

**Tables** should be as simple and as few as possible. When constructing tables, it would be helpful if authors would take into account the size and shape of the pages of *Animal Production*.

**Summary:** Every article should have a short summary complete in itself and understandable without reference to the paper. *The summary will be printed at the beginning of the paper.*

**References:** Only papers closely related to the author's work should be referred to; exhaustive lists should be avoided. Bibliographical details should be in the following order: author's name, initials, year, title of paper, title of journal (abbreviated according to the World List of Scientific Periodicals), volume of journal, first and last page of paper. References should be listed in alphabetical order. When abstracts are referred to the page reference should be followed by (Abstr.).

*Examples:*

BLAXTER, K. L. and WILSON, R. S. 1962. The voluntary intake of roughages by steers. *Anim. Prod.* 4: 351-358.

HAMMOND, J. 1932. *Growth and the Development of Mutton Qualities in the Sheep*. Oliver and Boyd, Edinburgh.

In the text, references should be made by giving author and year; at the first mention all authors should be named, thereafter the first author followed by *et al.* should be used for papers with more than two authors.

**Proofs** are supplied once in galley form and must be returned corrected to the Editors within seven days. Only essential corrections should be made.

**Reprints:** Twenty-five reprints of each paper will be supplied free to authors on request. Further copies may be purchased if the order is sent at the galley proof stage.

*Animal Production* is published four times a year. Annual subscription for every four numbers is 90s. (or \$14.00 in the U.S.A. and Canada) and the price for a single number is 25s. (or \$4.00) net.

**Business matters**, including regular subscriptions and sales (the current Journal, back numbers, the *Proceedings of the British Society of Animal Production* (1944-58) and reprints), should be addressed to Messrs. Oliver & Boyd, Tweeddale Court, 14 High Street, Edinburgh EH1 IYL

# CONTENTS

	PAGE
DENT, J. B., ENGLISH, P. R. and RAEBURN, J. R. Testing regression models for pig feeding systems	379
LARGE, R. V. The biological efficiency of meat production in sheep	393
LUCAS, I. A. M. and MILES, K. L. Comparison of protein concentrations in diets given unchanged to pigs from 18 to 93 kg live weight	403
KAY, M., MACLEOD, N. A. and MCLAREN, MARGARET. Nutrition of the early-weaned calf. XI. Intake of diets differing in energy concentration	413
KAY, M., MACDEARMID, A. and MASSIE, R. Intensive beef production. 11. Replacement of cereals with ground straw	419
LEDGER, H. P., ROGERSON, A. and FREEMAN, G. H. Further studies on the voluntary food intake of <i>Bos Indicus</i> , <i>Bos Taurus</i> and crossbred cattle	425
WILKINSON, J. M. and PRESCOTT, J. H. D. Beef production from grass and silage with autumn-born calves. 1. The influence of grazing intensity on efficiency of herbage utilization and live-weight gain of cattle	433
WILKINSON, J. M. and PRESCOTT, J. H. D. Beef production from grass and silage with autumn-born calves. 2. The effects on the performance of cattle fed on silage of barley supplementation and of previous grazing intensity	443
WILLIS, M. B. and PRESTON, T. R. Performance testing for beef: inter-relationships among traits in bulls tested from an early age.	451
PRESTON, T. R., WILLIS, M. B. and ELÍAS, A. The performance of two breeds given different amounts and sources of protein in a high-molasses diet	457
DUCKER, M. J. and BOWMAN, J. C. Photoperiodism in the ewe. 3. The effects of various patterns of increasing daylength on the onset of anoestrus in Clun Forest ewes	465
WIJERATNE, W. V. S. Crossbreeding Sinhala cattle with Jersey and Friesian in Ceylon	473
HOLMES, C. W. Some thermal effects on the pig of the ingestion of liquid feed at various temperatures	485
HOLMES, C. W. Effects of air temperature on body temperatures and sensible heat loss of Friesian and Jersey calves at 12 and 76 days of age	493
JACKSON, P. and ROOK, J. A. F. Responses in milk yield and composition to the inclusion of ammonium salts of short-chain fatty acids in the drinking water of dairy cows	503
DUCKER, M. J. and BOWMAN, J. C. Photoperiodism in the ewe. 4. A note on the effect on onset of oestrus in Clun Forest ewes of applying the same decrease in daylength at two different times of the year	513
GUNN, R. G. A note on the effect of Broken Mouth on the performance of Scottish Blackface hill ewes	517
GRIFFITHS, J. G. A note on patterns of behaviour and grazing in hill sheep	521
LOWMAN, B. G. and KNIGHT, D. W. A note on the apparent digestibility of energy and protein in dried poultry excreta	525
BLAIR, R. and FITZSIMONS, J. A note on the voluntary feed intake and growth of pigs given diets containing an extremely bitter compound	529
BOWMAN, J. C., FROOD, I. J. M. and WOOD, P. D. P. A note on the variation and heritability of twinning in British Friesian cattle	531
WOOD, P. D. P. Note on the repeatability of parameters of the lactation curve in cattle	535
MCNALLY, D. H. A note on the weights and weight gains of some Charolais and contemporary calves of other breeds in Northern Ireland	539
