

INFORMATION FOR AUTHORS

The Bulletin of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. The Editors receive more than twice as much material as can be published in the BULLETIN; many meritorious papers can, therefore, not be accepted. Authors are asked to avoid, as far as possible the use of mathematical symbols in the title. Manuscripts are accepted for review with the understanding that the same work is not concurrently submitted elsewhere.

To ensure speedy publication, editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after a careful evaluation by the Editor and an Associate Editor or other expert in the field. As even minor revisions are generally not permitted, authors should read carefully all the details listed below. For a paper to be acceptable for publication, not only should it contain new and interesting results but also

- (i) the exposition should be clear and attractive;
- (ii) the manuscript should be in publishable form, without revision.

Authors should submit three clean, high quality copies to

The Editor, Bulletin of the Australian Mathematical Society,
Department of Mathematics, The University of Queensland,
Queensland 4072, Australia.

Unless requested at the time, material submitted to the BULLETIN will usually not be returned.

EDITORIAL POLICY

1. References. Arrange references alphabetically (by surname of the first author) and cite them numerically in the text. Ensure the accuracy of the references: authors' names should appear as in the work quoted. Include in the list of references only those works cited, and avoid citing works which are "in preparation" or "submitted". Where the work cited is not readily accessible (for example, a preprint) a photocopy of the title page and relevant sections of the copy that you have used will be of great help to the editors.

2. Abstracts.

1. Each paper must include an abstract of not more than 200 words, which should contain a brief but informative summary of the contents of the paper, but no inessential details.
2. The abstract should be self-contained, but may refer to the title.
3. Specific references (by number) to a section, proposition, equation or bibliographical item should be avoided.

3. Subject Classification. Authors should include in their papers one or more classification numbers, following the 1980 Mathematics Subject Classification (1985 Revision). Details of this scheme can be found in each Annual Index of Mathematical Reviews.

4. Abstracts of Ph.D. Theses. The Bulletin endeavours to publish abstracts of all accepted Australasian Ph.D. theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within 6 months of the degree being approved.

5. Electronic Manuscripts. The Bulletin is produced using $A_M S-T_E X$. Authors who are able to do so are invited to prepare their manuscripts using $A_M S-T_E X$. Hard copy only should be submitted for assessment, but if the paper is accepted the author will be asked to send the text on a 5¼ IBM PC compatible diskette. [Typed manuscripts are, of course, still acceptable.]

Abelian groups that are unions of proper subgroups	1
K.P.S. Bhaskara Rao and J.D. Reid	
Convolution properties of a class of bounded analytic functions	9
Zou Zhongzhu and Shigeyoshi Owa	
A nonlinear ergodic theorem for asymptotically nonexpansive mappings	25
Kok-Keong Tan and Hong-Kun Xu	
A formula on the approximate subdifferential of the difference of convex functions	37
J.E. Martínez-Legaz and A. Seeger	
On the duality of some martingale spaces	43
N.L. Bassily and A.M. Abdel-Fattah	
Conical inverse mapping theorems	53
Hélène Frankowska	
Semiregular group divisible designs with dual properties	61
Alan Rahilly	
Some nilpotent Lie algebras of even dimension	71
Craig Seeley	
Structurally stable flows	79
Dong Pyo Chi, Sung Kyu Choi and Jong Suh Park	
Rings whose additive endomorphisms are ring endomorphisms	91
Manfred Dugas, Jutta Hausen and Johnny A. Johnson	
A property of analytic functions with Hadamard gaps	105
Jie Miao	
On the dynamics of a periodic delay logistic equation with diffusion	113
K. Gopalsamy and Pei-Xuan Weng	
Dichotomies for systems with discontinuous coefficients	135
Raúl Naulin	
A note on the radial growth of Bloch functions	143
Daniel Girela	
A note on high degree linear complementarity problems	151
David E. Stewart	
On the Pass-equivalence of links	157
Yan-Loi Wong	
On a conjecture of Z. Jianshong	163
Yasuo Matsugu	
The Weak* Karlovits lemma for dual lattices	171
Brailey Sims
