# Constitutional Problems in Pakistan

SIR IVOR JENNINGS

Recent decisions of the Federal Court of Pakistan are of outstanding interest to constitutional lawyers. The proceedings of the principal cases are given here, and Sir Ivor Jennings has added a long Introduction giving the historical background, a section on the Indian Independence Act, the traditional interpretation, the Royal Assent, emergency powers, and dissolution. *42s. net*

# International Law Opinions

LORD McNAIR

A selection of opinions given by Law Officers to the British Government over three centuries, covering almost the whole field of Public International Law. There are notes on British practice and judicial decisions.

— *Three Volumes. £9 9s. net the set*

# The Law of State Succession

D. P. O'CONNELL

An inquiry into legal principles governing the consequences of change of sovereignty, based on the examination of state papers, parliamentary papers, and the opinions of Law Officers of the Crown. *Cambridge Studies in International and Comparative Law. 45s. net*

# A CENTURY OF FAMILY LAW

---

★ ★ 1957 ★ ★

---

EDITED BY

*R. H. GRAVESON and F. R. CRANE*

She is my goods, my chattels ; she is my house,  
My household stuff, my field, my barn,  
My horse, my ox, my ass, my anything.

This view of the status of a wife in all essentials was to persist in the eye of the law for another two and a half centuries from Shakespeare's day.

The Matrimonial Causes Act, 1857, marked the start of a century of change in English family law greater than had taken place in the previous five hundred years. It set in motion a train of events which has far from exhausted its force, as may clearly be seen in the pages of the recently published Report of the Royal Commission on Marriage and Divorce.

The commemoration of this centenary provides the occasion for this work, but is by no means the main or only reason for producing it. There is an interest extending far beyond the legal profession in such problems as the stability of marriage and the increase in divorce, in the right of a deserted wife to continue to occupy the matrimonial home, and in the position of children of broken marriages. This book will assist the general reader to understand the legal background of such problems as these.

The book is a co-operative effort of the staff of the Faculty of Laws of King's College, London. Each contributor has written on a subject within his special sphere of interest and, within the general theme of the book, each has approached his topic in his own way.

THE HAMLYN LECTURES

# **Trial by Jury**

‘The purpose of the Trust lectures is to further the knowledge among the people of this country of our system of law “so that they may realise the privileges they enjoy and recognise the responsibilities attaching to them.” Indeed, the awakening of the responsibilities resting upon each one of us in preserving the priceless heritage of the Common Law is clearly the purpose and message of this particular series, and there can be none amongst us, however eminent and erudite, who would not benefit by a study of them.’—*Law Journal*.

State Secrets and Private Rights H. W. R. Wade  
The Body Vanishes Norval Morris, PH.D.  
Company Directors and Take-  
Over Bids Professor L. C. B. Gower

'The subject-matter is in each case one which recent developments have fashioned into a current topic among legal professionals and academicians alike, a speculative and controversial talking point for the legal world. That the speakers have been able, by skilful and restrained presentation, to interest the Third Programme audience at large, while at the same time preserving the authentic atmosphere and language in which discussions are carried on among the initiated, is the highest possible tribute to the nice poise of their views.'

—*Solicitors' Journal*

'The standard is such that a lawyer will not be irritated by their simplicity, nor will a discerning layman be out of his depth.'

# Tax Planning and the Family Company

*with Precedents*

DAVID R. STANFORD, M.A., LL.B.

*Barrister-at-Law*

This book gives a co-ordinated account of the taxation problems facing the family company and its members. Such a group must be regarded as a whole if its liability to tax is to be planned. By approaching each of the five main taxes from the point of view of such a group, a picture is gained of the narrow paths which it is necessary to tread in order to avoid the pitfalls awaiting the unwary.

When dealing with questions of future liabilities rather than those already accrued, it is essential to take account of many parts of the legislation which have not yet been elucidated by decisions of the Court. This book, in addition to setting out the well-tried practices upon which any scheme may be based, contains the Author's views on matters as yet unconstrued, indicating where possible what is the present Revenue attitude.

# The Copyright Act, 1956

*by D. H. MERVYN DAVIES*

*Barrister-at-Law*

The Copyright Act of 1956 enacts a new body of copyright law for the United Kingdom and Northern Ireland. For the first time copyright protection is given to sound recordings, films and broadcasts, as well as to the character and appearance of published editions of literary, dramatic and musical works.

The new Act is therefore of immense importance. It supersedes entirely the Act of 1911, discarding its very language and substituting entirely new provisions.

It establishes a Performing Right Tribunal for the settlement of disputes over the public performance of copyright works. Particularly important are the transitional provisions of the new Act on account of their retrospective effect.

This book provides full information about the new law—from the introductory survey to the detailed section-by-section analysis of the text of the Act itself.

# LAW and ORDERS second edition

---

by Sir Carleton Kemp Allen, Q.C.

## *What reviewers said of the first edition . . .*

'The most important work that has appeared for many years on the subject of delegated legislation and the exercise of executive powers. . . . It is difficult to imagine the general reader, once having begun, finally laying the book aside without finishing it. This is one of the most significant books on problems of government which has appeared in recent years.'—*The Law Times*.

'A book that concerns every citizen.'—*The Birmingham Post*.

'The author discusses from the standpoint of a lawyer an issue as important (so the writer believes) as any England will have to decide in the next phase of its history. It is that between government control and civil liberty.'—*The American Oxonian*.

'Prescribed reading'—*The Sunday Times*.

## *—and what they are saying of the second . . .*

'His work combines a penetrating diagnosis of the constitution with relentless narration of the facts . . . the publication of a new edition with the amplifications called for by developments in this rapidly changing field is a welcome and significant event.'—*The Law Times*.

## *—and why they are saying it . . .*

LAW AND ORDERS discusses such vital questions as the Balance of Power, Peace and Emergency, the Processes and Forms of Delegation, Parliamentary Delegation and some of its difficulties, the Courts and Delegated Legislation together with some of the Problems of Interpretation involved and a chapter on the Public and the Executive. It is wound up by a study of Crown Privilege. This is in fact a study of the hairline between 'government control and civil liberty.'

# Pension Scheme Precedents

'The volume of Pension Scheme business must already be enormous, and it is ever increasing. Even before the introduction of the Finance Act, 1947, it was substantial. The Act of 1947, perhaps to the Revenue's surprise, led to great increases. Now the Finance Act, 1956, has introduced pension possibilities of absorbing interest for the "self-employed." In these circumstances the legal profession will welcome all the assistance hereon that it can get, and it is indebted to the learned author of this treatise for assistance in such an expert and helpful form. This is a practitioner's book, and the bulk of it comprises precedents with comments and explanations, though a preliminary outline is duly included. The precedents enjoy the great advantage of being taken, so to speak, from life: all of them, save those under the 1956 Act, are in use today as part of the constitution of an existing pension scheme. Could there be a better recommendation? We wish this publication every success.'—*Law Notes.*

'Pension schemes for the employed have proliferated in the last decade and provision for the self-employed has been made a practical proposition by the Finance Act, 1956: in these circumstances much has been written and published on the subject of late. This volume, however, is the best and most ambitious that has appeared. . . . Your reviewer has no doubt at all that anyone who has to draw, or advise upon the formation of, a pension scheme should have this book beside him.'
