

RESEARCH INTO THE MEANING BEYOND WORDS

DEVELOPMENTAL KINESICS

The Emerging Paradigm

Edited by **Bates L. Hoffer, Ph.D.**,
and **Robert N. St. Clair, Ph.D.**

Here is a coherent and much-needed assessment of what developmental kinesics can tell us today about human communication and the meaning beyond words.

In this landmark survey, Walburga von Raffler-Engel, I.M. Schlesinger, and other leading authorities explain the acquisition and meaning of non-verbal communication—and how important it is to the use of language.

They illuminate the special problems of handicapped and emotionally disturbed children, and they describe the communications conflicts that exist across cultures in bilingual education.

DEVELOPMENTAL KINESICS: The Emerging Paradigm contains:

- *A review of the literature*
- *A critical assessment of concepts*
- *A clear analysis of problem areas*
- *A coherent, comprehensive theoretical model*
- *Clinical applications for special education, learning disabilities*
- *Plus, extensive bibliographic references*

THE COMPLETE GUIDE TO ANALYZING PHONOLOGICAL DATA

PROCEDURES FOR THE PHONOLOGICAL ANALYSIS OF CHILDREN'S LANGUAGE

By **David Ingram, Ph.D.**,
University of British Columbia

Here is the first comprehensive guide that shows you step-by-step how to perform a phonological analysis.

Going far beyond texts that focus on just one aspect of analysis, Dr. Ingram presents complete, easy-to-follow procedures for determining normal and delayed development in four distinct areas:

- *Phonetics*
- *Homonymy*
- *Substitution*
- *Phonological processes*

Procedures for the Phonological Analysis of Children's Language answers the need for systematic procedures that are flexible, adaptive, cumulative and normative. Organized in a handy workbook format, it features actual case studies, model data analysis forms, practice pages, and a glossary of basic terms at the start of each chapter.

The Journal of Child Psychology and Psychiatry and Allied Disciplines

Official Organ of the Association for Child Psychology and Psychiatry

Joint Editors: **L.A. HERSOV**, The Maudsley Hospital, London, UK
M. BERGER, St George's Hospital, London, UK

Corresponding Editors: **M. BOHMAN**, University of Umeå, Sweden
L. EISENBERG, Harvard Medical School, Boston, USA

N. GARMEZY, University of Minnesota, USA

H. REMSCHMIDT, Phillips University, Marburg, FR Germany

Primarily concerned with child psychology and psychiatry, this journal includes experimental and development studies. An important function of the journal is to bring together interdisciplinary contributions so that more is known about the mental life and behaviour of children. The journal has an international readership and publishes original papers, review articles, book reviews and items of information.

Some Articles Appearing in the Journal:

J. DUNN, C. KENDRICK and R. MACNAMEE

The reaction of first born children to the birth of a sibling: mothers' reports

S. MITCHELL and P. ROSA

Boyhood behaviour problems as precursors of criminality: a fifteen-year follow-up study

M.A. STEWART, C. CUMMINGS, S. SINGER and C.S. DEBLOIS

The overlap between hyperactive and unsocialized aggressive children

M.E. LYON and R. PLOMIN

The measurement of temperament using parental ratings

J.O. GOLDBERG and

M.M. KONSTANTAREAS

Vigilance in hyperactive and normal children on a self-paced operant task

This journal is published quarterly.

Explanation in Linguistics

The logical problem of language acquisition

Edited by Norbert Hornstein and David Lightfoot

This is a collection of seven papers which focus on what is called the logical problem of language acquisition. The writers show how the problem of language acquisition shapes explanations and dictates the general form of analyses in various domains of linguistics. All seven authors work within the so-called 'Extended Standard Theory' of generative grammar and the first four papers cover the major components of that kind of grammar (syntax, phonology and semantics); the other three papers show what kinds of explanation can be achieved in the areas of language processing, historical change and real-time acquisition by young children.

Cambridge Journals on Linguistics

Applied Psycholinguistics

A new international journal whose scope encompasses work both on normal and on disordered language and communicative functioning and development in adults and children. In addition to full length articles and shorter notes, a special feature of Applied Psycholinguistics is the Editor's Overview which serves an integrative function and helps readers keep abreast of major trends in the field.

£24.00 for institutions £12.50 for individuals

Journal of Child Language

The journal publishes material on all aspects of the scientific study of language behaviour in children and the principles which underlie it. In addition to articles and book reviews, the journal contains a Notes and Discussion section, and from time to time an Observations section with short pieces of data illustrating points of general theoretical interest.

£29.00 for institutions £15.00 for individuals

Journal of Linguistics

The Journal of Linguistics is published on behalf of the Linguistics Association of Great Britain. It is concerned with all branches of linguistics, including phonetics. Preference is given to articles of general theoretical interest, but the journal covers as wide a field as possible, and includes articles on a variety of languages, as well as book reviews and a section devoted to comment arising from recent articles.

£17.00 for institutions

Language In Society

An international journal of sociolinguistics concerned with all branches of the study of speech and language as aspects of social life. In addition to original articles, the journal publishes book reviews, brief accounts of work in progress, and notes and comments on points arising out of recent publications.

£26.00 for institutions £13.50 for individuals

Language Teaching and Linguistics: Abstracts

This journal is compiled by the English-Teaching Information Centre of the British Council and the Centre for Information on Language Teaching and Research. It aims to keep teachers and others professionally concerned fully informed of the latest research and developments in the study and teaching of modern languages, including English as a second language.

£17.00 for institutions £9.50 for individuals

Learning Through Interaction

The Study of Language Development

Language at Home and at School: Volume 1

Edited by GORDON WELLS

The first full-length volume to be derived from the Bristol Study of Language Development, this book synthesises the research to date and discusses key themes. The authors argue that conversation provides the natural context of language development, and that the child learns through exploring his world in interaction with other people. **Hard covers £20.00 net**
Paperback £6.50 net

Child Development

ALISON J. ELLIOT

This textbook concisely surveys the most important recent research in language acquisition. Dr Elliot finds little justification for the view that language has an independent existence for the young child, and here examines linguistic achievement within the context of the child's development in general. **Hard covers £12.50 net**
Paperback £4.50 net

CAMBRIDGE UNIVERSITY PRESS

NOTES FOR CONTRIBUTORS

Papers, notes and reviews should be sent to Prof. D. Crystal, Department of Linguistic Science, University of Reading, Whiteknights, Reading, Berkshire, England. They should normally be written in English. Major articles should not exceed twenty printed pages.

Three copies of the typescript should be submitted, one of which should be the top copy. Contributions should be clearly typed with double spacing, on one side of the paper only, using a conventional size of paper, preferably A4 (or 21.6 by 28 cm). Authors should hold one copy for correction of proofs. Footnotes, which should be as few as possible, should be listed, double spaced, on a separate sheet at the end of the article. Tables and figures should be drawn on separate pages at the end of the article. Each table/figure should have a title, and there should be an indication in the body of the text as to placement. Tables and figures should each be numbered independently of examples of utterances, etc. The title-page should include the title, author's name and affiliation, together with the address to which proofs are to be sent. Titles should be so worded that the first part may be used as a running headline (with a maximum length of 50 characters, including spaces). An abstract of the article (max. 120 words) should be typed on a separate sheet.

Chronological age should be stated in years, months and (where needed) days as follows: 4; 5.17. Cited forms should be underlined to represent italicization in print. Translational 'meanings' should be placed within single quotation marks. Emphasis should be marked by the use of small capitals. Phonetic transcriptions should, wherever possible, employ the symbols and conventions of the IPA; they must never be used in footnotes, and should in no

case be narrower than absolutely necessary for the purpose.

References are to be made in the text thus: (Neisser 1967: 222). If the author's name is part of the text, the following form should be used: 'Piaget (1967: 131) investigates...'. When a work written by three or more authors is referred to, all names should be given in the first citation, with an ampersand linking the last two; e.g. (Fraser, Bellugi & Brown 1963): in subsequent citations the first name only should be given, with 'et al.' added.

All works referred to should be listed at the end of the article, double-spaced and in alphabetical order. The titles of articles should as far as possible be abbreviated according to the conventions of the Linguistic Bibliography of the Permanent International Committee of Linguists (CIPL). Examples of references (note the use of punctuation marks) are:

- Carroll, J. B. (1961). Language development in children. In S. Saporta (ed.), *Psycholinguistics: a book of readings*. New York: Holt, Rinehart & Winston.
- Lenneberg, E. H. (1967). *Biological foundations of language*. New York: Wiley.
- Oldfield, R. C. & Marshall, J. C. (eds) (1968). *Language*. Harmondsworth: Penguin.
- Velten, H. V. (1943). The growth of phonemic and lexical patterns in infant language. *Lg* 19, 281-92.

With the exception of the title-page, book reviews should be submitted in the same form as articles. The title-page should be of the following form:

F. Smith & G. A. Miller (eds), *The genesis of language*. Cambridge, Mass.: MIT Press, 1966. Pp. xii + 400.
