"We have experimentally proved that Listerine is a powerful antiseptic, preventing the development of bacteria and decomposition of vegetable infusions."—*British Medical Journal*, May 3, 1890.

# LISTERINE

*A safe, non-poisonous, unirritating  
antiseptic solution*

**LISTERINE** is particularly useful in the treatment of abnormal conditions of the mucosa, and admirably suited for a wash, gargle, or douche, in catarrhal conditions of the nose and throat.

**LISTERINE** in proper dilution may be freely and continuously used without prejudicial effect, either by injection or spray, in all the natural cavities of the body.

**LISTERINE** embodies a two-fold antiseptic effect, in that after the evaporation of its volatile constituents—thyme, eucalyptus, mentha, gaultheria, and ethyl alcohol—a film of boracic and benzoic acids remains upon the surface to which Listerine has been applied, affording more prolonged antiseptic protection.

**LISTERINE** is a trustworthy surgical dressing; it has no injurious effect upon the tissues in which the healing process is going on.

**LISTERINE** in teaspoonful doses will often afford relief in fermentative dyspepsia, and is largely prescribed, with excellent results, in the various forms of diarrhœa occurring in infants and adults.

**LISTERINE** literature, including special pamphlets upon *Respiratory Diseases*, may be had, by physicians, upon application to

## An Improved Antiseptic Silver Compound

FOR THE TREATMENT OF INFLAMMATIONS OF MUCOUS MEMBRANE

**SILVOL** is a proteid silver compound containing about 20 per cent. of the metal.

It is in the form of lustrous scales, **readily soluble** in water. The solution is **stable**, is **not precipitated** by proteids or alkalies, or by any of the reagents which affect most other silver solutions, and when applied to mucous surfaces it **does not cause coagulation** of albuminous matter or the precipitation of chloride. It **penetrates the tissues** and **destroys pathogenic bacteria**.

Even so strong a solution as 1 in 2 is **non-toxic** and **does not give rise to pain** or irritation.

**SILVOL** exerts an **antiseptic**, **astringent** and **sedative** influence upon mucous surfaces. Its application is indicated in **inflammatory conditions of the throat, nose, and ear**, in solutions of various strengths, according to the condition to be treated.

*'Silvol' is supplied in bottles of 1 ounce, also in capsules containing 6 grains (a convenient quantity for preparing a little solution extemporaneously).*
