## OUT NOW

Surveys the fascinating history of the study of language, from its beginnings in ancient Mesopotamia and Egypt to the diversification of the language sciences in the past half-century.

“ The wide chronological and geographical scope, the broad view of the language sciences in their relation to psychology, sociology and anthropology, the accuracy of historiographical analysis, avoiding unnecessary technical jargon, and the comprehensive coverage up to the most recent developments, make the CHL a major reference work for teachers and students of linguistics, and readers interested in the fascinating history of language study.”

Pierre Swiggers, University of Leuven and Université de Liège

“ [A]n impressive one-volume accomplishment which is remarkable by its depth - it spans more than twenty centuries of learned thinking about language - by its breadth - across centuries and across continents - and by the diversity of its themes - a fresco across centuries with a large section devoted to present-day linguistics and interdisciplinary work on language”

Georges Daniel Veronique, Professor emeritus, Aix-Marseille Université
