Nasal Mast Cells: A Preliminary Report on their Ultrastructure

by A. B. Drake-Lee, F.R.C.S.

The ultrastructural morphology of mast cells in the nose and the adenoids are compared. Normal cells have a very varied morphology with electron dense granules which have scrolls occasionally. Cells from patients with perennial allergic rhinitis show variable degranulation in all areas examined. Few cells were seen in the surface epithelium. Cells from the adenoids had different degrees of degranulation which suggests that mast cell reactions are not a constant feature.

THIRTEENTH FUNCTIONAL ENDOSCOPIC SINUS SURGERY COURSE

AND

KTP/532 WORKSHOP

CME Accredited by BAO-NHS (23 Points)
Approved by European Laser Association (ELA)

Tyrone County Hospital, Omagh, N. Ireland
7–10th September 1999

Guest Faculty: Professor Dinesh Mehta New York

A two day course in Functional Endoscopic Sinus Surgery with hands on nose-sinus endoscopy will instruct the participant with an in-depth account of both morbid and endoscopic anatomy, pathophysiology, diagnosis including imaging techniques and surgical approach with post operative care. Complications and how to prevent them will be discussed in detail.

The course is aided by profuse illustrations, video presentations and live surgery.

The two day KTP/532 workshop aims to instruct the surgeons in both basic concepts and the varied applications in ENT and Head and Neck surgery including tissue interactions of various lasers. The latest techniques with KTP Laser in Tonsillectomy, Functional Endoscopic Sinus Surgery, UP3 and microlaryngeal surgery are discussed by didactic lectures and video presentations.

Live Tonsillectomy surgery will be performed with KTP/532 laser on several patients. The delegates will have 'hands on' training with KTP/532 Laser system with various animal tissue and pig's larynx with micromanipulator.

The course has a limited number of places and these will be allocated on a first come first served basis.

Course Director: Mr S. K. Kaluskar, M.S., F.R.C.S., D.L.O.(Eng.)

October

International Conference on Newborn Hearing Screening Diagnosis and Intervention

October 12-14, 2000
Milan, Italy
 Chairman: Ferdinando Grandori
 Scientific Organizers: Ferdinando Grandori and Deborah Hayes

BUILDING A NEW FUTURE

Within the past five years, scientists and clinicians have demonstrated the feasibility, validity, reliability, and effectiveness of early detection of infants with hearing loss through universal newborn hearing screening. This international conference is designed to provide state-of-the-art scientific and clinical information on systems of newborn hearing care. As a follow-up to the highly successful European Consensus Development Conference (Milan, 1998-<http://www.ECDEvents.biomed.polimi.it>), our conference will provide an overview of the elements of care required to develop successful programs of newborn

hearing screening, diagnosis, and intervention. Screening technologies and protocols, diagnostic assessment strategies, and amplification and intervention techniques will be discussed. Parents will provide their perspective on the process of early identification and intervention. This conference is intended for: pediatricians, otolaryngologists, neonatologists, family practitioners, parents and families, pediatric audiologists, audiologists, speech-language pathologists, teachers of the deaf, and health care administrators.

The organizers warmly invite you to come to Milan and meet new colleagues and old friends in a region of rich and fascinating history and culture.

CALL FOR PARTICIPATION

The format of the conference includes invited presentations and keynote addresses, free communications, poster sessions, round table discussions, short courses, and seminars.

Interested participants are encouraged to submit scientific and clinical papers and proposals for round table discussions, short courses, and seminars. An electronic version (e-mail or diskette) of the abstracts (max 300 words) must be sent for consideration by May 15, 2000 either to Dr Ferdi Grandori (in Europe) or to Dr Deborah Hayes (in the USA).

TOPICS

- Historical perspective on infant hearing programs
- Impact of infant hearing programs on public health
- Infrastructure supporting infant hearing programs
- Techniques for infant hearing screening
- Audiologic evaluation of infants
- Medical/otologic diagnosis of infants
- Genetics of hearing loss
- Amplification for infants
- Cochlear implants for very young children
- Early intervention for infants with hearing loss
- Language, cognition and deafness
