LONDON:  
JOHN CHURCHILL AND SONS,  
NEW BURLINGTON STREET.

MDCCLXIII.

"In adopting our title of the 'Journal of Mental Science, published by authority of the Association of Medical Officers of Asylums and Hospitals for the Insane,' we profess that we cultivate in our pages mental science of a particular kind, namely, such mental science as appertains to medical men who are engaged in the treatment of the insane. But it has been objected that the term mental science is inapplicable, and that the terms, mental physiology, or mental pathology, or psychology, or psychiatry (a term much affected by our German brethren), would have been more correct and appropriate; and that, moreover, we do not deal in mental science, which is properly the sphere of the aspiring metaphysical intellect. If mental science is strictly synonymous with metaphysics, these objections are certainly valid, for although we do not eschew metaphysical discussion, the aim of this Journal is certainly bent upon more attainable objects than the pursuit of those recondite inquiries which have occupied the most ambitious intellects from the time of Plato to the present, with so much labour and so little result. But while we admit that metaphysics may be called one department of mental science, we maintain that mental physiology and mental pathology are also mental science under a different aspect. While metaphysics may be called speculative mental science, mental physiology and pathology, with their vast range of inquiry into insanity, education, crime, and all things which tend to preserve mental health, or to produce mental disease, are not less questions of mental science in its practical, that is, in its sociological, point of view. If it were not unjust to high mathematics to compare it in any way with abstruse metaphysics, it would illustrate our meaning to say, that our practical mental science would fairly bear the same relation to the mental science of the metaphysicians as applied mathematics bears to the pure science. In both instances the aim of the pure science is the attainment of abstract truth; its utility, however, frequently going no further than to serve as a gymnasium for the intellect. In both instances the mixed science aims at, and, to a certain extent, attains, immediate practical results of the greatest utility to the welfare of mankind; we therefore maintain that our Journal is not inaptly called the 'Journal of Mental Science,' although the science may only attempt to deal with sociological and medical inquiries, relating either to the preservation of the health of the mind or to the amelioration or cure of its diseases; and although not soaring to the height of abstruse metaphysics, we only aim at such metaphysical knowledge as may be available to our purposes, as the mechanician uses the formularies of mathematics. This is our view of the kind of mental science which physicians engaged in the grave responsibility of caring for the mental health of their fellow-men may, in all modesty, pretend to cultivate; and while we cannot doubt that all additions to our certain knowledge in the speculative department of the science will be great gain, the necessities of duty and of danger must ever compel us to pursue that knowledge which is to be obtained in the practical departments of science, with the earnestness of real workmen. The captain of a ship would be none the worse for being well acquainted with the higher branches of astronomical science, but it is the practical part of that science as it is applicable to navigation which he is compelled to study."

J. C. BUCKNILL.

**HEALTH, FRESH AIR, AND PURE WATER.**

**CONDY'S HYGIENIC PREPARATIONS,**

BY HER MAJESTY'S LETTERS.

**CONDY'S FLUID,**

Which contains *nascent Oxygen, Nature's true and only purifying agent*, instantly destroys all offensive smells, removes organic impurities from water and air, and, being entirely innoxious and unirritating in its nature, is the only safe disinfectant of the living tissues, whether for external application or for consuming and counteracting organic poisons taken into the stomach, or generated in the system. "*I consider it to be a most important addition to sanitary science, and a valuable agent in the hands of the medical profession.*"—ROBERT DUNDAS THOMSON, M.D., F.R.S.

**CONDY'S PATENT FLUID,**

By reason of its peculiar composition, is invaluable as a preventive and cure for the diseases of domestic animals, which are so liable to assume a contagious type. "*I consider Condy's fluid, in short, a boon to the veterinary profession and the sportsman, as well as to the community at large.*"—W. H. KENT, M.R.C.V.S. "*It appears to me to be a most valuable and healthy life preserver.*"—F. T. BUCKLAND, Ass.-Surg., 2d Life Guards. In Bottles, Green, 6d., 1s., and 2s. Crimson, stronger and purer, 1s., 2s., and 4s.

**CONDY'S PATENT HEALTH POWDER,**

Also contains nascent oxygen, is odourless, and destroys all smells. Sold in Bottles, 1s., 1s. 6d., and 3s.; and in casks, 1 cwt., 36s.

**CONDY'S PATENT OZONISED WATER,**

For the toilet, bath, &c., removes from the mouth impure and foreign tastes and odours, whether arising from tobacco or other causes, and counteracts the irritation and morbid secretions of carious teeth. It purifies and softens the skin, and, used in the bath, tends to promote a healthy state of the whole body. "*A teaspoonful added to a tumbler of water will remove instantaneously all the taste and smell which are often so troublesome, after smoking pipes or cigars.*"—*The Field*, November 24th, 1860. In stoppered Bottles, price 2s.; double size, 3s. 6d.

Liq. Potass. v. Calc. v. Magnes. Permangan (Condy), gr. ij ad ʒj.

Solutions of absolutely pure salts of permanganic acid, prepared of uniform strength for prescription by medical men.

*Internally*—Dose from ten drops to a drachm in half a pint of pure water.

*Externally*—As a lotion or gargle, from one to four drachms in half a pint of pure water.

## SPARKS AND SON, INVENTORS

of the INDIA-RUBBER URINALS for MALE and FEMALE RAILWAY TRAVELLERS, INVALIDS, and CHILDREN.

These Urinals are made on the most approved principles, and all are fitted with the recently-invented valve, which will not allow any return of the water by the upper part, by being placed in any position, and from their improved construction are better than any similar articles at present in use.

A liberal discount to the Medical Profession. Descriptive Circulars and Lists of Prices sent per Post.

Hospitals, Infirmaries, and Unions supplied on the best terms with every article for the use of the sick and invalided.

SPARKS AND SON,  
PATENT SURGICAL TRUSS AND BANDAGE MAKERS,  
28, CONDUIT STREET, NEW BOND STREET, LONDON.  
ESTABLISHED ABOVE 30 YEARS.

## PULVIS JACOBI VER., NEWBERY'S.

*To the Medical Profession of Great Britain and Ireland.*

GENTLEMEN,—We beg to call your attention to the following extracts from a Paper by the late John Cheyne, M.D., F.R.S.E., M.R.I.A., Physician to the Hardwicke Fever Hospital, Dublin, and Physician-General to His late Majesty's Forces in Ireland, &c., &c., contained in the "*Dublin Hospital Reports*," vol. 1, p. 317.

"Since this case came into my possession, I have been led to make a good many clinical experiments, which have enabled me to verify the reports which I had heard of the efficacy of JAMES'S POWDER, in sometimes removing the APOPLECTIC DIATHESIS in persons advanced in life. It is, moreover, worthy of observation, that JAMES'S POWDER has been of remarkable utility in certain instances of DETERMINATION OF BLOOD TO THE HEAD, which occurred at an early period of life, and threatened to end by effusion. Lastly, in two cases of GENERAL PLETHORA, in which, however, the head was more affected than any other part, JAMES'S POWDER was exhibited by me with perfect success."

Also vol. 1, p. 320.

"The following very simple method of exhibiting JAMES'S POWDER, in cases of undue determination of blood to the head, is that which I have generally pursued. The patient is made to begin with a very moderate dose, not more than two grains at bedtime, and to increase the dose by half-a-grain every night, until some sensible effect is produced upon the stomach, bowels, or skin. Should the stomach be affected with sickness, the dose must be lessened by one grain on the following night. By the addition of a little rhubarb to it, a larger quantity of JAMES'S POWDER may be administered than the stomach could otherwise bear. If the skin is softened, or the bowels affected, the dose should not further be increased, but it must be repeated every night for a considerable length of time: in several instances I have known eighteen or twenty grains taken for a considerable period without any inconvenience."

The following extract (showing the *increasing estimation* in which the true Dr. James's Powder is held by Medical Practitioners) is taken from "The Lumlæan Lectures," 1858-59, delivered before the Royal College of Physicians, by A. Tweedie, M.D., Physician to the London Fever Hospital, who is admittedly one of the highest practical authorities on the subject of Fever. He said, ("*The Lancet*," June 16, 1860, p. 590,) as follows:—

"If the febrile excitement be such as to require antimonial preparations, a pill containing 2 or 3 grains of James's Powder (prepared by Newbery) should be taken at intervals according to circumstances."

In writing to Messrs. Newbery, he made the following statement:—

"I wish that your preparation was always used."

To secure the dispensing of the *original* preparation, which, for 114 years, has been sold by the house of Newbery and Sons, in St. Paul's Churchyard, it is necessary to prescribe it as "PULVIS JACOBI VER., NEWBERY'S," otherwise another article (wanting in the best properties, and recommended to be given in a different code of dose, *though called by the same name*) may be substituted for the original medicine.

This substitution must bring disappointment, and of course deter Practitioners from prescribing Dr. James's Powder, or lead them to regard it as a preparation on which no dependence can be placed.

FRANCIS NEWBERY AND SONS.

45, St. Paul's Churchyard, London.

Prices for Dispensing  $\frac{1}{4}$  oz. Bottle, 3s. 4d.; 1 oz. 9s. Usual Discount
