**Core Collapse after the conference**

## RANDOM QUOTES

Let the speakers speak.

Once I am here I can talk about anything.

I am absolutely amazed you have finally come around.

I don't believe it, it's completely crazy.

Like the trial in Alice in Wonderland, I will present the conclusions first.

I will give this talk in the international language of astronomy - bad English.

Dutch is the official language of the Astronomical Mafia.

My apologies to the observers for speaking as a theoritician.

Sorry I don't know all the names, but I thought I recognized the ideas.

I don't think that the data are very good.

I don't think the theory is very good either.

This is not a confessional

There ain't much you can do about that.

I understand nothing about these three papers.

I will discuss a simple astronomical system, the universe as a whole.

I used to be very skeptical about the Washington system and wouldn't believe in the results even if George Washington did them. But I am becoming a convert.

Globular Clusters are being destroyed right now!

We will still do it faster than the cluster does it.

Peace and Harmony now reign over the globular cluster abundance scale.

This work was done by Buonanno and his collaborators Et and Al.

I don't know of any spectral synthesis program that discovered a Carbon

star.

Caclcium is floating around.

Anybody who has a working hypothesis must work.

We had to destroy most of the data. There wasn't enough room on the disk to save it.

I know this code because it is mine.

When I came to the meeting I thought that for at least one day I could get away from solar neutrinos.

The important aspect of the Hubble Space Telescope is the stimulus it is providing.

This is not a ST photo of NGC 6397!

We attempted to go farther out in M 31. It was an incredible effort which we never finished.

Every chip has its own personality.

I know you would. You are going to work for me!

The velocity ellipsoid looks like a bagel.

$N \propto B(\text{age})L_t$  (Bagel)

The Sun is ploughing through a sea of WIMPS.

A quasar is worth about 20 galaxies.

C'est magnifique, mais ce n'est pas la guerre.

Are you related to that man? I am related to Charley.
