

# GENETICAL RESEARCH

EDITORIAL BOARD

C. H. WADDINGTON (*Chairman*)  
CHARLOTTE AUERBACH    D. LEWIS  
H. GRÜNEBERG    G. PONTECORVO  
W. HAYES    A. ROBERTSON

EXECUTIVE EDITOR

E. C. R. REEVE

**Volume 4. 1963**

CAMBRIDGE  
AT THE UNIVERSITY PRESS

1963

*Printed in Great Britain by Spottiswoode, Ballantyne & Co. Ltd.  
London and Colchester  
and published by the Cambridge University Press  
Bentley House, 200 Euston Road, London, N.W.1  
American Branch: 32 East 57th Street, New York 22, N.Y.  
Agents in Canada: The Macmillan Company of Canada Limited*

# CONTENTS

No. 1 (February 1963)

MANN, STANLEY J. The phenogenetics of hair mutants in the house mouse: Opossum and Ragged	page 1
SIDDIQI, OBAID H. and PUTRAMENT, A. Polarized negative interference in the <i>paba 1</i> region of <i>Aspergillus nidulans</i>	12
GODFREY, J. and SEARLE, A. G. A search for histocompatibility differences between irradiated sublines of inbred mice	21
DE HAAN, P. G. and STOUTHAMER, A. H. F-prime transfer and multiplication of sexduced cells	30
GIBSON, I. and BEALE, G. H. The action of ribonuclease and 8-azaguanine on mate-killer paramecia	42
DAY, P. R. Mutations of the <i>A</i> mating type factor in <i>Coprinus lagopus</i>	55
GILBERT, NEIL. Non-additive combining abilities	65
ROBERTSON, FORBES W. The ecological genetics of growth in <i>Drosophila</i> 6. The genetic correlation between the duration of the larval period and body size in relation to larval diet.	74
LYON, MARY F. Attempts to test the inactive-X theory of dosage compensation in mammals	93
McFARQUHAR, A. M. and ROBERTSON, FORBES W. The lack of evidence for co-adaptation in crosses between geographical races of <i>Drosophila subobscura coll.</i>	104
SIEGEL, R. W. New results on the genetics of mating types in <i>Paramecium bursaria</i>	132
COHEN, L. W. and SIEGEL, R. W. The mating-type substances of <i>Paramecium bursaria</i>	143
PHILLIPS, RITA J. S. <i>Striated</i> , a new sex-linked gene in the house mouse	151
SLIZYNSKA, H. Origin of repeats in <i>Drosophila</i> chromosomes	154
REEVE, E. C. R. and ROSS, G. J. S. Mate-killer ( <i>mu</i> ) particles in <i>Paramecium aurelia</i> : further mathematical models for metagon distribution	158
CLOWES, ROYSTON C. Colicin factors and episomes	163

## No. 2 (July 1963)

COCK, A. G. Genetical studies on growth and form in the fowl. 1. Phenotypic variation in the relative growth pattern of shank length and body-weight	page 167
BERRY, R. J. Epigenetic polymorphism in wild populations of <i>Mus musculus</i>	193
KOSIN, I. L. and KATO, MASARU. A failure to induce heritable changes in four generations of the White Leghorn chicken by inter- and intra-specific blood transfusion	221
ASHTON, G. C. and FERGUSON, K. A. Serum transferrins in Merino sheep	240
SLIZYNSKA, H. Mutagenic effects of X-rays and formaldehyde food in spermatogenesis of <i>Drosophila melanogaster</i>	248
GOLDSTEIN, MARC, PINSKY, MERRILLE FEINER and FRASER, F. C. Genetically determined organ specific responses to the teratogenic action of 6-aminonicotinamide in the mouse	258
SFICAS, A. G. Statistical analysis of chromosome distribution to the poles in interspecific hybrids with variable chromosome pairing	266
APIRION, D. Formal and physiological genetics of ascospore colour in <i>Aspergillus nidulans</i>	276
KELSALL, P. Non-disjunction and maternal age in <i>D. melanogaster</i>	284
KING, STEVEN C., VAN VLECK, L. DALE and DOOLITTLE, DONALD P. Genetic stability of the Cornell randombred control population of White Leghorns	290
STOUTHAMER, A. H., DE HAAN, P. G. and BULTEN, E. J. Kinetics of <i>F</i> -curing by acridine orange in relation to the number of <i>F</i> -particles in <i>Escherichia coli</i>	305
THODAY, J. M. Effects of disruptive selection with negative assortative mating	318
MACKINTOSH, M. E. and PRITCHARD, R. H. The production and replica plating of micro-colonies of <i>Aspergillus nidulans</i>	321
DAY, P. R. The structure of the <i>A</i> mating type factor in <i>Coprinus lagopus</i> : Wild alleles	323
SLEE, J. Hair density in the mouse mutant ragged ( <i>Ra</i> )	326
SCAIFE, JOHN and GROSS, JULIAN D. The mechanism of chromosome mobilization by an F-prime factor in <i>Escherichia coli</i> K12	328

## No. 3 (November 1963)

PARTINGTON, M. and JACKSON, H. The induction of dominant lethal mutations in rats by alkane sulphonc esters	page 333
HARRIS, J. M., KALMUS, H. and WEST, G. B. Genetical control of the anaphylactoid reaction in rats	346
MCBRIDE, GLENORCHY and ROBERTSON, ALAN. Selection using assortative mating in <i>Drosophila melanogaster</i>	356
HULL, P., GOWE, R. S., SLEN, S. B. and CRAWFORD, R. D. A comparison of the interaction, with two types of environment, of pure strains or strain crosses of poultry	370
SAUNDERS, J. H. and INNES, N. L. The genetics of bacterial blight resistance in cotton. Further evidence on the gene B <sub>6m</sub> .	382
EDWARDS, R. G. and SEARLE, A. G. Genetic radiosensitivity of specific post-dictyate stages in mouse oöcytes	389
KIMURA, MITOO and CROW, JAMES F. On the maximum avoidance of inbreeding	399
DAWSON, G. W. P. The interpretation of data from transduction experiments	416
SMITH-KEARY, P. F. and DAWSON, G. W. P. Transduction analysis using leucine requiring mutants of <i>Salmonella typhimurium</i>	427
PANTELOURIS, E. M. and DUKE, E. J. The inheritance of lymph proteins in <i>Drosophila</i>	441
SLIZYNSKA, H. Heterogeneity among spermatogonia of <i>Drosophila melanogaster</i> in sensitivity to X-rays	447
GROSS, J. D. The effect of unbalanced growth on recombinant formation in <i>E. coli</i>	457
GROSS, J. D. Cellular damage associated with multiple mating in <i>E. coli</i>	463
KAPLAN, S., SUYAMA, T. and BONNER, D. M. A genetic analysis of CRM negative mutants at the td locus of <i>Neurospora crassa</i>	470
GLOVER, S. W., SCHELL, J., SYMONDS, N. and STACEY, K. A. The control of host-induced modification by phage P1	480
SCHELL, J., GLOVER, S. W., STACEY, K. A., BRODA, P. M. A. and SYMONDS, N. The restriction of phage T3 by certain strains of <i>Escherichia coli</i>	483
MCCARTHY, J. C. and NAFEI, H. A test for X-ray induced translocations in spermatogonia of <i>Drosophila melanogaster</i>	485
<i>Index of subjects and authors</i>	487

**PLATES** should only be included where absolutely essential. They should be supplied as unmounted glossy prints; any lettering to be inserted on them is best indicated on a separate sketch. Please do not damage prints by writing heavily on their backs or by using paper clips.

**DIAGRAMS** should be about twice the size of the finished block, and the thickness of lines and size of points determined accordingly. They must be drawn in Indian ink on white Bristol Board or tracing linen; graph paper ruled in pale blue (but not other colours) is also acceptable. Lettering should be lightly inserted in soft pencil only, so that the printer can put in the finished lettering.

**Legends to illustrations** must be given on a separate sheet of paper. Each illustration must have the name of the author and figure number pencilled on the back. Plates and diagrams should be numbered separately and their position indicated on the typescript. It will hasten refereeing if a photograph of each diagram can be supplied with the carbon copy of the paper.

**TABLES** should each be typed on a separate sheet of paper and their approximate positions in the text indicated on the typescript. Each table should be numbered and carry an appropriate title. The table should be designed, whenever possible, to be printed in the normal orientation of the text. The data should be grouped so as to make the use of rules unnecessary. Vertical rules, in particular, are expensive to print, and will only be included at the Editor's discretion.

**FOOTNOTES** should be avoided where possible. They can often be incorporated into the text, in parentheses.

**SYMBOLS.** Italic letters should generally be adopted for both gene symbols and quantities in mathematical formulae. Bold letters add to printing costs, and should only be used where they are necessary to avoid confusion.

**SPELLING** should follow the *Concise Oxford Dictionary*.

**REFERENCES** should follow the normal usage in the journal. In the list of references at the end of the paper, titles of periodicals should be abbreviated according to the *World List of Scientific Periodicals* (third edition).

**PROOFS.** Two sets of single-sided page proofs, together with the typescript, of each paper will be sent to the author. The printers' marked proof should be returned after correction to the Executive Editor. Excessive alterations, other than corrections of printers' errors, may be disallowed or charged to the author. Correction should be made using the symbols in British Standard 1219: 1958, or its shortened version B.S. 1219C: 1958.

Proofs of short notes will only be sent to authors if time permits.

**OFFPRINTS.** Fifty offprints of each paper, including short notes, are provided free of charge. Additional offprints may be ordered on the form sent out with proofs, provided this is returned within seven days of receipt.
