

THE BRITISH JOURNAL OF **PSYCHIATRY**

September 1986 Vol 149

ISSN 0007-1250

Published by authority of The Royal College of Psychiatrists

NOTICE TO CONTRIBUTORS

- 1. The British Journal of Psychiatry is published monthly under the auspices of the Royal College of Psychiatrists. The Journal publishes original work in all fields of psychiatry. Communications on general editorial matters, including manuscripts for publication, printed matter, and books for review, should be sent to The Editor, The British Journal of Psychiatry, 17 Belgrave Square, London SW1X 8PG.
- 2. Contributions are accepted for publication on the condition that their substance has not been published or submitted for publication elsewhere. The *Journal* does not hold itself responsible for statements made by contributors. Unless so stated, material in the *Journal* does not necessarily reflect the views of the Editor or the Royal College of Psychiatrists.
- 3. Published articles become the property of the *Journal* and can be published elsewhere, in full or in part, only with the Editor's written permission.
- 4. Manuscripts accepted for publication are subject to copyediting, and to editorial changes required for conformity with *Journal* style.
- 5. We regret that papers unsuitable for publication will not be returned.
- 6. General advice to authors In the assessment of manuscripts submitted to the *Journal*, great importance is attached to clarity and brevity of expression. Authors should read *General Notes on the Preparation of Scientific Papers* (3rd ed. 1974, £0.45, from The Royal Society) and/or Judith Butcher's *Typescripts, Proofs and Indexes* (1980, Cambridge University Press, £2.95). Spelling should follow the *Concise Oxford Dictionary*.

The standard of statistical work in papers submitted for publication has proved to be very variable. Authors using any statistical methods at all are strongly advised to study the paper 'Statistical guidelines for contributors to medical journals' (D. G. Altman et al, British Medical Journal, 7 May 1983, 286, 1489–1493) at the earliest possible stage in preparing their work for publication.

- 7. Manuscripts Two high-quality copies should be submitted and the author should retain a copy. Articles must be typed on one side of the paper only, double spaced with wide margins, and all the pages must be numbered sequentially, starting with the title page.
- a. The title should be brief and to the point. If necessary, a sub-title may be used to amplify the main title. The names of the authors should appear on the title-page, and their names, degrees, affiliations and full addresses at the end of the paper.
- b. A summary should be given at the *beginning* of the article. It should be brief and factual and not normally more than 150 words.
- c. References should be listed alphabetically at the end of the paper, the titles of journals being given in full. Authors should follow Journal style for the reference list and study the examples given below. Titles of books and journals are printed in italic and should therefore be underlined on the typescript. Reference lists not in Journal style will be returned to the author for correction.

Authors should check that the text references and the reference list are in complete agreement as regards dates and spelling of names. The text reference should be in the form '(Smith, 1971)' or 'Smith (1971) showed that...'

- DURKHEIM, E. (1897) Le Suicide. Paris. Translated (1952) as Suicide: A Study in Sociology, by J. A. Spaulding & C. Simpson. London: Routledge & Kegan Paul.
- KENDELL, R. E. (1974) The stability of psychiatric diagnoses. British Journal of Psychiatry, 124, 352-358.
- RUTTER, M., TIZARD, J. & WHITMORE, K. (1970) Education, Health and Behaviour. London: Longman.
- SCOTT, P. D. (1974) Definition, classification, prognosis and treatment. In Pathology and Treatment of Sexual Deviation (ed. I. Rosen) Oxford: Oxford University Press

'Personal Communications' need written authorisation.

- d. Symbols and abbreviations Follow Units, Symbols and Abbreviations: A Guide for Biological and Medical Editors and Authors (3rd ed. 1977), £2.00, available from the Publications Office of the Royal Society of Medicine. Terms or abbreviations which might not be understood by the average reader should be explained at first occurrence.
- e. Tables and Figures Each table should be on a separate sheet, with an adequate heading; table and heading should be self-explanatory without reference to the text. The desired position of the table relative to the text should be indicated in the left margin.

Figures should be individual glossy photographs, or other camera-ready prints, not photocopies, clearly numbered and captioned below. Avoid cluttering figures with explanatory text which is better incorporated succinctly in the caption. A figure intended to occupy a single column should be drawn (or photographed) 80-110 mm wide to allow for a 2/3 reduction; a figure requiring the whole width of the page should be 180-210 mm wide. Lettering (film-set or stencil) should be 12pt sans (initial capital for the first word only) to give 8pt on the printed page. Labels on graphs should read parallel to the axes. Units must be clearly indicated and should be in brackets (note—'litre' should be spelled out in full unless modified to ml, dl, etc.).

- f. Photographs Prints must be taken directly from the original b/w negative (not, for example, from a colour slide or a printed page) and should be glossy and sharply focussed. Labels, arrows, etc. should be shown on a duplicate print or overlay. Do not write anything on photographic prints, and do not use staples or paper-clips on them. These procedures apart, all the comments on figures and tables apply equally to photographs.
- 8. **Proofs** A proof will be sent to the senior author of an article. Reprints, which are prepared at the same time as the *Journal*, should be ordered when the proof is returned to the Editor
- 9. Letters to the Editor Letters should not exceed two double-spaced typed pages. They will be edited for clarity and conformity with *Journal* style and may be shortened. There should be no more than five references; tables and figures cannot be used.

When there seems to be nowayout

Ticehurst House was established as a psychiatric clinic more than 200 years ago. Today it retains its position at the forefront of psychiatric care.

The reputation of Ticehurst House stems from the comprehensive service it offers to patients and to the medical and psychiatric professions.

The psychiatric team at Ticehurst House offers a full spectrum of treatments in the care of short and long term patients and specialises in the active care of short term patients, the treatment of alcoholics and the assessment and treatment of psychogeriatric patients. The hospital responds promptly to

The hospital responds promptly to requests for out-patient consultation and admission of patients. There are excellent liaison procedures between Ticehurst House and outside Consultants and G.P's.

The special facilities at Ticehurst House include a psychogeriatric assessment unit, the Newington Alcohol Treatment Unit and facilities for day care patients.

Within the grounds of the hospital Highlands Lodge offers high quality accommodation for low dependency patients under the care of Consultants and experienced nursing staff.

Ticehurst House enjoys an excellent reputation for its cuisine. Bedrooms are spacious and equipped with nurse-call systems

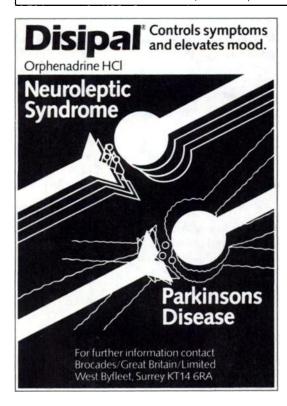

It is easily accessible by both road and rail, being close to Wadhurst in Sussex (7,0 minutes from Charing Cross), and stands in forty-eight acres of delightful gardens and grounds.

For further information write or telephone The Medical Director, Ticehurst House, Ticehurst, Near Wadhurst, Sussex TN5 7HU. Telephone (0580) 200391.

TICEHURST HOUSE HOSPITAL Helps restore the balance

University of London

FOR THE MRC PSYCH

This one day course will be run at Charing Cross Hospital on Saturday 1st November starting at 9.30 a.m. Topics to be covered include:

- 1) Writing an essay with a mock paper
- 2) MCQ with a 30 question mock paper
- 3) Making the most of time with the patient
- Presentation in the clinical and viva with video feedback from mock exam situation with senior psychiatrists as examiners.

Course Organiser, Dr Chris Thompson.

For further information contact: Tricia Carroll, Department of Psychiatry, Charing Cross & Westminster Medical School, 24 St Dunstans Road, London W6, Tel. 01 748 2040 ext. 3010.

The course is approved for study leave expenses under HM(67)27.

Final date for registration is Friday 17th October.

Vital New and Revolutionary Principles of

Human Psychology, Physiology And Psychogenic Pathology

by

M. S. Rao, 2nd revised edition, 832 pages, demy 8vo, hard bound, art jacket, £12.

"A book of encyclopaedic proportions it covers all aspects of the human psychology. It is replete with case-histories of mental (psychologuic) disorders, of all types, their analysis and treatment... The work stems from the actual experience of a successful clinical psychologist that the author is.... He has not only explained, in details, mental (psychogenic) disorders, but has also shown how to correct them—and even to prevent them.... He is abreast of the latest developments in the psychiatric field in other countries."—The Hindustan Times, Sunday Magazine, Books Review Section.

This book shows that while the psychology and physiology of the other animals are simply instinctive and self-preservative, the peculiar human psychology and physiology (because of the unique human brain) are complex; and, besides being instinctive, they are also ideadetermined, intellectual and super-instinctive, so that they are naturally very alterable and pervertible or disorder-prone, so that they often become counter-instinctive, suicidal and self-destructive, as shown in cases of schizophrenia, hypochondria, hysteria, melancholia, paranoia, etc., called 'neuroses and functional psychoses', or 'the major psychiatric disorders', in today's psychiatry and abnormal psychology.

This new book now really explains the precise psychologic causation, and real (ideo-emotional) nature, of these disorders (pathology) of the human mind and body, or of human psychology and physiology—explains with vital new principles, and new terms and concepts, with 'new ideas' or new theories, and explains so clearly and effectively that they all can now be cured or corrected, and prevented, as said in the review above.

This book also shows clearly how this new human psychology has now become an integral part of the human health science (physiology and medicine), and its most important part, so that this science will now be called human psychology, physiology and medicine (therapeutics). These are obviously revolutionary developments in this most vital human science, which will now effectively ensure all-round human health or well-being. This is what Prof. Coleman means to say (below).

This book also shows how the very special (alterable and pervertible) human psychology is also corrigible, and improvable or *supervertible*, so that we are now able to improve one's mental health (rectitude), with hopes and ambitions, with new will-power, courage and self-confidence.

It is due to these vital developments, and on studying the so-many explained and cured cases in this 'excellent' book that—

Dr James C. Coleman, Professor of Psychology, University of California, author of the famous textbook Abnormal Psychology and Modern Life, 5th edition, says about this book:

'A review of your outstanding book was most rewarding... I express my sincere appreciation of your excellent book. The (new) basic premises on which your book is based are quite sound. I compliment you on this concise representation, and on the scholarly and outstanding text. It is a most interesting, informative and scholarly work... a most distinguished book.... It will be warmly received and widely read in India as well as other countries.' Similarly—

Dr Vinoda N. Murthy, Professor of Clinical Psychology, National Institute of Mental Heath and Neurosciences, Bangalore, writes about this book, The book gives a lot of information on the psychologic factors (that work) in mental health and mental illness... This Institute teaches postgraduate diploma courses to doctors, to train them as psychiatrists... Your book may be prescribed...'

Even the Orthodox Psychiatrists (generally committed to Kræpelinian and genetic theories) appreciate and recommend these 'new ideas' or new theories of this book. Thus, Prof. N. S. Vahia, a senior psychiatrist of India, says in a long review of this book in—

The Indian Journal of Medical Sciences, "The author's view-points deserve serious consideration by all those physicians, psychiatrists and clinical psychologists interested in new ideas."

The Indian Journal of Psychiatry also similarly says about this new book, 'Pathogenesis of all serious psychiatric disorders has been explained, by ideogenic mechanisms (by ideo-emotional brooding, etc.) which deserve exceptionally serious attention of all research workers (in psychology and psychiatry).' No other book on psychology or psychiatry has elicited such warm opinions.

So, obviously, this is a book for all psychologists, psychiatrists, general medical men, and other intellectuals, educationists etc., and for all *libraries*. It is already in the more-important libraries of London. *Published by:* Universal Psychology Publishers, D-36, Subhas Marg, Jaipur-1. India. London distributors:

Lord Chancellor's Medical Visitors

The Lord Chancellor invites applications for an additional appointment to the panel of part-time Medical Visitors. Applicants must be Fellows or Members of the Royal College of Psychiatrists.

Medical Visitors work to the Court of Protection which supervises the property and affairs of persons who by reasons of mental disorder are incapable of managing for themselves. They visit Patients when it is considered that a specialist opinion on their capacity would be helpful.

Remuneration will be on the basis of a fee normally not less than £63 (at present under review) paid for each visit undertaken. Travelling costs are reimbursed and a subsistence allowance is payable in respect of absences from home on duty.

The Visitor to be appointed will be expected to carry out about 6 visits a year, in Wales, Hereford and Worcester and Shropshire. Reserve Visitors for other areas may also be needed.

Applications should be sent to Mr I. R. Tapster, Lord Chancellor's Department, Neville House, Page Street, London SW1P 4LS by not later than the 30th September 1986.

Application forms will be provided on request to that address, or by telephone to 01 211 8084.

UNIVERSITY OF LONDON NORTH THAMES PSYCHIATRY MEMBERSHIP COURSE

The Autumn term of the course will be held in the Post-graduate Medical Centre, at Charing Cross Hospital. The Royal College of Psychiatrists have recently agreed to major alterations to both parts of the MRC Psych Exam and in accordance with this, the old course will be abandoned and replaced with a fresh approach to teaching of psychiatry and the basic sciences for the new exam. When fully operational six modules will be offered. During this transitional term, Module 1 is offered which is appropriate to Part I. For Part II the course continues as usual this term for the last term before modifying its syllabus in accordance with the new exam.

Module 1: To be held Tuesday afternoons from 3.00-6.15 p.m. from 7th October to 9th December to include: Basic Clinical Skills; Descriptive Psychopathology; Neurosis; Affective Disorder; Schizophrenia; Acute and Chronic Organic Brain Syndromes; Dynamic Psychopathology—personality and personality disorder; Basic Psychopharmacology.

Part II, Term II: To be held Thursday afternoons from 3.00–6.15 p.m. from 9th October to 11th December to include: Neurotic illness; Personality disorders; Affective Illness and Behaviour Therapy.

Approval has been given for study leave and expenses under HM(67)27. Enquiries to Tricia Carroll, Course Administrator, Department of Psychiatry, 24 St Dunstans Road, London W6. Tel (01) 748 2040 × 3010.

West Midlands Institute of Psychotherapy

INTRODUCTORY COURSE IN DYNAMIC PSYCHOTHERAPY

An introductory course in DYNAMIC PSYCHOTHER-APY will be held at Uffculme Clinic, Birmingham, beginning on 20th January 1987. The course will be held on Tuesday afternoons and will extend over a period of two years.

Throughout the two year course members will attend a small group. The first year will also include seminars on both relevant theory and practice, together with case discussions.

Those who complete the course satisfactorily will be offered Associate Membership of the West Midlands Institute of Psychotherapy.

The programme is open to members of the medical and nursing professions, social workers, probation officers and other related disciplines.

The closing date for applications is 30th September 1986. Shortlisted applicants will be required to attend for interview on Wednesday, 22nd October 1986, at 2 p.m. Fees for the 1987/8 course will be £260 per annum.

For further information and application forms, please contact: Mrs. Valerie Peake, Secretary W.M.I.P., Uffculme Clinic, Queensbridge Road, Birmingham B138QD.

Tel: 021-449-4481, ext. 237. Monday/Tuesday/Thursday.

PSYCHIATRISTS

OFFICE OF PSYCHIATRIC SERVICES VICTORIA

The Garden State

The Office of Psychiatric Services, Health Department Victoria, was created on the 7 February, 1986, as an innovative approach to the provision of psychiatric services to the community, reflecting the high profile and priority afforded to mental health services by the State Government.

We are now seeking to attract creative and energetic specialist psychiatrists to provide clinical expertise and leadership in our rapidly expanding programme delivery areas.

We offer you EMPLOYMENT

- *Full-time/Part-time/Sessional
- *Negotiable salary packages
- *Generous Private Practice Rights
- *Paid leave provisions

Annual leave

Long service leave

Sabbatical leave

Sick leave

Compassionate/Maternity/Paternity

Conference/Examination/Study

- *On-call/recall allowances
- *Low cost health insurance (Medicare)/workcare
- *Free air fares

SYMPOSIUM ON BEHAVIOURAL PSYCHOTHERAPY

This one-day Symposium will cover the theory and background of behavioural psychotherapy and specific topics of clinical interest, including the treatment of phobias and anxiety, sexual and marital problems and obsessional illness. The roles of the psychologist and nurse practitioner will also be discussed.

Part of the programme will include small workshops with the individual speakers as well as discussion time.

Speakers will include:— Professor I. Marks, Professor J. Gray, Dr J. Bancroft, Dr J. Cobb and Mr S. Shrubb.

This one-day Symposium will be held on:

Friday 28 November 1986

at

The Royal Society 6 Carlton House Terrace London, SW1Y 5AG

The cost of registration will be £20 (£10 for junior medical staff.)

For further details of speakers and their specific topics and for registration forms, please contact: Diane Carter, Charter Clinic, 1/5 Radnor Walk, London, SW3 4PB. Tel no 01-351 1272.

Information for the demands of our time

M.R. Leary, Wake Forest University; R.S. Miller, Sam Houston State University

Social Psychology and Dysfunctional Behavior

Origins, Diagnosis, and Treatment

1986. 2 figures, 3 tables. Approx. 248 pages. (Springer Series in Social Psychology). Hard cover DM 88,—. ISBN 3-540-96325-1

There has been little dialogue between psychologists interested in the study of social behavior and those interested in dysfunction, abnormal behavior. Social Psychology and Dysfunctional Behavior is a comprehensive syntheses of those areas of social psychology relevant to understanding, diagnosing, and treating psychological problems.

S. Schwartz, T. Griffin, University of Queensland

Medical Thinking

The Psychology of Medical Judgement and Decision Making

1986. 28 figures. 22 tables. Approx. 288 pages. (Contributions to Psychology and Medicine). Hard cover DM 92,-. ISBN 3-540-96315-4

What cognitive strategies do physicians use to make everyday clinical judgments? This volume describes and interprets the psychological literature related to medical judgement and decision making.

New Results in Depression Research

Editors: H. Hippius, Munich; G.L. Klerman, Boston; N. Matussek, Munich

1986. 90 figures. Approx. 320 pages. Soft cover DM 78,-. ISBN 3-540-15782-4

Springer-Verlag Berlin Heidelberg New York London Paris Tokyo

Heidelberger Platz 3, D-1000 Berlin 33 · 175 Fifth Ave., New York, NY 10010, USA · 28, Lurke Street, Bedford MK40311U, England · 26, rue des Carmes, F-75005 Paris 37-3, Hongo 3-chome, Bunkyo-ku, Tokyo 113, Japan P.V. Trad, White Plains

Infant Depression

Paradigms and Paradoxes

1986. 27 tables. Approx. 375 pages. ISBN 3-540-96343-X. In preparation

Infant Depression: Paradigms and Paradoxes provides a unique study of the etiology of depression and depressive-like phenomena in infants. The book isolates key developmental milestones important for analyzing incipient depressive-like symptoms.

G.A. Gladstein and Associates, University of Rochester

Empathy and Counseling

Explorations in Theory and Research

1986. 17 figures, 39 tables. Approx. 210 pages. ISBN 3-540-96358-8. In preparation

Dr. Gladstein and his associates, through theory and new empirical research, explore the various types of empathy from their development to the roles they play in counseling and similar helping processes. At the center of Gladstein's idea is a fourstage process involving perception, affective reverberation, cognitive analysis, and communication.

Theories of Group Behavior

Editors: B. Mullen, Syracuse; G.R. Goethals, Williamstown

1986. Approx. 13 figures, 4 tables. Approx. 235 pages. (Springer Series in Social Psychology). ISBN 3-540-96351-0. In preparation

Theories of Group Behavior provides thorough and concise presentations of the major theoretical perspectives on group behavior. Theoretical approaches which have dominated research on intrapsychic processes, such as self-awareness, cognitive dissonance, and social cognition, are applied in order to help understand group phenomena.

Treatment of Schizophrenia

Family Assessment and Intervention

Editors: M.J. Goldstein, Los Angeles; I. Hand, Hamburg; K. Hahlweg, Munich

1986. 28 figures. XII, 222 pages. Soft cover DM 72,-. ISBN 3-540-16628-9

E.G. Shapiro, Bethesda; A.A. Rosenfeld, New York

The Somatizing Child

1986. 8 tables. Approx. 150 pages. (Contributions to Psychology and Medicine). ISBN 3-540-96363-4. In preparation

The Somatizing Child is a guide to the clinical diagnosis, management, and treatment of children who have symptoms which mimic organic disease but which are actually psychological in origin. It is the first book on somatoform disorders in children to summarize and integrate the important research work on these problems.

C. Ray, Uxbridge; M. Baum, London

Psychological Aspects of Early Breast Cancer

1985. VIII, 133 pages. (Contributions to Psychology and Medicine) Hard cover DM 92,-. ISBN 3-540-96122-4

Women With Cancer

Psychological Perspectives

Editor: B.L. Andersen, The University of Iowa

1986. 5 figures, 23 tables. Approx. 330 pages. (Contributions to Psychology and Medicine). ISBN 3-540-96360-X. In preparation

Women with Cancer presents a topical and up-to-date survey of important work on the psychological aspects of cancer care and the psychological responses of cancer patients. Leading researchers review evidence on the incidence, risk, and prevention of cancer in women. Other contributions deal with the social and psychological factors involved in diagnosing, treating and recovering from this devastating disease.
