

CLAY MINERALS BULLETIN

Vol. 4 No. 24

DECEMBER, 1960

*Issued by the Clay Minerals Group
of the Mineralogical Society*

CONTENTS

Page

161. V. A. FRANK-KAMENETSKY. A crystallochemical classification of simple and interstratified clay minerals.
173. J. L. MARTIN VIVALDI and D. M. C. MACEWAN. Corrensite and swelling chlorite.
182. W. W. SMITH. Some interstratified clay minerals from basic igneous rocks.
191. R. F. YUELL. An electrolytic method for producing chlorite-like substances from montmorillonite.
196. G. D. NICHOLLS and D. H. LORING. Some chemical data on British Carboniferous sediments and their relationship to the clay mineralogy of these rocks.
208. O. GJEMS. Some notes on clay minerals in podzol profiles in Ferrosandia.
212. Notes and News.

Price to non-members 10/-

Annual Subscription 15/- for two numbers
