HEARING AID CLINICS

throughout the country are demonstrating and recommending VERNON-SPENCER Hearing Aids, a tribute to their high qualities which is the more noteworthy since these instruments have only recently been marketed. This immediate and authoritative recognition is striking evidence of the great technical advances which underlie the unequalled efficiency, compactness and light weight of Vernon-Spencer Hearing Aids.

VERNON-SPENCER INSTRUMENTS include:

2 valve Model, **12** gns. 3 valve Model (as illustrated) **20** gns.
4 valve Model, **25** gns.

N.B.—Substantial Discounts allowed to Hospital Clinics.

We shall be pleased to furnish full details on request

PRESCRIBE DeVilbiss

No. 15 ATOMIZER

For more than 45 years the medical profession has recognized the value of the DeVilbiss No. 15 Atomizer for applying sprayed solutions in prescribed self-treatment. The adjustable gold tip permits spraying in any direction, the vented nasal guard prevents excess pressure in the nasal cavities and the atomizer may be sterilized easily and rapidly by boiling or passing the tip through a flame. Dependable and certain in the hands of the patient, the DeVilbiss No. 15 applies the treatment you want gently and thoroughly—may we suggest that you mark “DeVilbiss Atomizer No. 15” on your prescription where its use is indicated.

AEROGRAPH Co. Ltd., 43 Holborn Viaduct, London, E.C.1. Sole distributors of DEVILBISS products in the United Kingdom. Telephone: Holborn 1257 and 1258

CLINICAL INSTRUCTION

Clinical instruction in the Diagnosis and Treatment of Diseases of the Ear, Nose, and Throat is given in the Out-patient Department from 2 to 5 p.m. daily, and on Tuesdays and Thursdays from 6 to 9 p.m. also. Major operations are performed every morning and afternoon, except Saturdays, in the In-patient Operating Theatres. Minor Operations are performed in the Out-patient Operating Theatre on three mornings a week. Practitioners and Medical Students are admitted to the practice of the Hospital as Post-Graduates. Clinical Assistants, whose duty it is to assist the staff, are appointed as vacancies occur.

For further information apply to the Dean: **GILBERT H. HOWELLS**.

In addition to the General Wards, there are Semi-private Wards and 11 Private Rooms. The charge for a Private Room is 7 guineas a week, plus a fee for the surgeon.

Further particulars may be obtained from F. P. CARROLL, *Secretary-Superintendent*.

AMPLIVOX HOUSE

The New Home
of the
HIGH FIDELITY
HEARING
AID

Amplivox House accommodates an organization which in three years has become the world's largest manufacturer of High Fidelity hearing aids. This success has been achieved solely through the recommendations of medical men and enthusiastic users. Here is definite proof that sufferers from deafness are now fully alive to the vital importance of using high-grade instruments and are putting performance first in purchasing a hearing aid. At Amplivox House they can compare all types of hearing aids with the many Amplivox models. They can avail themselves of the unique facilities offered by an organization which concentrates all its energies on the production of hearing aids for use individually and in Churches, Schools, Theatres, etc., and the development of special acoustic apparatus for the medical profession. Details of the full range of Amplivox aids should be in the hands of every Medical Practitioner.

The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

WALTER HOWARTH

ASSISTED BY

W. M. MOLLISON

1. Original Articles are accepted on the condition that they have not been published elsewhere.
2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.
3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter added.
4. Orders for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.
5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.
6. Editorial Communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.
7. The Annual Subscription commencing with the January issue is Two Pounds sterling, post free, and is payable in advance.
8. Single copies, both of the present and the previous series, are on sale at Four Shillings each.
9. All Subscriptions, advertising and business communications should be sent to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.

United States of America

Orders for this Journal may be sent either through a local bookseller, or to Messrs. G. E. STECHERT & Co., 31-33 East 10th Street, New York, or may be sent direct to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2, England.

THE INTRA-NASAL IONIZER FOR HAY FEVER AND NON-SUPPURATIVE RHINITIS

Pat. No. 373802

This apparatus is designed for the application of current to the nasal tissues for the treatment of Hay Fever and Paroxysmal Rhinitis by Ionization. It consists of positive and negative electrodes through which is conveyed a galvanic current from a battery as shown in the illustration, and was described by Mr. Philip Franklin, F.R.C.S., in the *British Medical Journal*, June 27th, 1931.
