CAMBRIDGE PHILOSOPHICAL SOCIETY

FOUNDED 1819; ROYAL CHARTER 1832

Session 1966–1967

President: SIR RUDOLPH PETERS

Vice Presidents: SIR MARTIN RYLE, E. N. WILLMER, O. R. FRISCH

Treasurer: R. C. EVANS

Secretaries: (Mathematical) G. R. ALLAN

(Physical) J. E. FIELD

(Biological) S. SMITH

The publications of the Society consist of the *Proceedings* and of the *Biological Reviews*. The publication of *Transactions* was suspended at the end of Volume XXIII.

Orders should be sent to: THE MANAGER, CAMBRIDGE UNIVERSITY PRESS, BENTLEY HOUSE, 200 EUSTON ROAD, LONDON, N.W. 1. Enquiries from the U.S.A. should be addressed to the Cambridge University Press, American Branch, 32 East 57th Street, New York, N.Y. 10022.

For the purchase of early parts of the *Transactions* and *Proceedings*, application should be made to the Secretaries, CAMBRIDGE PHILOSOPHICAL SOCIETY, BENE'T STREET, CAMBRIDGE, ENGLAND, and for early parts of *Biological Reviews* to the Cambridge University Press. All parts of the *Proceedings* (including the cumulative index to Vols. 1 to 50) and of *Biological Reviews* are available, and prices of sets or single parts will be quoted on application.

Fellows and Associates of the Society are particularly requested to inform the Secretaries of any change of postal address and to send their subscriptions to the Treasurer, at the Society's office.

All correspondence regarding library exchanges and Fellows' copies should be addressed to the Librarian at the Society's office.

PROCEEDINGS of the CAMBRIDGE PHILOSOPHICAL SOCIETY

edited by

G. R. ALLAN

in consultation with

J. W. S. CASSELS
H. T. CROFT
P. V. LANDSHOFF
E. R. LAPWOOD
W. B. R. LICKORISH
J. M. C. SCOTT
A. M. WALKER

1. Four parts of the *Proceedings* are issued each year, in January, April, July and October. Papers in all branches of mathematics (including applications of mathematics in the natural and biological sciences) are within its scope.

2. Contributions for the *Proceedings* should be sent to the Mathematical Secretary at the Society's office (see above). Papers should be communicated directly by the author.

3. Papers which (if printed) would occupy more than 20 pages can only rarely be accepted.

4. Papers in languages other than English should be accompanied by a brief summary in English.

5. It is extremely helpful if diagrams are drawn in indian ink on white card, faintly blue or green-lined graph paper, or tracing cloth or paper. *Symbols, legends and captions should be given on a transparent overlay.* The Society recognizes that many authors do not have the facilities for producing drawings of a sufficiently high standard to be reproduced directly and it is therefore willing to have such diagrams re-drawn, provided they are reasonably clear.

6. References should be listed at the end of each paper. Titles of journals should be abbreviated as in *Mathematical Reviews*. Any systematic method of ordering the list of references is acceptable.

7. **Authors are particularly requested to prepare their manuscripts in a form suitable for printing, with adequate margins. The Secretary reserves the right to return scarcely legible manuscripts to the author. A pamphlet on the preparation of manuscripts may be obtained on application to the Librarian. If a large number of corrections are required in the proofs, the Council reserves the right to make a charge towards the cost.**

8. Authors may receive on request *100 free offprints* (for each set of authors in the case of a joint paper). Alternatively authors may have 50 free offprints in covers. Further copies may be obtained at reasonable cost. An order form is included with the galley proofs of each paper.

Electronics Letters – IEE PERIODICAL

AN INTERNATIONAL PUBLICATION

'REQUIRED READING FOR THOSE WISHING TO KEEP ABREAST OF RESEARCH AND DEVELOPMENT'

Since its establishment in March 1965, ELECTRONICS LETTERS has published 932 letters from 26 countries on advanced research and development projects.

ELECTRONICS LETTERS each month gives the fastest publication of short communications yet obtained in this field—the interval between receipt and publication of a contribution is never more than six weeks and frequently as little as two weeks, including refereeing.

ELECTRONICS LETTERS covers all aspects of electronics and control, including such fields as circuit theory, satellite communication, solid-state devices, electroacoustics, computer design, medical electronics, control theory, microwave techniques, the properties of plasmas, semiconductors and magnetic materials, communication theory, quantum electronics etc.

The annual subscription is £4 by surface mail, £9 by airmail. The surface-mail rate for IEE members is 30*s.* per annum, and for members of societies with which the IEE has reciprocal arrangements for subscriptions to publications, £3 per annum (airmail rates £6. 10*s.* and £8, respectively).

SIAM JOURNAL ON APPLIED MATHEMATICS

VOLUME 15, NUMBER 4, JULY 1967

Disconjugacy in E^n. KURT KREITH.
An Extension of the Validity of the Stationary Phase Formula. DONALD LUDWIG.
On Perturbation Solutions to Linear System Dynamics-II. T. T. SOONG and D. A. PRELEWICZ.
Properties of Error-Correcting Codes at Low Signal-to-Noise Ratios. EDWARD C. POSNER.
The Determination of Unknown Parameters in Analytic Systems of Ordinary Differential Equations. J. R. CANNON and D. L. FILMER.
Note on Asymptotic Expansions of Fourier Integrals Involving Logarithmic Singularities. JAMES MCKENNA.
Applications of Symptotic Integration to Potential Problems in Shells III: The Flexure Problem of St Venant. D. R. WESTBROOK.
The Electrostatic Field Around a Slender Conducting Body of Revolution. RICHARD A. HANDELSMAN and JOSEPH B. KELLER.
A Method of Solving Certain Plane Problems of Contained Elasto-Plasticity. PHILIP H. FRANCIS and KWAN RIM.
Generalized Green's Matrices for Two-Point Boundary Problems. WILLIAM T. REID.
A Property of Infinite Products of Boolean Matrices. N. J. PULLMAN.
A Probabilistic Model of a Self-Organizing File System. GEZA SCHAY, Jr. and FRANCIS W. DAUER.
Some Stability Conditions for $x''+a(t)x^{2n+1}=0$. JAMES S. W. WONG.
Strong Law of Large Numbers for Branching Processes. M. M. SIDDIQUI.
On the Simplification of Logical Expressions. B. H. MAYOH.
An Extension of Generalized Upper Bounding Techniques for Structured Linear Programs. M. SAKAROVITCH and R. SAIGAL.
Some Remarks on Analytic Representations and Products of Distributions. H. J. BREMERMANN.
The Lorentz Invariant Solutions of the Klein-Gordon Equation. E. M. DE JAGER.
Generalized Functions in Elementary Particle Physics and Passive Systems: Recent Trends and Problems. W. GUTTINGER.
An Approach to the Time Varying Sensitivity Problem. B. D. O. ANDERSON and R. W. NEWCOMB.
Dissipative Operators, Positive Real Resolvents, and the Theory of Distributions. E. J. BELTRAMI.
On Linear Passive N-Ports with Time-Varying Elements. V. DOLEZAL.

The Journal is published bi-monthly. Subscriptions are $20.00 per volume

Orders should be placed with the

ROYAL STATISTICAL SOCIETY

THE JOURNAL OF THE ROYAL STATISTICAL SOCIETY, SERIES B (METHODOLOGICAL), three issues a year, annual subscription post free £4. 2*s*. (U.S. $12), price each part 35*s*.

Volume 29, Part 3, 1967

CONTENTS

A Bayesian significance test for multinomial distributions (with Discussion). I. J. GOOD.

The theory of risk (with Discussion). K. BORCH.

Tests of hypotheses concerning matched samples. B. M. BENNETT.

Considering statistical and time averages in a regulation problem. E. KOUNIAS.

On a class of Gaussian processes for which the mean rate of crossings is infinite. J. A. MCFADDEN.

On the economic choice of experiment sizes for decision regarding certain linear combinations. W. A. ERICSON.

On the distribution of products of random variables. Z. A. LOMNICKI.

Missing data in regression analysis. Y. HAITOVSKY.

Estimation of the parameter of an exponential distribution. G. M. EL-SAYYAD.

The likelihood and invariance principles. J. A. HARTIGAN.

An analysis of departures from the exponential distribution. O. A. Y. JACKSON.

Four-letter words: The distribution of pattern frequencies in ring permutations. D. E. BARTON and F. N. DAVID.

Obtainable through any bookseller or direct from:
