We have experimentally proved that Listerine is a powerful antiseptic, preventing the development of bacteria and decomposition of vegetable infusions.—*British Medical Journal*, May 3, 1890.

LISTERINE is an efficient, non-toxic ANTISEPTIC of known and definite power, prepared in a form convenient for immediate use.

It is a saturated solution of boric acid, reinforced by the antiseptic properties of ozoniferous oils.

It is unirritating, even when applied to the most delicate tissue.

It does not coagulate serous albumen.

It is quite generally accepted as the standard antiseptic preparation for use where a poisonous or corrosive disinfectant can not be safely used.

It is particularly useful in the treatment of abnormal conditions of the mucosa, and admirably suited for a wash, gargle or douche in catarrhal conditions of the nose and throat.

In proper dilution, it may be freely and continuously used without prejudicial effect, either by injection or spray, in all the natural cavities of the body.

There is no possibility of poisonous effect through the absorption of Listerine

A pamphlet descriptive of the antiseptic, and indicating its utility in medical, surgical and dental practice, may be had upon application to the manufacturers, Lambert Pharmacal Co., Locust and Twenty-first Streets, St. Louis, Missouri, U.S.A., or to their British Agents, Messrs. S. Maw, Son & Sons, 7-12, Aldersgate Street, London, Eng., but the best advertisement of Listerine is

THE
CLINICAL JOURNAL

— A WEEKLY RECORD OF —
CLINICAL MEDICINE & SURGERY

With their Special Branches.

THE CLINICAL JOURNAL was founded in 1892 with the object of **SPECIALLY REPORTING** and publishing **CLINICAL LECTURES** given by the leading Physicians and Surgeons of the day—Lectures for the most part delivered at the Hospitals to a few score of Students and quite lost to the General Practitioner who, however much he may desire to keep himself in touch with the progress of the times, is usually unable to attend.

Appreciation of this enterprise is shown by the present position of the Journal, its increasing circulation throughout the world, and the numerous letters received from subscribers.

New subscribers are strongly recommended to secure the **BACK VOLUMES**. It may be confidently asserted that no collection of Lectures more reliable and interesting, nor material of greater practical value, is available to the General Practitioner.

Subscribers write:—

"I consider of all the Medical Journals the 'Clinical Journal' is of the greatest use to the busy general practitioner."

"The fact is the Journal contains the very sort of article the country practitioner wants."

". . . the Journal has been useful to me in deciding points, many of which are not in text-books."

Ordinary Subscription Terms, { 52 weeks - 15/6
26 " - 8/-
13 " - 4/-
payable in advance

3d.

*** A SPECIAL REDUCTION
OF TWENTY PER CENT.**

is allowed on the above ordinary subscription terms to those subscribers signifying their intention of taking the Journal for not less than two years.

CLINICAL INSTRUCTION.

A Clinical Demonstration on the Diagnosis and Treatment of Selected Cases (Larynx, Nose, Ear) will be given each Monday at 5 p.m.

A Course in Surgical Anatomy and Physiology will be given each Thursday at 5 p.m. These Courses are free to Students of the Hospital. Other a fee of 2 guineas for each Course.

Practical Instruction in the Diagnosis and Treatment is given **daily** in the Out-patient Department from 2 to 5 p.m., on Tuesdays and Fridays from 6.30 p.m. to 9 p.m., and Mondays at 9.30 a.m.

Major Operations are performed at 10 a.m. on Tuesday, Wednesday Thursday, Friday, and Saturday, and Fridays at 2 p.m.

Minor Operations daily (Mondays excepted) at 9.30 a.m.

Operative Surgery Classes can be formed at any time on application.

Practice in **Direct Laryngoscopy, Tracheoscopy, Bronchoscopy, and Oesophagoscopy** will be given to Students, to enable them to become familiar with the use and manipulation of the instruments.

Practitioners and Medical Students are admitted to the Practice of the Hospital at a fee of five guineas for three months, eight guineas for six months, or ten guineas for a Perpetual Studentship. Each course may commence at any date Special terms to men in actual practice who can only attend the hospital once or twice a week.

The Hospital contains 60 beds for In-patients. There is also an Out-patient attendance of nearly 50,000 yearly.

Gentlemen may enter to the practice of **The Throat Hospital** at any time and on certain conditions eligible for appointment as **Clinical Assistants**, whose duty it is to Assist the Member of the Staff to whom they are appointed.

GEORGE W. BADGEROW, F.R.C.S., *Hon. Med. Sec.*
