

# Run a *Smooth* Operation

*with these 1981 texts from Irwin*

PRODUCTION AND OPERATIONS MANAGEMENT:  
A Life Cycle Approach. Third Edition

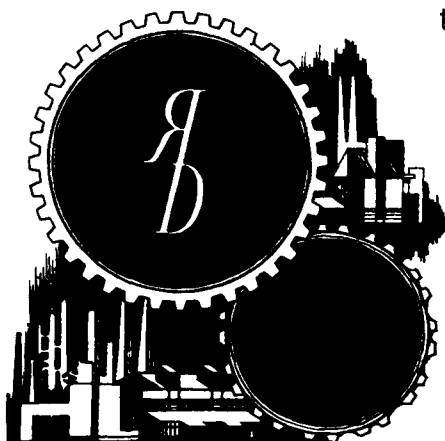

**RICHARD B. CHASE** and **NICHOLAS J. AQUILANO**,  
*both of the University of Arizona*

Chase and Aquilano continue to contribute innovative material as they examine operations and production management from the perspective of how the production system evolves and operates over time. The starting point is the product or service that is to be manufactured and the organization which must be available to produce it. The text proceeds from the design of the system to its termination. Accompanied by a Workbook and a Teacher's Manual.

QUANTITATIVE ANALYSIS FOR BUSINESS  
DECISIONS. Sixth Edition

**HAROLD BIERMAN, Jr.**, *Cornell University*, **CHARLES P. BONINI**  
and **WARREN H. HAUSMAN**, *both of Stanford University*

This is an introductory work in the application of mathematics to problems of business. It describes a representative sample of models and their related quantitative techniques. The main objective is to get notation and a few basic relationships before readers rather than to teach them mathematics. Solutions Manual.
