

**New Benefits for the Readers of
*Weed Science***

**Free Access to the *Access to UnCover*[®]
Database Service and
Special Discount on Document Delivery!**

Weed Science is pleased to announce an arrangement with The UnCover Company to provide all society members with free on-line searching of the UnCover database of periodical tables of contents—the largest and most comprehensive journal article database in the world. In addition, users of this special service can order delivery of the full text of articles from UnCover at the lowest available document delivery fee.

This new service is known as *Access to UnCover*. To use this service, readers need only access the Allen Press World Wide Web site at: www.allenpress.com and follow the link to *Access to UnCover*. When prompted for user name, type “access” (lowercase) and for the password type “deliver” (lowercase).

The UnCover database contains the tables of contents of nearly 18,000 scholarly journals published throughout the world. Searches can be made by title, by key word or by author. Again, searching the database is FREE. Full-text delivery, including charts, photographs, and graphics, is available at a special discounted rate. Copies of the full-text articles can be ordered on-line; they are delivered via fax, usually within 24 hours. The cost for full-text article delivery to members is \$8.00 per article, plus publisher’s royalty. This represents a \$2.00 per article discount off the normal charge. Payment for document delivery can be conveniently made either by credit card or through a deposit account.

Normally, only UnCover subscribers who pay an annual Password fee of \$900.00 are eligible for this low document delivery fee. However, as a reader of *Weed Science*, your annual Password fee is waived.

We have made this arrangement for *Access to UnCover* because it provides our members and other readers of our publications with a quick, convenient and inexpensive way to take advantage of the new and advanced on-line searching technologies in their scholarly research. Articles appear in *Access to UnCover* at the same time the current periodical issue is delivered to local and institutional libraries and to individual subscribers.

**An Additional Benefit:
Discount on the *Reveal* Service!**

The *Access to UnCover* Password also entitles members to a 20% discount on UnCover’s *Reveal* service. With *Reveal*, members select the journals from which they want to receive tables of contents alerting e-mails. Alerts are sent to members right after each issue is published. In addition, members can also receive weekly topical alerts by creating custom keyword search strategies. To sign up for *Reveal* at a special 20% discount, call 800-787-7979 and mention the *Access to UnCover* Password.

New Benefits for Our Readers!

Free Access to the *Access to Uncover*[®] Database Service and Special Discount on Document Delivery for Readers of *Weed Science*!

You can now access free of charge the UnCover on-line database, which indexes tables of contents information from nearly 18,000 scholarly journals—the largest and most comprehensive scholarly journal article database in the world. You can also order delivery of full-text articles including charts, photographs, and graphics from citations in the database and receive a \$2.00 discount per article off the regular document delivery price.

With *Access to UnCover*, you can search for articles by topic, by author, or by journal. You can then order articles on-line the full text of articles, including charts, photographs and graphics, for delivery by fax within 24 hours. Payment for document delivery can be conveniently made by credit card or through a deposit account.

To use this service, readers need only access the Allen Press World Wide Web site at: www.allenpress.com and follow the link to *Access to UnCover*. When prompted for user name, type "access" (lowercase) and for the Password type "deliver" (lowercase).

Another Benefit: Discount on *Reveal* Service

Your *Access to UnCover* Password also entitles you to a 20% discount on UnCover's *Reveal* service. With this service, you receive by e-mail the tables of contents of journals you select—immediately after each issue is published. In addition, you can also receive weekly topic alerts by creating custom keyword search strategies. To sign up for the *Reveal* service at your special 20% discount, call 800-787-7979 and mention your *Access to UnCover* Password.

Weed Science will publish short reports of important scientific advances. Such reports will not normally exceed 2,000 words and cannot be accompanied by more than one table or figure and should not include more than ten references. Each submission for rapid publication will be reviewed in less than one month. If accepted for publication, the manuscript will be published as soon as possible. The manuscripts will by pass the normal publication queue. Manuscripts must offer insights and be clear advances of our science. They might contain research results that are complete but characterized by a rather limited area or scope. Descriptions of new or improved techniques or equipment may be acceptable. Abstracts of no more than 100 words are mandatory. Each submission must be accompanied by a brief letter stating the reasons why the work should be considered for rapid publication. Manuscripts without an accompanying letter of justification will be returned or reviewed in the normal review process. Electronic submissions are welcome. Manuscripts should be sent directly to the Editor. It is not necessary to send copies to the *Weed Science* Managing Editor at Allen Press.

Directions for Contributors to *Weed Science*

Manuscripts on the biology, ecology, physiology, or management of weeds; and on herbicides, or related topics will be considered for publication in *Weed Science*. Each manuscript must contain original material constituting a logical unit of subject matter and must contribute to the advancement of knowledge.

Send two copies of the text and all illustrations to Sheila Rake, Managing Editor, Allen Press, 810 East 10th Street, Lawrence, KS 66044 and one copy to R. L. Zimdahl, Editor, *Weed Science*, Weed Research Laboratory, Colorado State University, Fort Collins, CO 80523-1177. In the accompanying cover letter to R. L. Zimdahl provide: (1) the corresponding author's name, telephone number, and e-mail address, (2) five stick-on labels showing the name and address of the corresponding author, (3) the category that best describes the paper's content: Weed Management; Physiology, Chemistry, and Biochemistry; Weed Biology and Ecology; Soil, Air, and Water; or Special Topic, and (4) the names, addresses, phone numbers, fax numbers, and e-mail addresses of several possible reviewers.

Authors are asked to pay a portion of publication costs (\$50 per page). Authors are encouraged to send a disk with their manuscript.

PREPARING THE MANUSCRIPT

STYLE. Refer to a recent issue of *Weed Science* and the Directions for Contributors to *Weed Science* (last issue each year). *Weed Science* follows the *Scientific Style and Format: The CBE Manual for Authors, Editors, and Publishers*, 6th ed., Cambridge University Press, Cambridge, MA, 1994. The manuscript is usually assembled in the following order: title, author(s) and affiliation, abstract, nomenclature, key words, introduction, materials and methods, results and discussion, sources of materials, acknowledgements, literature cited, tables, captions for figures, and figures.

NUMBERING. Submit manuscripts on 21.6- by 27.9-cm (8 1/2- by 11-inch) bond paper with the lines numbered on each page. Number pages consecutively, including separate pages for literature cited, tables, and captions for figures.

SPACING. Double-space everything, including text, tables, figure legends, footnotes, and literature citations.

TITLE. Capitalize only the first letter of the first word and others that must be capitalized (e.g., Genus). Include the scientific name without authority for all plants.

AUTHOR(S). Use the given name for each author, note corresponding author, and include an e-mail address for the corresponding author if possible. Give institutional affiliation for each author.

ABSTRACT. Begin the abstract on a new page. Omit the word "Abstract." The abstract must be written as a single paragraph containing an informative digest of significant findings.

NOMENCLATURE. Begin with common or code names for herbicides and organisms used in the title and abstract paired with the appropriate chemical or Latin binomial name and the five-letter code. The order should be herbicides, weeds, and crops, alphabetized within each group. Example: Nomenclature: Glyphosate, *N*-(phosphonomethyl)glycine; MAA, methylarsonic acid; annual bluegrass, *Poa annua* L. POANN; giant foxtail, *Setaria faberii* Herrm. SETFA; corn, *Zea mays* L. 'Pioneer 3732.' Note use of commas and semicolons.

KEY WORDS. Include words not in the title that describe the manuscript's content.

ABBREVIATIONS. Each nonstandard abbreviation and acronym should be introduced in parentheses immediately after first use of the complete word or phrase.

MEASUREMENTS AND UNITS. Report all measurements in SI units or SI-derived units.

NUMBERS. Use arabic numerals for all numbers with two or more digits and for all measurements such as time, weight, length, area, concentration, or temperature.

PLANT AND ANIMAL NAMES. At the first mention of a plant not included in nomenclature, give its common name followed in parentheses by: Genus and species, underlined or typed in italics, author of Latin binomial, and crop cultivar name in single quotation marks. For cultivar names that are registered trade names, insert ®. At first occurrence only in nomenclature or text, use the appropriate five-letter, WSSA-approved computer code from *Composite List of Weeds* (1989) for species important in the manuscript. Example: "purple nutsedge (*Cyperus rotundus* L. CYPRO)." In subsequent mention of these species, use only common names.

HERBICIDE AND OTHER PESTICIDE NAMES. At the first mention of a herbicide or other pesticide not included in nomenclature, give its common name or other designation first followed by its full chemical name in parentheses or brackets. Use chemical and common names as printed each year in the last issue of *Weed Science*.

SOIL TERMINOLOGY. Include the soil series with textural classification and the subgroup name, using the terminology of the U.S. Department of Agriculture and Soil Conservation Service's publication *Soil Taxonomy*, U.S. Government Printing Office, Washington, DC, 1975.

STATISTICAL ANALYSES. Data must be analyzed statistically, and results of the analyses should be included in tables or figures when data are presented. Multiple comparison tests (LSD and Duncan's multiple range) may be used when appropriate, but not on structured data such as quantitative series of treatments (e.g., herbicide rates in stepwise increments) or factorial treatments.

SOURCES OF MATERIALS. Use consecutive superscript numbers to provide sources of materials. The sources of materials section appears before Acknowledgments or Literature Cited. Provide a brief description of the item, model number (if applicable), company name, and complete postal address, including ZIP code.

LITERATURE CITATION. *Weed Science* uses the author-year system with complete citations listed alphabetically on a separate page after the text, followed by tables and figures. Abbreviate journal names according to the most recent issue of *BIOSIS Serial Sources*, BIOSIS, Philadelphia, PA. In-text literature citations are listed alphabetically by author, then chronologically.

TABLES AND FIGURES. Tables should be no more than 120 characters and spaces wide. All text within each table should be in lowercase letters except the first word of a phrase or sentence. Proper nouns should have initial capitals. Use all caps for weed codes.

Experimental data may be presented in graphic or tabular form, but the same data will not be published in both forms. Type figure captions on a separate page. Data points and relevant equations must be included on figures.

MANUSCRIPT REVIEW

Manuscripts will be reviewed by two or more anonymous reviewers and an Associate Editor. Communications concerning changes are with the Associate Editor. Final acceptance or rejection is the prerogative of the Editor. To facilitate timely publication of manuscripts, author proofs must be corrected and returned to the Managing Editor within 10 days of receipt.
