CAMBRIDGE

Expression and Meaning

Studies in the Theory of Speech Acts

John R. Searle

In his latest work, John Searle develops and refines analyses presented in *Speech Acts* (C.U.P. 1969), and extends the application of speech-act theory to other modes of discourse, including metaphor, fiction, reference, and indirect speech acts. In addition, he presents a rational taxonomy of types of speech acts and explores the relation between the meanings of sentences and the contexts of their utterance. \$17.95

Foundations of Linguistics

Dieter Wunderlich

Roger Lass, Translator

Wunderlich's general introduction to linguistics goes beyond the bewildering range of current developments in the physics and physiology of speech, in the social and psychological aspects of linguistic behavior, and in the more formal studies in phonology, syntax, and semantics, to consider the foundations of the subject as a whole. *Cambridge Studies in Linguistics 22* Hardcover \$49.50 Paper \$14.95

Principles of Diachronic Syntax

David W. Lightfoot

This study in historical linguistics offers analyses of syntactic change in several languages, principally Old, Middle, and Modern English. Dr. Lightfoot argues for a restrictive theory of grammar which defines the limits of change a language may undergo historically, and derives from this a predictive theory of change. *Cambridge Studies in Linguistics 23*

Hardcover \$59.50 Paper \$14.95

A Functional Approach to Child Language

A Study of Determiners and References

Annette Kamiloff-Smith

A book on the functions children confer on the words they use. The author's experiments, conducted with some one thousand French children between the ages of two and twelve, were designed to demonstrate their ability to construct referential expressions as normal language procedures. Her experiments provide the data base, but the results and theoretical analyses are relevant to a number of controversial issues in linguistic theory. *Cambridge Studies in Linguistics 24* \$29.95

Linguistic Behavior

Jonathan Bennett

Now in Paperback \$9.95

INSTRUCTIONS TO AUTHORS

Components and style of the manuscript

Authors of articles or notes should submit their original manuscript plus two copies to:

Sheldon Rosenberg, Editor
Applied Psycholinguistics
Department of Psychology
University of Illinois at Chicago Circle
Box 4348
Chicago, Illinois 60680

Full length articles (original research, theoretical or methodological studies, literature reviews) should not exceed 14,000 words. Shorter notes may be, for instance, reports of work in progress or critical responses to articles or notes previously published in *Applied Psycholinguistics*.

Spelling, capitalization, and punctuation should be consistent within each article and each note, and should follow the style recommended in the latest edition of the *Publication Manual of the American Psychological Association*. A title should be given for each article and note. An *auxiliary short title* should be given for any article or note whose title exceeds 50 characters. The *author's name* should be given in the form preferred for publication; the *affiliation* should include the author's full mailing address. An *abstract* should be prepared for each article (limited to 120 words) and note (limited to 60 words). *Tables and figures* (which comprise photographs, charts or other artwork) should be numbered consecutively throughout the article or note. *Bibliographic citations in the text* must include the author's last name and the date of publication and may include page references. Complete bibliographic information for each citation should be included in the list of references.

Examples of correct styling for bibliographic citations are: Brown (1973), Ingram (1976, 54–55), Smith and Miller (1966), (Smith & Miller, 1966), (Peterson, Danner & Flavell, 1972) and subsequently (Peterson et al., 1972). *References* should be typed in alphabetical order using the style of the following examples:

Brown, R. Schizophrenia, language and reality. *American Psychologist*, 1973, 28, 395–403.
Ingram, D. *Phonological disability in children*. New York: Elsevier, 1976.

Krashen, S.D. Individual variation in the use of the Monitor. In W.C. Ritchie (Ed.), *Second language acquisition research*. New York: Academic Press, 1978.

Smith, F., & Miller, G.A. (Eds.), *The genesis of language*. Cambridge, Mass.: M.I.T. Press, 1966.

Titles of journals should *not* be abbreviated.

Preparation of the manuscript

The entire manuscript, including footnotes and references, should be typed double-spaced on 8½ by 11 inch or A4 paper, with margins set to accommodate approximately 70 characters per line and 25 lines per page, and should not exceed 50 typed pages. Each element of the article or note should begin on a new page and should be arranged as follows: title page (including title, short title, author's full name and affiliation, including mailing address), abstract, text with tables interspersed as they occur, appendixes, acknowledgements, footnotes, references (including reference notes for unpublished citations), captions and figures. Each table and figure should be submitted on a separate page. Manuscript pages should be numbered consecutively.

Figures should be ready for photographic reproduction; they cannot be redrawn by the printer. Charts, graphs, or other artwork should be drawn in black ink on white paper to occupy a standard area of 8½ by 11 or 8½ by 5½ inches before reduction. Photographs should be glossy black-and-white prints; 8 by 10 inch enlargements are preferred. All labels and details on figures should be clearly printed and large enough to remain legible after a reduction to half-size. It is recommended that labels be done in transfer type of a sans-serif face such as Helvetica.

Copyediting and proofreading

The publishers reserve the right to copyedit and proof all articles and notes accepted for publication. Authors will review their copyedited manuscripts only if changes have been substantial. Page proofs of articles and notes will be sent to authors for correction of typographical errors only; authors must notify the editorial office of any changes within 48 hours or approval will be assumed.

The latest edition of the *Publication Manual of the American Psychological Association* should be consulted for instructions on aspects of manuscript preparation and style not covered in these instructions. The Editor may find it necessary to return for reworking and retyping manuscripts that do not conform to requirements.

Each author will receive 25 offprints of his or her article or note without charge; additional copies may be purchased if ordered at proof stage.

Submission of an article or note implies that it has not been published elsewhere. Authors are responsible for obtaining written permission to publish material (quotations, illustrations, etc.) for which they do not own the copyright. Contributors of accepted articles and notes will be asked to assign their copyrights, on certain conditions, to Cambridge University Press.
