributing editor John Graham Smith. 1988. £14.50/\$31.00 (£9.00/\$19.00 to members).

Lists of theses: Each year, the Society publishes a full list of current theses in history of science in British universities. This is available free to members, and at £2.00 (\$4.50) to non-members on request to the Executive Secretary. Standing orders are accepted from members or non-members who wish to receive the list regularly.

The Society's *Newsletter*, an informal publication edited by Dr Mari Williams, Business History Unit, Lionel Robbins Building, 10 Portugal Street, London WC2A 2HD, appears in January, May and September each year. It is free to members, £4.50 (\$9.50) for institutions and non-members.

All the administrative business of the Society is handled by The Executive Secretary, Wing Commander G. Bennett, 31 High Street, Stanford in the Vale, Faringdon, Oxfordshire SN7 8LH.
