Subject Index

δ Scuti stars, E10, E72
3D modelling, C4, C12
3D problems, 51
A-stars, C10
Abundances, 301, A9, B4, B10, D7, D14, E5, E6, E12, E15, E16, E17, E34, E37, E39, E42, E44, E51, E72
Accelerated lambda iterations, 51
Acoustic waves, B7, C1
Active late-type stars, D9
AGB, 353, 377, 387, A13, A67, D12, E53, F2, F3, F5, F7, F12
Asteroseismology, E69
Astrospheres, F14
Atmospheres, A13, B13
Atmospheric,
  dynamics, F10
  extinction, 337
  inhomogeneities, D8, D20, D27
  parameters, E6
Atomic data, 45, 261, 323, A24, C9, D14

Balmer lines, E28, C10
Barium isotopic abundances, E39
Be stars, E26, E29, E40
Binaries, 93, E43
Brown dwarfs, D12, D26

Calcium emission lines, E18
Carbon, A13, E15
Carbon stars, F1
Chemical,
  abundances, D6, D20, E7
  composition, 33, D24
  evolution of the galaxy, E39
Chemically peculiar stars, A3, A9, B4, D3, D7, D17, D22, E12, E20
Chromosphere, B7, C1, F9
Chromospheric activity, E18
Circumstellar matter, F7, F12
Comparison with observations, B12
Compressible turbulence, C3
Convection, 113, 127, 143, 181, C1, C2, C4, C5, C6, C10, C11, C12, E4, E10
Cool stars, 403, E7, F15
Coronal heating, 195
CP stars, D24, E45

DACs, E29
Cata analysis, E21
Cata processing, E49
Cecentered dipole, A17
Ciffusion, B4, D7, E37
Doppler imaging, D9, D10, D14, D16, D22, E24
Cust, 387, D12
Cynamical models, 403, F3
Cynamo, 169

Early-type stars, B1, B11, B13, E17, E26, E27
Echelle, E49
Element stratification, 301
Emission lines, E40
Equivalent widths, 337
Extrasolar planets, E6

F-stars, C10
Fundamental parameters, A9, C10, E12, E17, E21, E26, E27

Gas dynamics, A10
Giant planet, D26
Giant stars, B7, E68
Granulation, C3, C9, C11, E4, E62

Halo, E42
Hanle effect, 243
Helium stars, D3
High-resolution spectra, 337, A1
High signal-to-noise, 337
Horizontal-branch stars, D6
Hot stars, 67, 81
Hydrodynamics, 113, 353, A13, F5
Hydrogen lines, E28
Hypergiants, F10

https://doi.org/10.1017/S007418090013356X Published online by Cambridge University Press

Infrared, 367, A67, E21, E42, E53
infrared excess, E40
Instabilities, F5
Interferometry, 367, D16, F11
Interior structure, E10
ISM, F6
Isotopic abundances, D3

Kinematics, F3

Late-type stars, A67, C7, D20, D23, E21, E24, E47, E53, F2, F9, F14
LBV, A22
Limb-darkening, E52
Line,
  blanketing, 67
  formation, 323, D17
  identification, E5
  profiles, A17, E23, F3
Lithium abundance, D19

M-type stars, 113
Magnetic,
  field evolution, A14
  fields, 195, 209, 233, A3, A12, A14, A18, C7, D24, D29, E20, E43
  helicity, 233
  stars, A17
Magneto-convection, 157, 169
Masers, 377
Mass loss, 353, 377, A13, D12, F5, F7, F9, F14
Metal-poor stars, B10, E34
Metalic lines, E45
Mg II, E29
MHD, 127, 157, A12, E43
Mira stars, 367, D26, F16
Model atmospheres, 3, 33, 45, 67, 107, A1, D9
Modelling, A18
Models, A15
Molecular data, 45, E71
Molecular lines, F3

Nitrogen, E15
NLTE, 51, 67, 81, 323, B1, B10, B12, B13, D14, E37, E39, E44
NLTE radiative transfer, A24
Non force-free magnetic fields, A14
Numerical,
  methods, 33
  models, A12
  simulations, 169

O-stars, 67
OB-associations, E15
Observations, 287, E23
Observatories,
  Brera, A1
  HST, F6
  NOT, D10
  WHT, D19
OH, E34
Opacities, B5
Optical, A1, D16
Optical interferometry, 313, E52, E68, F16
Oscillations, C2
Outer atmosphere models, A10
Oxygen, E15, E34

Partition functions, 261
Photoionization, 261, D14
Photosphere, B7
Polarization, 209, D29
Post-AGB, 353, A13, A67, E53, F5, F7
Pulsations, 181, 403, D16, E10, F1, F2

Radial velocities, E4
Radiation hydrodynamics, C4, C12
Radiative cooling, D12
Radiative transfer, 19, 51, 81, 93, 107, 273, 353, A13, A22, A26, B3, B10, B11, B12, D14, F3, F5, F15
Radio, F11
Rapid variability, E45
Red supergiants, C4, C12
roAp stars, D22
Rotation, 287, D10, E17, E23, E26
RS CVn systems, D8

s-process nucleosynthesis, E7
Shocks, B7, D12
Solar and stellar magnetic fields, 127, 243
Solar,
  chromosphere, 221

https://doi.org/10.1017/S007418090013356X Published online by Cambridge University Press

convection, C3
oscillations, 221
photosphere, 221, C9
photospheric abundances, A24
Solar-type stars, E6
Spectral lines, B3, B5, E62
Spectral variability, F1
Spectrophotometry, 337, E55
Spectropolarimetry, 243
Spectroscopy, 93, D16, D19, E4, E21, E49
Stars, 19, A12, D14, E37, E42, E44
Starspots, D10, D23, E24, E48, E52
Stellar,
abundances, 273, B1
activity, D10, D23, E43, E47, E48
atmospheres, 51, 81, 143, 301, 313, 353, 403, 413, B4, C5, C6, D6, D12, D17, D26, D29, E21, E28, E29, E51, E52, E68, F9, F11, F16
chromospheres, D8
convection, 273
evolution, 181, 209, C5, C6, E69
flares, A10
interiors, 143
opacity, A15
oscillations, E69
photospheres, 287
pulsations, A22
rotation, E18
spectra, 413
structures, 181
winds, 93, 387, B11, F15
Stratification, A15, D14
Structure, B11
Subdwarfs, E44
Sun, E62
Sunspots, A17
Supergiants, F9, F10
Supergranulation, C11
Supernovae, 19
Symbiotic stars, E16

Temperature, 287
Turbulence, C2, D12, F15
Turbulent dynamos, 233

UV, 93, A1, F6

Variable stars, A22, F10
Velocity fields, 287, F3

Wavelengths, E4
Wind driving, F10
Winds, 403, D12, D26, E37, F6, F14

Zeeman effect, 243
